This inquiry developed on August 28 the position of Messrs. Morgan & Co., that if the Director General in writing would have the Government guarantee rentals sufficient to pay interest on notes and other charges they would try to renew the loan for one year at a cost to the company of approximately 9¾ per cent, of which 7½ per cent was interest and 2¼ per cent commissions for syndicating, handling, and selling. They indicated further that if the commission was increased to 2¾ per cent they would attempt, if desired, to place the loan for two years on the same basis. On August 29 the Director of the Division of Finance telegraphed Messrs. J. P. Morgan & Co., that the Director General "is willing to insure the Chicago & Western Indiana Railroad Co., a rental which, added to its other current income, will be sufficient to enable the company to pay the interest on its present outstanding bonds and one year notes and sinking fund requirements on bonds and also taxes and other miscellaneous rentals" and pointed out that this would enable the company during the period of Government control to pay promptly interest upon the $15,000,000 issue at the rate of 6 per cent per annum. The telegram further indicated that the terms proposed by J. P. Morgan & Co., of approximately 10 per cent per annum for a one year well-secured loan whose interest they had stipulated should be guaranteed by the Government were excessive and unwarranted, and that the Director General was not willing to approve those terms. The telegram concluded with the experssion of hope that the bankers would be able to renew the loan upon a 6 per cent basis, secured on property claimed by them to be so valuable, with the Government agreeing under the lease to guarantee the interest.

The Director General communicated by wire to all the 12 railroad companies using or interested in the Chicago & Western Indiana terminals his willingness to guarantee the rental as indicated, to the end that they might be definitely advised as to the basis upon which they could aid in refunding the notes if they chose to do so. The four banking and bond houses which had joined Messrs. Morgan & Co. a year ago in placing the notes were also duly advised of this telegram.

No reply was received to this telegram until midday, Sunday, September 1, when Messrs. Morgan & Co. declined to provide for the notes on a 6 per cent basis and offered no counter suggestion except one in effect necessitating the Director General himself providing for the maturity of the notes.

The result is that the only rate of interest on which Messrs. Morgan & Co. suggested a renewal was equivalent to 9¾ for the one-year loan, which terms both the Director General and the officers of the Chicago & Western Indiana Railroad Co. regarded, and still regard, as excessive and unwarranted.

ADDS TO CONSERVATION LIST.

The War Trade Board announces in a new ruling (W. T. B. R. 218) the addition of the following commodities to the Export Conservation List, effective September 9, 1918:

Acids, as follows: Hydrochloric, X-2; muriatic, X-2; Hydrochloric acid, X-2; muriatic acid, X-2.

AMERICAN CIVILIANS OVERSEAS WHO REGISTERED IN U. S. MAY ENLIST VOLUNTARILY IN ARMY

DRAFT REGULATIONS ARE AMENDED

Registrants in Great Britain and France, When Called by Their Local Boards, Will be Permitted to Join Forces if Physically Fit.

The War Department authorizes the following from the office of the Provost Marshal General:

Americans of draft age, who shall have registered in this country and gone to Great Britain and France in civilian capacity are to be given opportunity by their local boards to apply for voluntary enlistment with the American Expeditionary Forces in the event that they are called upon by their local boards for induction into the military service. If such a man is physically disqualified when he attempts such enlistment, his local board on receiving a certificate to that effect will place him in Class V as unfit for military service.

Regulations Amended.

In this connection draft officials have been advised of the fact that note 1 to section 157 of the Selective Service Regulations has been amended to read:

"When a local board learns that one of its registrants is in Great Britain or France it shall, when issuing his induction order (Form 1028), place the date of reporting so far ahead that the registrant will have time to apply for enlistment voluntarily with the American Expeditionary Forces. After a reasonable time a local board should receive either a certificate indicating that the registrant has so enlisted or a certificate and report of a physical examination showing that the registrant has been rejected by the recruiting officer as physically unfit for military service. If such certificate of enlistment or such certificate and report of physical disqualification is not received within a reasonable time, the local board shall report the registrant to The Adjutant General of the Army on Form 1018 in the usual manner. If such certificate of enlistment or such certificate and report of physical disqualification is received, the registrant shall be classified in Class V whether or not the date specified in Form 1028 had passed at the time of the receipt of the certificate of enlistment or the certificate and report of physical disqualification."

Rejected in England.

In order to relieve a registrant in Great Britain who has attempted to enlist in the Army of the United States and has been rejected for military service on account of physical disqualification from the necessity of physical examination under the selective service regulations, or from the obligation of returning to the United States, if an order for his induction has already been issued by his local board, the following addition has been made to section 151 (i), as follows:

"If a citizen of the United States in

(Continued on page 4.)

CONTRACTS FOR 2 MILLION PAIRS OF SHOES FOR U. S. SOLDIERS TO COST $14,107,600

The War Department authorizes the following:

Awards for the manufacture of 2,021,000 pairs of metallic fastened field and marching shoes for the Army at a total cost of $14,107,600 have been made by the Quartermaster Corps to 31 shoe manufacturers in various parts of the country. The prices fixed by the Shoes, Leather & Rubber Goods Branch were $7.15 per pair for the field shoes, $6.45 per pair for the marching shoes, $9.05 per pair for the field shoes in large sizes (12½ to 15), and $8.45 per pair for the marching shoes in large sizes (12½ to 15).

Deliveries by December 10, 1918.

Deliveries on the field shoes are to be completed December 10, 1918, and on the marching shoes January 31, 1919. The awarding of the contracts was governed by the following considerations: Location of the contractor as regards the congested districts of the country; the contractor's record of past performances as given by the quartermasters at the general supply depots; relative price submitted in proposals opened August 30; readiness and ability of the equipment possessed by the contractor.

The complete account of the awarding of the contracts follows:

Announcement of awards made by the Acting Quartermaster General for the manufacture of metallic fastened field and marching shoes for the United States Army.

On Saturday, September 7, 1918, at 5 o'clock p. m., George R. Harsh, chief of the Shoes, Leather & Rubber Goods Branch, in the office of the Quartermaster General, made the following statement regarding the award of contracts for the manufacture of metallic fastened field and marching shoes (Specifications Nos. 1351 and 1352):

"Acting on the policy announced at the meeting held in Washington on Saturday, August 31, the Shoes, Leather & Rubber Goods Branch has been governed in its award of contracts by the following considerations, stated in order of their relative weight:

a. Position of the contractor as regards the congested districts of the country.

b. The contractor's record of past performance as given by the quartermaster at the central supply depots.

c. Relative price submitted in proposals opened Friday, August 30.

d. Readiness and ability of the equipment possessed by the contractor.

Delivery on the field shoe is to be completed December 10, 1918, and on the marching shoe January 1, 1919. The awards are as follows:

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

American Communiques

The following is authorized by the War Department:

American Official Communique No. 116.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES.
September 7, 1918.

Section A.—South of the Aisne our troops entered the village of Muscourt and captured 50 prisoners. Hostile counterattacks in this sector were repulsed and our line was lightly advanced. Two strong hostile raids in the Woevre were beaten off, leaving prisoners in our hands. In Alsace a successful raiding party inflicted losses on the enemy.

Section B.—The commander in chief has awarded the distinguished-service cross to the following men of the American Expeditionary Forces for the acts of gallantry set forth after their names:

Sergt. ALBERT N. ELSEA, Machine Gun Battalion. "While acting as machine-gun leader near Hilsenfirst, France, July 6, 1918, he was wounded in the face by a bursting shell, but continued to direct his men until the attack ended and then insisted on walking to a dressing station."

Corpl. CLAYTON N. MOORE, Band, Infantry. "During the attack on Hilsenfirst, France, July 6, 1918, while carrying a wounded soldier through machine-gun fire to shelter, he was wounded, but by unusual pluck he nevertheless brought his comrade to safety, and realizing the scarcity of stretchers, insisted on others being carried to the rear and walking himself."

American Official Communique No. 117.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 8, 1918.

Section A.—Aside from patrol encounters and heavy artillery fighting south of the Aisne there is nothing to report from the sectors occupied by our troops.

ENLISTMENT OF AMERICAN CIVILIANS WHO ARE OVERSEAS.

(Continued from page 3.)

Great Britain, who has registered, applies for enlistment at a recruiting station in Great Britain and is rejected for military service on account of physical disqualification thereafter upon presentation by such registrant to his local board of a certificate by the recruiting officer stating that the registrant applied for enlistment and was found physically disqualified (as the case may be) for military service, together with a copy of the report of the physician who examined the applicant for enlistment, such certificate and copy of examining physician's report shall be filed with the questionnaire, and the registrant shall be placed in Class V on the ground that he is totally physically unfit for military service."

American Minister to Sweden Discusses Food Conditions on Reports from Germany

Ira Nelson Morris, American Minister to Sweden, who is in Washington, has issued the following signed statement with the sanction of the State Department:

"I have read reports in the Press, since my return home, to the effect that Germany is on the verge of starvation, and I find this to be the opinion of many with whom I come in daily contact. There can be no question that there is a shortage of most of the essentials of life, but to state that this borders on the verge of starvation is erroneous and misleading. I base this statement on many reports from reliable sources that have reached me in Stockholm. There is no doubt that in many parts of Germany there is a marked scarcity of food and that the civilian population has been reduced to the minimum ration but still receives sufficient for existence. Conditions are better in the rural districts, particularly as regards the farmers and landowners, even in the northern part of Germany where the scarcity is most felt. In the southern part conditions improve still more, and resorts and hotels there still serve meals at moderate prices. In the case of the Army, there has been but slight deprivation; this has been fed at the expense of the civilian population.

"In German Poland, in manufacturing districts, and in the more densely populated parts there has been suffering, quite visible in the emaciation of the people, which has naturally impaired the efficiency of the German workman, who no longer possesses full vigor; but it is a mistake to believe that this has provoked a strong current toward revolution or any general lessening of the loyalty of the people. They still possess faith in the invincibility of the military power, being purposely kept in ignorance of the real condition on the western front, not only as regards German reverses but also the full significance of America's entry into the war.

"It is to the advantage of our country and our cause that we should know the actual conditions which face us in this great crusade for democracy so that we can more effectively direct our effort toward victory.

"The people of the United States are resolute and determined. The country should realize that its entire energy must be put into the struggle and must not be relaxed for a single instant. There is no doubt of victory so long as these moves by Germany are plainly understood.

"IRA N. MORRIS,
"American Minister to Sweden."

BASIS FOR EXEMPTION CLAIMS IN CERTAIN OCCUPATIONS

Provost Marshal's Suggestions to Bankers, Merchants and Newspaper Workers.

The War Department authorizes the following from the office of the Provost Marshal General:

Persons, such for example as bankers, men in commercial enterprises, newspapermen, etc., who may contemplate making claim for deferred classification on the ground that they are "persons engaged in industries, occupations, or employments, including agriculture, found to be necessary to the maintenance of the Military Establishment, or the effective operation of the military forces or the maintenance of national interest during the emergency" should bear this in mind:

That any such person must be prepared to convince his district board (1) that the particular enterprise in which he is working is necessary to the maintenance of the Military Establishment, or the effective operation of the military forces, or the maintenance of national interest during the emergency, and (2) that he himself is necessary to the operation of that enterprise.

In making such claims such persons may make use of those parts of the questionnaire relating to claims for deferred classification on the ground of being engaged in industries.

WORK OF CONGRESS BRIEFLY TOLD

SENATE.

Before the Finance Committee several witnesses protested against various forms of taxation in the pending war-revenue bill. Benjamin C. Marsh, representing the Farmers' National Committee on Finance, urged increased taxes on incomes and a smaller issue of bonds. J. H. Dieckman, president of the St. Louis Board of Trade, objected to the tax on a membership on stock exchanges. Thomas S. Fuller, speaking for tobacco interests, of $1 on cigarettes retailing at more than expressed opposition to a differential tax 2 cents each, as distinguished from those retailing at 2 cents or less. M. L. Dawson, representing farmers and stock raisers of Texas, urged the committee in determining the taxes that farmers will have to pay to make some allowance for overhead expenses incurred in previous years. He said drought sufferers in parts of Texas particularly needed such an allowance.

The Senate was not in session Saturday.

HOUSE.

On Saturday Chairman Kitchin concluded his two days' explanation of the various features of the war-revenue bill. The remainder of the week will be devoted to its consideration. Chairman Lever, of the Agricultural Committee, on Saturday endeavored to expedite final passage of the emergency appropriation bill carrying the war-time prohibition amendment, by moving that it be sent to conference. Objection was raised by Minority Leader Gillette, and the bill as passed by the Senate was sent to the Agricultural Committee for report. Then Mr. Lever asked that the regular annual appropriation bill should be made a special order for to-morrow, but Mr. Walsh, of Massachusetts, objected to this unanimous-consent request and notified the House he would object to all such requests until the war-revenue bill now before the House is disposed of.

Representative Clark, of Florida, introduced a resolution under which, if adopted, all forms of profiteering in the District of Columbia would be investigated. It provides for the appointment of a select committee of five members of the House to investigate prices charged for the rental of houses, apartments, and rooms; prices charged for food served in restaurants, cafes, hotels, and other places where food is served to the public for pay; prices charged the consuming public by retail grocers, market men, and others for food of all kinds; the system commonly known as "tipping." The committee would be vested with full authority to summon and examine witnesses under oath, and to report to the House such legislation as it might deem expedient in the circumstances.

QUITS BUREAU OF HOUSING.

The Department of Labor authorizes the following:

The Bureau of Industrial Housing and Transportation announces the retirement of Mr. Albert B. Kerr, of the firm of Zabriskie, Sage, Kerr & Gray, of New York City, who has served as its chief counsel during the period of organization.

WAR TRADE BOARD REGULATION ON THE EXPORT OF DUNNAGE

The War Trade Board announces in a new ruling (W. T. B. R. 215) the addition of paragraph 6 to the General Rules No. 1, governing granting licenses for bunker fuel, port, sea, and ship's stores and supplies. The paragraph reads as follows:

"No dunnage shall be allowed to proceed out of the United States or any of its Territories or possessions on any vessel, except under license of the War Trade Board, either as ship's stores or as cargo. No applications for 'bunkers' of any vessel shall be granted unless such dunnage as she may have aboard is so licensed. Vessels will not be permitted to clear with dunnage unless properly covered either by export or bunker license. If declared as ships' stores, dunnage can not be discharged at any foreign port or transferred to any other vessel without special permission from the Bureau of Transportation of the War Trade Board."

Steamship owners, agents, and masters and also shippers are reminded that this regulation has been operative for some time, but that heretofore it has not been incorporated in the general rules which were given publicity.

Azalea, N. C., Hospital Is to be Made Larger

The War Department authorizes the following statement:

The tuberculosis hospital located at Azalea, N. C., is to be enlarged. Instructions have been issued to the Construction Division to erect the following buildings, which it is estimated will cost $380,100:

Twelve open-air wards for enlisted men, two officers' wards, three infirmary buildings, two buildings to accommodate 50 nurses, officers' quarters, and two storehouses.

SERIES OF WAR LECTURES.

A series of lectures illustrated with slides on the various war activities of the United States up to this time is being prepared by George F. Zook, professor of modern European history, Pennsylvania State College. The cantonments, airplanes, the Navy, shipbuilding, the trenches, and many other features of the war are described in an interesting and instructive way. The lectures will be especially useful for the work of teachers, Y. M. C. A. secretaries, and club officials.

Each lecture is accompanied by from 45 to 65 slides. The slides are of excellent workmanship and will be sold at the nominal price of 15 cents each. The lectures and slides will be available for use about October 1. For further information address the Division of Civic and Educational Publications, Committee on Public Information, Washington, D. C.

SUGAR EQUALIZATION BOARD ANNOUNCES RAW CANE PRICE

Upon the basis of an investigation conducted by the Hon. Oscar Straus, of New York, and the Federal Tariff Commission into the increased cost of refining cane sugar, the Sugar Equalization Board has made recommendation to the Food Administration, which has determined to increase the differential over that allowed last year to compensate for the increased costs imposed by an increase in materials, labor, the lesser scale of operations and the increase in the value of raw sugar lost in refining. The net result of these increases works back from the established basis of 9 cents granulated basis seaboard points and makes the price of raw sugar, duty paid, $7.28, which from Monday morning is the established basis for raw sugar prices. The difference between this basis of raws on old-crop sugars and the old basis will be accounted for to the Sugar Equalization Board by the refiners as delivered.

35 MEN KILLED ON THE MT. VERNON

(Continued from page 1.)

William P. Flynn, fireman, first class. Father, William Flynn, 213 Green Street, Cambridge, Mass.

Dock B. Frye, fireman, third class. Sister, Minnie May Frye, Conway, S. C.

Daniel Terrell, fireman, second class. Mother, Mrs. Margaret Terrell, 3314 Locust Street, St. Joseph, Mo.

Irving Ellis Tracy, fireman, first class. Mother, Mrs. Ella Tracy, Canyon City, Oreg.

Charles Wesley Viebey, fireman, second class. Mother, Mrs. Elizabeth Contant, Marlborough, N. Y.

PREFERENCE LIST OF INDUSTRIES AND PLANTS

(Continued from page 1.)

Where it is imperative not only to maintain, but to stimulate and increase, production to supply abnormal demands created by war requirements, a high rating is necessary even though the intrinsic importance of the product may be less than that of other products placed in the lower classification, due to the fact that the supply of such other products equals the demand without the stimulus of high priority. Certain plants produce commodities of more relative importance, but at the same time produce other commodities of less relative importance and under such circumstances consideration and weight is given to the ratio of production between the more important and less important commodities.

Not Intended as Embargo.

The inclusion of the industries and plants on this preference list does not operate as an embargo against all others, but the effect is to defer the requirements of all other industries and plants until the requirements of those on the preference list shall have been satisfied. The paramount purpose of priorities is the selective mobilization of the products of the soil, the mines, and factories for direct and indirect war needs in such a way as will most effectually contribute toward winning the war.

In listing industries as such or individual plants, while a number of factors are taken into account, the ultimate test is: To what extent, if at all, will according preference contribute directly or indirectly toward winning the war; and, if at all, how urgent is the need.

A high priority classification does not always mean that the product of the industry of plant so classified is of greater intrinsic importance than those of industries and plants in a lower classification or not appearing at all on the preference list, but that taking into account the urgency of the demand and the relation of supply to demand, it is in the public interest that the artificial stimulus of priority should be applied. All priority is relative and implies purposeful discrimination.

Continuing, Judge Parker says:

"Without a central agency to determine the relative needs, importance and urgency of the requirements of each department of this Government, of its allies and of the civilian population, there would be hopeless conflict and confusion. The unprecedented expansion of the Army and of the Navy of the United States, the creation of the Emergency Fleet Corporation to engage in shipbuilding on an extraordinary scale, and the demands made by our allies for munitions, material, equipment, fuel, foods and feeds, the abrupt change from a peace to a war basis have all combined to create abnormal industrial conditions in the United States, to regulate which the law of supply and demand and other economic laws applicable to normal conditions are wholly inadequate. The administration of priorities is calculated to bring order out of chaos and to develop an evenly balanced industrial program to meet the requirements of the military program, and at the same time supply the essential requirements (as distinguished from the mere wants or desires) of the civilian population. Now that it is understood that priority and preference can not be purchased, the tendency is for prices to assume more nearly the normal level. It is now the public interest rather than the dollars of the purchaser that determines precedence in production and delivery."

Closely associated with the promulgation of this new preference list by the War Industries Board is the great necessity for conservation in every possible way of men, material, transportation and all energies that go to placing the United States with all its power and resources behind its men at the front in winning the war. It is necessary now more than ever to save to the point of sacrifice so that demand may be held to the bone, enabling supply to go as far as possible.

The Preference List.

The preference list follows:

(NOTE.—The list is complete except for the table showing industries grouped by classes. The list is given alphabetically with the class number opposite each group.)

WAR INDUSTRIES BOARD.

PRIORITIES DIVISION.

Circular No. 20.

Preference List No. 2, issued September 3, 1918.

(Superseding Preference List No. 1, issued Apr. 6, 1918, and all amendments and supplements thereto.)

FOREWORD.

The President has placed upon the chairman of the War Industries Board the responsibility for determining and administering all priorities in production and delivery. The determination of the relative importance of all industries and plants for both production and delivery by a single agency renders it possibly to reasonably maintain a well balanced program with respect to the several factors entering into production, which include (*a*) plant facilities, (*b*) fuel supply or electric energy, or both, (*c*) supply of raw materials and finished products, (*d*) labor, and (*e*) transportation by rail, water, pipe lines, or otherwise. Without all of these—speaking generally—production is impossible.

In compliance with the directions of the President that plans be formulated whereby there may be "common, consistent, and concerted action" in carrying into effect all priority policies and decisions, the chairman of the War Industries Board has created a priorities board, with the priorities commissioner of the War Industries Board as chairman, consisting of (1) the chairman of the War Industries Board, (2) the priorities commissioner, (3) a member of the Railroad Administration, (4) a member of the United States Shipping Board Emergency Fleet Corporation, (5) a member of the War Trade Board, (6) a member of the Food Administration, (7) a member of the Fuel Administration, (8) a representative of the War Department, (9) a representative of the Navy Department, (10) a member of the Allied Purchasing Commission, and (11) the chairman of the War Labor Policies Board.

The decisions of the priorities board are subject to review only by the chairman of the War Industries Board and by the President.

For the guidance of all governmental agencies and all others interested in (1) the production and supply of fuel and electric energy, (2) in the supply of labor, and (3) in the supply of transportation service by rail, water, pipe lines, or otherwise, in so far as such service contributes to production of finished products, the accompanying designated Preference List No. 2 has been adopted by the priorities board superseding Preference List No. 1 adopted April 6, 1918, and all amendments and supplements thereto.

Where advisable industries as such have been classified and listed. In numerous instances individual plants have been found to be entitled to preference, although the industries to which they belong are not; and in other instances where an industry as such has been accorded a degree of preference particular plants in such industry have been placed in a higher class. This has necessitated classifying and listing not only industries as such but to a limited extent individual plants, some of which are accorded a higher rating than that accorded the listed industry to which they belong.

The Preference List is made up of industries and plants which in the public interest are deemed entitled to preferential treatment. The inclusion of these industries and plants on this list does not operate as an embargo against all others, but the effect is to defer the requirements of all other industries and plants until the requirements of those on the Preference List shall have been satisfied.

In the compilation of this list industries and plants have been divided according to their relative importance into four classes, viz, Class I, Class II, Class III, and Class IV. In determining such relative importance consideration and weight have been given not solely to any one, but to all of the following factors: (1) The intrinsic importance of the product itself for use during the war, and the urgency, as measured by time, of the demand or of the use to which it is to be put; (2) the necessity for maintaining or stimulating and increasing the total quantity of production, which in turn depends largely upon the relation of the supply to the demand for essential uses; (3) the proportion of the capacity of the industry or plant which is devoted to the production of the essential product.

Where it is imperative not only to maintain but to stimulate and increase production to satisfy abnormal demands created by war requirements a high rating is necessary, even though the intrinsic importance of the product may be less than that of other products placed in a lower classification due to the fact that the supply of such other products equals the demand without the stimulus of high priority. Where it is necessary to speed the production of a particular product required at a particular time to carry into effect an important program, a high

PREFERENCE LIST OF INDUSTRIES AND PLANTS

priority is given, although changing conditions may thereafter suggest and demand a reclassification. Certain plants produce commodities of great relative importance, but at the same time produce other commodities of less relative importance, and under such circumstances consideration and weight is given to the ratio of production between the more important and less important commodities. Instances occasionally arise where individual plants are given preference so long as they are rendering, and so long as it is in the public interest that they should render, a particular service, even though, taking the country as a whole, the supply of their product is ample to meet all demands.

No distinction has been made between any of the industries or plants within any one class, and no significance attaches to the order in which industries and plants are listed within any class.

The industries and plants grouped under Class I are only such as are of exceptional importance in connection with the prosecution of the war. Their requirements must be fully satisfied in preference to those of the three remaining classes.

Requirements of industries and plants grouped under Class II, Class III, and Class IV shall have precedence over those not appearing on the Preference List. As between these three classes, however, there shall be no complete or absolute preference. The division into classes is for the purpose of presenting a composite picture of the relative importance of the industries and plants embraced within each group. It is not intended that the requirements of Class II shall be fully satisfied before supplying any of the requirements of Class III, or that those of Class III shall be fully satisfied before supplying any of those of Class IV. The classification does, however, indicate that the industries and plants grouped in Class II are relatively more important than those in Class III and that those in Class III are relatively more important than those in Class IV. It will often happen that after satisfying the requirements of Class I the remaining available supply will be less than the aggregate requirements of the other three classes, in which event such supply will be rationed to the industries and plants embraced within those classes. In determining a basis for such rationing the relative importance of each industry and plant, according to its class rating, must be considered. It has been found impracticable to prescribe for rationing purposes any general and uniform rule or formula, but the priorities board will from time to time, after conference, and in cooperation with each of the several governmental agencies charged with the distribution thereof, determine particular principles, values and methods of application which may be followed in allocating fuel, power, transportation, and labor, respectively, to the end that proper recognition and weight may as far as practicable in each case be given to the relative importance of Class II, Class III, and Class IV.

Each plant listed as such shall not later than the 15th of each month file with the secretary of the priorities board, Washington, D. C., a report on P. L. Form No. 3 (a supply of which will be furnished on application) covering its activities during the perceding month. Any plant failing to file such report will be dropped from the Preference List.

Priorities in the supply and distribution of raw materials, semifinished products, and finished products shall be governed by Circular No. 4 issued by the priorities division of the War Industries Board under date of July 1, 1918, and all amendments and supplements thereto or substitutes therefor.

The term "principally" as used in listing industries shall be construed to mean plants whose output is not less than 75 per cent of the products mentioned.

This Preference List shall be amended or revised from time to time by action of the priorities board to meet changing conditions. The priorities commissioner shall, under the direction of and with the approval of the priorities board, certify additional classes of industries and also certify additional plants whose operations as a war measure entitle them to preference treatment, which industries and plants when so certified shall be automatically included in the Preference List.

EDWIN B. PARKER,
Priorities Commissioner.

Approved:
BERNARD M. BARUCH,
Chairman War Industries Board.
WASHINGTON, *D. C., September 3, 1918.*

INDUSTRIES

(Listed alphabetically)

	Class.
Agricultural Implements. See Farm implements.	
Aircraft: Plants engaged principally in manufacturing aircraft or aircraft supplies and equipment	I
Ammunition: Plants engaged principally in manufacturing same for the United States Government and the allies	I
Army and Navy: Arsenals and navy yards	I
Army and Navy: Cantonments and camps	I
Arms (small): Plants engaged principally in manufacturing same for the United States Government and the allies	I
Bags: Hemp, jute and cotton—plants engaged principally in manufacturing same	IV
Blast furnaces (producing pig iron)—	I
Boots and Shoes: Plants engaged exclusively in manufacturing same	IV
Brass and copper: Plants engaged principally in rolling, and drawing copper, brass, and other copper alloys in the form of sheets, rods, wire, and tubes	II
Buildings. See public institutions and buildings.	
Chain: Plants engaged principally in manufacturing iron and steel chain	III
Chemicals: Plants engaged principally in manufacturing chemicals for the production of military and naval explosives, ammunition, and aircraft, and use in chemical warfare	I
Chemicals: Plants, not otherwise classified and listed, engaged principally in manufacturing chemicals	IV
Coke: Plants engaged principally in producing metallurgical coke and by-products, including toluol	I
Coke: Plants, not otherwise classified and listed, producing same	II
Copper and brass: See Brass and copper.	
Cotton: Plants engaged in the compression of cotton	IV
Cotton textiles: See Textiles.	
Cranes: Plants engaged principally in manufacturing locomotive or traveling cranes (The term "principally" means 75 per cent of the products mentioned.)	II
Domestic consumers: Fuel and electric energy for residential consumption, including homes, apartment houses, residential flats, restaurants, and hotels	I
Domestic consumers: Fuel and electric energy not otherwise specifically listed	III
Drugs: Medicines and medical and surgical supplies, plants engaged principally in manufacturing same	IV
Electrical equipment: Plants engaged principally in manufacturing same	III
Explosives: Plants engaged principally in manufacturing same for military and naval purposes for the United States Government and the allies	I
Explosives: Plants, not otherwise classified or listed, engaged principally in manufacturing same	III
Farm implements: Plants engaged principally in manufacturing agricultural implements and farm-operating equipment	IV
Feed: Plants engaged principally in preparing or manufacturing feed for live stock and poultry	I
Ferro alloys: Plants engaged principally in producing ferrochrome, ferromanganese, ferromolybdenum, ferrosilicon, ferrotungsten, ferrouranium, ferrovanadium, and ferrozirconium	II
Fertilizers: Plants engaged principally in producing same	IV
Fire brick: Plants engaged principally in manufacturing same	IV
Foods: Plants engaged principally in producing, milling, refining, preserving, refrigerating, wholesaling, or storing food for human consumption embraced within the following description: All cereals and cereal products, meats, including poultry, fish, vegetables, fruit, sugar, sirups, glucose, butter, eggs, cheese, milk and cream, lard, lard compounds, oleomargarine and other substitutes for butter or lard, vegetable oils, beans, salt, coffee, baking powder, soda and yeast; also ammonia for refrigeration	I
Foods: Plants engaged principally in producing, milling, preparing, refining, preserving, refrigerating, or storing food for human consumption not otherwise specifically listed; excepting herefrom plants producing confectionery, soft drinks, and chewing gum	III
Food containers: Plants engaged principally in manufacturing same	IV
Foundries (iron): Plants engaged principally in the manufacture of gray iron and malleable iron castings	IV
Fungicides. See Insecticides and fungicides.	
Gas. See oil and gas, also Public utilities.	
Guns (large): Plants engaged principally in manufacturing same for the United States Government and the allies	I
Hospitals. See Public institutions and buildings.	
Ice: Plants engaged principally in manufacturing same	III
Insecticides and fungicides: Plants engaged principally in manufacturing same	IV
Laundries	IV
Machine tools: Plants engaged principally in manufacturing same	II
Medicines. See Drugs and medicines.	
Mines: Coal	I
Mines: Producing metals and ferro-alloy minerals	II
Mines: Plants engaged principally in manufacturing mining tools or equipment	III
Navy. See Army and Navy.	
Navy Department. See War and Navy Departments.	

PREFERENCE LIST OF INDUSTRIES AND PLANTS

	Class.
Newspapers and periodicals: Plants engaged principally in printing newspapers or periodicals which are entered at the post office as second-class mail matter	IV
Oil and gas: Plants engaged principally in producing oil or natural gas for fuel, or for mechanical purposes, including refining or manufacturing oil for fuel, or for mechanical purposes	I
Oil and gas: Pipe lines and pumping stations engaged in transporting oil or natural gas	I
Oil and gas: Plants engaged principally in manufacturing equipment or supplies for producing or transporting oil or natural gas, or for refining and manufacturing oil for fuel or for mechanical purposes	III
Paper and pulp. See Pulp and paper.	
Periodicals. See Newspapers and periodicals.	
Public institutions and buildings (maintenance and operation of) other than hospitals and sanitariums	III
Public institutions and buildings (maintenance and operation of) used as hospitals or sanitariums	I
Public utilities: Gas plants producing oluol	I
Public utilities: Street railways, electric lighting and power companies, gas plants not otherwise classified, telephone and telegraph companies, water-supply companies, and like general utilities	II
Public utilities: Plants engaged principally in manufacturing equipment for railways or other public utilities	II
Pulp and paper: Plants engaged exclusively in manufacturing same	IV
Railways: Operated by United States Railroad Administration	I
Railways: Not operated by United States Railroad Administration (excluding those operated as plant facilities)	II
Railways (street). See Public utilities.	
Rope. See Twine and rope.	
Rope wire. See Wire rope.	
Sanitariums. See Public institutions and buildings.	
Ships (maintenance and operation of): Excluding pleasure craft not common carriers	I
Ships: Plants engaged principally in building ships, excluding (a) pleasure craft not common carriers, (b) ships not built for the United States Government or the allies nor under license from United States Shipping Board	I
Soap: Plants engaged principally in manufacturing same	IV
Steel-making furnaces: Plants engaged solely in manufacturing ingots and steel castings by the open-hearth, Bessemer, crucible, or electric-furnace process, including blooming mills, billet mills, and slabbing mills for same	I
Steel-plate mills	I
Steel-rail mills: Rolling rails, 50 or more pounds per yard	II
Steel: All plants operating steel rolling and drawing mills exclusive of those taking higher classification	III
Surgical supplies. See Drugs and Medicines.	
Tanners: Plants engaged principally in tanning leather	IV
Tanning: Plants engaged principally in manufacturing tanning extracts	IV
Textiles: Plants engaged principally in manufacturing cotton textiles, including spinning, weaving, and finishing	IV
Textiles: Plants engaged principally in manufacturing woolen textiles, including spinners, top makers, and weavers	IV
Textiles: Plants engaged principally in manufacturing cotton or woolen knit goods	IV
Textiles: Plants engaged principally in manufacturing textile machinery	IV
Tin plates: Plants engaged principally in manufacturing same	III
Tobacco: Only for preserving, drying, curing, packing, and storing same—not for manufacturing and marketing	IV
Toluol. See Coke; also Public utilities.	
Tools: Plants engaged principally in manufacturing small or hand tools for working wood or metal	III
Twine (binder and rope): Plants engaged principally in manufacturing same	IV
War and Navy Departments: Construction work conducted by either the War Department or the Navy Department of the United States in embarkation ports, harbors, fortified places, flood-protection operations, docks, locks, channels, inland waterways and in the maintenance and repair of same	II
Wire rope and rope wire: Plants engaged principally in manufacturing same	II
Woolen textiles. See Textiles. (The term "principally" means 75 per cent of the products mentioned.)	

SCHEDULE FOR STOVE MAKERS FOR CONSERVING MATERIALS

The War Industries Board authorizes the following:

Under agreement with the Conservation Division of the War Industries Board, the stove manufacturers of the country have put into effect the following schedule for the conservation of material, capital, and labor, which is a part of the general industrial war conservation program:

1. Each manufacturer is to reduce his assortment of sizes and styles of goods manufactured approximately 75 per cent.

2. The immediate discontinuance of the manufacture or the acquiring of new patterns for the duration of the war.

3. All cooking stoves or ranges manufactured to be equipped with No. 8 covers only, except where the body of the stove and range is too small to permit the use of such size.

4. The manufacture of back guards and tea shelves for steel high closets to be discontinued.

5. The manufacture of tin linings in ovens and doors to be discontinued.

6. Light patterns of stoves and ranges to be manufactured in preference to heavy patterns.

7. The manufacture of steel high shelves and canopies on domestic ranges to be discontinued.

The conservation division is advised that the universal adoption of this schedule will result in large savings in materials and in reducing the amount of materials and capital tied up in manufacturers' and dealers' stocks.

Maximum Prices and Differentials on Hides

The price-fixing committee of the War Industries Board has approved the following maximum prices and differentials as applying to the schedule of maximum prices on hides now in effect:

Buenos Aires city wet-salt horsehides, about 15 to 20 kilos average, maximum price $5.75 each c. and f. New York.

Headless and seconds at 50 cents less, excluding glue, colts, and ponies.

Resalted, packer, abattoir, and wholesales butcher hides and kip maximums shall be 5 per cent less than the maximums for such first salt hides and kips.

COMMITTEE TO INVESTIGATE RAILROAD TELEGRAPH LINES

The Post Office Department issues the following:

The Postmaster General has appointed Joseph Stewart, special assistant to the Attorney General; G. W. E. Atkins, first vice president, Western Union Telegraph Co.; and John Barton Payne, chairman of the general counsel of the Railroad Administration, as a committee to make careful investigation of the contractural relations between the railroads and the various telegraph companies, and to report what changes, if any, should be made in these contracts or in the service rendered.

The Postmaster General has appointed Messrs. Henry Carter Adams and David Friday as statisticians in connection with the operation and control of the telegraph and telephone systems.

Mr. Adams is head of the department of economics of the University of Michigan; was statistician of the Interstate Commerce Commission, and more recently adviser to the commission of the Chinese Republic on standardization of railway accounts and statistics.

Mr. Friday is head of the department of economics in the New York University School of Commerce and Finance; was valuation expert of the Michigan Railroad Commission, and is a tax expert in public utilities and financial matters.

LIST OF CASUALTIES REPORTED AMONG THE UNITED STATES FORCES OVERSEAS

ARMY

SECTION NO. 1, SEPTEMBER 7, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	14
Missing in action	7
Wounded severely	78
Died of wounds	9
Died from accident and other causes	2
Wounded (degree undetermined)	35
Total	145

Killed in Action.

Sergt. Henry Zimmerman. William Zimmerman, 1401 Superior Avenue, Oconto, Wis.

Corpl. Max R. Grundkovski. Mrs. Laura Grundkovski, Farnham, N. Y.

Corpl. Timon Hestekind. Mrs. Henry Ricken, Cedar Rapids, Nebr.

Corpl. John D. Kirkpatrick. Milton H. Kirkpatrick, Terrace, Mont.

PRIVATES.

Henry Anderson. Mrs. Caroline Anderson, Swedona, Ill.

Stanislau Andrych. John Andrych, 37 Whitcomb Street, Webster, Mass.

William Bailey. Mrs. William Bailey, Wilson Avenue, Sharon, Pa.

Claude W. Bills. Mrs. Amelia Trolson, box 6, Mills, Nebr.

Martin J. Dahl. John J. Dahl, Loma, Cavalier County, N. Dak.

George A. Johnson. Carl A. Johnson, 15 Malden Street, Worcester, Mass.

Carl J. Lindberg. Mrs. Amanda Lindberg, 69 Birch Street, Worcester, Mass.

Rodrick George Prato. Mrs. Joseph Prato, Munising, Mich.

Russell Rickerman. William Rickerman, 332 Gratiot Avenue, Detroit, Mich.

Joseph Scheffler. Frank Scheffler, 1048 North Carolina Street, Chicago, Ill.

Died of Wounds.

Lieut. Henry Howard Houston. Samuel Frederick Houston, Chestnut Hill, Philadelphia, Pa.

Corpl. Alfred Follet Ethier. Alfred D. Ethier, 186 Wright Street, Milwaukee, Wis.

PRIVATES.

Joaquin Chavez. Mrs. Bolarita Lucero, Corvio, N. Mex.

Joseph Gilbert Cyphers. Mrs. Mildred Cyphers, 128 Almond Street, Syracuse, N. Y.

Fred Eastlick. Mrs. Louisa Eastlick, 4208 West Page Street, St. Louis, Mo.

Alvin Ficklin. Mrs. Ida M. Smalley, Estancia, N. Mex.

Roy Gill. Mrs. Julia Gill, 803 Atlantic Avenue, Toledo, Ohio.

John Joseph Grojber. Stephen Grojber, 502 South Water Street, Philadelphia, Pa.

Roscoe Jordan. Mrs. Mary J. Jordan, Green Forest, Ark.

Died from Accident and Other Causes.

PRIVATES.

Rosario Masi. Bruni Masi, 133 George Street, Brooklyn, N. Y.

William T. Peters. Edward A. Peters, 44 Walden Street, Jamaica Plain, Mass.

Wounded Severely.

Lieut. Stephen F. Jackson. Mrs. Ella A. Jackson, 601 Bedford Avenue, Brooklyn, N. Y.

Lieut. Charles W. Pence. Mrs. Alpha R. Pence, New Richmond, Ind.

SERGEANTS.

Walter C. Guttke. Paul Guttke, 6435 Thirty-fourth Street, Berwyn, Ill.

Harry Hemmingson. Chriss Hemmingson, Grayling, Mich.

Dorsey F. Hudson. William A. Hudson, Vineland, N. J.

Total Army and Marine Corps Casualties

The following is a summary of casualties reported to date by the Commanding General of the American Expeditionary Forces:

ARMY.

Killed in action (including 291 at sea)	5,240
Died of wounds	1,552
Died of disease	1,686
Died of accident and other causes	794
Wounded in action	14,677
Missing in action (including prisoners)	3,224
Total to date	27,173

MARINE CORPS.

Officers:		
Deaths	37	
Wounded	60	
Missing	1	
		98
Enlisted men:		
Deaths	834	
Wounded	1,899	
In hands of enemy	10	
Missing	135	
		2,928
Total to date		3,026

Reinhold Frederick Rosenthal. Fred Rosenthal, 415 Clark Street, Reedsburg, Wis.

CORPORALS.

James Agnew. Miss Mary Agnew, 276 Bank Street, Bridgeport, Conn.

Clifford A. Babcock. Mrs. Ruby Babcock, 100 Oak Grove, South Beloit, Ill.

George E Dunn. Joseph S. Dunn, Birmingham, Ky.

Alfred C. Elliott. Mrs. Eliza Elliott, Vicar Switch, Va.

Arno A. Gerald. Mrs. Mary Gerald, 2307 North Church Street, Beloit, Wis.

Alvin Hanes. George Hanes, 194 Sheldon Avenue, Detroit, Mich.

Robert James Kline. Miss Jennie Hunter, Saranac, Mich.

Clay M. Long. E. J. Cooper, Box 44, Parkman, Wyo.

William T. Parezo. Mrs. Thursa Ramme, General Delivery, Hurley, Wis.

Charles Julius Pastore. Rev. Anthony Pastore, 1206 Ridge Avenue, Coraoplis, Pa.

Posie D. Powell. J. H. Powell, Whitmell, Va.

Wilber McK. Rose. Lewis J. Rose, Richpatch, Va.

Henry Schielz. Mrs. Suzan Schielz, Fenwood, Wis.

Musician Gifford C. Olson. Mrs. Matilda Olson, Garner, Iowa.

PRIVATES.

Jesse F. Allen. Mrs. Jennie Allen, Belle Ellen, Ala.

Stanley Anczak. Anton Anczak, 1066 Fifth Avenue, Milwaukee, Wis.

John S. Anderson. Miss Mattie Brown, Stones Mills, N. Y.

Vester L. Andrews. Calvin Andrews, Piney Creek, N. C.

Herman Asch. Mrs. Esther Asch, 563 South Center Street, Schenectady, N. Y.

Adam Richard Bailey. Worthy Erastus Thorpe, Chosaning, Mich.

John F. Beaderstadd. Mrs. Ella Beaderstadd, Herman, S. Dak.

Joseph Bukowski. Mrs. Alexandria Bukowski, 1130 Midland Avenue, Milwaukee, Wis.

Allen Cleveland. H. L. Bond, Boulder, Mont.

William James Coughlin. William Coughlin, R. F. D. No. 1, Minden City, Mich.

Lester Davis. Mrs. Ida Davis, Tustin, Mich.

Bruno De Fazio. Philip De Fazio, 2367 Prospect Avenue, New York, N. Y.

Alfred J. Demers. Mrs. Anna Dubois, 90 Plantation Street, Worcester, Mass.

Frank J. Diehl. Mrs. Josephine Diehl, 720 O'Brien Street, Monroe, Mich.

Cornelius E. Dirks. Cornelius Dirks, Holland, Iowa.

Tony Joseph Dubanowich. Julius Dubanowich, 1640 Pennsylvania Street, Gary, Ind.

Anthony Dumblisky. Mike Dumblisky, St. Charles, Mich.

Emilio Eburno. Miss Vita Eburno, 1158 Milton Avenue, Chicago, Ill.

Joe V. Emmons. Mrs. C. F. Emmons, 1719 Washington Avenue, Houston, Tex.

Brotromos Evlombiatis. M. G. Karopoth, 805 East Third Street, South Bethlehem, Pa.

Martin Fielding Williams. John H. Williams, Brooklin, W. Va.
Ernest D. Worthely. David Worthely, R. F. D. No. 3, Lakeview, Mich.

Keep Bulletin Posted In All U. S. Post Offices

Reports having been made that at some post offices THE OFFICIAL (United States) BULLETIN is not being posted regularly for public reading in accordance with Postmaster General Burleson's orders, postmasters are again reminded of this important duty. It should be remembered that THE BULLETIN is the only publication available to all sections of the country that prints daily the complete and correct casualty lists from our armies oversea exactly as they are issued by the War Department. Many newspapers print only the lists having local interest in their own territory. THE BULLETIN prints every name and address, thus making it a certain means of informing friends and relatives, wherever they may be, of the fate of a soldier or sailor, no matter where his home town or city.

Postmasters are urged, aside from their duty as officials, to make it their patriotic and personal duty to see that the public has the fullest benefit of this privilege.

The Postmaster General's order follows:

All postmasters are directed to post THE OFFICIAL BULLETIN *daily in a conspicuous place in the lobby or other portion of their respective post-office buildings where the public can read it; and, without expense to the Government, each and every postmaster is earnestly urged to see that this* BULLETIN *is made available to as many people as possible in the manner suggested.*

A. S. BURLESON,
Postmaster General.

SECTION NO. 2, SEPTEMBER 7, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	13
Missing in action	8
Wounded severely	86
Died of wounds	6
Wounded (degree undetermined)	34

FEDERAL RESERVE BOARD'S WEEKLY BANK STATEMENT

Continued gains in discounts, mainly of war-loan paper, also in note circulation, are indicated by the Federal Reserve Board's weekly bank statement issued as at close of business on September 6, 1918:

Investments.—Discounted bills on hand show an increase for the week of 113.8 millions, all the banks except Kansas City reporting substantial additions to their holdings of discounted paper. Of the total reported 65.3 per cent as against 62.8 per cent the week before is represented by war paper, i. e., bills secured by Treasury certificates and Liberty bonds. Acceptances on hand increased 1.2 millions, although the New York bank shows net liquidation of this class of paper. An increase of 2.3 millions in Government short-term securities is due partly to the taking by New York of additional Treasury certificates to secure Federal Reserve bank-note circulation. Total earning assets show an increase for the week of 116.6 millions.

Deposits.—Government deposits increased 92.6 millions, all the banks except Richmond and Dallas reporting larger amounts of Government funds on hand. Members' reserve deposits show a decrease of 13.5 millions, while net deposits show a gain of 28.7 millions.

Reserves.—The week saw a further gain of 3.2 millions in gold reserves. Largely as a result of a return movement of funds from the interior, the New York bank reports a gain of 33.5 millions in total reserves. The banks' reserve percentage shows a decline from 56.4 to 54.9 per cent.

Note circulation. — Federal reserve agents report a net addition of 100.8 millions to Federal reserve notes outstanding. The banks show a gain for the week of 88 millions in Federal reserve notes in actual circulation, besides an increase of 3.3 millions in their aggregate liabilities on Federal reserve bank notes in circulation.

Capital.—An increase of $191,000 in paid-in capital is due largely to payment for Federal reserve bank stock by newly admitted members. The largest gains under this head are shown for the Chicago, St. Louis, Philadelphia, and Richmond banks.

Condition of Member Banks.

Further reductions in the holdings of Treasury certificates and Liberty bonds are indicated by the board's consolidated weekly statement, showing condition on August 30 of 734 member banks in leading cities. Large withdrawals for the week of Government deposits are partly offset by substantial gains in net demand deposits.

Treasury certificates on hand show a decrease of 28.2 millions, and United States bonds, other than circulation bonds, a decrease of 11.9 millions.

Figures of Government deposits indicate net withdrawals during the week of 217.9 millions, of which 120.5 millions represents withdrawals from central reserve city banks, and 82.2 millions withdrawals from banks in other reserve cities. Net demand deposits increased 120.4 millions.

The philosophy of the W. S. S. is save, save, save.

Flying Field Fatalities in Week Ending Aug. 31

The War Department authorizes the following:

Herewith is a summary of deaths due to aviation accidents in training at flying fields in this country for the week ending August 31, 1918.

Call Field, Wichita Falls, Tex	2
Carlstrom Field, Arcadia, Fla	1
Chanute Field, Rantoul, Ill	1
Love Field, Dallas, Tex	1
Mather Field, Sacramento, Cal	1
Total	6

The six deaths during the week ending August 31, represent one fatality for every 3,680 hours flown, or 294,400 miles air travel. At 22 fields other than those named above there were no fatalities during the week.

LIST OF CASUALTIES OVERSEAS

Frank Snider. John F. Snider, 300 West Street, Marquette, Mich.

Wounded in Action (Severely).

Pvt. Edward Colberg. Florence Colberg, Dusthe Krair, Smigel Province, Germany.

EMPLOYMENT SERVICE REPORT ON TRANSFER OF WAR WORKERS

The Department of Labor announces the following:

During the month of August, the first month of control of unskilled labor recruiting for war work by the United States Employment Service, between 50,000 and 60,000 unskilled workers were recruited and moved from States having a surplus of common laborers in war work to other States in which there were Government projects short of labor. Actually this number was recruited and shipped within three weeks, as the first week of August was devoted largely to organization work.

The movements were handled through the Federal directors of the Employment Service for the States on authorizations from the Director General at Washington. Labor was not taken from farms or other war work, and the Federal directors report a general absence of friction and that the movement met with hearty cooperation from employers.

To augment the common labor supply for war production several hundred laborers from the Bahama Islands have been brought to this country through the United States Employment Service during the past few days. They were shipped from Nassau and are to be used in the construction of the Army and Navy terminal at Norfolk, Va.

As soon as shipping is available, several thousand Porto Rican laborers, now registered at San Juan, will be brought to continental United States by the Employment Service for Government war work. Mexican labor is another source of outside labor which is being utilized in war production.

Wounded in Action (Severely) (Previously Reported Missing in Action).

Pvt. William H. Lenz. Henry Lenz, Gillian, Mo.

Returned to Duty with Organization (Previously Reported Missing in Action).

Pvt. Wilfred Brunelle. Cedelin Brunelle, 33 Vingeant Street, Ware, Mass.

NAVY

The Navy Department reports the following casualties:

Joseph Bernard Ladd, yeoman, third class, United States Naval Reserve Force, killed by an explosion in Federal Building, Chicago, Ill., Sept. 4. Mother, Mrs. Sarah Edith Ladd, Salina, Kans.

Alfred Austin Byxbee, gunner's mate, third class, United States Naval Reserve Force, attached to U. S. S *New Mexico*, died on Sept. 4. Brother, Frank Byxbee, Port Washington, Long Island, N. Y.

James William Jett, fireman, third class, United States Naval Reserve Force, accidentally drowned September 1 at Hampton Roads, Va. Father, James T. Jett, Willis, Va.

James H. Christian, patternmaker, second class, United States Navy, died at Hampton Roads, Va., September 2 as a result of a fractured vertebrae sustained while swimming. Wife, Mrs. Dorothy Christian, Roanoke, Va., Post Office Box 259.

James William Hurley, pharmacist's mate, third class, attached to United States Marine Corps, drowned August 29, at Santiago. Body was recovered. Father, Harry L. Hurley, 625 Columbia Road NW., Washington, D. C.

Nathan Harry Lamport, seaman, second class, United States Naval Reserve Force, killed as the result of an aeroplane accident in France September 3. Mother, Mrs. Ethel Lamport, 990 John R. Street, Detroit, Mich.

REVISED DRAFT REGULATIONS TO CONTROL CLASSIFICATION OF MEN WITH RESPECT TO WORK

BEING MAILED OUT TO BOARDS

Purpose is to Show Registrants, Desiring to Claim Deferred Classification on Industrial, Occupational or Other Grounds, How to Proceed.

The War Department authorizes the following:

The office of the Provost Marshal General has completed its revision of the selective service regulations governing the classification of persons subject to the draft, with respect to engagement in industries, occupations, or employments, including agriculture.

Copies of these revised regulations, together with printed leaflets to be inserted in the questionnaires sent out to the registrants, are being mailed out to the local and district boards throughout the country. Upward of 6,000,000 copies of the leaflet alone have been turned out by the Government Printing Office since Saturday. Its purpose is to show the registrant, desiring to claim deferred classification on industrial, occupational, or employment grounds, how he should proceed to fill out his questionnaire.

Guide for Local Boards.

The revised regulations themselves are to govern the operations of the boards and their advisers in the application of the law, which, as recently amended by Congress, changed the provision "Persons engaged in industry, including agriculture," wherever it occurs in section 4, to read: "Persons engaged in industries, occupations, or employments, including agriculture, found to be necessary to the maintenance of the Military Establishment, or the operation of the military forces, or the maintenance of national interest during the emergency."

The revised regulations are built around the provision of the act of Congress that no registrant will be entitled to deferred classification on industrial, occupational, or employment grounds, including agriculture, unless he himself, or the person or persons who may make claim in his behalf, can convince the district board (1) that the industry, occupation, or employment he happens to be engaged in is necessary to the maintenance of the Military Establishement, or the operation of the military forces, or the maintenance of national interest during the emergency; and (2) that he himself is necessary to the operation of the enterprise by which he is employed.

In defining the procedure to be followed in the handling of all such claims the

(Continued on page 6.)

FURTHER DETAILS OF ATTACK ON THE U. S. S. MT. VERNON

Vice Admiral Sims, in a dispatch received by the Navy Department, gives further particulars of the torpedoing of the U. S. S. *Mount Vernon*. A periscope was sighted 500 yards off the starboard bow and the guns opened fire. At almost the same moment the torpedo struck the ship. It hit abreast the bulkhead between boiler groups 3 and 4. Firerooms 5, 6, 7, and 8 were flooded.

The loss of so many lives, 35 being killed, was due to the fact that the watch was being relieved and there were many more men than usual in the firerooms.

Neither periscope nor submarine was sighted by the escorting destroyers, but a number of depth charges were dropped at the point where the periscope was sighted by the *Mount Vernon*.

The *Mount Vernon* proceeded to port at a speed of 15 knots, and is now docked for repairs.

Vice Admiral Sims remarks on the "admirable conduct" of officers and crew, showing their thorough training for such an emergency, and the "great skill and ability" with which Capt. Dismukes handled the situation.

Three Sailors Lose Lives Overboard from U. S. Ship

The Navy Department reports that Carl Duglass MacVittie, quartermaster third class, United States Naval Reserve Force; Jesse Taylor Swafford, seaman second class, United States Navy, and Roy Calvin Ragan, seaman second class, United States Navy, were lost overboard from the U. S. S. *Von Steuben* on September 6th.

MacVittie enlisted at Niagara Falls, N. Y., February 19, 1917; mother, Mrs. Clara MacVittie, 63 Duane Avenue, La Salle, N. Y.

Swafford enlisted April 10, 1917 at Little Rock, Ark.; mother, Mrs. Sara Swafford, Lexington, Tenn.

Ragan enlisted April 10, 1917, at Kansas City, Mo.; mother Mrs. Jane Ragan, Mercer, Mo.

ARMY WOOL REQUIREMENTS DISCUSSED IN AN INTERVIEW BY BRIG. GEN. R. E. WOOD

SOME WILL HAVE TO BE IMPORTED

Argentina and Australia Expected to Supply Deficit in Domestic Clip. Clothing Material Now on Hand For Our Men in France.

Press interview with Brig. Gen. R. E. Wood, acting quartermaster general of the Army, September 9, 1918:

Question. What are the Army wool requirements going to be for the coming year?

Answer. To figure definitely for the fiscal year ending June 30, 1919, approximately 266,000,000 pounds, in round figures, for the Army, Navy, and Marine Corps, and approximately 17,500,000 pounds for semigovernmental needs. This is scoured wool.

Question. Is that available—that much wool?

Answer. Yes. We have got to import some from Argentina and Australia.

Shipping Provided For.

Question. Has the shipping been provided for?

Answer. Yes, for the difference between 283,500,000 pounds and the portion of the domestic clip available, and the foreign wool now on hand.

Question. We have never been able to learn as to whether the bottoms have been furnished.

Answer. It won't require many bottoms because the wool to be imported from Argentina and Australia would, roughly, amount to 50,000,000 pounds to be imported for the Army; after all, only about five cargoes.

Question. Is this 150,000,000 pounds domestic?

Answer. The domestic clip is a little more than that. Of course, you understand that there is a good deal of wool in process with the manufacturers, and the tailors and the stores have all stocked up with cloth six or eight months ahead, so there would really be no shortage for about 15 months.

Question. You think by the expiration of the time that this piece goods is consumed some more will be available for civilian use?

Answer. It all depends on how long the war lasts.

Question. Does this 283,500,000 pounds provide for the new draft army?

Answer. Yes.

Question. You have already inducted into the service, Gen. Crowder says, 2,750,000.

Answer. I guess that includes the September draft. After this month there

would be 2,000,000 men to be called between October 1 and July 1. Now our greatest strain is coming in the next three months; that is, when I speak of us, I mean the Quartermaster Corps. We have got to outfit the drafts called in September, October, November, and December. We have got to keep up the shipments overseas, and then we have got to put woolen clothing in the hands of all these men who have been called this summer. They haven't got their overcoats, their blankets, their woolen coats, and woolen trousers. That puts the biggest strain on us during October, November, and December.

Question. It seems that there is a great quantity of material in France just now?

Key to the Situation.

Answer. We have a stock report which is the key to our whole situation. We get up at the end of each month a report showing everything in the States, from the factory to the man's back. We have a record of what clothing is in transit from the factory to the depot, what is on hand in the depots and camps, what is on hand at the docks, what is in transit to the docks, and what is in the holds of the ships going over to France, and Gen. Rogers cables me what he has in France. The troubles last fall were partly due to the fact that they didn't know where the material was. Since the 1st of March we have had double the number of men called in the last September draft, and, as far as I know, there has not been the slightest trouble. I assume if the men hadn't been supplied we'd have heard of it. There is no excuse for the Quartermaster Department falling down. The Ordnance and Aircraft had to design—and didn't have the production. They had to build new plants and new factories. With us it was simply the question of turning over the plants from making civilian clothes to uniforms. In fact, while wool has been short at times, we have never been entirely out. Our biggest problem is distribution, and the fact that we have got to distribute to each individual soldier. The Army can go without guns and airplanes, but it can't do without clothes without a big kick from the soldier and his people.

Question. Can you tell us how many uniforms have been provided for the new draft?

Answer. I can just give you the stocks at the 1st of August and the way production is coming. For instance, we had on hand on the 1st of August 5,000,000 breeches—that is, woolen breeches—and then, in addition, 5,600,000 cotton breeches, that is over 10,500,000 breeches. Of coats, we had 3,000,000 cotton coats and 4,000,000 woolen coats; we have 29,000,000 drawers, summer and winter; and 24,000,000 undershirts, summer and winter, and 5,200,000 blankets. Those are some of the important items.

Question. That would mean your actual stock? That is, then, your stock on hand exclusive of what is with the soldiers or what is in process of reclamation?

Answer. Yes.

Contracts in England.

Question. These contracts that have been let in England—are they being filled in good shape?

Answer. I sent a cablegram to Gen. Rogers this morning to see what deliveries are actually being made. They have placed contracts ahead for 3,000,000 pairs of leggings, 3,000,000 pairs of shoes, 1,500,000 flannel shirts, and 1,000,000 breeches. These contracts have been let, but I don't know what deliveries are being made. Outside of a few blankets and some shoes, foreign concerns wern't able to deliver last winter and spring. What they have delivered the last 60 days I don't know.

Question. One thing I want to ask you about is the Army raincoat frauds—how much did that amount to in dollars?

Answer. I would say, offhand, about $2,000,000. We didn't lose anything. The contractors are the losers.

Question. The contracts were canceled?

Answer. We canceled the contracts and then what raw material they had in process we commandeered. We relet the contracts to new firms, or firms who were not implicated. It slowed up production some—lost us a month in production, but it is better to have no raincoats at all than defective ones.

Question. What are the figures on overcoats?

Answer. Three million one hundred and forty thousand woolen coats.

Question. Can we say that every call made under the 18 to 45 draft during the fall and winter will find clothing ready for them?

Answer. Yes. We are going to be pretty short for a very short time on one or two articles, but we have enough.

The Military Program.

Question. Just what is the plan—what are the calls from each camp?

Answer. We have a military program. Suppose there are 155,000 men called in October. Thirty days before those men are called the General Staff notifies me of the distribution of that draft; that is, 10,000 men go to Camp Gordon, 10,000 to Camp Devens, 10,000 to Camp Funston. We send the distribution of that 155,000 men out to these camp quartermasters. Say, for instance, 10,000 men go to Camp Funston. The camp quartermaster has his stocks; he looks them over and he sees that he is going to be short 5,000 pairs of breeches. He draws his supply from the Depot Quartermaster at St. Louis. If the depot quartermaster is short, he notifies us here in Washington and we have them shipped direct from the factories to St. Louis and then out to Camp Funston. It is a perfectly simple distribution—from the factory to depot to camp. Where we have that 30 days' notice (we try to keep 30 days' supply on hand in

(Continued on page 8.)

RAILROAD INSURANCE AND FIRE PROTECTION SECTION CREATED

New Branch Will Be Under Division of Finance and Purchases, Railroad Administration.

U. S. RAILROAD ADMINISTRATION,
OFFICE OF DIRECTOR GENERAL,
WASHINGTON, D. C.,
September 3, 1918.

CIRCULAR No. 54.

The insurance and fire protection sectiontion has been established in the division of finance and purchases and in supervising this section Mr. John Skelton Williams, the director of the division, will be assisted by Mr. Theodore H. Price, actuary to the Railroad Administration.

Mr. Charles N. Rambo, formerly superintendent and secretary of the Mutual Fire, Marine and Inland Insurance Co., Philadelphia, has been appointed manager of the insurance and fire protection section with headquarters in the Premier Building, No. 718 Eighteenth Street NW., Washington, D. C.

In the work devolving upon it the insurance and fire protection section will have the cooperation of an advisory committee of which Mr. Theodore H. Price is chairman. The other members of the committee are Mr. R. M. Bissell (president of the Hartford Fire Insurance Co., Hartford, Conn., and also chairman of the National Conservation Committee and the National Board of Fire Underwriters); Mr. Charles E. Mather of Philadelphia; Mr. D. R. McLennan, of Chicago, and Mr. A. M. Schoen, a civil and electrical fire protection engineer and expert, at present chief engineer of the Southeastern Underwriters Association of Atlanta, Ga., and also a member of various national and other consulting boards throughout the United States.

The insurance and fire protection section will have its own force of general inspectors and loss investigators, reporting directly to it at Washington, and through the division of operations will communicate to the regional directors and the officers and employees of the operating force under them with regard to the work of fire prevention and inspection on all railways under control of the United States Railroad Administration with the object of utilizing existing organizations, as they may be available, reorganizing them when it may be necessary, and establishing adequate fire protection and inspection organizations for those properties upon which no such organization is now maintained.

Prompt compliance with the recommendations of the insurance and fire protection section received through the channels designated, will be required from all officials of the railroads.

Need of Increased Vigilance.

The heavy fire losses throughout the country and the recent destruction by fire in and on the railroad properties emphasize the need of increased vigilance in applying the latest and most effective methods of fire prevention, and it is especially essential that the officials and employees shall with renewed energy cooperate in the reduction of the hazard and the unnecessary fire waste.

It is believed that if every employee can be made to feel an alert consciousness of responsibility for this loss, that it can be substantially reduced, thus effecting an important saving in the cost of operation and avoiding the interference with and delay of traffic that fires cause. To this end the earnest cooperation of every employee of the United States Railroad Administration is desired and requested.

W. G. McADOO,
Director General of Railroads.

SCHEDULE FOR CONSERVATION OF WOOD IN COTTON SPOOLS

The War Industries Board authorizes the following:

The Construction Division of the War Industries Board, after agreement with the spool cotton manufacturers, has issued a schedule for the industry putting into effect plans for the conservation of lumber, cardboard, twine, nails, and other materials, and to relieve the burden on railroads by cutting down to the extent of at least 600 cars a year the number of cars necessary to transport the material used in the industry.

Manufacture Restricted.

Manufacturers of cotton thread in white, black and colors in all cords are restricted now to these sizes:

White—Nos. 8, 12, 20, 30, 36, 40, 50, 60, 70, 80, 90, 100, 120, 150.

Black—Nos. 8, 12, 20, 30, 36, 40, 50, 60, 70.

Colors—No. 50.

Effective January 1, spools are to be made with the smallest practical diameter for 200 yards minimum per spool of white, black, and colored domestic cotton threads for all cords; 100 yards minimum per spool for carpet and button threads; 45 yards minimum per unit for darning cotton.

Size of Spools.

The size of spools now in use for winding carpet and button threads is to be reduced by at least 50 per cent, without any reduction in yardage, and the number of colors manufactured for stock is to be reduced as far as possible. For the manufacturing trade tubes and cones are to be substituted where possible for wooden spools.

One of the largest manufacturers of cotton thread reports that under the plan of conservation he will save next year 407,379 pounds of wrapping paper; 9774 pounds of twine, and 5,146,815 feet of lumber. No estimate has been made of the savings in cardboard boxes, nails, etc., used in the industry.

Lehigh Valley to Use Pennsylvania Terminals

Director General McAdoo announces that, effective September 15, the New York and Jersey City terminals of the Pennsylvania Railroad will be used by the Lehigh Valley Railroad. The present use of the Communipaw terminal of the Central Railroad of New Jersey by Lehigh Valley passenger trains will be discontinued the same date.

It is proposed to send Lehigh Valley trains Nos. 5 and 6, 7 and 8, 9 and 10, 29 and 30, and 11 and 28 into the Pennsylvania station at New York, while the remainder of the Lehigh Valley passenger service, consisting of trains Nos. 1, 27, 33, 40, 22, and 34 will use the Jersey City terminal of the Pennsylvania.

Passengers from down-town New York for trains leaving the Pennsylvania uptown station will use the Hudson and Manhattan Railroad trains connecting at Manhattan Transfer. Hudson and Manhattan trains and Pennsylvania Ferry service also will be used by passengers for the Lehigh Valley trains leaving from the Pennsylvania's Jersey City station. No excursion business of the Lehigh Valley will be handled out of the Pennsylvania stations at New York or Jersey City and the Lehigh Valley will handle its troop trains at Communipaw.

GRAND CENTRAL PALACE LEASED BY U. S. FOR WAR HOSPITAL

The War Department authorizes the following statement:

The Grand Central Palace in New York City has been leased by the Government for use as a surgical reconstruction hospital for the period of the war and three months after, at an annual rental of $395,000 and maintenance. It will be remodeled to accommodate 3,000 patients. The work of making ready the building for the Medical Department was begun on Monday, and it is estimated that the building will be ready for occupancy by December 1.

The lease is the result of long negotiations between the real estate section of the General Staff and the Merchants & Manufacturers Exchange, which owns the building. The land on which it stands is owned by the New York Central Railroad.

The building is located on Lexington Avenue, occupying the full block between Forty-sixth and Forty-seventh Streets. It is 12 stories in height, of fire-proof construction, and is 200 by 275 feet in area. It is now used for various exhibitions and as a permanent headquarters for several hundred firms.

The income to the owners of the building will be approximately the same that it has been for the last year.

STATEMENT BY MR. PALMER.

Alien Property Custodian Clears Up Reported Confusion in Names.

A. Mitchell Palmer, Alien Property Custodian, announces that he had been informed that the public had been confused by the similarity in names of the A. W. Faber plant, of Newark, N. J., the Eberhard Faber Rubber Co., of Newark, N. J., and the Eberhard Faber Pencil Co., of Brooklyn, N. Y.

Mr. Palmer states that the Faber plant in Newark which has been taken over by him is the A. W. Faber plant, and that it should not be confused with the Eberhard Faber Rubber Co., or the Eberhard Faber Pencil Co., because his records disclose no enemy interest in either of the latter companies or in the partnership of Eberhard Faber, which is the sales organization of the Eberhard Faber companies.

FRENCH EMBARGO ON WALNUTS.

The American consul general at Paris has reported in a cablegram of September 3 that a ministerial decree of September 1 permits the exportation of walnuts of the 1917 crop to England and the United States without special authorization, provided shipment is started before September 30. The prohibition against the exportation of walnuts of the 1918 crop remains in effect.—Commerce Reports.

SUNDAY GAS SAVING EXPLAINED BY THE FUEL ADMINISTRATION

Not an Order But a Request That Every True American Should Observe.

The United States Fuel Administration issues the following:

The United States Fuel Administration finds that in regard to the conservation of gasoline many have understood that the plan of not driving pleasure automobiles on Sundays was an order, instead of a request. It has been suggested that the result to be sought might better be gained by a card system or some other method of rationing gasoline. The answer to this is that in the time it would take to inaugurate a card system of rationing, the shortage should be overcome, particularly if there is heed to the calls of conservation with regard to waste, leaks, and the running of motors when not actually in operation. There is further answer that from European experience the machinery of administrating a rationing system to three or four million automobile users is so large and so extremely expensive that it should not be undertaken until the need is extremely great.

Saving in Transportation.

The request for no Sunday driving was limited to the territory east of the Mississippi because the great bulk of the country's gasoline is obtained in the mid-continent fields, in Kansas, Oklahoma, Texas, and Louisiana, while all oil and gasoline sent to the war zone is shipped from our Atlantic seaboard, and transportation is saved by conservation in the East.

People have asked whether they should use their cars for churchgoing; the answer, according to the Fuel Administration, that where church can be reached reasonably in another way the automobile should not be used and that, after all, the conscience of each citizen will be his best guide.

Soda Fountains and Taxicabs.

It has been reported that in a great many cases the proprietors of hotels and restaurants in outlying districts and many operators of soda fountains in the cities refused to serve pleasure-seeking customers who drove out in automobiles. Taxicab operators in most cities refused, last Sunday, to take passengers except on specific trips. They declined all hourly and pleasure trips. Patrons of sight-seeing cars have also been made to feel that by riding on Sunday they are violating the administration's request just as much as the man who drives his own car.

ALASKA COMMISSION SUPPLIES.

Sealed proposals will be received at the office of the General Purchasing Agent for the Alaskan Engineering Commission, Room 422 Bell Street Terminal, Seattle, Wash., not later than 11 a. m., September 23, 1918, for furnishing free of all charges delivered on pier in Seattle, Wash., iron and steel, tools and tin shop supplies, castings, repair parts for locomotives, cotton rags, saw teeth, etc., as per specifications.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor.*

RATES BY MAIL.

	Six months, postage prepaid to foreign countries	4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

President Regrets War Questions Confine Him So Closely To Capital

THE WHITE HOUSE.

I had hoped and had even begun to plan a trip to the western coast and back in connection with the "campaign" for the fourth Liberty loan, not because I believed that the country had any need of being stimulated to subscribe to that loan by anything that I could say, but because I coveted the opportunity to discuss with my fellow-citizens the great undertaking which has made such loans necessary and in which our whole energy and purpose are enlisted. It is the third or fourth time that I have tried to persuade myself that such a trip was possible for me without serious neglect of my duties here, because I have keenly felt again and again the privation of being confined to the Capital and prevented from having the sort of direct contact with the people I am serving which would be of so much benefit and stimulation to me. To my deep regret, I find that I must again give the idea up. The questions which come to me every day, many of them questions of the utmost delicacy and involving many critical matters, convince me that it is not right for me to absent myself from Washington for more than a day or two at a time while the war continues. Questions concerning our dealings with other governments, in particular, it is impossible for me to deal with by telegraph or at a distance from the many sources of information which exist only here. I should feel myself an unconscientious public servant if I yielded to my wish in this matter and took any chance of neglecting even for a short time things that must be decided promptly and in the presence of all the facts.

WOODROW WILSON.

Appointed as Inspector for Fuel Coke Bureau

The United States Fuel Administration announces the appointment of R. C. Glazier, of Johnstown, Pa., as chief coke inspector for the coke bureau.

The object of the institution of the inspection section is to further centralize the work for improvement in the quality of coke, to conserve fuel, and to increase production in the interest of enlarged production of iron and steel.

The chief inspector will enlarge the present field force for the systematic inspection of the product of the ovens both at producing and delivery points.

With the vastly increased demand for coke there has arisen a tendency to speed production to a point where quality became a secondary consideration. The necessity of keeping the standard of quality high without shortening the quantity, has made it advisable to exert systematic efforts to that end.

BOARD OF OFFICERS NAMED.

Special Orders, No. 170:

214. Under the provisions of section 9, Bulletin No. 32, May 24, 1917, War Department, a board of officers to consist of—Maj. Willis F. Manges, Medical Reserve Corps; Maj. Thomas P. Lloyd, Medical Reserve Corps, and Capt. Homer Reese, Medical Reserve Corps, is appointed to meet at United States Army General Hospital No. 14, Fort Oglethorpe, Ga., at the call of the senior member, for the purpose of examining into and reporting upon the capacity, qualifications, conduct, and efficiency of such officers as may be ordered to appear before the board.

CONFERENCES TO MOBOLIZE NATION'S NEGRO LABOR FORCES

The Department of Labor authorizes the following:

The Department of Labor, through Dr. George E. Haynes, director of negro economics, is conducting conferences and organizing State committees for the purpose of mobilizing, placing, and rendering stable and more efficient the negro labor forces of the country in industry and agriculture for winning the war. Recently, state conferences were held in Ohio, Georgia, and Kentucky. State negro workers' advisory committees are now being appointed in these States and Federal State supervisors of negro economics are at work in Ohio, Virginia, Illinois, Mississippi, Georgia, and Florida.

At the Ohio State conference, Dr. Hagerty, professor of sociology at Ohio State University, presided. In his opening remarks he spoke of the Department of Labor as being effectively organized to direct voluntary efforts toward the winning of the war.

Dr. Haynes spoke of the responsibility of the Department of Labor as being that of promoting maximum production in agriculture and industry for winning the war by promoting opportunities for the efficiency of all wage earners.

The Kentucky conference of State negro workers' advisory committee, which was largely attended, was called by Gov. K. O. Stanley in cooperation with Edward W. Hines, chairman of the State council of defense.

In Georgia the conference was called by Gov. Hugh M. Dorsey. This conference was also well attended and resulted in the appointment of a State supervisor of negro economics and the drawing up of plans that will bring good results to both employer and employee.

TREASURY STATEMENT.

September 7, 1918.

RECEIPTS.

Customs receipts	$382,284.90
Internal-revenue receipts:	
Income and excess-profits tax	135,723.60
Miscellaneous	4,356,315.90
Miscellaneous revenue receipts	116,419.88
Total ordinary receipts	4,990,744.28
Panama Canal receipts	
Public-debt receipts	50,362,477.33
Balance previous day	1,277,746,904.20
Total	1,333,100,125.81

DISBURSEMENTS.

Ordinary disbursements	$34,509,881.84
Panama Canal disbursements	172,636.69
Purchase of obligations of foreign Governments	
Purchase of Federal farm loan bonds	
Public-debt disbursements	20,103,503.65
Balance in general fund to-day	1,278,314,103.63
Total	1,333,100,125.81

ASSISTANT TO SECRETARY LANE.

Secretary Lane to-day announced that Mr. Herbert Kaufman, the author and editor, has been appointed as a Special Assistant to the Secretary of the Interior.

PROCEEDINGS OF THE CONGRESS OF THE UNITED STATES BRIEFLY TOLD

SENATE.

The espionage act was amended by the Senate yesterday by the adoption of an amendment intended to reach "slackers" and other offenders. It provides a maximum penalty of 20 years imprisonment or a fine of $10,000 or both for making false report or statements with intent to interfere with the success of the military or naval forces of the United States. These penalties would apply to those who attempt to obstruct the sale of United States war securities of any kind, or whoever promotes insubordination, disloyalty, mutiny, or refusal to perform duty, or to those who in any way injure the United States in the prosecution of the war.

The mineral development bill was taken up in the Senate yesterday. It provides for government production and distribution during the war of minerals and metals essential in the prosecution of the war and appropriates $50,000,000 as a revolving fund for that purpose to be administered by a corporation. Gold, silver, copper, lead and zinc are exempted from the provisions of the law.

Protest By Italy.

The Italian Government, through its ambassador, has protested against the provision of the war-time prohibition bill that would stop the import of wines upon the passage of the law except such as were in transit at the time. This protest was forwarded to the Committee on Foreign Relations yesterday by Secretary Lansing, who called attention to the justice of the complaint of the Italian diplomat. In his letter to Secretary Lansing the ambassador said:

> While, in fact, American wine producers would be allowed a certain period of time for necessary adjustments before prohibition as to their production would take place—that is, until May 1, 1919—Italian producers would see this market closed to them immediately upon approval of the bill in question, so that no time would be given to them to dispose of that part of their production of the current year, for which, in most cases, they have already standing arrangements with wine importers of this country.
>
> I can not conceal that in view of the importance the wine industry has in economic life in Italy, the provision mentioned might have serious consequences at a time when it is most advisable to avoid them.

Land Patents Bill.

The Senate passed a bill authorizing final certificates and patents for lands entered as much as a year ago and on which the homesteader has lived seven months, without requiring compliance with the improvement and cultivation provisions of the homestead law.

In cleaning up the calendar yesterday the bill for the establishment of the national budget system was reached, so that it may be called up for consideration at almost any time. On motion of Senator Kenyon the Appropriations Committee was discharged from further consideration of the measure.

Relief for wives and other dependents of American officers made prisoners by Germany was demanded by Senator Borah in a speech. Reported action that the pay and allowances of such officers have been cut off through a ruling of the law officers of the Treasury was the cause for the speech. Mr. Borah indicated that legislation would be submitted providing for the continuance of the pay of such imprisoned American officers.

William H. Martin, of Petersburg, Va., filed with the Committee on Finance objections to the proposed tax in the war-revenue bill on cigarettes for export. George P. Hampton, managing director of the farmers' national headquarters, told the committee farmers are being persecuted because they ask that a large portion of the cost of the war be paid by current taxes. Senator Dillingham filed with the committee a letter from a manufacturer of pipe organs protesting against the proposed 10 per cent tax on sales of organs.

HOUSE.

By a unanimous vote the House adopted the Senate resolution empowering the President to establish dry zones around mines, shipyards, and munitions plants. The war-revenue bill was laid aside for a few moments while this action was taken, Chairman Webb, of the Judiciary Committee, explaining that Acting Secretary of War Crowell had impressed the Members with the importance of the resolution as a war measure.

Consideration of the $8,000,000,000 war-revenue bill was continued. Representative Fordney, of Michigan, ranking Republican member of the Ways and Means Committee, charged that it had been disclosed that the Government had agreed to pay the income tax and all other Federal taxes of those engaged in the Hog Island shipyard and similar enterprises. Representative Moore, of Pennsylvania, a Republican, in discussing the bill, declared the bulk of the taxes would be paid by northern States. Both speakers declared their purpose to try to amend the bill, but even if unsuccessful would vote for it.

WAR INDUSTRIES BOARD GUIDE TO DRY GOODS MEN ON PRICES

The War Industries Board authorizes the following:

At a recent conference with Robert S. Brookings, chairman of the Price Fixing Committee of the War Industries Board, John V. Farwell, chairman of the committee for naming maximum prices for the wholesale dry goods trade, announced that the committee has issued a letter to dry goods merchants which covers in detail maximum prices on different fabrics so adjusted as to eliminate excess prices on staple cotton goods from manufacturer to consumer.

"Fine Spirit" Appreciated.

The War Industries Board appreciates the fine spirit shown by the dry goods merchants in their response to the President's proclamation and request that all concerned in the distribution of cotton goods should meet the spirit of the agreement made between the manufacturers of cotton goods and the Price Fixing Committee last July in order that the benefits of stabilization and lower prices should carry through to consumer.

Mr. Brookings assured the manufacturers through Mr. Farwell of his appreciation of their attitude, and while not desiring to check the prices they had agreed upon as being fair prices, said he assumed that the manufacturers knew them to be fair and that the prices would be accepted by the trade.

Mr. Farwell, and the joint committee, representing the National and the Southern Wholesale Dry Goods Association, emphasized the desire of the wholesale dry goods merchants to cooperate to the full. He stated the committtee had gathered much information as to the cost of doing business from both large and small distributors, and that it had agreed upon the maximum prices for several well-known staple cotton goods, with the request to the trade that similar goods should be priced consistently.

The letter sent the membership of the two dry goods associations by their joint commmittee states:

"Responding as quickly as possible to the proclamation of the President, regarding the elimination of excess prices from manufacturer to consumer, especially on staple goods used by the masses, and recognizing that the scarcity of many cotton goods affords an opportunity to obtain such prices, and also that there is a great difference of opinion as to what are reasonable selling prices in the wholesale markets of the country, where the expense of doing business and the character of goods sold varies considerably, a committee of the National Wholesale Dry Goods Association, in conjunction with a similar committee of the Southern Wholesale Dry Goods Association, both appointed by their respective organizations, with power to act, ask all their members and the trade generally to respect the letter and spirit of the President's proclamation.

"To that end, and in conformity with prices already made on a few items in the primary markets, your committees request, no matter what the shortage of goods may be, that no dry goods jobber ask more than the maximum prices on the articles named.

"Any jobber may sell these goods at as much less than these prices as he may desire, or as competition may require, and it is expected that in many cases they will be so sold.

"These prices are simply the maximum, which should not be exceeded under any circumstances.

"It is also understood that these maximum prices are made without specific agreement with the authorities in Washington, but with their knowledge of the desire and intent of the National Wholesale Dry Goods Association and the Southern Wholesale Dry Goods Association to carry out the spirit and letter of the President's proclamation."

We are giving our work, our time, and our money, but "they" are giving their lives.

REVISION OF SELECTIVE SERVICE REGULATIONS

(Continued from page 1.)

regulations make it plain that the district boards are to remain the judges over these claims. The regulations define the duties of the industrial advisers, and set forth clearly that such facts as these advisers place before the district boards, including the preference lists issued by the priorities division of the War Industries Board, can neither bind the district board in its conclusions concerning the necessary character of a particular industry, occupation, or employment, nor prevent the district board from holding as necessary any industry, occupation, or employment, including agriculture, not presented as such by these advisers or contained in such lists.

Text of Extract.

Following is the extract from the revised regulations mailed to the local and district boards:

C. CLASSIFICATION WITH RESPECT TO ENGAGEMENT IN INDUSTRIES, OCCUPATIONS, OR EMPLOYMENTS, INCLUDING AGRICULTURE.

Section 80. Principles governing classification with respect to engagement in industries, occupations, or employments, including agriculture, found to be necessary to the maintenance of the Military Establishment or the effective operation of the military forces or the maintenance of national interest during the emergency.

District boards are charged with the duty of selecting the individuals whose engagement in industry, including agriculture, or whose occupations or employments are such as to require their continued service in civil life rather than in the Army.

In order to provide for the necessary adjustments between the necessities of the Military Establishment and the requirements of the industries, occupations, and employments, including agriculture, found to be necessary to the maintenance of the Military Establishment, the effective operation of the military forces, and the maintenance of the national interest during the emergency, there shall be appointed by each district board three persons to be known as industrial advisers to the district board.

One such person for each district board shall be nominated by the Department of Labor, one by the Department of Agriculture, and one by each district board, who shall thereupon be appointed by the respective district boards.

Whenever, in the discretion of the President more than three such industrial advisers are required by a district board, the President may call upon the Department of Labor, or the Department of Agriculture, or the district boards to nominate such additional industrial advisers, who shall thereupon be appointed by each district board.

Such industrial advisers so appointed by each district board shall not in any sense be members of such district board, shall have no right to vote at any meetings thereof, and shall have and exercise only the rights, duties, powers, and functions herein specifically given.

Such advisers shall have the right to furnish all pertinent information to the district board and may attend meetings of the board upon request of the board to which they are attached.

Such advisers may place before the district board at its meetings, or at such other time as the board may request, all facts and information in their possession as to the preference lists issued by the Priorities Division of the War Industries Board. Such lists shall not be regarded as binding upon the district board in its conclusions as to whether or not any particular industry, occupation, or employment, including agriculture, is a necessary industry, occupation, or employment within the meaning of the law and regulatons, nor shall such lists prevent the district board from holding as necessary any industry, occupation, or employment, including agriculture, not contained therein. Such preference lists and other facts and information in the possession of such advisers will supplement the information in the possession of the district boards and will also be used to assist the district boards in dealing with specific cases.

Inasmuch as the United States Employment Service under the Department of Labor has already established throughout the Nation State advisory boards and numerous recruiting agencies in divisions of the country, and is therefore familiar with the needs for skilled labor in each community and the supply in each community, the advice of the industrial adviser nominated by the Department of Labor will be of great value to the district boards in arriving at their decisions as to whether or not individuals engaged in certain industries, occupations, or employments are engaged in work necessary to the maintenance of the Military Establishment, the effective operation of the military forces, or the maintenance of the national interest during the emergency.

The Department of Agriculture has special facilities for being informed as to the supply of labor for agricultural purposes and the demand for such labor in the various communities of the Nation, and such information will be, through the adviser nominated by the Department of Agriculture, available to the district boards and helpful in assisting such boards in determining the claims by or in respect of registrants based upon their engagement in agriculture.

The necessity of not seriously interfering with certain occupations and employments, such as financial, commercial, educational, hospital work, care of the public health, or with the conduct of certain other activities necessary to the public welfare and the prosecution of the war, requires that the district boards have the cooperation of such advisers so that persons necessary in such activities be not removed therefrom. To this end the adviser nominated by the district board should bring to the attention of the district board the questions as to whether or not individuals engaged in some particular industry, occupation, or employment are so necessary thereto as to outweigh the benefit to the Nation should they be drafted into the Army.

Such advisers shall, under rules to be prescribed by the local boards, have access to the questionnaires and other records in the files of the local boards, and shall confer with persons engaged in various industries, occupations, and employments for the purpose of having the cases of certain individual registrants, by whom or in whose behalf no claim for deferred classification has been made, presented to the district board for consideration and determination as to whether or not such registrants should be placed in a deferred class.

If any such adviser files with the district board a claim on Form 1001–A for deferred classification on the ground of a registrant being engaged in a necessary industry, occupation, or employment, including agriculture, the district board shall forward such claim to the local board having jurisdiction, and upon receipt thereof it will be the duty of such local board to certify the questionnaire and record of any such registrant to the district board for consideration, although no claim by or in respect of such registrant for deferred classification has been made or such registrant has waived deferred classification, provided the day and hour fixed to report for military duty has not arrived. If the information and the affidavits necessary for the classification of the registrant because of his engagement in a necessary industry, occupation, or employment, including agriculture, are not contained in the questionnaire of such registrant, it shall be the duty of such local board to give the opportunity by reasonable extension of time to those interested in obtaining a deferred classification, to furnish the information and supply the affidavits required by the questionnaire and the regulations. Pending the final classification of such registrant he shall not be inducted into military service.

It shall be the duty of such advisers to confer with the managers and heads of various industries, and those familiar with the needs in occupations and employments including agriculture, and instruct such persons as to their right under the regulations to file a claim for deferred classification in respect of any registrant who has failed or refused to file a claim for deferred classification in his own behalf or who has waived his claim for deferred classification.

Such advisers should in all ways cooperate with the district boards in order that the information in their possession may at all times be available to the district boards and be made use of in the work of classifying registrants.

If, under the authority of Rule XXVII, section 101, a local board determines to consider a case for deferred classification because the registrant is engaged in a necessary industry, occupation, or employment, including agriculture, notwithstanding no claim for deferred classification on that ground has been made, the local board shall, after indorsing the recommendation on the questionnaire, forward the questionnaire and record to the district board having jurisdiction. The district board shall thereupon consider the case and proceed to classify the registrant, notwithstanding the fact that no claim for deferred classification by or in respect of the registrant has been made.

SECTION 81. General classification rules applicable to industries, occupations, or employments, including agriculture.

Rule XV. The words "persons engaged in industries, occupations, or employments, including agriculture," as used in the selective service law, shall not be construed to mean that a person so engaged is entitled to deferred classification merely by reason of the fact that the industry, occupation, or employment, taken as a whole, or agriculture taken in its entirety, is necessary to the maintenance of the Military Establishment, or the effective operation of the military forces, or the maintenance of national interest during the emergency. In order to support such deferred classification the evidence must establish that the registrant is engaged in a particular industrial or agricultural enterprise, or occupation, or employment, and that the particular industrial or agricultural enterprise, or occupation, or employment is "necessary" in the sense recited in Rule XVII.

Rule XVI. In acting on any claim for deferred classification based on engagement in a particular industry, or occupation, or employment, or agricultural enterprise, the board shall first proceed to determine whether such industry, or occupation, or employment, or agricultural enterprise is "necessary" in the sense recited in Rule XVII. If the board does not find that such industry, or occupation, or employment, or agricultural enterprise is "necessary" in such sense, the claim is concluded, and the registrant shall be classified in Class I.

If the board determines that the industry, or occupation, or employment, or agricultural enterprise, is "necessary," it will then proceed to determine whether the registrant is "necessary" thereto in the sense recited in Rule XVIII, and in the capacity recited in any of the various rules in the classification schedule. If the board does not find that the registrant is "necessary" in such sense and in any such capacity, the claim is concluded, and the registrant shall be classified in Class I.

Rule XVII. The word "necessary" as applied to any industry, or occupation, or employment, or agricultural enterprise, within the meaning of these regulations, shall be taken to import that the discontinuance, the serious interruption, or the materially reduced production thereof, or the discontinuance or serious interruption thereof will result in substantial material loss and detriment to the adequate and effective maintenance of the military establishment, or the effective operation of the military forces, or the maintenance of national interest during the emergency.

A particular industry, or occupation, or employment, or agricultural enterprise shall be found to be "necessary" only when it is shown that it is contributing substantially and materially to the maintenance of the military establishment, or the effective operation of the military forces, or the maintenance of national interest during the emergency; and in the case of a particular agricultural enterprise, that it is producing an appreciable amount of agricultural produce over and above what is necessary for the maintenance of those living on the place.

Rule XVIII. The word "necessary" as applied to the relation of a registrant to an industry, or occupation, or employment, or agricultural enterprise within the meaning of any particular rule governing deferred classification in these regulations shall be taken to import:

(1) That the registrant is actually and completely engaged in the industry, or occupation, or employment, or agricultural enterprise, in the capacity recited in any such rule, and that he is competent and qualified in that capacity.

(2) That the removal of the registrant would result in direct, substantial, material loss and detriment to the effectiveness of the industry, or occupation, or employment, or agricultural enterprise.

(3) That the available supply of persons competent in the capacity recited in the rule is such that the registrant can not be replaced in such capacity without direct, substantial, material loss and detriment to the adequate and effective operation of the industry, or occupation, or employment, or agricultural enterprise.

NOTE.—In applying Rule XVIII the Board should consider generally—

(1) The length of time the registrant has been engaged in such capacity, and especially whether the circumstances of his engagement are such as to convince the board that he is

REVISION OF SELECTIVE SERVICE REGULATIONS

not now so engaged for the primary purpose of evading military service.

(2) The nature of the claimant's study, training, or experience and the extent and value of his qualification for the capacity in which he is engaged.

(3) The actual conditions which would result from his removal.

SECTION 82. Class I (continued)—Agriculture.

Rule XIX. In Class I shall be placed:

(e) Any registrant not found to be engaged in a "necessary" agricultural enterprise, or, if found to be engaged in such an enterprise, not found to be "necessary" to the effective operation of the enterprise in any capacity recited in Rules XX, XXI, or XXII.

SECTION 83. Class II (continued)—Agriculture.

Rule XX. In class II shall be placed:

(c) Any registrant found to be engaged in a "necessary" agricultural enterprise, and found to be "necessary" to such enterprise in the capacity of a farm laborer especially fitted for the work in which he is engaged.

SECTION 84. Class III (continued)—Agriculture.

Rule XXI. In Class III shall be placed:

(j) Any registrant found to be engaged in a "necessary" agricultural enterprise, and found to be "necessary" to such enterprise in the capacity of an assistant, associate, or hired manager of such particular enterprise or of a substantial and integral part thereof.

SECTION 85. Class IV (continued)—Agriculture.

Rule XXII. In Class IV shall be placed:

(c) Any registrant found to be engaged in a "necessary" agricultural enterprise and found to be "necessary" to such enterprise in the capacity of sole managing, controlling, and directing head of the enterprise.

Section 86. Class I (continued)—Industry, occupation, or employment.

Rule XXIII. In Class I shall be placed—

(f) Any registrant not found to be engaged in a "necessary" industry, or occupation, or employment; or, if found to be so engaged, not found to be "necessary" to the effective operation thereof in a capacity recited in Rule XXIV, XXV, or XXVI.

Section 87. Class II (continued)—Industry, occupation, or employment.

Rule XXIV. In Class II shall be placed—

(d) Any registrant found to be engaged in a "necessary" industry, or occupation, or employment, and found to be "necessary" therein in the capacity of a laborer, worker, or employee, especially fitted for the work in which he is engaged.

Section 88. Class III (continued)—Industry, occupation, or employment.

Rule XXV. In Class III shall be placed—

Any registrant found to be engaged in a "necessary" industry, or occupation, or employment, and found to be "necessary" therein in the capacity of—

(k) A highly specialized expert.

(l) An assistant or associate manager of the industry, or in the occupation, or employment, or a manager of a substantial integral part thereof.

Section 89. Class IV (continued)—Industry, occupation, or employment.

Rule XXVI. In Class IV shall be placed—

(d) Any registrant found to be engaged in a "necessary" industry, or occupation, or employment, and found to be "necessary" therein in the capacity of sole managing, controlling, and directing head thereof.

NOTE 1.—Persons claiming to be necessary to organizations that are claimed to be necessary to the maintenance of the Military Establishment or effective operation of the military forces or the maintenance of national interest during the emergency, such as American Red Cross, Y. M. C. A., Knights of Columbus, Jewish Welfare League, may make claims as being engaged in occupations or employments under sections 80 to 89, inclusive, and such claims must be supported by affidavits as provided in respect of industrial claims in the questionnaire.

Explanatory Memorandum.

Following is the memorandum to be inserted in the questionnaire:

Subsequent to the printing of the questionnaire Congress amended by the act approved August 31, 1918, the selective service law by substituting for the provision wherever occurring in section 4 of the said law: "Persons engaged in industry including agriculture," the words:

"Persons engaged in industries, occupations, or employments, including agriculture."

The questionnaire was based on the words of the original act, and this memorandum explains the effect of the amendment and the manner in which the questionnaire as printed may be used for the purpose of making claims by or in respect of persons engaged in occupations or employments.

The effect of the amendment of August 31, 1918, is to permit claims to be made by or in respect of "necessary" persons engaged in occupations or employments found to be "necessary" to the maintenance of the Military Establishment, or the effective operation of the military forces, or the maintenance of national interest during the emergency.

The decision as to whether or not any particular occupation or employment is "necessary" for any of the purposes specified in the act of Congress and as to whether or not the registrant is "necessary" therein, rests with the district boards, subject only to the duty of the local boards under Rule XXXII, section 101, of the Selective Service Regulations to make their recommendations.

However, the local boards have original jurisdiction, subject to the right of appeal to the district boards, of the claims of registrants who are engaged in the occupations or employments specifically designated in section 4 of the Selective Service Act as exempt or entitled to temporary discharge, that is, deferred classification, under Rules and Regulations prescribed by the President namely officers, legislative, executive and judicial of the United States and of the several States, Territories and the District of Columbia, ministers of religion, students of divinity, medical students, county and municipal officials, including firemen and policemen, customhouse clerks, persons employed by the United States in the transmission of the mail, artificers and workmen employed in the armories, arsenals and navy yards of the United States, such persons employed in the service of the United States as the President may designate, pilots and mariners.

Under the act as amended, claims by or in respect of registrants engaged in occupations or employments other than those specifically named in the act come within the exclusive original jurisdiction of the district boards for decision as to whether or not the particular occupation or employment is "necessary" for one of the purposes specified in the act and the registrant is "necessary" thereto, the local boards only making their recommendations.

Registrants, or others making claims in respect of registrants, engaged in agriculture will record their claims in the proper divisions on page 1 of the Questionnaire relating to agricultural claims. The claim that a registrant is engaged in a "necessary" agricultural enterprise and is "necessary" thereto in the capacity of a farm laborer especially fitted for the work in which he is engaged should be made in Division C, Class II, on page 1 of the Questionnaire.

Registrants or others making claims in respect of registrants engaged in "necessary" industries, occupations, or employments, other than agriculture, will record their claims in the proper divisions on page 1 of the Questionnaire relating to industrial claims.

The claim by or in respect of any registrant that he is engaged in a "necessary" industry or occupation or employment and is "necessary" therein in the capacity of a laborer, worker, or employee especially fitted for the work in which he is engaged, should be made in Division D, Class II, on page 1 of the Questionnaire.

The claim by or in respect of any registrant that he is engaged in a "necessary" industry or occupation or employment and is "necessary" therein in the capacity of a highly specialized expert, should be made in Division K, Class III, on page 1 of the Questionnaire.

The claim by or in respect of any registrant that he is engaged in a "necessary" industry or occupation or employment and is "necessary" therein in the capacity of an assistant or associate manager of the industry, or in the occupation or employment or a manager of a substantial integral part thereof, should be made in Division L, Class III, on page 1 of the Questionnaire.

The claim by or in respect of any registrant that he is engaged in a "necessary" industry or occupation or employment and is "necessary" therein in the capacity of sole managing, controlling, and directing head thereof, should be made in Division D, Class IV, on page 1 of the Questionnaire.

Such claims, other than claims based on engagement in agriculture, must be made and information in support thereof be given under Series XI, Industrial Occupation, of the Questionnaire, and the claim supported by the affidavits required on page 15 of the Questionnaire.

Additional affidavits may be filed with the Questionnaire when deemed necessary by the registrant or by the person making the claim in his behalf to fully set forth the facts in support of the claim.

The revised regulations in respect of registrants engaged in industries, occupations, or employments, including agriculture, will be found in sections 80 to 89, Selective-Service Regulations.

Sealed Bids Wanted

General Engineer Depot, United States Army, 1438 U Street, Washington, D. C.—Sealed bids are wanted until dates indicated under circular proposals as follows for furnishing miscellaneous supplies for the General Engineer Depot. Additional information may be had upon application to the purchasing officer as above:

Proposal No. 1098, opening of September 17, 1918.—9 electric transformers, as per specifications.

Proposal No. 1100, opening of September 17, 1918.—Blacksmith's equipment and supplies, as per specifications.

Proposal No. 1101, opening of September 17, 1918.—Valves, injectors, grease cups, and gauges, as per specifications.

Proposal No. 1102, opening of September 17, 1918.—140 drag scrapers, as per specifications; 140 wheeled scrapers, as per specifications.

Proposal No. 1103, opening of September 17, 1918.—Pipe fittings, as per specifications.

Proposal No. 1104, opening of September 13, 1918.—150,000 sheets, 4 by 8 inch wall board, as per specifications.

Proposal No. 1105, opening of September 13, 1918.—1,176 steel blocks with hook; 588 double steel blocks with hook; 1,176 7-inch steel blocks with hook; 588 6-inch double steel blocks with hook.

Proposal No. 1107, opening of September 20, 1918.—120,000 feet two-conductor braided cable, as per specifications; 50 reels.

LOSES HIS FOOD LICENSE.

Houlton, Me., Dealer Penalized by the United States Administration.

The Food Administration issues the following:

For unfair practices in business the Food Administration license of F. N. Willett, of Houlton, Me., has been revoked.

Last February Willett sold to F. W. Gibbons & Co., 600 sacks of potatoes to be delivered in Boston. Gibbons claimed that after Willett had shipped a car of frozen potatoes, he cancelled the contract for this 600 sacks. The matter was brought to the attention of the Food Administration at Washington and both agreed to arbitration.

Willett had received $600 on the car-lot consignment of potatoes and deposited his check for this amount with the Food Administration. Gibbons gave a check for $1,950, which was the total amount claimed by Willett. The Gibbons check was paid on presentation but Willett's check was refused payment by the bank. Willett was notified several times to make the check good and upon refusing, his license was ordered cancelled.

NEW DIRECTOR IS APPOINTED FOR THE FOUR-MINUTE MEN

William H. Ingersoll, widely known in the business world, is now national director of four-minute men of the Committee on Public Information, in place of William McCormick Blair, resigned, to enter a field artillery training camp.

Mr. Ingersoll was born in Lansing, Mich., on March 22, 1879. After graduating from high school, he took up the study of electrical engineering. In 1901 he went into business with Robert H. Ingersoll & Bro. in New York, where he has since continued, with the exception of brief periods devoted to the solution of special sales and advertising problems on the road and as Canadian manager for the same company.

He is widely known as a speaker and writer upon advertising and merchandising generally, and has been very active in advertising organization and research. He was president of the Advertising Men's League of New York, 1909 to 1914; first chairman of the educational committee of the Association of National Advertisers, 1911–12; chairman of the national commission of the Associated Advertising Clubs of the World, 1914 to 1915. He is a regular nonresident lecturer of Harvard Business School and New York University, and lectures also at many other universities on subjects of sales management and advertising.

His wide experience as an organizer of forces and planner of campaigns will be of great value to the four-minute men in their work of carrying official messages from the various departments of the United States Government to the people in all parts of the country. This organization now has enrolled some 40,000 speakers in over 6,000 communities, from Alaska to the Canal Zone, and in Hawaii, Porto Rico, the Philippine Islands, Guam, and Samoa.

Army Officers Assigned to State Fuel Agencies

The War Department authorizes the following:

Twenty-two officers and civilians formerly handling fuel matters for the Ordnance Department and located in various production districts have been transferred to the Quartermaster Corps and have been assigned, under the direction of the Fuel and Forage Division of the corps, to the offices of the State fuel administrators in New England and the States east of the Mississippi River.

The location of these representatives of the fuel branch follows out the decentralization plan of the Fuel Administration, and while they will be located in the State fuel administrators' offices, their duties will be to assist all War Department contractors in securing their fuel requirements. They will also be of service generally to all coal consumers who are supplying equipment or material to the War Department.

A weekly meeting of the representatives of the various corps or bureaus of the War Department is held in the fuel branch of the Fuel and Forage Division of the Quartermaster Corps, at which are discussed all matters pertaining to fuel assistance to Army contractors.

Clothing for Army Discussed by General Wood

(Continued from page 2.)

the camps) we know the totals but we don't know the distribution of the draft until 30 days before. If the camp quartermaster is short in any article, he calls on the depot, which is a warehouse, and the warehouse calls on the purchasing division here and we notify the factory. It is a big problem but it is being worked out on business lines; at least, I think it is. It has stood the test for the last five months. The principal difficulty in the past was that they didn't know where their material was.

There are three main divisions of the Quartermaster Corps. We have the purchasing, the storage and distribution, and what we call our supply control, who get the military program, fill out the requirements, and then deduct the stocks on hand and decide what to purchase.

Question. What is the present status of the officers' cloth?

Answer. That was finally approved last month by the General Staff and we are now buying cloth and getting the proposals for the uniforms. We expect to have the cloth and uniforms on sale about the middle of November.

Question. These standard cloths have been prescribed?

Answer. They have been prescribed and we are buying them.

Question. Will the officers have to buy only ready-made uniforms?

Answer. We have made a change from the original plan. We sell the cloth and we also sell a ready-made uniform. Now the officer has his choice between buying a ready-made uniform or buying the material and having one made to order. He makes his own arrangements with the tailor. We are trying to get the tailors committed to a schedule price. We are working on that now.

Question. It would mean a big thing in the cost of living to every officer to be able to get his uniform ready-made. Will it save much?

Answer. It should save the officer a great deal. We think that the ready-made uniform should be suitable for 90 per cent of the officers.

Question. Is it proposed to have this standard cloth in sufficient quantity to outfit all officers?

Answer. The officer won't be allowed to buy anything but the standard cloths, but he is permitted to have them made up where he wants them.

Question. You think by November 15 there will be sufficient quantities of standard cloth ready?

Answer. I believe so.

Outfitting of Troops.

Question. As to the outfitting of troops—how are they fixed on the other side?

Answer. Every man is outfitted before he goes over, so they don't have the problem of shifting from cotton to wool. Every man, before he goes over there, gets his full equipment from the concentration camps, so over there it is simply a question of maintenance. Here there is an initial issue for the new men coming in, plus the great body of men shifting from cotton to wool. They don't carry any cotton clothing over there. There are sufficient stocks of woolen clothing over there to insure every man having a full supply. This stock report cabled from Gen. Rogers shows they are fixed up all right except on a few unimportant items. They have got ample stocks and we are making them large shipments. We will ship 1,000,000 blankets this month.

Question. We heard that the Quartermaster Department was buying a lot of uniforms and equipment for Red Cross nurses.

Answer. Not for Red Cross nurses, but for Army nurses. We got a cable from France to buy, provide, and ship, which we are doing now.

Question. That includes waists, skirts, and hats?

Answer. I think so. There is a cablegram from Gen. Rogers which shows the requirements.

Question. General, is there anything about the operations of the Quartermaster Corps that you would like us to know that we haven't thought of?

Answer. No. As I have just said, the most important thing to us right now is the problem of distribution this fall. Our reclamation work is assuming big proportions. We are getting that on a better basis all the time. We are getting over 300,000 pairs of shoes a month repaired and we have right now in the course of reclamation 700,000 blankets. That being a new thing in our Army, it was hard to get it organized and hard to get it started. We have undoubtedly made some mistakes. I expected to have our report for August operations here to-day.

Departmental Efficiency.

Question. To sum the entire situation up, the Quartermaster Department is now 100 per cent efficient. Then the only difficulty is in distribution?

Answer. We are 100 per cent efficient in this—that we are meeting and have met for the past five months every demand put on us. We are not 100 per cent efficient in our operations; in other words, no department could be and be expanding all the time. It may take four men out of these offices to do the work that three men should do. In the camps there may be 10 men working where there should be five. In the reclamation work we may, in some instances, pay a dollar to repair 50 cents worth of material. This is incidental to a new and rapidly expanding organization. As an operating organization, I believe we are right now as efficient, or more efficient than any other department in the Army. The Staff gave us a military program in March before the Picardy drive, that they are going to call about 100,000 men a month. They changed this to 125,000 the first of April, to 300,000 the first of May, to 250,000 the first of June, and to 345,000 the first of July, to be called during those months instead of the original 100,000. Now, mind you, that increase alone was more than all the September draft, but in spite of it we got the stuff, got the troops, and outfitted every man that went overseas—outfitted him complete from these concentration camps. I think our lineup is right now.

Better than money because they earn money; buy a WAR-SAVINGS STAMP TO-DAY.

LIST OF CASUALTIES REPORTED AMONG THE UNITED STATES FORCES OVERSEAS

ARMY

SECTION NO. 2, SEPTEMBER 9, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	17
Missing in action	72
Wounded severely	44
Wounded slightly	1
Wounded (degree undetermined)	136
Died of wounds	18
Total	288

Killed in Action.

LIEUTENANTS.

Harrison A. Dickson. Mrs. Charles E. Dickson, 403 South Seventh Street, Springfield, Ill.

Vincent S. Manning. Mrs. James D. Manning, 2862 Boulevard, Jersey City, N. J.

CORPORALS.

Martin J. Kiah. Mrs. Dell Greely, 1300 Grant Street, Bay City, Mich.

Abraham Zippin. Nathan Barofsky, 57 Henry Street, New York, N. Y.

PRIVATES.

Charles Cottingham. Mrs. J. D. Cottingham, Stonewall, Okla.

Eddie C. Lund. A. M. Lund, Siren, Wis.

Joseph Majewski. Alex Bietkienuez, 5438 Lake Park Avenue, Chicago, Ill.

Sterling M. Peek. Mrs. Mary Peek, Florey, Tex.

Howard S. Rising. Mrs. Grace A. Rising, Lockport, Niagara County, N. Y.

Charles T. Sampson. C. A. Sampson, Russell, Pa.

Carl J. Smith. Ole Smith, Washburn, Wis.

Lee Trammell. Frank Trammell, Guadalupita, N. Mex.

John Aylor. William M. Aylor, Seminole, Okla.

Harry Broshanso. Ivan Broshanso, Babanca, Kieve, Russia.

H. P. Caton. Mrs. H. L. Caton, 6401 South First Street, St. Joseph, Mo.

Emit E. Mitchell. J. R. Wilcoxon, Walter, Okla.

Henry F. Peterson. Louis Sorenson, Arlington, Nebr.

Died from Wounds.

SERGEANTS.

Frank E. Andrea. Mrs. Chris. Stoen, R. F. D. No. 1, Beresford, S. Dak.

Clifford W. Cahill. Joseph H. Cahill, 415 Edgewood Street, Hartford, Conn.

CORPORALS.

Victor Hubert Handley. Mrs. Estella M. Crinnion, 1218 Delaware Street, Berkeley, Cal.

Berrard Henry Huelsman. Mrs. Katherine Huelsman, 613 East Eighteenth Street, Covington, Ky.

PRIVATES.

William J. Birmele. Mrs. Mary Birmele, 103 Bremen Street, Newark, N. J.

Arthur C. Christofferson. Harry Ristau, 2021 Vleit Street, Milwaukee, Wis.

William J. Cooney. Edward C. Cooney, Cherry Valley, Mass.

Thomas E. Duncan. Mrs. Bessie P. Duncan, 332 Tenth Street, Portland, Oreg.

Elmer A. Feldman. Edward Feldman, R. F. D. No. 3, Quincy, Wis.

Joe Fuller. Albert I. Fuller, Arlington, Colo.

John F. Lehman. Mrs. Mary Marie Lehman, Coles Lane, Far Rockaway, N. Y.

Kenneth Lewis. Mrs. Hattie B. Lewis, 2008 Twelfth Street NW., Washington, D. C.

Hobson Maddox. Theado Maddox, New Brockton, Ala.

Clifford B. Mason. Mrs. Clifford B. Mason, 234 West Canton Street, Boston, Mass.

Oliver Peterson. Nels Peterson, Twin Valley, Minn.

William L. Spencer. A. J. Spencer, Milan, Ga.

Frank Stanke. Mrs. Marie Stanke, 1643 Passyunk Avenue, Philadelphia, Pa.

Don S. Sutton. Mrs. Annie Lawson Sutton, R. F. D. 5, Lumberton, N. C.

Wounded Severely in Action.

Mechanic Donald John McDonald. Mrs. Brunnett McDonald, Huron Street, Cheboygan, Mich.

PRIVATES.

Dennie Ball. John D. Ball, 2941 Roosevelt Street, Kansas City, Mo.

Otto F. Boese. August Boese, Kalispell, Mont.

Clarence D. Brown. Mrs. James Lawrence, 826 Bay Street, Clifton, N. Y.

Angelo Campanello. Mrs. Mary Campanello, 292 Farmont Avenue, Newark, N. J.

Edward Fitzgerald. J. B. Campbell, 3213 Filbert Street, Oakland, Cal.

Gabriel P. Homsley. A. A. Ruf, Fairfield, N. Dak.

John Kaniewski. Martin Kaniewski, 3035 Farwell Street, Chicago, Ill.

Richard Krueger. Peter Christensen, R. F. D. 13, Milton Junction, Wis.

Blas Levandowsky. Mrs. Josephine Levandowsky, 114 Randolph Street, Wausaw, Wis.

Charley W. Malone. Mrs. A. L. Malone, R. F. D. 2, Sallis, Miss.

John Roy Miller. Mrs. Julia Miller, Elkton, Mich.

Clayton. Lesley Murray. Alonzo Murray, Mackinaw City, Mich.

Stephen N. Pappas. Andrew Bell, Front Street, Worcester, Mass.

Marion E. Fowler. Mrs. Mary Jane Scott, Novinger, Mo.

Charles E. Schaffer. Mrs. Minnie Schaffer, R. F. D. 1, Hunt, W. Va.

Severin Tangen. Hans Tangen, Box 23, Fosston, Minn.

John J. Vogely. John U. Vogely, R. F. D. 1, Benkelman, Nebr.

George A. Wright. Mrs. Nettie Wright, Casselton, N. Dak.

Oscar Peterson. Christ Peterson, Popejoy, Iowa.

Roy Pierce. George W. Pierce, Corning, Ark.

Michael Quinn. Daniel Quinn, 180 Sand Street, Brooklyn, N. Y.

Ernie P. Robinson. George N. Robinson, R. F. D. 2, Box 38, Pioneer, Tenn.

Walter O. Schlatter. Mrs. Clara E. Schlatter, 607 Riverside Avenue, Fort Wayne, Ind.

William B. Slattery. Mrs. William Slattery, Luna, N. Y.

Paul M. Spehar. Michael Spehar, Chassell, Mich.

Noureddin E. Steel. Warren Steel, 908 Syndicate Building, Oakland, Cal.

Casper Stelmachowski. Mrs. Mary Grocka, 1216 Seventh Avenue, Milwaukee, Wis.

Joseph Stokes. Adam Stokes, 45 Hudson Avenue, Brooklyn, N. Y.

Lee Tounsen. Mrs. Pearl Tounsen, general delivery, Kennet, Mo.

Edmund Tyborczyk. August Tyborczyk, 1067 Weil Street, Milwaukee, Wis.

Robert Urban. Mrs. Frances Wesely, 1443 Avenue A, New York, N. Y.

Frederick P. Vinson. Thomas J. Vinson, Gneiss, N. C.

Glen G. Wagner. Henry Wagner, 8 South Third Street, Richmond, Ind.

Morris C. Watson. Clinton W. Watson, 623 Dover Place, St. Louis, Mo.

Ulna Whitaker. Sam Whitaker, Caney Springs, Tenn.

Lawrence Thomas White. Mrs. Minnie White, 119 North Fifth Avenue, Ann Arbor, Mich.

William H. Whitlock. Mrs. Mattie Parrott, R. F. D. No. 2, box 171, C. Bedford, Ind.

Percy John Wicks. Inza Reader Wicks, R F. D. No. 1, box, 7, Carson City, Mich.

Fred Wilcox. Mrs. Tilty Lichtener, R. F. D. No. 2, Morley, Mich.

Charlie Wright. Mrs. Cynthia Smith, Middlecreek, Ky.

Nelson Wright. Mrs. Clara Wright, 506 Linwood Avenue, Laporte, Ind.

Albert Wutrich. Arnold Wutrich, Beloit, Wis.

Nicholas Yakovich. Nick Merich, general delivery, West Pullman, Ill.

Wounded (Degree Undetermined.)

Lieut. Harley B. Gaston. Samuel J. Gaston, Lowell, N. C.

SERGEANTS.

Frederick Aloysius Dockendorf. Mrs. Irene Dockendorf, 658 West Eighteenth Street, Chicago, Ill.

Walter Henry Garnett. Mrs. Susan Garnett, Paradise Road, St. Jones, New Brunswick, Canada.

Andrew Gertner. Andrew Gertner, box 21, Brownfield, Pa.

Edward Mercker. Edward Mercker, Velpen, Ind.

William D. Quimby. Edwin E. Quimby, 413 Merrimac Street, Manchester, N. H.

Robert A. Williams. Mrs. Anna Williams, 1560 East Thirty-first Street, Cleveland, Ohio.

CORPORALS.

George A. Bazutka. Mrs. Anna Bazutka, 19 Dashler Street, Buffalo, N. Y.

John Bronkhorst. John Bronkhorst, R. F. D. No. 1, Ross, Mich.

Clyde C. Campbell. Miss Homer Collar, La Junta, Colo.

Alex Caspalich. Joseph Caspalich, Gulfport, Miss.

John Cawley. Mrs. Ellen C. McCabe, 637 Main Street, Vandling, Pa.

Norman K. Clapp. Mrs. Cassie Clapp, Grafton, Ohio.

James Defillippo. Fil Defillippo, 19 Salem Place, San Francisco, Cal.

Selmer Arnold Egland. Thomas Egland, Malta, Ill.

John K. Finney. Frank Finney, 125 North Eleventh Street, Philadelphia, Pa.

Walter E. Forth. Mrs. Mary Forth, 70 Hunt Street, Detroit, Mich.

Ernest S. Hayes. Mrs. Isabel Horton, Bond Street, Allegan, Mich.

Andrew Jensen. Jeno Jensen, Milnor, N. Dak.

Herbert D. McDermott. Mrs. Mary C. McDemott, R. F. D. No. 1, Harmon, Ill.

Frank N. Martinez. Mrs. Dellina Martinez, R. F. D. C, box 85, Fresno, Cal.

Daniel Nelson. Mrs. Mary Nelson, R. F. D. No. 1, Morrison, Okla.

Frank Nichols. Mrs. Mary Nichols, 4416 West Madison Avenue, Chicago, Ill.

Bartholomew O'Connor. Lawrence O'Connor, 29 East Seventy-sixth Street, New York, N. Y.

Ray A. Pickett. Mrs. Jessie Pickett, Palisade, Minn.

DeBarth Steele. Mrs. Tressie A. Steel, Central Avenue, El Monte, Cal.

Louis Svoboda. Joseph Svoboda, 1111 Hagerer Street, Racine, Wis.

George Van Oss. Mrs. Millie Beller, Dixon, Mont.

John S. Watkins. Joseph Watkins, Winona, W. Va.

Cook Frank J. Staisiatis. Antonio Gerstantus, 4857 Melrose Street, Philadelphia, Pa.

PRIVATES.

Robert J. Batson. Ernest B. Blake, Vista, N. C.

Walter H. Begley. John Begley, R. F. D. No. 2, Soldiers Grove, Wis.

Newton M. Berry. John Berry, Plato, Minn.

Clifford S. Billows. Charles F. Billows, 895 Charles Street, St. Paul, Minn.

Edwin J. Bower. Mrs. Mary F. Bower, 1327 Erving Avenue, North Minneapolis, Minn.

James Cack. Mrs. Elinore Cack, 518 South Randolph Street, Philadelphia, Pa.

Timothy James Callahan. Mrs. Helen Clarkson, 380 Brody Street, Milwaukee, Wis.

Benjamin Lovin Callis. Mrs. Mona Faulkner Callis, R. F. D. No. 1, Bedford, Ky.

Adolph F. Carlson. Carl F. Carlson, Rock Creek, Minn.

Vito Catalano. Mrs. Francesco Catalano, De Trojani, Campobasso, Italy.

Thomas Chambers. Mrs. Charles Bissell, 42 Cambridge Street, South Manchester, Conn.

Ernest Champluvier. Mrs. Leon Champluvier, Skinners Eddy, Pa.

Jacob Aster Clark. Isaac Clark, R. F. D. No. 3, Easton, Md.

Elmer E. Cloud. J. B. Cloud, R. F. D. No. 6, Greenup, Ill.

Nicholas T. Cody. Michael Cody, 25 Barrett Street, Revere, Mass.

Leroy Cooley. Mrs. Hattie Walker, 3212 Royal, Los Angeles, Cal.

Edward E. Craven. Mrs. Daniel Craven, 180 Lincoln Park Drive, Youngstown, Ohio.

Eliseo Cuellar. Lucas Cuellar, Alice, Tex.

Charles Cushman. Louis Cushman, Broken Bow, Nebr.

CASUALTIES REPORTED BY GEN. PERSHING

Richard M. Cutter. Frederick L. Cutter, Mountain View, Cal.
Albin P. Dahlberg. Mrs. Caroline Dahlberg, R. F. D. No. 1, Amery, Wis.
Casper Idolph Dahlby. Christ Dalby, R. F. D. No. 1, Eleva, Wis.
Edward Francis Daley. Mrs. Mary Daley, P. O. box 26, Ballardvale, Mass.
Earl Depue. Miss Ruth Depue, Creston, W. Va.
Frank A. Dettlaff. Mrs. Annie Dettlaff, 799 First Street, Milwaukee, Wis.
Alberts J. Dolven. Allie M. Dolven, Little Falls, Minn.
Frank Domask. Walter Domask, 703 Berlin Street, Berlin, Wis.
Earl E. Domer. Mrs. Lola Domer, 1812 Tuscarawas Street east, Canton, Wis.
Clarence Dozier. Mrs. Lina Dozier, Clifford, Ill.
Joseph R. Drought. Mrs. Bessie Drought, 313 South Main Street, Janesville, Wis.
Jean L. Durand. Mrs. Mary Durand, Basile, La.

Ezra Eby. Gabriel Eby, R. F. D. No. 1, Jones, Mich.
Arthur Erickson. Ernil Erickson, R. F. D. No. 4, Irene, S. Dak.
Selmer C. Espenlund. Christ S. Espenlund, route 1, Mettonville, Iowa.
John A. Fallstrom. Alfred Carlson, Falun, Wis.

Florenz J. Fenton. Mrs. Johanna Fenton, 605 East Wishart Street, Philadelphia, Pa..
Harry Hartley Fish. William J. Fish, Kirkland, Wash.
Alva A. Freeman. A. J. Freeman, Paragould, Ark.
Laurence Furstenberg. Nellie Vick, Sioux Pass, Mont.

Edgar Girard. Eli Girard, 421 South Street, Louisiana, Mo.
Thorvald Granby. Mrs. Thea O. Granby, Poplar, Minn.
Clifford Hagen. Mrs. Aernill Hagen, Pelican Rapids, Minn.
Henry George Haugen. John Haugen, 1528 North Rockwell Street, Chicago, Ill.
Ray E. Hilscher. Mrs. Jennie A. Hilscher, 703 East Pulaski Street, Lincoln, Ill.
Sherman Hoover. Isaac Benjamin, Terrytown, Bradford County, Pa.
John W. Hopkins. Rosco Walden, Forestport, N. Y.
Howard L. Johnson. Mrs. Mary C. Johnson, 941 Ogden Street, Denver, Colo.
Peter Joe Klopotek. John F. Klopotek, R. F. D. No. 1, Custer, Ill.

Dennis Mallon. Mrs. Jane Mallon, 510 Nevada Street, Detroit, Mich.
Thomas D. Mallory. Miss Corinne Mallory, R. F. D. No. 6, Jewell, Tex.
William H. Mansfield. Charles Mansfield, 1332 Michigan Building, Racine, Wis.
John Midgett. Jack J. Midgett, Lowland, N. C.
Rudolph John Mikulenka. Tom Mikulenka, Smithville, Tex.
Anthoney Morkus. Mrs. Martha Morkus, Showdy, Russia.
James R. Muckle. Mrs. George Hupple, 324 Market Street, Steubenville, Ohio.
Emil Neubauer. Joe Neubauer, Martin, N. Dak.

Cozmish Novitsky. Mrs. Annie Novitsky, 55 School Street, Hudson, Mass.
George S. Paul. Michael Hoptic, Dixonville, Indiana County, Pa.
Clarence L. Perry. John M. Perry, New Waverley, Tex.
Carl V. Peterson. John Johson, 2800 East Twenty-sixth Street, Minneapolis, Minn.
Clement K. Porter. Mrs. Florence Porter, Rexburg, Idaho.
Harry E. Purdum. Mrs. Alvina Purdum, Glencoe, Minn.
Barton D. Robeson. Harry H. Robeson, Baring, Mo.
Roman Rybinski. Stfns Rybinski, R. F. D. No. 2, Elgin, Nebr.
Ralph W. Shull. Mrs. Cleo Shull, Montrose, Ill.

Guy Smith. Mrs. J. M. Smith, Summerfield, Okla.
Chester Stevens. E. Stevens, 615 North Second Street, Nashville, Tenn.
Oscar I. Sykes. W. Sykes, R. F. D. No. 1, Derby, Vt.
Andrew Russell Thomas. William Thomas, R. F. D. No. 3, Ellwood City, Pa.
William S. Tower. Mrs. Mary E. Tower, 57 Shelburne Street, Greenfield, Mass.
James H. Vanwinkle. Mrs. Sarah J. Vanwinkle, R. F. D. No. 2, Broughton, Ill.
Charles Vanzile. John Vanzile, Howe, Ind.
George Whalen. Mrs. Mary Whalen, Huntley, Mont.

Clarence E. Wharton. Miss Vivian Green, 421 Central Avenue, Decatur, Ill.
William Weitner. Otto Weitner, Glencoe, Ohio.
Leslie Williamson. Mrs. Perie Martin, 226 Willow Street, Fort Collins, Colo.
Ben Wright. Ben Wright, Guinea Mills, Va.
Joseph Bolensky. George Bolensky, 327 John Street, South Amboy, N. J.
Jan Bugeeda. Mrs. Julie Cituk, New Cumberland, W. Va.
Joseph Caradonna. Vito Caradonna, 31 Clark Street, Stoughton, Mass.
Loren Danforth Duren, jr. Lauren Duren, sr., 134 Washington Avenue, Endicott, N. Y.
Joseph French. Patrick French, R. F. D. box 100, Chelmsford, Mass.
Clancey Otho Greer. Mrs. A. Greer, 1105 West Clark Street, Urbana, Ill.
Roscoe R. Groff. W. S. Groff, Claremont, Ill.
James H. Hamilton. Mrs. Catherine Chapen, 29 North Union Avenue, West Haven, Conn.
Adolph Hang. Amund T. Hang, R. F. D. No. 3, box 76, Dalton, Minn.
William E. Hocken. Mrs. Ed Hocken, 373 Main Street, Bingham, Utah.
Richard L. Hurd. Mrs. Kate Hurd, 117 Baker Avenue, North Chattanooga, Tenn.
Jessie J. McAfee. Albert McAfee, Paige, Tex.
Frederick McGowan. Mrs. Rose M. McGowan, 512 Montana Street, Lewiston, Mont.
Pete Manasian. Morrelle Manasian, Brookshire, Tex.

Appeared Before Disability Board, Previously Reported Missing in Action.

Pvt. Eugene M. Brown. Clara Brown, Grenola, Kans.

Seaman and Yeowoman Killed in Auto Accident

The Navy Department reports the following casualties:

Peter Joseph O'Brien, seaman, second class, and Mary Agnes Monahan, woman yeoman, first class, both of United States Naval Reserve Force, attached to navy yard, Boston, Mass., were killed in an automobile accident at Hampton Falls, N. H., on September 5. O'Brien was enrolled at Boston, Mass.; mother, Mrs. Annie O'Brien, South Boston, Mass. Mary Agnes Monahan was enrolled at Boston, Mass.; sister, Mrs. Catherine Daly, 24 Center Street, Malden, Mass.

George William Pendleton, chief yeoman, United States Naval Reserve Force, died September 6, as a result of injuries received in a fall from a railroad train; father, Frank L. Pendleton, 2087 Seventh Street, New York, N. Y.

War Trade Board Ruling On Vessel Deck Loads

The War Trade Board, in a new ruling (W. T. B. R. 220), has adopted certain restrictions on deck cargoes on unarmed vessels, proceeding without convoy from Atlantic and Gulf ports. The board also announces certain restrictions on cargoes carried by sailing vessels. In order to avoid delays and unnecessary expense, vessel owners, charterers and agents should consult with collectors of customs or agents of the Bureau of Transportation, War Trade Board, before making commitments for deck cargoes or cargoes to be carried by sailing vessels.

Navy Officer Praised For Bravery in Rescue

Lieut. William K. Beard, United States Navy, commanding the U. S. S. *Lawrence*, has been commended by Secretary Daniels for his gallant action on August 1 in rescuing a member of the Southern Port Inspection Party, on board the *Lawrence* in Charleston Harbor, who had fallen into the water between the *Lawrence* and the dock.

The Exports Control Committee, Washington, D. C., at a recent meeting adopted a resolution, which was forwarded to the department and also spread upon the minutes of the committee, specifically commending the daring action of Lieut. Beard. One member of this committee, who was an eyewitness to the accident, stated that the rescue was so well and quickly done that the officer did not stop to remove his cap, nor did the plunging into the water even dislocate it from his head.

DYEING AND SALE OF SOCKS.

A cablegram, dated September 4, from Consul General Robert P. Skinner, of London, states that the war office has issued an order prohibiting the sale and dyeing of socks produced from Army gray worsted or woolen yarn, except as to socks sold and delivered to retail dealers prior to September 2.—Commerce Reports.

ASSIGNED TO GENERAL STAFF.

Special Orders, No. 207:

197. Col. Edwin G. Davis, Judge Advocate General's Department, is assigned to duty with the General Staff Corps.

INCREASE OF COAL ON CARS REPORTED TO RAIL DIRECTOR

The increase in cars of coal loaded for the period from January 1, 1918, to August 31, 1918, as compared with the same period for 1917, has passed the half-million mark.

A report was made to Director General McAdoo by the car service section of the Railroad Administration on the quantity of coal of all kinds loaded by roads for the week ended August 24, 1918, as compared with the same period of 1917. A summary of the report follows:

	1918.	1917.
Total cars bituminous	219,750	185,133
Total cars anthracite	40,865	41,212
Total cars lignite	3,367	3,249
Grand total cars all coal	263,982	229,594

A summary of reports for the week ended August 31, 1918, based on actual reports from most roads, but with the results of some roads estimated, follows:

	1918.	1917.
Total cars bituminous	218,534	187,093
Total cars anthracite	41,281	42,817
Total cars lignite	3,708	3,187
Grand total cars all coal	263,523	233,097

Increase of 1918, up to and including week ended August 31, over same period of 1917, 516,951 cars.

Following is the weekly report on the production and shipments of bituminous coal, shipment of anthracite coal, beehive and by-product coke, compiled by the Geological Survey, Department of the Interior, September 7, 1918:

Average daily requirements established by the United States Fuel Administration April 1, 1918 to March 31, 1919	2,013,000
Average daily production, April 1 to August 31	1,979,000
Average daily production necessary during period September 1, 1918 to March 31, 1919, to make up deficit for coal year to date	2,037,000

The output of bituminous coal in the United States during the week ended August 31 was approximately the same as the week preceding. Estimates place production during this week at 12,642,000 net tons, as against 12,620,000 net tons during the week of August 24 and 11,056,000 net tons during the corresponding week of 1917.

The average production per working day for week ended August 31 is estimated at 2,107,000 net tons, an increase over the corresponding week of last year of 14% and over the average daily requirements for the coal year of 4.7%. The schedule of the Fuel Administration, however, calls for an increased rate of producing during the six months beginning with April, and production in the first five of these six months has been nearly 13,000,000 tons below this figure. To overcome this apparent shortage it will be necessary to maintain the average daily rate of production during the seven months remaining in the coal year at 2,307,000 net tons or 2.9 per cent in excess of the average daily production in the five months, April to August.

Production of anthracite in the United States during week ended August 31 is estimated at 2,259,715 net tons, an increase over the week preceding of 125,716 net tons or 5.9 per cent, and over the corresponding week of last year of 268,228 net tons or 13.5 per cent.

Additional List of American Prisoners and the Camps Where They Are Held

The War Department authorizes the publication of the following list of American prisoners of war in Germany, the camp at which detained, and emergency address:

Pvt. Joseph F. Keenan, Langensalza. Joseph Keenan, father, 1322 Mifflin Street, Philadelphia, Pa.

Pvt. (1st class) Harvey M. Murdock, Langensalza. Mrs. Emma C. Haley, mother, 2820 River Avenue, Ogden, Utah.

Pvt. (1st class) Mike Musulin, Langensalza. George Musulin, brother, 101 Broad Street, Cambria City, Pa.

Pvt. Andrew Yusevitz, Langensalza. Mrs. Melia Waselefski, sister, Jefferson Street, Simpson, Pa.

Pvt. (1st class) Anton Shvegzdo, Langensalza. Mrs. Varanika Shvegzdo, mother, Kovna, Azitenoai, Russia.

Pvt. David Robb, Langensalza. Mrs. David Robb, wife, 3003 Girard Avenue, Philadelphia, Pa.

Pvt. John Allen Beaver, Langensalza. Mrs. Ella Beaver, mother, 2032 Fulton Street, Harrisburg, Pa.

Pvt. Nelson Siegel, Langensalza. David Siegel, father, 501 Dudley Street, Philadelphia, Pa.

Pvt. (1st class) Michael Viola, Rastadt. Mrs. Petronilla Viola, 4017 Poplar Street, Philadelphia, Pa.

First Lieut. Paul F. Baer, Graudenz. A. E. Baer, father, 318 South Conception Street, Mobile, Ala.

Pvt. (1st class) Austin M. Ready, Darmstadt. Mrs. Mary Redfield, sister, 245 Custer Avenue, Jersey City, N. J.

Pvt. Joseph A. Edelin, Lamsdorf. Mrs. Catherine Schmiedel, sister, 2200 Fulton Road, Cleveland, Ohio.

Corpl. Harvey Phipps, Rastadt. Mrs. Nancy Phipps, mother, 704 West Cornwell Street, Aurora, Ind.

First Sergt. Edward A. Stevens (camp unknown). Arthur M. Stevens, brother, 1 Stevens Street, Methuen, Mass.

Corpl. Walter E. Moore, Rastadt. Mrs. Jessie Moore, mother, 307 West One hundred and twenty-sixth Street, New York, N. Y.

Prof. Henry C. Emery, Berlin Clinic, Weiler. Mrs. Henry C. Emery, 163 George Street, Providence, R. I.

First Officer Hilmar Richardson, Brandenburg. Mrs. Cynthia Richardson, Willapa, Wash.

Second Mate Adolf Colstad, Brandenburg. Mrs. Sandringham, 334 First Avenue, Seattle, Wash.

Pvt. Joseph P. Redding, Limburg. Mrs. Rose Redding, mother, 2928 Peltz Street, Philadelphia, Pa.

All Mail for Soldiers Specifically Addressed

OFFICE OF FIRST ASSISTANT POSTMASTER GENERAL.
Washington, August 28, 1918.

The attention of all postmasters is directed to instructions published in the Postal Bulletin of May 25 and on page 2 of the June Supplement to the Postal Guide. Letters as well as parcels intended for soldiers should be specifically addressed.

Postmasters will please post this notice for the information of patrons.

J. C. KOONS,
First Assistant Postmaster General.

400 COLLEGES COOPERATING WITH ARMY TRAINING CORPS

More than 400 colleges have responded to the War Department's call for cooperation in training the new branch of the Army, the Students' Army Training Corps. Plans are being made to convert fraternity houses and dormitories into barracks for the period of the war to meet this new emergency of training boys of 18 years and over in institutions used as cantonments.

The Students' Army Training Corps has two branches—the collegiate, to which men qualified by high-school graduation are eligible, and the vocational section, to which grammar-school graduates are eligible. Recruits will be procured by voluntary induction. Student-soldiers will not be in a deferred class, but will be on active duty and on private's pay. High-school graduates are urged to enroll in colleges this month to await induction upon application in October.

Types of Colleges Included.

The following types of colleges are included in the Students' Army Training Corps:

Arts and sciences, technology, engineering, mines, agriculture and forestry, business administration, industry and commerce, veterinary medicine, education, law, medicine, dentistry, graduate schools, normal schools with two years' college work, junior colleges, and technical institutes.

The following colleges have recently been accepted by the War Department's committee on education and special training:

Dakota Wesleyan University, South Dakota; Yankton College, Yankton, S. Dak.; State Normal College, Springfie'd, Mo.; West Kentucky State Normal School, Richmond, Ky.; Lenoir College, Hickory, N. C.; Billings Polytechnic Institute, Billings, Mont.; Kentucky Wesleyan College, Winchester, Ky.; Transylvania College, Lexington, Ky.; St. Francis College, Brooklyn, N. Y.; College of Charleston, Charleston, S. C.; Cumberland University, Lebanon, Tenn.; Ogden College, Bowling Green, Ky.; Bethany College, Lindsborg, Kans.; Carson and Newman College, Jefferson City, Tenn.; East Tennessee Normal School, Johnson City, Tenn.; University of Minnesota, Minneapolis, Minn.; Augsburg College, Minneapolis, Minn.; Thiel College, Greenville, Pa.; Missouri Wesleyan College, Cameron, with William Jewel College, Liberty, Mo.; Baldwin Wallace College, Berea, Ohio; McKendree College, Lebanon, Ill.; Middle Tennessee State Normal School, Murfreesboro, Tenn.; Hahneman Medical College, Philadelphia, Pa.; University of Nebraska, Lincoln, Nebr.; Baltimore College of Dental Surgery, Baltimore, Md.; Burleson College, Greenville, Tex.; Illinois College, Jacksonville, Ill.; Lake Forest College, Lake Forest, Ill.; Colorado State Teachers' College, Greeley, Colo.; Huron College, Huron, S. Dak.

BRITISH WOOL CONTROL.

Consul General Skinner, at London, cables:

War office gives notice of intention to take possession of all wool noils, excluding merino noils, in respect whereof permit may have been granted. Present order effective September 1, after which sale without permit is prohibited. From September 2 scheme for rationing wool tops and yarns extended to exclude distribution and consumption of noils by woolen manufacturers, spinners, and others. Basis of distribution between spinners and woolen manufacturers will be same as now obtains in case of wool. As between other manufacturers, basis will be consumption for civil orders in 1916.—Commerce Reports.

TOTAL OF U. S. IMPORTS AND EXPORTS FOR JULY AND SEVEN MONTHS PRECEDING

Total values of merchandise imported and exported by the United States during July, 1918, and the seven months ended July, 1918, compared with corresponding periods of the preceding year, are made public by the Bureau of Foreign and Domestic Commerce, Department of Commerce, as follows:

	Month of July—		7 months ended July—	
	1918	1917	1918	1917
Imports from:				
Grand divisions—				
Europe	$21,785,244	$41,793,223	$293,942,045	$393,516,130

RED CROSS REPORT ON WORK DONE BY THE HOME SERVICE

The following is authorized by the Red Cross war council:

The war council of the American Red Cross has planned to issue a series of reports to the American people concerning the use of the first Red Cross war fund of $100,000,000 and the plans so far perfected for future work.

The first section of these reports issued September 1 covers the work of the Red Cross in caring for the families at home of America's men in militant service. The report on this subject says in part:

The Home Service.

More than 300,000 families of American men in service have been relieved of money troubles, legal difficulties, family worries, or of depressing loneliness by the home service of the Red Cross. This branch of Red Cross activity has 50,000 men and women serving on its 10,000 home-service committees. It has reached into remote communities where there had never been organized social effort before. It has established the closest cooperation in the largest centers of population with the organized agencies of public welfare. It is spreading a doctrine of intelligent substantial neighborliness on behalf of the fighters' families and backing it with an expenditure of over $400,000 a month.

These expenditures have been made out of money raised in the communities themselves and reserved from the amount contributed to the national Red Cross war fund.

More Than a Million Helped.

More than 1,000,000 people have been helped by these local committees since the war began. Money has been, certainly, the least valuable contribution of home service to the welfare of communities since men began to go into training camps, but it amounted to $1,500,000 for the first six months of the present year and will probably exceed $4,000,000 for the second half of the year. By January 1, 1919, Red Cross will have spent in home service work a total of $6,000,000 and will then be carrying a burden, probably, of nearly $1,000,000 a month.

The work of the home service section as organized in France is under the supervision of R. G. Hutchins, jr., vice president of the Bank of Commerce of New York City.

Purpose Briefly Outlined.

The purpose of home service, sanctioned by the Army and Navy and by President Wilson, are to conserve human resources in fighters' families, to relieve emergencies, to supplement government provision for dependents, to aid disabled soldiers, to supply information of any kind to men in service or to their families, to help families to keep pace with fighters who are getting a broader outlook on life, and to help maintain the morale of our Army and Navy by safeguarding homes. Home service has enlisted help from all creeds and races and is extending its aid to every person who will accept it regardless of rank, religion, or color. It is not charity, but only that neighborliness which is due every fighter from the people of the whole United States.

Official U. S. Bulletin

PUBLISHED DAILY under order of THE PRESIDENT of THE UNITED STATES by COMMITTEE on PUBLIC INFORMATION
GEORGE CREEL, Chairman ★ ★ ★ COMPLETE Record of U. S. GOVERNMENT Activities

VOL. 2 WASHINGTON, WEDNESDAY, SEPTEMBER 11, 1918. No. 409

ALLIED NATIONS AGREE TO POOL SUPPLY OF WORLD'S PIG TIN; U. S. TO RECEIVE 80,000 TONS

TWO-THIRDS OF ENTIRE OUTPUT

Result of Conference Between Representatives of This Country, Great Britain, Italy, and France—Intended to Equalize the War Needs of Each Nation.

Bernard M. Baruch, Chairman of the War Industries Board, authorizes the following:

Under an inter-allied pooling agreement reached by representatives of the United States, Great Britain, France, and Italy at conferences held in London, which were attended by L. L. Summers, member and technical adviser of the War Industries Board and George Armsby, chief of the tin section, each country participating in the conference will get its needed supply of pig tin. The action amounts to an international monopoly of a beneficent nature.

Plan of Distribution.

The plan of distribution worked out allows the United States about 80 000 tons of pig tin or two-thirds of the world's entire production annually.

With the War Industries Board supervising the allowance to this country, all imports of pig tin, tin ores and concentrates will be consigned to the American Iron and Steel Institute which will receive, pay for and distribute the metal to the industry through the United States Steel Products Co.

The price will be regulated by the War Industries Board and will be uniform to all consumers of 10 tons of pig tin or over. There will be another uniform price for users of less than 10 tons. These prices will be maintained at a level which will encourage production in the tin mining countries—Great Britain and the Straits settlements chiefly—and stop profiteering. Prices, rules, and regulations will be announced later. It is probable that users and dealers may be licensed.

Steady Supply Expected.

The War Industries Board believes there will be insured by these arrangements a steady supply of material at a stable and reasonable price. Since the negotiations for the pooling arrangement began in London six weeks ago the price of pig tin has fallen steadily. The quotation on September 6 last showed a net decrease of 14 cents per pound as compared with the price on July 15, 1918

That there may be a sufficient supply

Advice By Gen. Crowder To Employers of Labor on Their Duty in New Draft

SHOULD CONFER WITH THEIR WORKERS

MEN 19 AND 20, 32 TO 36, FIRST CALLED, SAYS CROWDER

Provost Marshal General Crowder in an interview for the press said yesterday:

Gen. CROWDER. I regret to see that some of the newspapers have fallen into the habit of speaking of the industrial advisers as though they operated as committees. On the contrary, the adviser nominated by the Department of Agriculture deals with all questions concerning agricultural employment and deferment; the adviser nominated by the Department of Labor deals with industrial claims, and the third one deals with all occupations not included in the above. The word "committee" is being erroneously used. We were very careful to leave it out of the regulations. Each of the three acts independently of the other two in dealing with matters that come under his head.

Scope of the Advisers.

Question. Will not the work of these advisers depend on the size of the districts in which they operate?

Gen. CROWDER. No; not so much on the size of the district. There may be a very large district involving few industries in which the adviser dealing with industrial claims would have very little to do, whereas the one dealing with agricultural claims might have a great deal to do. Then, again, taking New York City, for example, where there is a very large range of essential employments and oc-

Double Responsibility Resting Upon Those Whose Advice Shall Count When Other Men Are in Doubt—Willingness of All to Serve the Nation Impressed Upon Every Man. Expects All to Exercise Best Judgment.

The War Department authorizes the following from the Provost Marshal General:

Interview of Provost Marshal General Crowder with newspapermen September 10:

Provost Marshal General Crowder made public to-day the following statement, addressed to employers throughout the country, enlisting their cooperation in connection with the classification of the men who will register September 12:

WAR DEPARTMENT,
OFFICE OF THE PROVOST MARSHAL GENERAL,
Washington, September 9, 1918.

To employers and other representatives of industry:

The time has come when I must address to you some recommendations as to your share of responsibility in the classification of the new registrants under the selective-service act. I have noticed, in the general expressions of the public attitude which reach this office, two frequent features which lead me to the present comments. One of these features is the belief that the process of awarding deferred classification to a registrant requires merely the filling out of the questionnaire, and that the selective-service boards will perceive the propriety of making the deferment without the assistance furnished by the registrant's formal claim indicating the deferment desired. The other feature is the employer's failure to realize his responsibility to intervene in aiding the board's determination, and therefore to inform himself fully on all the considerations which should affect the decision as to deferment. Both of these features are due to a single

larger fact, viz, a failure on the part of many to reflect on the industrial considerations governing deferred classification.

Some One Responsible.

1. As to the first-mentioned belief, it must be pointed out that if it were universally acted upon, the process of classification would be seriously hampered and delayed. Some one must indicate that the individual case is one which should arrest the special attention of the boards in respect to the registrant's occupational status. The boards do not possess a superhuman omniscience. Nor are they permitted by circumstances to devote unlimited time to the search of questionnaires for possible grounds of claim. In 1917, out of more than 3,000,000 registrants called, only 140,000 filed occupational claims, or 4.7 per cent; thus 95 per cent of all registrants raised no question of such deferment. Under the questionnaire system the exact scrutiny of every page of this 95 per cent of questionnaires presenting no occupational claims would have been an intolerable expenditure of time, involving a delay fatal to the speed and decisive action necessary for filling the Army.

Duty of the Boards.

The boards will do all that they possibly can, on their own initiative, to reach a just decision by a complete examination of the questionnaire even where no claim is expressly made; following in this respect the spirit of the Secretary of War's statement made before the House Committee on Military Affairs on August 19 last: "It is not easily possible—it is, perhaps, not possible at all—to do that without some aids from the men affected; but as far as it is possible we ought to have the facts developed by the answers to the questions which the man makes and call on him for as little aid as we can in determining whether or not he is to be exempted." A registrant is therefore at liberty, if he sees fit, to trust to the scrutiny of the boards to discover the necessity for his deferment.

Nevertheless, the boards will welcome and will need all the aid that can be furnished by the indication of a claim made for deferment. With this aid, the process will become a simple and speedy one. Time and labor will not be wasted on needless search; and ample time will be gained for thorough attention to those cases explicitly raising a question of occupational deferment.

Claims of Registrants.

But who is to make that claim? Ordinarily, the registrant himself will indicate the claim on his questionnaire. But if, through mistaken chivalry, he should fail to do so, another may make it for him. In industry, agriculture, or other occupations, this other person will naturally be his employer or some other representative of his associated group. And this brings me to the second feature above mentioned.

2. Why should the employer, or other third person, in such cases, make the claim? Because the employer in this situation represents the Nation—because (in the statutory phrase) "the maintenance of the Military Establishment or of national interest during the emergency" requires that some well-advised third person should look after that national interest, which the registrant himself may not have sufficiently considered.

It is at this point that I wish to address to employers (and other representatives) the suggestion that they charge themselves, more systematically than hitherto, with this responsibility. I have above referred to such third persons as "well-advised," and this is the place to emphasize to employers the importance of making themselves well advised for the execution of this duty.

How many employers having charge of some industrial or other occupational group have hitherto taken pains to inform themselves systematically which of their employees are registrants and which are not? How many have studied carefully the required conditions for occupational deferment as laid down in the President's regulations pursuant to the statute? How many have made it a point to survey their entire plant so as to single out the really indispensable individuals? With the oncoming of a more extensive registration an even larger outlook is necessary. The general industrial conditions, the supply of skilled men in the industry at large, the possibilities of training substitutes, the availability of women workers—these are some of the considerations which bear directly on the need of occupational deferment as related to the need of the Army.

Voluntary Enlistments.

Moreover, it is often forgotten that the selective draft is only one element in the depletion of a particular industry's man power. A second and large element is found in the voluntary withdrawals for enlistment; how large this is may be seen from the circumstance that the total inductions by draft have reached some 2,000,000, while the total enlistments in Army and Navy amount to some 1,400,000—nearly three-quarters as many. A third element, very large, but unknown as to its precise extent, has been the transfer of labor power from one industry to another, i. e., into the distinctively war industries offering the inducement of higher wages. How relatively small in actual effect has been the effect of the selective draft is seen in the fact that for all the occupations represented in the 8,700,000 classified registrants of January, 1918, the percentage of the entire industrial population represented by

(Continued on page 6.)

ADDITIONS TO AND REMOVALS FROM THE WAR TRADE BOARD EXPORT LIST

The War Trade Board issues the following:

The War Trade Board announces in a new ruling (W. T. B. R. 216) the addition of the following commodities to the Export Conservation List, effective September 11, 1918:

Aluminum, metallic, and all articles containing 10 per cent or more (in weight) of metallic aluminum, X-2. (Individual licenses not required to Canada and Newfoundland.)
Alloys, as follows:
  Dental, X-4.
  Titanium, X-2.
  Uranium, X-2.
Animal hair, as follows:
  Manufactures of.
  Raw.
Bichloride of tin, X-4.
Cameras, moving-picture.
Cameras, photographic, other than moving-picture cameras. (Individual licenses not required if accompanying a passenger as personal baggage.)
Cartridges and shells, loaded and unloaded, and reloading and cleaning tools for same, X-2.
Crystals, tin, X-4.
Degras.
Dental alloys, X-4.
Flax and all articles containing flax, X-2.
Hair, animal, as follows:
  Manufactures of.
  Raw.
Kapok.
Lead, as follows:
  Pig, X-2.
  Pipe, X-2.
  Sheet, X-2.
Lenses, optical, mounted or unmounted, including lenses forming part of apparatus but not including spectacle, eyeglass, or reading-glass lenses. (Note exception under Cameras.)
Instruments, as follows:
  Containing lenses. (Note exception under Cameras.)
Metallic aluminum and all articles containing 10 per cent or more (in weight) of metallic aluminum, X-2. (Individual licenses not required to Canada and Newfoundland.)
Moellon degras.
Moving-picture cameras.
Optical lenses, mounted or unmounted, including lenses forming part of apparatus, but not including spectacle, eyeglass, or reading-glass lenses. (Note exception under Cameras.)
Ore, as follows:
  Radium, X-2.
  Uranium, X-2.
  Titanium, X-2.
Oxide of tin, X-4.
Pearls.
Photographic cameras, other than moving-picture cameras. (Individual licenses not required if accompanying a passenger as personal baggage.)
Pig lead, X-2.
Pipe lead, X-2.
Radium, as follows:
  Luminous compounds, X-2.
  Ores, X-2.
  Salts, X-2.
Salts, as follows:
  Radium, X-2.
  Tin, X-2.
  Uranium, X-2.
Sheet lead, X-2.
Tin, as follows:
  Bichloride of, X-4,
  Crystals, X-4.
  Oxide of, X-4.
  Salts, X-4.
  Sundry articles, all, either made of tin plate or coated or dipped in tin, X-4.
Titanium and its compounds, X-2.
Uranium, as follows:
  Alloys, X-2.
  Ores, X-2.
  Salts, X-2.

The removals from the Export Conservation List, as shown below, have been adopted, also effective September 11, 1918:

Aluminum and all articles containing 10 per cent or more (in weight) of aluminum, X-2. (Individual licenses not required to Canada and Newfoundland.)
Cameras, photographic (valued at over $25 each).
Cartridges, X-2.
Flax, and all articles containing flax which are manufactured in the United States, X-2.
Lenses, optical (except spectacle, eyeglass, and reading-glass lenses).
Optical lenses (except spectacle, eyeglass, and reading-glass lenses).
Photographic cameras (valued at over $25 each).
Radium, its salts, and radium luminous compounds, X-2.
Titanium, X-2.
Uranium, X-2.

WAR TRADE BOARD ANNOUNCEMENT ON THE RULES FOR EXPORT LICENSES GOVERNING TRADE FROM THE U. S.

The War Trade Board announces the adoption of the following regulations with respect to the issuance of export licenses:

Hereafter licenses may be granted by the War Trade Board only upon application of the consignor and only to (1) corporations organized under the laws of the United States, or of any State, Territory, or possession of the United States or of the District of Columbia; (2) residents of any State, Territory, or possession of the United States or of the District of Columbia; (3) foreign partnerships with a member who is a resident of any State, Territory, or possession of the United States or of the District of Columbia; (4) foreign corporations actually maintaining in any State, Territory, or possession of the United States or in the District of Columbia an established branch or agency for the regular transaction of its business; (5) any foreign government acting through any member of its embassy or legation accredited to the United States; (6) the traffic executive of Great Britain, France, Italy, and the consul for Belgium; or (7) any official, firm, or corporation appointed by any department or agency of the United States Government to act in its behalf.

Applications for export licenses, and supplemental information sheets and any other supplementary documents or letters relating thereto will only be considered by the War Trade Board when filed by such corporations, firms, or individuals and only when signed in ink by an official duly authorized to act on behalf of a corporation if application for an export license is made by a corporation; a member of a firm if application for an export license is made by a firm; an individual himself if application for an export license is made by an individual; a regular employee of a corporation, firm, or individual making an application for export license if such employee has been duly authorized in writing to so sign on behalf of such corporation, firm, or individual and if such authorization has been filed with the War Trade Board; an attorney in fact of a corporation, firm, or individual making application for an export license if such attorney has been properly authorized so to act by virtue of a power of attorney duly executed and filed with the War Trade Board; or a person duly authorized to act in their behalf if application for an export license is made by a foreign government. The traffic executive, the consul of Belgium, or an agency of the United States Government.

These regulations are effective as to all applications for export licenses filed on and after September 20, 1918.

19-20, 32-36 DRAFT CLASSES WILL BE CALLED FIRST

(Continued from page 1.)

cupations, and the advisers dealing with these would have much to do.

Question. Is it not a fact that the number of men affected by these claims will be very small in comparison with the number registered?

Gen. CROWDER. There will, of course, be a very much larger percentage of occupational claims made in the upper ages—that is, from 32 to 45, inclusive—than there has been heretofore in the case of the men between the ages of 21 and 31. I would not like, however, to speak in terms of percentages for this unexplored field.

Benefit to the Registrant.

Gen. Crowder, in response to questions, then explained that where a registrant claims deferred classification or exemption on several grounds, he would be given the benefit of the most deferred claim to which any of these grounds entitles him.

Question. Suppose the registrant neglects to state his claims for deferred classification?

Gen. CROWDER. If he does not put them down in his questionnaire and no one else puts them down, the claim can not be considered.

In response to questions concerning the manner in which a registrant's income is figured in connection with a claim for deferred classification on the ground of dependency, Gen. Crowder referred those present to the paragraphs of section 72 of the regulations with the notes to the same.

Question. Are you ready as yet to announce the age groups in the order in which they will be called out?

Age Groups Decided Upon.

Gen. CROWDER. Yes. Instructions to that effect are being sent out to-day. The boards will proceed first to classify the registrants of the 19 and 20 classes, including those becoming 21 since last registration day, August 24, and between the ages of 32 and 36, inclusive. The men in these two classes will be treated as one group, and will be the first to be classified and called out. There will remain, then, those between 37 and 45, inclusive, and those of the 18-year-old class. As to how these will be called out I am not now prepared to say. I have no authority to state in what order they will be called.

Question. Can you give us the numbers of men, approximately, between the ages of 19 and 20, inclusive, and 32 and 36, that is, the number out of these two classes likely to be available for military service?

Estimates of Numbers.

Gen. CROWDER. You will find estimates covering this in the Congressional Record on the day on which the Record printed my memorandum to the Chief of Staff. That is to say, you will find the estimated number of class 1 men between the ages of 19 and 20, inclusive, and 32 to 45, inclusive. You won't find an estimate for those between 32 and 36, inclusive, but it will be possible for you to estimate this. Those between 32 and 45, inclusive, for class 1 fighting men were estimated at about 601,000, and it is fair to assume that the greater proportion of that number would be between 32 and 36, inclusive.

The estimates of Class I men given by General Crowder in his memorandum to the Chief of Staff were as follows:

Ages 18–20	1,797,609
Ages 19–20	1,121,634
Ages 32–45	601,236
Ages 32–40	448,086

Attendants at Colleges.

Question. Will not a large proportion of the class of 19–20 include attendants at colleges?

Gen. CROWDER. How many there will be I do not know, but all who report and are physically qualified, will be inducted into the service, and permitted to continue their studies until such time as they may be sent to non-commissioned officers' schools, officers' training schools, or vocational schools, or sent to camp for general service.

Col. Wigmore, who was called on by Gen. Crowder to explain the details of the college plan, stated that whereas the total number of men between the ages of 18 and 20, inclusive, who will register September 12, was estimated at about 3,000,000, it was not expected that more than 150,000 would be enrolled in these colleges. This number, he said, represented those who would commonly attend colleges. Attendance, he said, would be on the volunteer basis. The men were not to be placed in deferred classes, and may at any time be called out, or transferred to the noncommissioned schools, vocational schools or officers' training camps. They will be in the service from the time they are inducted by their boards.

WORLD POOL OF PIG TIN SUPPLY

(Continued from page 1.)

of tin in the United States to meet the war needs and to supply essential civilian uses, vigorous plans for conservation of the metal are being made effective through cooperative efforts by the War Industries Board and by the Food and Fuel Administrations in the enforced substitution of other than tin for containers, wherever that is possible. Tin container manufacturers have agreed with the War Industries Board in plans that will curtail their use of tin plate 30 per cent, which means a saving in the next three months of about 150,000 tons of tin plate.

Food Administration Plan.

The Food Administration is working out a tin conservation plan with various industries, including lard and lard compound packers, wholesale grocers, cracker manufacturers, tea and coffee packers, cocoa and chocolate manufacturers, and baking-powder manufacturers. All have been urged to substitute fiber, paper, or other containers where possible.

The Fuel Administration has taken up the subject with the oil dealers and the War Industries Board is working along similar lines with the tobacco manufacturers and all industries in which tin is used in turning out the finished product.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

RATES BY MAIL.

Daily—	One year	$5.00
	Six months	3.00
	One year, postage prepaid to foreign countries	8.00
	Six months, postage prepaid to foreign countries	4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

SURVEY OF FIRE PREVENTION CONDITIONS AT PORTS BEGUN

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

The fire-prevention section of the War Industries Board, at the request of Attorney General Gregory, has undertaken a survey of conditions at the principal ports on the seaboards and the Great Lakes with a view to suggestions for reforms, if necessary, that will lessen dangers from destructive fires.

Special attention will be given by experts of the section to fire-prevention equipment and constructions in and about Government buildings, properties, piers, and warehouses.

Since its organization April 5 the fire-prevention section, of which W. H. Merrill is the head, has inspected 1,469 munition plants having important Government contracts. These were classified according to their qualities as fire risks, as follows:

Good, or no action required	1,142
Fair	136
Poor	118
Bad	73

Examinations have been made of 195 additional plants, and reports ordered on 223 others. A plant may consist of from 1 to 50 buildings.

POST OFFICE SUPPLIES.

Sealed proposals will be received by the purchasing agent of the Post Office Department until 2 o'clock p. m., September 16, 1918, for furnishing 5,000 reams of typewriter paper, as per specifications.

American Official Communiques on Operations of U. S. Forces

The following is authorized by the War Department:

American Official Communique No. 117—Continued.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 8, 1918.

Section B.—The commander in chief has awarded the Distinguished Service Cross to the following-named officers and men of the American Expeditionary Forces for acts of gallantry as set forth after their names:

First Lieut. JAMES J. SHEERAN, Infantry. "After being severely wounded, near Chateau Thierry, France, on June 6, 1918, he displayed remarkable fortitude and exemplary poise by continuing to direct the operation of his platoon under violent machine-gun fire."

Pvt. WILLIAM JACOBSON, Infantry. "On June 6, 1918, near Chateau Thierry, France, he perseveringly continued his work throughout the night as a runner, under heavy fire after having his nose shot off, in order to maintain communication."

Pvt. EDWIN L. BEARD, Infantry. "After his platoon was practically wiped out and had been withdrawn, near Chateau Thierry, France, on June 6, 1918, he continued forward to his objective and remained throughout the night under heavy fire in hope of keeping the ground gained until reinforcements came up."

Pvt. LUZIUZ LUZI, Infantry. "He fearlessly and frequently passed through heavy machine-gun fire while performing his duty as a runner near Chateau Thierry, France, on June 6, 1918, after being twice wounded."

Pvt. DAN W. SULLIVAN, Infantry. "During a period of five hours and thirty minutes on June 6, 1918, near Chateau Thierry, France, he carried messages between the commanding officer and platoon leader through constant machine-gun fire, thereby maintaining communication successfully at the imminent risk of his life."

Saddler LEWIS B. McLAWHON, Infantry. "While attached to the headquarters of a machine gun company of the Infantry, near Chateau Thierry, France, on June 6, 1918, he made eight trips as a runner to and from advance platoons. He showed heroic coolness in the face of machine-gun fire, and absolute fearlessness in the execution of his work."

First Lieut. ALBERT P. BASTON, Marine Corps. "Although shot in both legs while leading his platoon through the woods at Hill 142, near Chateau Thierry, France, on June 6, 1918, he refused treatment until after he had personally assured himself that every man in his platoon was under cover and in good firing position."

Gunnery Sergt. JAMES CARBARY, Marines. "During the attack on Bois de Belleau, France, June 12, 1918, he voluntarily made two trips in the open under terrific fire to within 50 yards of a machine gun and rescued successfully two wounded men."

Pvt. JAMES L. CLARKE, Marines. "Although wounded in the attack on Bois de Belleau, France, he crossed through enemy territory to convey a message."

Capt. CLAUDE A. MARTIN, M. D., Infantry. "He operated a battalion dressing station near Vaux, France, July 1, 1918, although the station was practically destroyed by shell fire."

First Lieut. CHARLES L. BARROW, M. G. BN. "For extraordinary heroism in action northeast of Chauteau Thierry, France, July 30-31, 1918, acting as leader of a platoon and by his heroic conduct stimulated his men to success until incapacitated by a second wound."

Sergt. LEROY MORNINGSTAR, M. D. Infantry. "Sick, gassed and stunned by shells, he remained at his post on duty under heavy fire and bravely assisted in the succoring of soldiers who had been injured, near Vaux, France, July 1, 1918."

Sergt. CHARLES M. TARTER, Infantry. "Near Vaux, France, on July 1, 1918, when his captain was wounded, he went out under violent machine gun fire to bring the officer to shelter and was severely wounded himself while performing this heroic act."

Pvt. JOSEPH DEMAY, Infantry. "On July 1, 1918, near Vaux, France, he gamely continued to fire his automatic rifle after falling wounded in both legs."

Corpl. PATRICK McKENNA, Infantry. "After being previously wounded near Vaux, France, July 1, 1918, he charged into thick woods held by the enemy, in face of a barrage of hand grenades, and killed three, single handed."

First Lieut. C. M. MURRAY, Machine Gun Battalion. "Throughout the five days of battle near Soissons, France, July 18–22, 1918, his conduct was marked by exceptional initiative and bravery. He organized Infantry and machine-gun units and voluntarily led them in successful attacks against enemy machine guns."

Second Lieut. TRACY D. STAINS, Machine Gun Battalion. "After being severely wounded at the beginning of the engagement near Belzy le Sec, France, July 18, 1918, he continued to lead his command forward until he had taken positions assigned to him. He declined medical assistance and did not retire to an aid station until he had seen to the disposition and security of his men."

Pvt. CHARLES CAMERON, Ma-

(Continued on page 5.)

PROCEEDINGS OF THE CONGRESS BRIEFLY TOLD

SENATE.

Robert R. Reed, of New York, representing the Investment Bankers' Association, before the Finance Committee, now considering the war-revenue bill, asked that the Treasury Department be authorized to make adjustments in administering the war profits and income taxes where inequalities exist by reason of the failure of the bill to take into consideration the amount of invested capital. He also objected to the proposed tax on State and municipal bonds, asserting that under this section of the bill Liberty bonds of the first issue would be taxed although they were sold with the distinct understanding that they would be tax free. Levi Mayer, of Chicago, urged that the $8 tax on whisky held in bond after war-time prohibition becomes effective be reduced. He argued that under the prohibition law the holders of the whisky could not sell it and the tax was unreasonable.

The National Civil Service Reform League, before the Committee on the Census, yesterday opposed that provision of the House bill for taking the 1920 census which permits the appointment of employees regardless of the civil-service requirements. It was claimed that under the House bill 85,400 jobs were created to be filled through political patronage. William Dudley Foulke, of Indiana, urged amendment of the House bill so as to require that all supervisors, numbering about 400, should be appointed through the civil service and that they be authorized to appoint the enumerators.

HOUSE.

House leaders when the House convened this morning planned to close general debate on the war-revenue measure to-morrow and begin discussion under the 5-minute rule Friday for the consideration of amendments. Meanwhile it is the purpose of the Ways and Means Committee to consider special amendments that have been suggested by the Treasury Department intended to facilitate the sale of Liberty bonds. Speeches were made yesterday by Representative Hull, of Tennessee, Democrat and author of the present income-tax law; Longworth, of Ohio, and Green, of Iowa, members of the Ways and Means Committee. Representative Caraway, of Arkansas, replied to suggestions that have been made in debate that a tax be placed upon cotton. Even those Republican Members who criticized some features of the pending bill said they would vote for it, and predicted that the country would give all its provisions patriotic support. Mr. Hull pointed out that the annual tax budget of the Government after the war would be $4,000,000,000, and in the course of his remarks urged consumption taxes on sugar, coffee, tea, silk, and rubber. Mr. Longworth also declared that increased taxes for the future would have to be raised by taxing articles in daily consumption. He estimated that the imposition of war-time prohibition would reduce the revenues by $1,500,000,000. He estimated that the order stopping the manufacture of beer after December 1 next would result in a loss of revenue amounting to $500,000,000 between that date and the date when prohibition would become effective under the amendment to the agricultural extension bill. Discussing the war in general, Mr. Hull, in the course of his speech, declared that the war would be fought to a military decision, asserting that "peace by negotiation" is impossible, because it would require negotiation with "rascals, villains, freebooters, highwaymen, and desperadoes."

Readmission of Aliens.

A favorable report was ordered yesterday by the Immigration Committee on a resolution to readmit to the United States resident aliens who enlist in any of the armies of the cobelligerents of the United States. The resolution was urged by the President, the Secretary of State, and the Secretary of Labor. Under existing law readmission is allowable only for those aliens residing here who enlist in the American forces or with the Czecho-Slovaks or Polish independent military forces.

The Senate amendment to the agricultural extension bill establishing "bone-dry" prohibition after July 1, 1919, as a war measure was accepted by the Agricultural Committee. In conformity with the recommendations of Secretary Lansing, following the protest of the Italian Government, the committee amended the measure so as to admit Italian wines until May 1, next, when the prohibition of the manufacture of wines in this country becomes effective. Senator Sheppard, speaking for the prohibitionists in the Senate, said there would be no objection in that body to this amendment. A number of the Senate amendments to various appropriations carried in the emergency bill were disapproved. When the bill is reported back to the House it will at once be sent to conference.

Exports from Philippines.

Before the Judiciary Committee representations were made on behalf of the Government for a change in existing law so as to extend the powers of the President to the control of exports from the Philippines to this country. The purpose of this legislation is to stop the shipment of nonessential products and reduce the demands upon cargo space in the Pacific trade.

Statements made in debate Monday by Mr. Fordney, of Michigan, that under the contracts made with the Hog Island shipbuilding corporation the Government agreed to pay all Federal taxes, were denied in a statement issued by General Manager Piez, of the Emergency Fleet Corporation. Mr. Piez stated that the contract provided specifically that the American International Corporation should pay Federal taxes without compensation, and he added that Mr. Fordney evidently had not read the document.

A report submitted to the House by the Department of Commerce, asking for an appropriation of $45,000 for the next fiscal year, disclosed the fact that 140 additional persons in the country are entitled to retired pay under the recent pension legislation of Congress.

Save for the country's sake.

American Communiques

(Continued from page 1.)

chine Gun Battalion. "When the Infantry, of which he was a part, was held up by a trench occupied by Germans, near Soissons, France, July 19, 1918, he voluntarily ran around the trench to its rear, shot and killed one of the enemy and captured the remainder."

Pvt. HAROLD B. CRAWFORD, Machine Gun Battalion. "Between Soissons and Belzy le Sec France, July 19, 1918, he bravely carried messages through shell fire and reorganized and directed Infantry units. Entrusted with a particularly important message he knew must be delivered, he fearlessly started through a heavy bombardment to execute his mission, and while so engaged was severely wounded."

Second Lieut. ALLEN A. TUKEY, Machine Gun Battalion. "During the engagement near Soissons, France, July 18–19, 1918, the leadership of his platoon was exceptionally distinctive by reason of his courage, initiative and presence of mind. While advancing on the second day of the attack he was wounded, but continued with his command until he had given complete instructions to his platoon sergeant and notified his company commander of the disposition of his guns, after which he was compelled to yield command because of weakness from his injuries."

Sergt. GERARD P. LANDRY, Machine Gun Battalion. "When his platoon commander was incapacitated by wounds, July 19, 1918, near Soissons, France, he displayed instant initiative, effectively took command of his platoon and directed its movements with marked ability and courage during the remaining three days of the advance."

Sergt. JAMES LEVAS, Machine Gun Battalion. "Between Berzy le Sec and Soissons, France, on July 19, 1918, he took charge of his platoon after his commander was killed. Soon afterwards he himself was wounded, but he dressed his own wound and continued forward. In a later advance directed by him he was severely wounded, but placed his gun in position, looked after the security of his men, and reported those facts personally to his commanding officer before permitting himself to be taken to a dressing station."

American Official Communique No. 118.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES.
September 9, 1918.

Section A.—In the Woevre a hostile patrol which attacked one of our outposts was repulsed. Elsewhere the day was uneventful.

Section B.—There is nothing to report in this section.

Remember! the men in our Army and Navy do not expect luxuries. Should we at home expect them? Buy necessities and war-savings stamps.

AMERICAN PARTY FROM RUSSIA HAS ARRIVED AT STOCKHOLM

A telegram received at the Department of State from the American Legation at Stockholm states that the American party from Russia arrived at Stockholm on September 7. It included Norman Armour, secretary of embassy; Consuls Lee, Willoughby Smith, and William Jenkins; Vice Consuls Randolph, Dennis, Nielsen, Lehrs (with wife and son), Doolittle, and Imbrie; Commercial Attache Huntington, Commercial Agent Roger Simmons, Mr. Lewis, representative of the Committee on Public Information; members of the military mission, Capt. Eugene Prince, and Lieuts. Peter Dukovski and Earl Packer; Clerks Willard, Calder, Thomas, Flack, and Max Zahler; Mrs. Natalia Summers, widow of the late Consul General Summers, and her son Lionel, and clerk of the Petrograd consulate, Emile Rarogiewz.

List of Citizens.

The following citizens, the telegram states, also arrived: Full staff of the National City Bank, numbering 20; full staff of Y. W. C. A., numbering 7 persons; full staff of Y. M. C. A., except Paul Anderson and Harold Penningroth, who remained in Russia, numbering 26 persons; 2 Red Cross men, Herbert Magnuson and George Polatos; C. S. Smith and Gregory Yarms, of the Associated Press; Arno Dosch Fleurot, of the New York World; Thomas H. Anderson, Sidney S. McAllister, Cornelius Callahan, William Casey, Morris Joffe, Caroline Irmer Smith, Lulu Irmer Smith, John O. Conrad and wife, Angus Campbell, John Conyrey and wife, Dora Albert and son, E. C. Riley, William P. Kelly, and R. E. Jensen.

TREASURY STATEMENT.

September 9, 1918.

RECEIPTS.

Customs receipts	$404,393.37
Internal-revenue receipts:	
Income and excess-profits tax	704,830.61
Miscellaneous	2,572,080.74
Miscellaneous revenue receipts	300,912.49
Total ordinary receipts	3,982,217.21
Panama Canal receipts	
Public-debt receipts	19,359,030.04
Balance previous day	1,278,314,103.63
Total	1,301,655,350.88

DISBURSEMENTS.

Ordinary disbursements	$34,038,199.12
Panama Canal disbursements	11,525.22
Purchase of obligations of foreign Governments	
Purchase of Federal farm loan bonds	
Public-debt disbursements	194,900.80
Balance in general fund to-day	1,267,433,776.81
Total	1,301,655,350.88

SEALED PROPOSALS INVITED.

Sealed proposals will be received by the Indian Service, Department of the Interior, Washington D. C., until 2 o'clock p. m., September 28, 1918, for furnishing one road tractor, to develop at least 25 horsepower at the drawbar, and until 2 o'clock p. m., September 16, 1918, proposals for furnishing 900 rods of woven wire fence and 1,500 iron or steel fence posts for the Round Valley Indian Agency, Dos Rios, Cal.

The Results of the Third Liberty Loan Showing the Totals and Averages As Subscribed by Bank Districts

The Treasury Department has issued the following table showing the results of the third Liberty loan subscriptions according to reserve bank districts:

District.	Quota.	Subscriptions.	Percentage of quota subscribed.	Subscribers.	Percentage population subscribed.
Boston	250,000,000	$354,537,250	141.81	1,512,555	21.7
New York	900,000,000	1,115,243,650	123.91	3,043,123	23.2
Philadelphia	250,000,000	361,963,500	144.79	1,670,229	25.2
Cleveland	300,000,000	405,051,150	135.02	1,440,681	15.4
Richmond	130,000,000	186,259,050	143.27	858,358	9.2
Atlanta	90,000,000	137,649,450	152.94	584,196	5.8
Chicago	425,000,000	608,878,600	143.26	3,479,315	24.7
St. Louis	139,000,000	199,835,900	143.72	1,186,377	12.7
Minneapolis	105,000,000	180,892,100	172.2	1,221,504	23.6
Kansas City	130,000,000	204,092,800	156.99	1,190,193	16.0
Dallas	80,000,000	116,220,650	145.27	719,210	12.7
San Francisco	210,000,000	287,975,000	137.13	1,402,584	21.1
Total	3,000,000,000	4,158,599,100	138.61	18,308,325	17.7
Treasury subscriptions		17,917,750			
Grand total		4,176,516,850			

The percentage of population subscribed is based on the estimated population of the United States on July 1, 1917, namely, 103, 620, 273.

RECOMMENDATIONS BY THE PROVOST MARSHAL GENERAL TO EMPLOYERS CONCERNING DRAFT

(Continued from page 2.)

the Class I registrants amounted to only 6 per cent. It ran as low as 3 per cent for some occupations, and correspondingly higher for some other occupations; but the national average was only 6 per cent. Any notably larger depletions in particular industries must therefore have been due partly to enlistments, and in probably greater degree to voluntary transfers into other industries.

Seeking the Best Solution.

These other influences are, therefore, to be kept in mind by employers and others in weighing the question whether the best solution, in the national interest, is to ask for the deferment of individuals or groups of men. Such deferments may assist the immediate situation in the particular establishment, but they merely force the Army and Navy to seek elsewhere for the same number of men thus deferred. The quantitative needs of the military forces are known and imperative, and any given quantity of deferments will ultimately have to be made up by the depletion of some other occupation. Thus, it becomes the employer's duty to consider these largest aspects of deferment in seeking that solution of his own problem which best comports with the national interest.

My present object is to urge upon employers the duty and responsibility of becoming well advised in all these matters, of equipping themselves with full information as to the extent to which their particular establishment is affected by the liability of registrants to military service, of observing the extent to which other influences of depletion have affected it, and the degree in which other methods of supply can relieve that depletion, and of laying these facts and other pertinent ones before the industrial advisers now to be placed at each district board, to the end that those individuals or groups who are indispensable and irreplaceable should receive deferment, whether or not they have made claim for it, and that the Army and the Navy should not be deprived of its proper supply of man power by ill-considered deferments not absolutely demanded by the national interest.

Protection to Industry.

The cessation of enlistments will henceforth protect industry against one irregular and uncontrollable source of derangement. It will correspondingly throw upon the selective service system the greater responsibility for an intelligent and discriminating selection made in the light of industrial needs. But this responsibility is shared by employers and all who represent groups of workers. To fulfill this responsibility they must now prepare themselves even more carefully than hitherto. They will find the boards heartily ready to cooperate with them to the utmost.

The keynote of purpose for all of us ought to be, and I am sure will be, that wise and profoundly significant phrase in the act of Congress under which we operate, "the maintenance of the Military Establishment or the effective operation of the military forces or the maintenance of national interest during the emergency."

When you buy war-savings stamps you do not give—you receive.

PURCHASES AND CONTRACTS TO BE MADE BY THE HARDWARE AND METALS DIVISION OF U. S. ARMY QUARTERMASTER CORPS

The following is a list of purchases and contracts to be made by the hardware and metal division of the office of the Quartermaster General of the Army, 1800 Virginia Avenue NW. The executive officers are:

William A. Graham, chief.

Maj. H. J. Arnold, assistant to chief on outside relations (liaison officer).

Maj. H. P. Hill, assistant to chief on inside relations.

Procurement branch No. 1 (metals and heavy hardware), George E. Welles, chief.

Procurement branch No. 2 (small tools and chests), William F. Fusting, chief.

Procurement branch No. 3 (camp and kitchen equipment), Maj. W. J. Peck, chief.

Procurement branch No. 4 (office equipment and sundries), G. H. Richards, chief.

Contract and purchase branch, Maj. Earl A. Darr, chief.

Production and inspection branch, Capt. Joseph Odin, chief.

Administrative branch, T. M. Lynch, chief.

Unless otherwise stipulated, formal contract will be made.

Quotations to be submitted on or before dates specified below. Sealed bids not required unless so stipulated.

Procurement branch No. 1, section 1–A, Mr. A. S. Rogers, buyer, room 422, September 18:

Shanks, rope, halter	1,000
Rope, manila:	
¾-inch—pounds	5,000
½-inch—do	5,000
Rope, 1½-inch, for picket lines, feet	3,000
Fire extinguishers:	
2½-gallon	322
Chemical, 40-gallon	3
Mattocks, pick, model 1910	102,207
Pins, field line, model 1912	34,124
Spoons, digging, 8-foot handle	250

Procurement branch No. 1, section 1–B, Mr. D. W. Jasper, buyer, room 424, September 21:

Knives, splitting, 6-inch, same as C. S. Osborne & Co.'s No. 86, 6-inch (Delivery: 4,000 per month, approximately.)	12,000
Belt awls	4,006
Thong awls, No. 6	1,903

Procurement branch No. 2, section 2–A, Mr. J. D. Rennick, buyer, room 106, September 19:

Vises, hand, 5-inch	2,640
Bits, gimlet:	
2/32-inch—Gross	7
3/32-inch—do	14
4/32-inch—do	34
5/32-inch—do	45
6/32-inch—do	54
7/32-inch—do	45
8/32-inch—do	40
9/32-inch—do	27
10/32-inch—do	14
11/32-inch—do	7
12/32-inch—do	7
Bits, center:	
¼-inch—Dozen	225
⅜-inch—do	225
½-inch—do	430
⅝-inch—do	430
¾-inch—do	430
⅞-inch—do	430

Important Notice to U. S. Purchasing Agents

Purchasing agents for the various Government departments and the special United States war administrations are earnestly reminded to send to the Official U. S. Bulletin at the earliest possible moment all copy for bids to be advertised and purchase awards, in order that these may be promptly and correctly printed in the Bulletin in accordance with the orders of the Secretary of War and other heads of departments.

The task of preparing this copy for publication, with a view to absolute correctness and continuity, is a considerable one, but, with the cooperation of the purchasing agencies, should result in a great help, not only to the departments themselves, but to bidders throughout the country, all of whom, through the medium of the Official Bulletin, are desirous of keeping informed of the Government's needs.

Bits, center—Continued.	
1-inch—dozen	855
1⅛-inch—do	855
1¼-inch—do	430
1⅜-inch—do	225
1½-inch—do	130
1⅝-inch—do	45
1¾-inch—do	45
1⅞-inch—do	45
2-inch—do	45

Procurement branch No. 2, section 2–B, Capt. C. B. Price, buyer, room 432, September 19:

Blades, Awl, lockstitch, automatic:	
Curved	125
Straight	125
Guides, rifle cartridge belt	184,766
Fasteners:	
Rifle cartridge belt, 6¼-inch	97,383

AMERICAN FOOD MISSIONS ARRIVE FOR FOREIGN DUTY

The Department of Agriculture announces the arrival in England of a committee of men familiar with food production and agricultural organization and activities in the United States. The personnel of the committee is as follows: Dr. W. O. Thompson, chairman, president Ohio State University, Columbus, Ohio; Mr. Carl Vrooman, Assistant Secretary of Agriculture; Mr. R. A. Pearson, president Iowa State College of Agriculture and Mechanic Arts, Ames, Iowa; Mr. T. F. Hunt, director of the Agricultural Experiment Station and dean of the College of Agriculture, University of California, Berkeley, Cal.; Mr. D. R. Coker, farmer and member of national agricultural advisory committee, Hartsville, S. C.; Mr. William A. Taylor, chief, Bureau of Plant Industry, United States Department of Agriculture; Mr. George M. Rommel, chief, Animal Husbandry Division, Bureau of Animal Industry, United States Department of Agriculture; Mr. George R. Argo, specialist in cotton business methods, Bureau of Markets, United States Department of Agriculture; Mr. John F. Wilmeth, administrative assistant, Bureau of Markets, Department of Agriculture.

The committee will secure general information regarding food production conditions in England, France, and Italy, so that, when they return, they will be able to reveal the needs more effectively to the leaders of agriculture in the United States and to farmers generally.

A cablegram received August 24 by the Bureau of Plant Industry of the United States Department of Agriculture announced the safe arrival in Paris of a party of agricultural experts of the bureau. They are en route to Algeria, Tunis, and Morocco to investigate and advise on the possibilities of increasing the agricultural output of those French colonies. The visit is to be made at the request of the French high commission now in the United States. The party is composed of E. C. Chilcott, in charge of the dry farming investigations of the bureau; C. S. Scofield, in charge of the bureau's work in development of irrigation agriculture; and T. H. Kearney, in charge of important work with alkali and drought-resistant crops.

Secret Service Chief For Federal Railroads

The United States Railroad Administration, division of law, issues the following:

WASHINGTON, *September 7, 1918.*

CIRCULAR No. 2.

Effective September 18, 1918, William J. Flynn, former Chief of the Secret Service Division of the Treasury Department, is appointed chief of the secret sevice of the United States Railroad Administration in section of claims and property protection, with offices in the Southern Railway Building, Washington, D. C.

JOHN BARTON PAYNE,
General Counsel.

Approved:
W. G. McADOO,
Director General.

EXECUTIVE ORDER.

Under authority of the act of Congress approved June 25, 1910 (36 Stats., 847), as amended by the act of August 24, 1912 (37 Stat., 497), it is hereby ordered that, with a view of enlarging the withdrawal made by executive order of May 2, 1918 (2854), the tract of land in Alaska lying south of the parallel of 58 degrees 50 minutes north latitude and west of the meridian of 137 degrees 40 minutes west longitude, and bounded on the west by the waters of the Gulf of Alaska, be, and the same is hereby, temporarily withdrawn from settlement, location, sale, or entry, except as provided by said act, for the purpose of supplying timber for use in the construction of aeroplanes for the United States.

WOODROW WILSON.

THE WHITE HOUSE, *August 16, 1918.*

Keep Bulletin Posted In All U. S. Post Offices

Reports having been made that at some post offices THE OFFICIAL (United States) BULLETIN is not being posted regularly for public reading in accordance with Postmaster General Burleson's orders, postmasters are again reminded of this important duty. It should be remembered that THE BULLETIN is the only publication available to all sections of the country that prints daily the complete and correct casualty lists from our armies oversea exactly as they are issued by the War Department. Many newspapers print only the lists having local interest in their own territory. THE BULLETIN prints every name and address, thus making it a certain means of informing friends and relatives, wherever they may be, of the fate of a soldier or sailor, no matter where his home town or city.

Postmasters are urged, aside from their duty as officials, to make it their patriotic and personal duty to see that the public has the fullest benefit of this privilege.

The Postmaster General's order follows:

All postmasters are directed to post THE OFFICIAL BULLETIN *daily in a conspicuous place in the lobby or other portion of their respective post-office buildings where the public can read it; and, without expense to the Government, each and every postmaster is earnestly urged to see that this* BULLETIN *is made available to as many people as possible in the manner suggested.*

A. S. BURLESON,
Postmaster General.

CITY MAIL CARRIERS' UNIFORM.

OFFICE OF FIRST ASSISTANT
POSTMASTER GENERAL,
Washington, August 9, 1918.

As postmasters at city-delivery post offices are about to inspect carrier winter uniforms, the department desires to call attention to the limited supply of uniform cloth and the high prices therefor, and it is, therefore, requested that the inspections be conducted on lines of conservation by providing for the usage of as many uniforms worn last year as possible. Uniforms or parts of uniforms, including caps, that can be cleaned and repaired and placed in respectable appearance should be reworn rather than require the carrier to purchase a new uniform.

J. C. KOONS,
First Asst. Postmaster General.

DRAFT ARRESTS IN NEW YORK ARE EXPLAINED TO PRESIDENT BY THE ATTORNEY GENERAL

LETTER MADE PUBLIC BY MR. WILSON'S ORDER

Department of Justice Head Reviews Efforts to Round Up "Slackers" and "Delinquents"—Use of Soldiers and Sailors by Certain Agents of Department Declared Illegal and Inexcusable.

The President directs the re'ease for publication of the following letter from the Attorney General relative to the recent arrests in New York of persons charged with evading the draft:

SEPTEMBER 9, 1918.

The PRESIDENT,
The White House.

DEAR MR. PRESIDENT: On returning to Washington I find your letter of the 5th instant, asking to be informed of the facts and circumstances in connection with the recent arrests by representatives of the Department of Justice in New York of persons charged with being slackers. As stated by the Acting Attorney General in acknowledging your letter, the circumstances attending these arrests as reported in the newspapers had already challenged the attention of the department, and inquiries had been set on foot to ascertain whether any action had been taken by representatives of the department contrary to law or to the instructions of the Attorney General.

In order to set forth intelligently the proceedings at New York it is necessary to touch on a serious national problem. There are many deserters and slackers at large in this country. In a letter to me dated August 5, the Secretary of War gave figures showing the number of deserters and delinquents under the first and second drafts and stated that while it was impossible to give the actual number of those who had failed to register at all—slackers, so-called—the number was large.

Energetic Measures Required.

The Secretary of War referred to this condition "as an indictment against the honor of the Nation." To permit it to continue would weaken substantially the

(Continued on page 2.)

British Ship With U. S. Men Hit by an Enemy Torpedo; All on Board Are Saved

The Navy Department has received a dispatch from Vice Admiral Sims stating that a British liner carrying American troops was struck by a torpedo off the British coast, but that all the troops and others aboard were rescued; a muster was held and all accounted for.

Arrival of U. S. Troops At Archangel Announced By Order of Gen. March

By order of Gen. March the safe arrival of American troops at Archangel is announced.

RESERVISTS IN THE NAVY NOT ON ACTUAL SERVICE REQUIRED TO REGISTER

The recruiting division of the Navy Department has sent this notice to all inspectors and recruiting officers:

"Registration is required of all naval reservists not on active duty. These men will be placed in class 5, as heretofore."

MR. BARUCH DISCUSSES POSITION OF WAR INDUSTRIES BOARD AS TO NECESSARY WORKERS

FIRST DUTY FURNISH MAN POWER

Every Effort of Industrial Establishments Should Be to This One Purpose—Employees Should Keep Advised as to the Law.

Bernard M. Baruch, chairman of the War Industries Board, at his regular conference with the Washington newspaper correspondents on Wednesday discussed these subjects:

1. Draft regulations.
2. Interallied tin pool.
3. Standard shoe maximum price.
4. Bad transportation situation in Germany.
5. New type of cotton compressor.

Emphasizing clearly his position with respect to his efforts to protect industrial establishments furnishing the soldier with war supplies, Mr. Baruch said:

First Duty of the Industries.

"The first duty of the industrial establishment is to bring about the needed increment of man power in the Army. The second duty is to protect the industrial establishments which are essential to supplying the soldiers with the tools of war. The War Industries Board directs the attention of industrial America to the fact that it has a highly important part in making the operation of the draft law successful. The first thing to do is for each employer of labor to thoroughly familiarize himself with the details of the law. The next is to make it a matter of honor to ask for industrial exemption for the lowest possible number and only for the indispensable key men. By observing these two points the duty to the Army and the duty to the Army's supply source will be discharged."

Mr. Baruch explained that the issuance of the new preference list by the War Industries Board about the same time that Provost Marshal General Crowder issued his draft regulations was a coincidence, and that the preference list, which undoubtedly will be used in connection with the exemption of essential men in war-essential industries, was prepared primarily to show essentiality and shortage of industry.

In answer to inquiries he stated that several industries not specifically mentioned were included in general classifications, illustrating with the statement that clothing makers are included under the general title of textiles, which are carried on the preference list.

(Continued on page 7.)

REPORT OF ATTORNEY GENERAL ON NEW YORK DRAFT ARRESTS

(Continued from page 1.)

Nation's fighting power and do grievous injustice to the great body of the youth of the land who have so gallantly met their military obligations. Energetic measures were required. The Secretary of War naturally looked to this department for assistance. To attempt to apprehend so great a number of offenders by running down individual cases obviously would have been futile. Some form of dragnet process, within the law of course, was absolutely essential.

Section 49 of the Rules and Regulations for the enforcement of the Selective Service Law, promulgated by the President November 8, 1917, referring to slackers and delinquents, provides:

"Those who fail to return the Questionnaire, or to appear for physical examination, or to report change of status, or to report for any duty, or to perform any act at the time and place required by these regulations or by direction by local or district boards in pursuance thereof, are guilty of a misdemeanor under section 6 of the selective service law. Under authority granted in section 6 of that law, it is hereby made the duty of all police officials of the United States and of any State, or any county, municipality, or other subdivision thereof, to locate and to take into custody such persons and to bring them forthwith before local boards * * *."

And with respect to deserters the same section provides:

"It is hereby made the duty of all such police officials to apprehend and arrest such deserters."

Plan Agreed Upon.

It was accordingly decided to adopt the plan of canvassing or rounding up in the large cities on particular days all men apparently within the draft age and arranging for a summary and immediate investigation of their status through their local draft boards. Of necessity this involved detaining pending investigation, all such men who did not have registration or classification cards (which registrants are required by the regulations to keep always in their personal possession, or who were not able to establish by satisfactory evidence that they were outside the draft ages. It was expected that for the most part such men would voluntarily go to the places of detention, which were usually armories, while the investigation of their status was being made. Where arrests were necessary it was never contemplated that they should be made by any but police officials of the United States or of the States and municipalities where the canvass was being conducted. The making of arrests in such cases by the military or by the members of any private organization would have been contrary to law and contrary to the express directions of the Attorney General, except in the case of deserters, where, of course, the military authorities had the power to make arrests. It was expected, however, that where the number of detained was large this department, in making the necessary investigations, would have the aid of the American Protective League, a private organization of established standing which had long been participating in the enforcement of the selective service law by express invitation of the Provost Marshal General; and that in guarding the persons taken into custody it would have the aid of units of the military and naval forces.

The plan was put into effect at several points before it was attempted in New York, notably Chicago and Boston, with excellent results; and, so far as I am informed, to the satisfaction of the communities affected.

Dragnet Process Necessary.

While this plan was evolved in discussions with a representative of the Provost Marshal General's office, I take full and entire responsibility for adopting it and for putting it into effect. I know that some such dragnet process is necessary unless thousands upon thousands of deserters and slackers are to remain at large. I believe the plan adopted is authorized by the regulations. I believe, also, judging by the results at a number of different points, that the great body of our people will cheerfully submit to the minor inconveniences which the execution of any such plan of necessity entails, to the end that this indictment of the Nation's honor, this drain on the Nation's strength, may be removed. I shall, therefore, continue to employ the plan unless you give directions to the contrary.

Coming to the city of New York, I again accept full and entire responsibility for putting into effect there the general plan of rounding up deserters and slackers which I have described. Contrary to my express instructions, however, instructions which I have repeated over and over again, and contrary to law, certain members of the investigating force of this department, without consultation with me or with any law officer of the department, used soldiers and sailors and certain members of the American Protective League, I am satisfied, in making arrests. I am convinced by the inquiries which I have made that they were led into this breach of authority by excess of zeal for the public good. While this extenuates, it does not excuse their action.

Besides being unlawful, the employment of members of the military forces and of private organizations in making arrests was ill-judged, as such men are not generally fitted by training or experience to exercise the discretion required in the circumstances.

Canvass In Manhattan and Bronx.

During the three-day canvass in Manhattan and the Bronx, 11,652 persons were apprehended and temporarily held at places of detention. Of these, about 300 were inducted into the military service and at least 1,500 turned over to their local boards as delinquents. In Brooklyn, 9,750 were detained, of whom 262 have been held by order of court and at least 1,000 turned over to their local boards as delinquents. These figures do not include a large number of persons who, on being accosted, made a satisfactory showing and were not detained; nor do they include a smaller number who were taken to the police station and required to give further information before being released.

Unquestionably a considerable number of persons, who on the showing made by them should not have been detained, were detained—none, however, overnight. Such mistakes always occur in exercising the power of arrest, though in much fewer number where the power is exercised by trained police officers.

On the other hand, the investigation which I have made leads me to believe that the number of persons over or under draft age who were apprehended was inconsiderable; that there was no disorder anywhere; that no persons are known to have been assaulted or maltreated; that in general the canvass was acquiesced in with good nature.

Canvass in New Jersey.

Simultaneously with the canvass in New York one was made in the cities of northern New Jersey, where, so far as I can learn, there was little, if any, criticism. The canvass in northern New Jersey was carried out in accordance with the instructions and known policy of the department. In the city of Newark, for example, the canvass was made by groups of men composed of one regular police officer, who in every instance made the arrest, aided by members of the American Protective League and uniformed, unarmed members of the State militia, who assisted in the work of accosting and making inquiries. No soldiers, sailors, or members of private organizations were employed in making arrests.

There were apprehended in the five cities of northern New Jersey—Newark, Jersey City, Hoboken, Paterson, and Passaic—a total of 28,875 persons. Out of this number, 749 men have been ordered inducted into the Army, and in addition 12,515 were delinquents whose draft records of classification were corrected by the local boards. These delinquents were persons who at one time had been given a temporary classification by reason of illness, exemption, etc., but who had failed to report for a corrected classification, or else persons who had failed to register, failed to appear for physical examination, or failed to file questionnaires, etc.

I remain,

Sincerely, yours,

T. W. GREGORY,
Attorney General.

Proposals for Twine Asked by P. O. Department

Sealed proposals will be received at the office of the purchasing agent of the Post Office Department until 2 p. m., October 1, 1918, for furnishing approximately 2,100,000 pounds of jute twine, or approximately 1,800,000 pounds of cotton twine and tying devices for tying packages of letters that may be required by the Postal Service, for a period of one year beginning November 1, 1918, and ending October 31, 1919.

Specifications and blanks for proposals will be furnished upon application to the purchasing agent.

SEALED PROPOSALS.

Sealed proposals will be opened by the Superintendent of Lighthouses at 2 o'clock p. m., September 24, 1918, for one oil engine-driven hoisting engine.

AMERICAN COMMITTEE NAMED TO INSURE FAIR TREATMENT OF GERMANS RESIDENT HERE

STATE DEPARTMENT STATEMENT

Mission a Delicate One, But Clearly To Protect Alien Enemies and Their Families—To Cooperate With Swedish and Swiss Legations

The Secretary of State announces the following:

Some time ago announcement was made of the proposed formation of a national committee, composed of American citizens, which would cooperate with the legations of Sweden and Switzerland and the consuls under their jurisdiction in relieving the situation and condition of law-abiding residents in this country who are German or Austrian nationals, and in supervising the aid given the families of interned alien enemies.

This committee has now been formed under the name of the "National Alien Enemy Relief Committee, in Cooperation with the Legations of Sweden and Switzerland and with the Approval of the Government of the United States" with an office at 818 Connecticut Avenue, Washington, D. C., and with a membership which comprises prominent American citizens in the larger cities of the country. On and after September 15 this committee will be in a position to perform its functions in the fullest possible manner.

Purposes of the Committee.

The purposes of this committee are few and relatively simple but of a delicate nature and requiring the greatest care in their accomplishment. These purposes are, for the present, twofold—first, the recording and control of the assistance dispensed to the families of interned alien enemies by the legations of Sweden and Switzerland; second, the rendering of aid and assistance, both financially and socially, to the vastly greater number of law-abiding, industrious, and discreet subjects of Germany and Austria-Hungary who are resident in the United States. Many of this latter group, although loyal to the United States, are, through unjust and unfounded suspicions and prejudice, of which they are the victims, prevented from or seriously handicapped in earning their livelihood and are, in consequence, reduced to grave financial straits.

Appreciating the need in which this class of residents finds itself, and realizing that some central control and guidance was desirable in the matter of their relief, the Department of State and the Department of Justice have not only approved the formation of this committee but have encouraged it to undertake this important and valuable work.

This committee is not, however, a general relief organization, nor has it any funds of its own for the relief of those in distress. Its functions are rather to oversee and direct rather than actually to administer relief, and these functions may be summarized as follows:

1. To investigate, at the request of the legations, appeals for aid and assistance which are received from the families of interned alien enemies, in order that the legations may be informed whether the appeal is genuine, what the real need of the applicant is, and how long that need is or will be continued, so that the legations may grant relief from funds in their possession with the assurance that they are not being imposed upon.

2. To direct and encourage the relief, through the numerous local organizations throughout the country, of the law-abiding Germans and Austro-Hungarians resident in the United States who are in need of financial or other assistance on account of discrimination and prejudice against them arising out of their nationality or from other causes directly or indirectly attributable to the war.

Appeals To Be Investigated.

Appeals made to the committee for relief will be promptly investigated and, if the request is a proper one, adequate assistance will be rendered, if possible, through an appropriate local relief society under the direction of this committee. In the event of the committee learning from time to time of alleged discrimination against or unfair treatment of innocent alien enemies through prejudice, fear of their disloyalty, or for any other reasons incident to the war, such cases will be carefully looked into and the facts with reference thereto will be ascertained. If it appears that this discrimination is unwarranted, the assistance of local aid societies and loyal citizens will be enlisted to allay these groundless fears to insure fair treatment in the future of those discriminated against.

The members of the committee are giving generously of their time and thought to make this plan a success and will not receive compensation of any kind. On the contrary, the expenses incident to the maintenance of an office and the carrying on of its work are being defrayed by the contributions received from the various members of the committee.

The object is a most worthy one and one which should appeal to the sense of justice of all fair-minded Americans and the zeal and enthusiasm exhibited by the members of the committee in carrying on the work insure its success, provided that it receives the cooperation and sympathy of the American people in general and especially of the local relief societies.

Membership of the Committee.

The National Alien Enemy Relief Committee membership is as follows:

Dr. Norman Bridge, Washington, D. C., chairman.

Eugene E. Prussing, executive secretary.

Willis H. Booth, Security Trust & Savings Bank, Los Angeles, Cal.

Hiram S. Cody, 105 South La Salle Street, Chicago, Ill.

J. E. Chilberg, president, Scandinavian-American National Bank, Seattle, Wash.

George B. Dealey, The News, Dallas, Tex.

Felix Frankfurter, Department of Labor, Washington, D. C.

Mrs. George C. Hitchcock, 5363 Waterman Avenue, St. Louis, Mo.

Darwin R. James, 19 West Forty-fourth Street, New York, N. Y.

Dr. F. Park Lewis, 454 Franklin Street, Buffalo, N. Y.

W. L. Marbury, 700 Maryland Trust Building, Baltimore, Md.

Walter A. May, May Building, Pittsburgh, Pa.

Charles Nagel, Security Building, St. Louis, Mo.

George W. Niedringhaus, 3745 Lindell Avenue, St. Louis, Mo.

J. E. Otis, vice president, Central Trust Co., Chicago, Ill.

Miss Mary E. Richmond, 130 East Twenty-second Street, New York.

Jacob G. Schmidlapp, chairman board of directors, Union Savings & Trust Co., Cincinnati, Ohio.

C. C. Webber, Deere & Webber Co., Minneapolis, Minn.

Prices of Commodities in All Countries Advanced on Account of the War

Consul General Scidmore at Yokohama, reports:

Prices of commodities have advanced in all countries, both belligerent and nonbelligerent, owing to the war. According to investigations made by the Bank of Japan, the index number of average prices for the years mentioned in Tokyo, London, and New York (prices just before the outbreak of the war, or in July, 1914, being taken as 100) was:

Period.	Tokyo.	London.	New York.
First year of war	95.5	116.0	108.9
Second year	111.8	146.0	124.3
Third year	132.7	191.8	154.2

Thus prices had not doubled on an average before the end of the third year of war, but the advance has been accelerated since the fourth year, or since the summer of last year, as will be seen from the following table:

Period.	Tokyo.	London.	New York.
1917:			
July	166	218	186
August	178	221	189
September	172	220	
October	172	222	
November	172	225	197
December	175	228	
1918:			
January	181	226	
February	188	229	
March	193	229	
April	197	232	213
May	196	232	218
June	198		

Prices in London and New York have advanced to more than double the prewar figures, and even those in Tokyo have now nearly doubled since the outbreak of the war. In this connection it has to be added that prices in Tokyo are somewhat lower than in Osaka and Kobé, the latter city being noted as the dearest place for living in the whole country. According to investigations made by the Asahi, prices of commodities in Osaka since the outbreak of the war have been about 20 per cent higher than in Tokyo.—Commerce Reports.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

RATES BY MAIL.

Daily	One year	$5.00
	Six months	3.00
	One year, postage prepaid to foreign countries	8.00
	Six months, postage prepaid to foreign countries	4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

PLAN FOR SAVING OF WOOL IN PAPER MAKERS' FELT INDUSTRY

Bernard M. Baruch, chairman of the War Industries Board, authorizes the following:

A strict plan for conservation and saving of wool is being worked out for the paper makers' felt industry, which makes woolen felts for paper manufacturers, by the paper makers' felt department of the felt section under the general direction of the War Industries Board.

Wool is now being allotted this industry in amounts absolutely needed to keep the plants going. The felts produced are for use in this country only. The War Industries Board has classed this textile industry as essential, since paper for newspapers, books, magazines, writing paper, food containers, in fact paper of any and every kind, can not be made without felts, and paper itself is a strictly essential item.

LUMBER HEADQUARTERS MOVED.

W. J. Haynan Named General Supervisor for Fleet Corporation.

The United States Shipping Board Emergency Fleet Corporation, in line with its efforts to centralize the control of all activities, has decided to remove its lumber headquarters from New Orleans to Philadelphia.

This was made necessary by the recent abolition of the purchasing production and transportation divisions, and the consolidation of their functions under the supply division.

The offices of the lumber administrator and assistant lumber administrator are discontinued, and W. J. Haynan, the former assistant administrator, is designated as head of the new lumber section with the title of general lumber supervisor.

American Official Communiques on Operations of U. S. Forces

The following is authorized by the War Department:

American Official Communique No. 119.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 10, 1918.

Section A.—Except for artillery fighting in Lorraine and in the Vosges the day passed quietly in the sectors occupied by our troops.

Section B.—The following details of a strong hostile raid in the Woevre, reported in American Official Communique Number 116, have been reported: At 4:30 o'clock, morning, September 7, approximately two hundred enemy infantry, accompanied by twenty pioneers, raided our line between Flirey and Limey. A box barrage was laid down two hundred meters south of the Metz Road. The raiding party entered the sector and then rushed the outpost group, which retired, firing on the enemy. Dividing into three detachments, the enemy tried to encircle this group, but a deployed platoon succeeded in routing them successfully, causing them to retire. Seven of the enemy were captured, two of whom were wounded. Three of the enemy were killed in the trenches and it is believed there are several others dead in No Man's Land. The combat groups state that they saw many enemy wounded being carried off by their own men. Only one of our men was captured and he succeeded in escaping before the enemy could get him back to their lines. Interrogation of the prisoners captured established that the raid was made in order to get prisoners for identification of the opposing troops. As no prisoners had been taken for a considerable period of time, it was decided that a large raiding party should be sent out, made up of units from each regiment of the German division in the sector. Volunteers were asked for but as none was obtained men were conscripted for the raid.

A second hostile raid on the same day in the same sector was also repulsed. Our casualties in these two encounters were exceptionally light.

The commander in chief has awarded the Distinguished Service Cross to the following named noncommissioned officer for the act set forth after his name:

Corpl. ALEXANDER NEWELL, Infantry. "Leading a squad of nine men, he fearlessly passed through an enemy barrage, captured 5 machine guns and 33 prisoners, and recovered a sergeant of his company who was helpless from wounds, all under violent artillery fire, near Chateau Thierry, France, July 15, 1918."

The emergency address of Corpl. Newell is Joseph Newell, father, 11949 Lafayette Avenue, Chicago, Ill.

American Official Communique No. 120.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 11, 1918.

Section A.—In the course of successful raids in Lorraine, our detachments penetrated the enemy's trenches, inflicting losses and capturing prisoners. There is nothing else of importance to report.

TREASURY STATEMENT.

TREASURY DEPARTMENT,
September 10, 1918.

RECEIPTS.

Customs receipts	$824,734.43
Internal-revenue receipts:	
Income and excess-profits tax	505,301.35

Balance in general fund today	1,210,086,769.76
Total	1,294,133,708.90

Grocers in Conference Promise Saving in Tin

The Food Administration issues the following:

Wholesale grocers of the Nation promised their heartiest cooperation in saving tin, steel, and paper by changes in methods of packing foodstuffs, after a conference of Food Administration officials and a representative committee of the National Wholesale Grocers' Association.

Elimination of odd and small sizes in tin containers, doing away with wasteful practices and conservation of labor, were suggested as means by which the wholesalers can serve the national interest. Tea, coffee, spices, baking powder, and other products were discussed as possibilities for packing in nonmetal containers.

Those present representing the National Wholesale Grocers' Association were: Arjay Davies, Easton, Pa., president of the association; S. B. Steel and Ezra J. Warner, Chicago; J. W. Herscher, Charleston, W. Va.; B. B. Cushman, Detroit; P. C. Staib, New York City; C. E. Picken, Omaha.

PROCEEDINGS OF THE CONGRESS BRIEFLY TOLD

SENATE.

After three days of consideration and with only minor amendments the Senate yesterday afternoon passed House bill providing for Federal stimulation of the production and distribution of minerals essential for war purposes. The measure now goes to conference, where differences between the two houses will be reconciled. The Senate also passed a bill providing for the international registration in this country of trade-marks and to give effect to the provisions of the convention for the protection of trade-marks and commercial names, signed in Buenos Aires in 1910.

Fuel Administrator Garfield, replying to the Lodge resolution, informed the Senate concerning the gasoline situation. The report showed that the reserve supply was being rapidly depleted and emphasized the fact that unless conservation steps are taken immediately there will be a deficit by the end of the year of approximately 1,000,000 barrels. Senator Lodge, following the receipt of this communication, introduced another resolution calling upon the Bureau of Mines for a report on the production and consumption of crude petroleum, together with data on stocks on hand. The figures of the Fuel Administration showed that on August 1 the supply of gasoline in the country east of California was 7,800,000 barrels. The daily consumption for the same period was 194,000 barrels, of which 160,000 were domestic consumption and 34,000 barrels for export. The average daily production was 191,000 barrels, thus indicating an average daily deficit of 3,000 barrels. The report said it had become necessary to buy 250 car loads of gasoline in California and ship it east to meet needs on the Atlantic seaboard.

Senator Smith, of Georgia, introduced a bill extending the vocational-education provisions of the law recently passed so as to include persons in this country injured in industrial or other pursuits. It provides that beginning the fiscal year 1920, $1,000,000 shall be set aside for the work to be distributed on the basis of population, each State to supply an amount equal to the Federal appropriation. For the fiscal year ending June 30, 1919, $500,000 would be appropriated. Senator Sheppard introduced a bill providing for a Federal fund of $50,000,000 to be set aside for the relief of farmers who have sustained heavy damages to their crops by reason of the drought. He also introduced a resolution under which the Court of Claims would be authorized to investigate the claims for damages of citizens or others who suffered from the negro soldier riots at Houston, Tex., in August, 1917.

The nomination of Josephus Daniels, jr., to be a first lieutenant in the Marine Corps was confirmed yesterday afternoon.

A communication from the French ambassador transmitted to Congress yesterday stated that as an appreciation of the reception tendered the commission from France to this country, headed by M. Viviani and Marshal Joffre, the French Government desired to offer to the Senate and House vases manufactured at Sevres, the famous establishment near Paris.

Irving R. Drew, appointed by the governor of New Hampshire to fill the unexpired term of the late Senator Gallinger, pending the regular election, was inducted into the office yesterday afternoon.

Theatrical managers before the Finance Committee yesterday protested against the proposed increased tax on admissions in the war-revenue bill and contended that it would decrease revenue by reducing the attendance at the theaters and the movies. Milton Weil, representing the Musical Alliance, also protested against the increased tax.

Before the Census Committee, which has under consideration the House bill for taking the next decennial census, Census Director Sam Rogers denied that the manner provided for the appointment of enumerators and other employees violated the civil-service regulations. He said the provisions of the bill in this respect were not different from previous acts enacted for taking the census and contended that it would be impracticable to attempt to appoint approximately 85,000 enumerators through the civil service.

HOUSE.

Debate continued yesterday on the war revenue bill, Chairman Kitchin announcing that general discussion would be concluded at 6 o'clock to-night, and the measure was proceeded with under the five-minute rule. The Ways and Means Committee this morning heard Assistant Secretary Leffingwell on the Treasury's plan to exempt incomes from Liberty bonds from income taxes. Representatives Sterling of Illinois and Sloan of Nebraska, both members of the Ways and Means Committee, in debate in the House yesterday criticised the failure to include higher customs duties as one means of raising revenue.

SERIES OF WAR LECTURES.

A series of lectures illustrated with slides on the various war activities of the United States up to this time is being prepared by George F. Zook, professor of modern European history, Pennsylvania State College. The cantonments, airplanes, the Navy, shipbuilding, the trenches, and many other features of the war are described in an interesting and instructive way. The lectures will be especially useful for the work of teachers, Y. M. C. A. secretaries, and club officials.

Each lecture is accompanied by from 45 to 65 slides. The slides are of excellent workmanship and will be sold at the nominal price of 15 cents each. The lectures and slides will be available for use about October 1. For further information address the Division of Civic and Educational Publications, Committee on Public Information, Washington, D. C.

COMPARATIVE STATEMENT OF BANK CHARTERS ISSUED

The Comptroller of the Currency authorizes the following comparative statement of new national bank charters and capital increases for eight months ending August 31, 1918, and 1917:

Charters Applied For.—During the first eight months of 1918, this office received 175 applications for charters for new national banks, with capital of $10,165,000 compared with 221 applications received during the corresponding period in 1917, with capital of $15,790,000.

Charters Granted.—In these eight months of 1918, 107 charters were granted, capital $10,830,000, as compared with 140 charters granted during the corresponding period in 1917, with capital of $9,710,000.

Capital Increases.—For this period in 1918, 131 national banks increased their capital stock in the sum of $11,920,000, against 141 banks increasing their capital by $19,319,990, during the same period in 1917.

Capital Reductions.—Three banks reduced their capital during the first eight months of 1918 by $175,000. During the same period last year 10 banks reduced their capital $648,000.

Liquidations.—Thirty-two national banks went into voluntary liquidation (exclusive of those consolidating with other national banks) during the first eight months of 1918, their aggregate capital being $5,440,000, as compared with 42 such banks liquidating during the same period in 1917, with an aggregate capital of $5,007,500.

Charters Refused.—During the first eight months of 1918, the Comptroller of the Currency refused fifteen applications for charters for new national banks. During the same period last year twenty-five applications were refused.

HANGAR AT BOLLING FIELD FOR BRITISH AIR MISSION

The War Department authorizes the following:

One of the additions to be made to Bolling Field, Anacostia, D. C., when the contemplated enlargement is begun, will be the erection of a hangar for the British Air Mission stationed in Washington. This hangar will be large enough to shelter six airplanes. A storage house for equipment and supplies will also be built for the British flyers attached to the British Air Mission. Formerly the airplanes of the British flyers located in this city were sheltered in a canvas tent on Polo Field at Potomac Park. This has been taken down and the machines, excepting those which are being used by General Lee and his associates on the western flying trip, have been stored elsewhere temporarily until the new quarters are completed.

ORDERED TO WASHINGTON.

Special Orders, No. 206:

22. Lieut. Col. William O. Smith, Quartermaster Corps, is relieved from his present duty and will proceed to Washington, D. C., and report in person to the director of the war plans division, General Staff, for instructions in General Staff duties.

TABLE D'HOTE PLAN FOR DINNERS AND LUNCHEON ON DINING CARS

Director General McAdoo announced yesterday that, effective October 1, the custom of serving a la carte meals on dining cars will be abandoned, so far as lunch and dinner are concerned, and the table d'hote plan will be substituted. Breakfast will consist of a simple a la carte menu at moderate prices and lunch and dinner will be table d'hote meals of not to exceed four courses. The charge for lunch and dinner will be $1, with the exception that on a very few limited trains the charge for dinner will be $1.25.

Standardization of Meals.

While in a general way the plan contemplates a standardization of meals, there will be such variation as local market conditions make desirable. The meals, while simple, will be both ample and good. The small charge, which will bring them within the reach of the most moderate purse, is made possible by the many evident economies that can be accomplished, such as the increased capacity of dining cars, the complete utilization of supplies, and the saving in skilled cooks and waiters, who are very difficult to engage at present. Patrons will be saved the delays incident to the selection from varied menus and the inconvenience produced by congested conditions of travel. The new plan is also expected to result in the conservation of food.

Effective on All Roads.

Arrangements have been completed for making the new plan effective on the same day on all railroads under Government control. At the same time steps are being taken looking to the coordination of dining-car organizations and commissaries and the joint utilization of equipment which it is thought will lead to far more satisfactory results, both for the railroads and the public, than was possible under the old conditions.

SUBSTITUTING LOWER-PRICED COAL IN MANY ARMY CAMPS

The War Department authorizes the following:

In accordance with its policy of substituting lower-priced coal wherever possible at camps and cantonments throughout the country, the fuel and forage division of the Quartermaster Corps has been successful in substituting run-of-mine bituminous coal for lump bituminous coal in many of the western camps and cantonments. The saving resulting from this substitution and from the substitution of bituminous coal for anthracite in many of the southern and eastern camps last spring will aggregate more than half a million dollars.

The fuel and forage division has been requested by the construction division of the Army to purchase 903,000 gallons of road oil for use at 15 camps and cantonments in this country. This road oil is to be used to obviate the dust around camp hospitals and upon drill grounds. Delivery of this amount of oil will require approximately 10,000 tank cars.

PHONE MESSAGE SAYS U-BOAT WAS SUNK BY U. S. S. BUCK

Gun Fight at Long Range with Camouflaged Enemy Described by American Captain.

The Navy Department has received by telephone the following summary of a statement made by the captain of the U. S. S. *Frank H. Buck*

"On September 3, at 8.25 a. m., an enemy submarine was sighted on the starboard beam at 14,000 yards. The submarine opened fire with two 6-inch guns. We answered fire with forward gun. We saw the shot fall about 400 yards short and immediately swung stern forward to submarine, using after gun. Our shots were very close to the submarine and the submarine's shrapnel was bursting very near to us, some of the pieces falling upon our deck amidships. We changed the course frequently, which seemed to upset the submarine's aim and range. As soon as the submarine saw our range was equal to hers, she hauled away from us. Up to that time she had been closing in on us.

Hit Apparently Registered.

"Before the submarine could get out of range our twenty-eighth shot from the after gun apparently hit her stern. The twenty-ninth shot hit her just forward of the conning tower, near and under the water line. The bow immediately shot up into the air very suddenly, then settled and went down out of sight, the stern making a half turn toward us and then it disappeared.

"Upon shot striking the submarine we saw very closely a terrific explosion and black smoke, which enveloped the submarine. I am positive that we destroyed her, as she sank almost instantly after the shot struck her.

"The engagement lasted 29 minutes. Some of the fragments of the submarine fell on our deck and were picked up by the quartermaster and chief gunner's mate.

Flew No Flag.

"The submarine was about 300 feet long, of the early type of German submarines with high bows, and had two 6-inch guns close to the conning tower, fore and aft. She fired in salvos, using about 60 shots altogether. She was camouflaged and flew no flag."

The captain of the *Frank H. Buck* highly commends the efficiency and conduct of Chief Gunner's Mate Joseph Steffens, United States Navy, and the whole gun crew under his command.

The captain's official report has not yet been received by the Navy Department.

BIDS FOR POST OFFICE SUPPLIES.

OFFICE OF THE P. M. GENERAL,
Washington, D. C., Sept. 7, 1918.

Order No. 1963.

Post Office Department, Washington, September 7, 1918. Sealed proposals will be received at the office of the purchasing agent of this department until 2 o'clock p. m., on October 1, 1918, for furnishing approximately 2,100,000 pounds jute twine, or approximately 1,800,000 pounds of cotton twine and tying devices for tying packages of letters that may be required by the Postal Service, for a period of one year beginning November 1, 1918, and ending October 31, 1919. Specifications and blanks for proposals will be furnished upon application to the purchasing agent.

A. S. BURLESON,
Postmaster General.

ONLY PROJECTED BUILDINGS ARE INVOLVED IN PRIORITY RULING

Bernard M. Baruch, chairman of the War Industries Board, authorizes the following:

The War Industries Board announcement that its plan for conservation of material for war needs and release of labor to war work involved restriction of nonwar constructions has brought a flood of telegrams from every section of the country with reference to furnishing material for buildings already under construction.

Under a ruling made to-day, practically all buildings under way may be completed and dealers in building material may continue to supply needed material.

To Investigate New Projects.

Regaring new building projects, under arrangement made by Mr. Baruch, chairman of the War Industries Board, with the Council of National Defense, representatives of the State councils are to investigate each of them and report on each operation separately, with recommendations as to essentiality considered in connection with war needs, to the nonwar construction section of the War Industries Board, of which D. R. McLennan is head. Until these reports have been received and considered, the Priorities Division states it is not in a position to pass intelligently on various applications now made for priorities for building material.

Text of Statement.

Judge E. B. Parker, Priorities Commissioner, authorized the following explanatory statement:

Circular No. 21 issued by the Priorities Division of the War Industries Board under date of September 3, 1918, dealing with nonwar construction, applies only to projected buildings and not to these already begun. Where a substantial portion of a building has already been constructed, manufacturers and distributors of and dealers in building materials may continue to furnish such materials for the completion of such building, pending further action by the War Industries Board. The local representatives of the Council of National Defense are requested to make surveys of all building activities in their respective territories and report same as promptly as possible to their State chairmen, together with their recommendations concerning the necessity for the continuance of such construction or deferring same until after the war. The State chairman will in turn forward such reports, with their recommendations, to D. R. McLennan, chief of the nonwar construction section of the Priorities Division of the War Industries Board, Washington, D. C.

BUSINESS MEN OF THE NATION ASKED TO KEEP CLOSE ACCOUNT

Through the medium of the retail credit men's associations, boards of trade, chambers of commerce, and wholesalers and jobbers Commissioner of Internal Revenue Daniel C. Roper is sending to the retail merchants of the country a personal letter urging the necessity for maintaining an accurate system of accounts.

The $8,000,000,000 revenue bill now pending in Congress means an average tax of $76 for every man, woman, and child in America. "In many businesses," says Commissioner Roper, "taxes will be one of the largest items of expense. It is of the utmost importance, therefore, that every concern, large or small, whether corporation, partnership, or individual, shall maintain an exact record of its receipts and expenses, in other words keep accurate accounts. Taxes should be considered as an expense for the year for which they are assessed rather than for the year in which they are actually paid, and the necessary reserves should be provided at once.

No Special System Prescribed.

"No special system of accounts is prescribed by the Bureau of Internal Revenue, but the books should show in detail inventories, purchases, sales, capital investments, depreciation, and similar items required in making up income tax returns.

"Every merchant should study the income-tax law and regulations and see to it that his accounts are kept in a manner that will enable him to determine his net income for taxation purposes. Aside from the necessity of keeping systematic accounts in order to comply with the Government's requirements, every progressive merchant should adopt an approved accounting system for the good of his own business. In no other way can he further his financial interests more effectively.

"The bad-debt loss of the Nation, which runs into large figures annually, is due in large measure to inexperience and inability. If merchants would keep even the simplest books of account the bad-debt wastage would be reduced materially, for inability and inexperience are usually marked by the absence of an accounting system.

Advantage to Business Man.

"The man who knows the exact conditions of his business from day to day has an immeasurable advantage over the individual who has no records upon which to base his operations. It is the duty of every citizen, especially in these war times, to keep in such close touch with his business through record keeping and otherwise as to maintain the greatest efficiency and render to his Government every cent due in taxes."

It is expected through the various agencies employed by the bureau to place one of these letters in the hands of practically every retail merchant in the United States. The National Association of Credit Men, with headquarters in New York, not only has assured the bureau of its cooperation in the dissemination of the letter, but it is at work on a uniform system of accounting to be supplied to merchants at cost.

"Credit men generally," said a representative of the national association, "have found by experience that a large number of failures result because the men who fail do not have a regular system of accounts, and, therefore, do not know their financial condition from time to time. The National Association of Credit Men recognizes this condition and has been cooperating with retailers in a movement to remedy the situation."

Required to Make Reports.

Persons, corporations, partnerships, and associations liable to any tax imposed by the war-revenue act are required to keep such records and render under oath such statement of their accounts as the Commissioner of Internal Revenue may prescribe.

By adopting and maintaining an accurate system of accounting, the merchant, it is pointed out by Commissioner Roper, will be able to place before the internal revenue inspector book records showing how he arrived at his statement of net income, thus saving himself annoyance and expense and at the same time facilitating the Government's task of collecting the war revenues.

Give our boys in the Army and Navy every fighting chance. Pledge yourself to save to the utmost of your ability and to buy war-savings stamps.

Postal Airplane First to Make New York-Chicago Flight in a Single Day

The Post Office Department authorizes the following:

The landing of the postal airplane at New York Tuesday recorded the first trip ever made by an airplane from Chicago to New York in a single day. The numerous attempts heretofore to make this flight have encountered interruptions which have prevented the completion of the trip until the succeeding day.

Pilot E. V. Gardner, accompanied by Edward Radle, mechanician, left Chicago Tuesday morning at 6.25 in a plane propelled by a Liberty motor, and landed at Hicksville, Long Island, at 8.20 p. m. Allowing for one hour's difference in time and for stops made for replenishing of gas and oil, the trip from Chicago was made in 12 hours and 55 minutes. The actual flying time, however, was 10 hours and 5 minutes, there being a delay of 1 hour and 57 minutes at Cleveland and another 53 minutes at Lockhaven, Pa., in procuring gas and oil.

Mr. Gardner began his flight at Chicago in a driving rain and encountered a severe head wind at Cleveland. He flew over New York at an elevation of 7,000 feet and landed in the dark on a very bad field at Hicksville, Long Island. In taking the landing the machine made a spill, slightly injuring the occupants. Mr. Gardner received a cut on his nose and near his left eye, and Mr. Radle was cut on the arm.

Two bags of mail for New York and connections were carried on the plane from Chicago and delivered at the New York post office.

POSITION OF WAR INDUSTRIES BOARD ON NECESSARY WORKERS

(Continued from page 1.)

Mr. Baruch said that the Summers Commission, which is headed by L. L. Summers, a member of the War Industries Board, and its technical advisor, was at work in London planning for the extension of pooling arrangements on other basic elements than tin, which has been pooled by the allied countries. He explained that the purpose of these arrangements which the War Industries Board was seeking to make extended to all materials in which there is a shortage that all users of them might get a supply at a reasonable price.

The plans for standard shoes and a maximum price, Mr. Baruch said, are coming along with the prospect of an early successful adjustment. Shoemakers, he said, were cooperating with the War Industries Board and many difficulties were being overcome. He impressed the fact, however, that his desire to fix a maximum price was not prompted by an idea of profiteering on the part of the shoe manufacturers, but was to assure the continued supply of serviceable shoes to the civilian population at a reasonable price. Incidentally he said that he believed a good shoe could be made to sell at $3.50 a pair.

Steel Survey of Stocks.

The steel survey of stocks in the hands of all manufacturers throughout the country which is now being made at the instance of the War Industries Board, it was explained, was for the purpose of ascertainment of sizes of stock and location and not with the idea of having such stocks commandeered.

In connection with the subject of steel, Mr. Baruch said that he had been told that transportation conditions in Germany at the present time were in especially bad shape. The rolling stock for transportation was broken down and there was no steel for replacement, and the Germans are short also of all kinds of lubricants.

It developed at the conference that the Railroad Administration is holding back plans worked out at the War Industries Board for the saving of transportation and cargo space in the movement of cotton through the use of a new cotton compressor. It is stated that a higher degree of compression would result in the saving of 50 per cent of shipment space.

More Land is Acquired at Mt. Clemens Flying Field

The War Department authorizes the following statement:

Eighteen hundred acres adjoining the Gunnery School at Selfridge field, Mount Clemens, Mich., have been acquired by lease or condemnation. This school is exclusively for the instruction of aviators. The tract of land which has been acquired is located between Selfridge field and Lake St. Clair.

On the tract are several summer homes and small hotels. Part of it is marsh land. The real estate section of the General Staff estimates that the rentals the first year of occupancy, due to crop and property damage, will amount to $52,000.

PRESIDENT'S PROCLAMATION REQUIRING STOCK-YARD FIRMS TO SECURE TRADE LICENSE ON OR BEFORE SEPTEMBER 19

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA,

A PROCLAMATION.

Whereas, under and by virtue of an act of Congress entitled "An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel," approved by the President on the 10th day of August, 1917, it is provided, among other things, as follows:

"That, by reason of the existence of a state of war, it is essential to the national security and defense, for the successful prosecution of the war, and for the support and maintenance of the Army and Navy to assure an adequate supply and equitable distribution, and to facilitate the movement, of foods, feeds, fuel, including fuel oil and natural gas, and fertilizer and fertilizer ingredients, tools, utensils, implements, machinery, and equipment required for the actual production of foods, feeds, and fuel, hereafter in this act called necessaries; to prevent, locally or generally, scarcity, monopolization, hoarding, injurious speculation, manipulations, and private controls affecting such supply, distribution, and movement; and to establish and maintain governmental control of such necessaries during the war. For such purposes the instrumentalities, means, methods, powers, authorities, duties, obligations, and prohibitions hereinafter set forth are created, established, conferred, and prescribed. The President is authorized to make such regulations and to issue such orders as are essential effectively to carry out the provisions of this act."

And whereas it is further provided in said act as follows:

"That from time to time, whenever the President shall find it essential to license the importation, manufacture, storage, mining, or distribution of any necessaries, in order to carry into effect any of the purposes of this act, and shall publicly so announce, no person shall, after a date fixed in the announcement, engage in or carry on any such business specified in the announcement of importation, manufacture, storage, mining, or distribution of any necessaries as set forth in such announcement, unless he shall secure and hold a license issued pursuant to this section. The President is authorized to issue such licenses and to prescribe regulations for the issuance of licenses and requirements for systems of accounts and auditing of accounts to be kept by licensees, submission or reports by them, with or without oath or affirmation, and the entry and inspection by the President's duly authorized agents of the places of business of licensees."

And whereas it is essential in order to carry into effect the purposes of said act, and in order to secure an adequate supply and equitable distribution, and to facilitate the movement of certain necessaries hereafter in this proclamation specified, that the license powers conferred upon the President by said act be at this time exercised to the extent hereinafter set forth,

Now, therefore, I, Woodrow Wilson, President of the United States of America, by virtue of the powers conferred on me by said act of Congress, hereby find and determine, and by this proclamation do announce, that it is essential, in order to carry into effect the purposes of said act, to license the importation, storage, and distribution of certain necessaries, to the extent hereinafter specified.

All individuals, partnerships, associations, and corporations (except as exempted by said act of Congress and except those required to be licensed pursuant to my proclamation dated June 18, 1918, under said act), engaged in the business of handling, buying, selling, or otherwise dealing in live or dead cattle, sheep, swine, or goats in or in connection with places, establishments, or facilities, commonly known as stockyards, consisting of pens or other inclosures, and their appurtenances, in which cattle, sheep, swine, or goats are received, held, or kept for sale, feeding, watering, or shipment, are hereby required to secure licenses on or before September 19, 1918, which will be issued under such rules and regulations governing the conduct of the business as may be prescribed under said act.

The Secretary of Agriculture shall carry into effect the provisions of said act, and shall supervise and direct the exercise of the powers and authority thereby given to the President, as far as the same apply to the said business, including the purchase of live or dead cattle, sheep, or swine in or in connection with stock yards, as a part of the business of packing fresh, canned, or cured beef, pork, or mutton licensed under the provisions of the proclamation of October 8, 1917, and to any and all practices, procedure, and regulations applicable thereto authorized or required under the provisions of said act, and in this behalf he shall do and perform such acts and things as may be authorized or required of him from time to time by direction of the President and under such rules and regulations as may be prescribed by the President from time to time. All departments and agencies of the Government are hereby directed to cooperate with the Secretary of Agriculture in the performance of the duties hereinbefore set forth.

Applications for licenses must be made to the law department, License Division, United States Food Administration, Washington, D. C., upon forms prepared for that purpose.

Any individual, partnership, association, or corporation, other than as hereinbefore excepted, who shall engage in or carry on any business described herein, without first securing the license required therefor, will be liable to the penalties prescribed by said act of Congress.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia this sixth day of September, in the year of our Lord 1918, and of the independence of the United States of America the one hundred and forty-third.

WOODROW WILSON.

By the President:

ROBERT LANSING,
Secretary of State.

Addresses of Men Cited For Military Honors

The War Department authorizes the following emergency addresses of the men cited in American Official Communique No. 117 as having been awarded the Distinguished Service Cross:

Pvt. Harold B. Crawford, Machine Gun Battalion. Mrs. Francelia Crawford, mother, 1104 Detroit Avenue, Cleveland, Ohio.

Second Lieut. Allen A. Tukey, Machine Gun Battalion. Miss Christine Biller, friend, 1820 Ingersoll Avenue, Des Moines, Iowa.

Sergt. Gerald P. Landry, Machine Gun Battalion. No record.

Sergt. James Levas, Machine Gun Battalion. Lewis Rossotos, cousin, 306 East Fifty-sixth Street, New York, N. Y.

First Lieut. James J. Sheeran, Infantry, unassigned, attached to Company B, 23d Infantry. Mrs. K. E. Sheeran, mother, 7130 Carpenter Street, Chicago, Ill.

Pvt. William Jacobson, Infantry. No record.

Pvt. Edwin L. Beard, 23d Infantry, Company M. Mrs. E. A. Beard, mother, Redfield, S. Dak.

Mechanic Cecil M. Murray, Company C, 323d Machine Gun Battalion. Mrs. Mable A. Murray, wife, 306 West Seventh Street, Cincinnati, Ohio.

Second Lieut. Tracy R. Stains, Company B, Machine Gun Battalion, 2d Brigade. C. M. Stains, brother, 513 North Estrella Street, El Paso, Tex.

Pvt. (first class) Charles L. Cameron, Company A, 319th Machine Gun Battalion. Mrs. Rachael Cameron, mother, 56 Willow Avenue, Somerville, Mass.

Pvt. Luzius Luzi, 163d Infantry, Medical Detachment. Bartholomew Luzi, father, Sils i/D-Ct., Grisons, Switzerland.

Pvt. Dan W. Sullivan, 23d Infantry, Machine Gun Company. Harold F. Bray, — Machine Gun Company, 23d Infantry.

Saddler Lewis B. McLawhon, Machine Gun Company, 23d Infantry. Lorenzo McLawhon, father, R. F. D. No. 2, Winterville, N. C.

First Lieut. Claude A. Martin, 23d Infantry. Mrs. Paul Martin, mother, Lafayette, La.

First Lieut. Charles L. Barrow, Machine Gun Battalion. Roland Barrow, father, 2004 San Antonio, Austin, Tex.

Corpl. Leroy E. Morningstar, 23d Infantry, Medical Detachment. Mrs. Elsie Mundorf, sister, 502 Wood Street, St. Petersburg, Fla.

Sergt. Charles M. Tarter, 23d Infantry, Company D. Marcus Tarter, father, Tarter, Ky.

Pvt. Joseph De May, 23d Infantry, Company L. Madelina De May, mother, San Felice, Italy.

Cook Patrick McKenna. Mrs. Katherine McKenna, mother, 1021 Lemis Street, St. Paul, Minn.

First Lieut. Albert P. Baston, Marine Corps. Mrs. Ora Z. Baston, wife, Pleasant Avenue, St. Louis Park, Minn.

Gunnery Sergt. James Carbary, Marine Corps. John Carbary, brother, general delivery, San Diego, Cal.

Pvt. James L. Clarke, Marine Corps. (No record, but there is serving in France a Pvt. James Lawrence Clark, Marine Corps; Andrew G. McCoy, uncle, R. F. D. No. 2, Seaman, Ohio.)

ASSIGNED TO STAFF DUTY.

232. Maj. Sidney Bingham, Cavalry, will proceed at once to this city and report to the director, war plans division, War College, for the purpose of receiving instruction in staff duties.

NEW HIGH-POWER RADIO STATION AT ANNAPOLIS, MD., IS OPENED

The new high-power radio station at Annapolis, Md., the most powerful in America, was formally opened Tuesday night, Secretary Daniels signalizing the occasion by sending messages to the first lord of the British Admiralty, London; the French minister of marine, in Paris; and the Italian minister of marine, in Rome.

These messages were transmitted to London, Paris, and Rome with the utmost ease, which is especially gratifying to Navy officials, since this powerful plant was erected and equipped by the Navy in the short space of 10 months. Under conditions that prevailed before our entry into the war its erection would have taken two years. The station completed cost about $1,500,000, and is capable of maintaining uninterrupted communication over a distance of at least 4,000 miles.

4 Towers, Each 650 Feet High.

There are four steel towers, each 650 feet high supporting the antennæ which, with the ground system, required 160 miles of wire for their completion. The power installations is in duplicate, so that it will always be possible to maintain communication. The operation of the station requires the services of 100 men, all of whom are drawn from the enlisted force of the Navy. Suitable provision has been made for the protection of the station.

Completion of the station gives still another guarantee of continuous communication abroad, even in the event of any possible interruption of the cable service.

Message to London.

Secretary Daniels's messages were as follows:

SIR ERIC GEDDES,
First Lord of the Admiralty,
London.

May I express to you our pride and gratification in the improved communications given our allies and ourselves by the completion at Annapolis to-day of one of the most powerful radio stations in the world.

The "Long Arm" of America reaches out ever more strongly from valley and plain across mountain and sea to do its share with our Allies in this war for humanity's sake; for all that your nation and ours holds dear.

JOSEPHUS DANIELS.

Message to Paris.

THE MINISTER OF MARINE,
Paris, France.

May I express to your Excellency our pleasure in our improved communications with France through the completion to-day of the Radio Station at Annapolis—one of the most powerful in the world.

France and America draw together ever more closely in heart and brain and military strength. We are bridging the seas with ships, we are girdling the earth with electricity, and in steadily growing numbers your men and ours fight side by side on land and sea; all to one end, victory in a righteous war for humanity's sake.

JOSEPHUS DANIELS.

Message to Rome.

THE MINISTER OF MARINE,
Rome, Italy.

May I express to your Excellency our gratification in our improved communications with Italy, through the completion to-day of the Radio Station at Annapolis, one of the most powerful in the world.

The forces of America now join those of Italy on the sea, and in her titanic battles among the mountain peaks. This country is united and confident of victory.

It is gratifying that the American and Italian Navies are fighting together to make the seas safe and free. I have no doubt we will win.

JOSEPHUS DANIELS.

INSURANCE OF SHIPMENTS BETWEEN COASTWISE PORTS

The Treasury Department issues the following:

Secretary McAdoo announces that owing to the difficulty encountered by shippers in ascertaining the names of steamers on which their goods are shipped between United States coastwise ports the Bureau of War Risk Insurance of the Treasury Department has arranged to accept applications for insurance of shipments between such ports without receiving the name of the carrying vessel, provided the applications are filed with the bureau or a collector of customs prior to the sailing of the steamer, with the following information to identify the shipments:

1. Number of packages, character of merchandise shipped, marks and numbers on same.

2. Amount of insurance, not to exceed the amount of the invoice, including the freight, insurance premiums and other charges (when prepaid and included in the invoice). In the absence of an invoice the amount of insurance must not exceed the market value at port of shipment on the date that application for insurance is made, plus freight, insurance premiums and other charges (when prepaid).

3. Name of shipper and port from which shipped.

4. Name of consignee and port of destination.

5. Name of the carrying company.

6. Date of bill of lading (name of steamer omitted). (This last is unnecessary if identifying marks and numbers are given.)

Heretofore it has been necessary to state the name of the forwarding steamer at the time application was filed with the Bureau of War Risk Insurance when the shipments were between United States coast ports. The new regulations make this unnecessary if the foregoing information is furnished.

A country worth fighting for is a country worth saving for. Buy THRIFT STAMPS.

BIDS INVITED BY BUREAU OF YARDS AND DOCKS OF NAVY

Sealed proposals, indorsed "Proposals for repairing Pier 1, Boston, Mass., specification No. 3291," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock a. m., September 16, 1918, and then and there publicly opened, for repairing the existing walls of Pier No. 1 at the Navy Yard, Boston, Mass., comprising removal of old concrete, laying granite, placing of reinforcing fabric, and the placing of mortar by the cement-gun process. Drawings and specifications No. 3291 may be obtained on application to the bureau or to the commandant of the Navy yard named. Deposit of a check or postal money order for $10, payable to the chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specifications.

C. W. PARKS,
Chief of Bureau.

August 27, 1918.

Sealed proposals, indorsed "Proposals for brig—Marine Barracks, Naval Station, New Orleans, La., Specification No. 3331," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock a. m., September 23, 1918, and then and there publicly opened, for a brig 36 feet wide by 50 feet long and of an average height of 20 feet, with concrete foundations and floors, brick exterior walls, metal lath and plaster interior walls, steel cell doors and fronts, and wood-frame roof covered with wood shingles, at the Naval Station, New Orleans, La. Drawings and specifications No. 3331 may be obtained on application to the Bureau or to the commandant of the naval station named. Deposit of a check or postal money order for $10, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawings and specifications.

C. W. PARKS,
Chief of Bureau.

August 26, 1918.

Sealed proposals, indorsed "Proposals for electric traveling cranes, Norfolk, Va., Specification No. 3309," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock a. m., September 23, 1918, and then and there publicly opened, for four 10-ton electric traveling cranes of the overhead bridge type, each equipped with two 5-ton trolleys and installed on runways at the Navy Yard, Norfolk, Va. Drawing and Specification No. 3309 may be obtained on application to the bureau or to the commandant of the navy yard named. Deposit of a check or postal money order for $—, payable to the Chief of the Bureau of Yards and Docks, is required as a security for the safe return of the drawings and specification.

C. W. PARKS,
Chief of Bureau.

August 23, 1918.

Award for U. S. Army Shoes Calls for 55,000 Pairs

The War Department authorizes the following:

An additional award for the manufacture of field and marching shoes for the Army has been made by the Quartermaster Corps to Charles Keighley of Vineland, N. J. The shoes, leather and rubber goods branch of the Quartermaster's Corps has given the contract for 55,000 pairs of marching shoes at the price of $6.45 per pair for delivery in October, November, December, and January, and 35,000 pairs of field shoes at the price of $7.15 per pair for delivery up to December 10.

This is a total of 90,000 pairs of shoes at a cost aggregating $605,000.

LIST OF CASUALTIES REPORTED AMONG THE UNITED STATES FORCES OVERSEAS

ARMY

SECTION NO. 1, SEPTEMBER 12, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	27
Missing in action	91
Wounded severely	183
Died of wounds	14
Died of disease	6
Died from aeroplane accident	1
Wounded severely from aeroplane accident	1
Wounded (degree undetermined)	8
Total	331

Killed in Action.

Capt. John Henry Ballamy. Mrs. John H. Ballamy, 1274 Snyder Avenue, Scranton, Pa.

Capt. Hoddie Wilbur Daniels. Mrs. Lizzie Daniels, 513 Davis Avenue, Elkins, W. Va.

Lieut. Frederick M. Atwood. Eugene R. Atwood, box 216, Quincy, Mass.

Sergt. Michael Cappiello. Tony Cappiello, 220 Wooster Street, New Haven, Conn.

Corpl. Jack Palmer. Mrs. R. O. McIntyre, Townsend, Mont.

PRIVATES.

Luigi Cerulo. Dominick Farmato, 65 Whiting Street, New Haven, Conn.

Horace W. Gossett. Mrs. Elizabeth Gossett, 1122 North Hough Street, Indianapolis, Ind.

Thomas Hurley. John B. Hurley, 319 Chauncey Street, Brooklyn, N. Y.

Edward Klimowecz. Joe Klimowecz, 700 East Ninety-second Place, Chicago, Ill.

Louis E. Koebrick. Mrs. Barbara Koebrick, 107 Second Avenue, Charles City, Iowa.

Charles Larson. Louis Larson, Crosby, N. Dak.

Edward W. Matthew. Mrs. Emily Matthew, 5 Regtan Street, Waterville, Me.

Ralph B. Palmer. Gilbert F. Palmer, Milo, Mo.

Manuel J. Pico. Mrs. Langarda Pico, Los Alamos, Cal.

Robert Blacker. Sam Blacker, Petersburg, Va.

Stewart E. Buck. James Buck, 141 South Bank Street, Easton, Pa.

Herbert A. Cahoon. Azzie Cahoon, West Brewster, Mass.

Walter Mattig. Hans P. Anderson, Medina, N. Y.

James A. O'Hare. Mrs. Helen O'Hare, 1456 Bedford Avenue, Brooklyn, N. Y.

Nels S. Olson. Mrs. Bertha L. Olson, Triumph, Minn.

Hyrum A. Perry. Hyrum B. Perry, Mapleton, Utah.

Stacy J. Pine. Mrs. Bronnie Pine, box 55, Hainsport, N. J.

Bert W. Seeley. Frank J. Seeley, Whittemore, Iowa.

Brick Severson. Halver C. Severson, Erie, Minn.

John A. Pirtle. Mrs. Fannie Pirtle, R. F. D. No. 1, box 106, Bogata, Tex.

Willard Toby. Mrs. Jennie Toby, Taylorsville, Cal..

Walter Grobowski. Mary Alivitz, Dickson, Pa.

Died of Wounds.

Lieut. Stephen O. Brigham. Horatio M. Brigham, R. F. D. No. 3, Madison, Wis.

Corp. Lester Macarthy. Wm. H. Macarthy, 5901 Theodosia Avenue, St. Louis, Mo.

PRIVATES.

Paul L. Hull. Charles M. Hull, Silver Spring, Md.

William W. Lee. Swan J. Lee, Fleming, Minn.

Special Orders, No. 206:

192. Capt. Hallet R. Robbins, United States Army, is relieved from his present duties, is detailed as assistant to the American military attache, China, and will proceed to Peking, China, by transport or commercial liner and upon arrival will report to the American military attache for duty.

TEXT OF PRIORITIES CIRCULAR AFFECTING BUILDING MATERIAL

EXTENT OF RESTRICTIONS

Publication Authorized by War Industries Board to Clear Away Doubt in Minds of Builders and Users—Basis for Detailed Instructions to be Sent State Councils of Defense.

The War Industries Board authorizes the following:

Because there seems to be doubt in the minds of builders and users of building materials as to the extent of restrictions to be thrown about nonwar construction, under plans of the War Industries Board to conserve material, capital, and labor for war work, Bernard M. Baruch, chairman of the War Industries Board, authorizes publication of the full text of the Priorities Division circular, bearing on the subject, which will form the basis for detailed instructions to be sent to the State councils of national defense that are to assist the board in carrying out its plans.

Text of the Circular.

The circular follows:

WAR INDUSTRIES BOARD—PRIORITIES DIVISION—CIRCULAR NO. 21—NONWAR CONSTRUCTION.

To all manufacturers, jobbers, distributors, dealers, and consumers of building materials:

As far back as March 21, 1918, the following resolution was unanimously adopted and given wide publicity by the War Industries Board:

"Whereas it has come to the notice of this board that new industrial corporations are being organized in different sections of the United States for the erection of industrial plants which can not be utilized in the prosecution of the war; and

"Whereas plans are being considered by certain States, counties, cities, and towns for the construction of public buildings and other improvements which will not contribute toward winning the war; and

"Whereas the carrying forward of these activities will involve the utilization of labor, materials, and capital urgently required for war purposes: Now, therefore, be it

Resolved by the War Industries Board, That in the public interest all new undertakings not essential to and not contributing either directly or indirectly toward winning the war, which involve the utilization of labor, material, and capital required in the production, supply, or distribution of direct or indirect war needs will be discouraged, notwithstanding they may be of local importance and of a character which should in normal times meet with every encouragement; and be it further

"*Resolved,* That in fairness to those interested therein notice is hereby given that this board will withhold from such projects priority assistance, without which new construction of the character mentioned will frequently be found impracticable, and that this notice shall be given wide publicity that all parties interested in such undertakings may be fully apprised of the difficulties and delays to which they will be subjected and embark upon them at their peril."

Agreement to Cooperate.

Since that time the manufacturers of the principal building materials, including paving brick, face brick, common brick, hollow tile, cement, and lime, have agreed to cooperate with the War Industries Board in carrying into effect the spirit of the foregoing resolution, and the individual manufacturers have signed and filed with the priorities division pledges in writing substantially as follows:

"The undersigned hereby pledges itself not to use, nor so far as lies within its power permit to be used, any products of its manufacture now in or which may hereafter come into its possession or control, save (a) for essential uses, as that term has been or may be defined or applied from time to time by the priorities division of the War Industries Board, or (b) under permits in writing, signed by or under authority of such priorities division; that it will make no sale or delivery of such products to any customer for resale until such customer has filed with it a similar pledge in writing, and that it will use its utmost endeavor to insure that its products shall be distributed solely for essential uses."

Similar pledges are exacted by manufacturers from their customers who purchase for resale.

Uses for Materials.

That all interested in the manufacture and sale of building materials as well as those interested in building projects of every character may have a clear definition of or a ready means of ascertaining the uses to which such materials may be put, and be advised of building projects which may be prosecuted during the war with the approval of the War Industries Board, this circular is issued.

Structures, roads, or other construction projects falling within the following classifications are hereby approved, and no permits or licenses will be required therefor:

(1) After having first been cleared and approved by the War Industries Board those undertaken directly by or under contract with the War Department or the Navy Department of the United States or the United States Shipping Board, Emergency Fleet Corporation, the Bureau of Industrial Housing and Transportation of the United States Department of Labor, or the United States Housing Corporation;

(2) Repairs of, or extensions to, existing buildings involving in the aggregate a cost not exceeding $2,500;

(3) Roadways, buildings, and other structures undertaken by or under contract with the United States Railroad Administration or a railroad operated by such administration;

(4) Those directly [illegible] mines producing [illegible] alloy minerals; and

(5) Public [illegible] street pavements when expressly approved in writing by the United States Highways Council.

Permits in Writing.

No building [illegible] one of the foregoing [illegible] undertaken without a permit in writing issued by or under the authority [illegible] chief of the nonwar construction section of the Priorities Division of the War Industries Board.

Should one contemplating building conceive his proposed project [illegible] public interest or of such essentiality [illegible] under existing conditions it should not be deferred, then he will make a full statement of the facts in writing, under oath, and present same to the local representative of the Council of National Defense, applying to such representative for his approval of the proposed construction. Should such local representative approve the construction project, he will promptly transmit the application, stating clearly and fully his reasons for approving same, to the chief of the nonwar construction section of the Priorities Division of the War Industries Board, Washington, D. C., for consideration, if need be further investigation and final decision. Should the application be finally approved by the Priorities Division, a construction permit will issue, which will constitute a warrant to manufacturers and dealers who have taken the pledges of cooperation above mentioned to sell and deliver building materials required in the construction of the licensed building project.

Policy of the Government.

While it is not the policy of the Government to unnecessarily interfere with any legitimate business, industry, or construction project, it must be borne in mind that there is an imperative and constantly increasing demand for labor, material, and capital for the production and distribution of direct and indirect war needs, to satisfy which much nonwar construction must be deferred. A full realization of this fact by all loyal and patriotic citizens, including State and municipal authorities, is all that is required to postpone such construction activities as interfere with the war program. The State and local representatives of the Council of National Defense are with confidence depended upon to fully acquaint the whole people of these United States with the pressing need for the most rigid economy, measured not only in terms of dollars, but in terms of labor, materials, and transportation service. The construction projects which must be now deferred may be undertaken when we shall have won the war and will then furnish employment to the returning artisan now on the battle front, as well as those who will then be released by strictly war industries.

Yours, very truly,

EDWIN B. PARKER,
Priorities Commissioner.

Approved:

BERNARD M. BARUCH,
Chairman War Industries Board.

PERSONNEL OF BOARDS APPOINTED BY THE SECRETARY OF THE NAVY TO RECOMMEND FOR PROMOTIONS

Secretary Daniels has appointed the following boards to recommend officers of the various corps of the Navy for promotion:

Construction Corps.—To recommend two officers for permanent promotion to the rank of captain, 6 to permanent promotion to commander, 7 to temporary promotion of captain, 20 to temporary promotion to commander: Rear Admiral David W. Taylor, United States Navy, president; Capt. Albert W. Stahl, United States Navy, member; Capt. Lloyd Bankson, United States Navy, member; Capt. Robert Stocker, United States Navy, member; Capt. George H. Rock, United States Navy, member; Lieut. Garland Fulton, United States Navy, recorder.

Civil Engineer Corps.—To recommend 1 officer for permanent promotion to the rank of commander, 2 to temporary captain, and 7 to temporary commanders: Rear Admiral Harry H. Rousseau, United States Navy, president; Rear Admiral Frederic R. Harris, United States Navy, member; Rear Admiral Charles W. Parks, United States Navy, member; Capt. Richard C. Holliday, United States Navy, member; Capt. Thomas E. Dunham, United States Navy, recorder.

Pay Corps.—To recommend 1 officer for promotion to the temporary rank of rear admiral, 1 to permanent captain, 5 to permanent commander, 10 to temporary captain, and 31 to temporary commander: Rear Admiral Thomas J. Cowie, United States Navy, president; Rear Admiral Samuel McGowan, United States Navy, member; Rear Admiral C. J. Peoples, United States Navy, member; Capt. C. S. Williams, United States Navy, member; Capt. T. H. Hicks, United States Navy, member; Lieut. (junior grade) (T.) William R. Ryan, United States Navy, recorder. (The first three above named, with the recorder, will constitute the board to recommend the promotion to the temporary rank of rear admiral.)

Medical Corps.—To recommend 2 officers for promotion to the temporary rank of rear admiral, 7 to the permanent rank of captain, 15 to permanent commander, 15 to temporary captain, and 41 to temporary commander: Rear Admiral Cary T. Grayson, United States Navy, president; Rear Admiral E. R. Stitt, United States Navy, member; Rear Admiral G. H. Basher, United States Navy, member; Capt. A. M. D. McCormick, United States Navy, member; Capt. L. W. Sprayling, United States Navy, member; Lieut. (J. G.) A. C. Stanley, United States Navy (retired), recorder. (The first three above named, with the recorder, will constitute the board to recommend promotions to the temporary rank of rear admiral.)

Chaplain Corps.—To recommend five officers for permanent promotion to the rank of captain: Capt. Carroll Q. Wright, United States Navy, president; Capt. Walter G. Isaacs, United States Navy, member; Capt. John B. Frazier, United States Navy, member; William G. Cassard, United States Navy, member; Capt. Eugene E. McDonald, United States Navy, member; Lieut. (J. G.) Thomas B. Thompson, United States Navy, recorder.

Also a board will recommend for promotion two professors of mathematics, one to the permanent rank of captain and one to the permanent rank of commander.

Instructions to Boards.

Secretary Daniels gives the following general instructions to the boards:

"The names of all officers eligible for consideration for selection, together with their records, will be furnished the board when it convenes. Should any information other than that disclosed by the records mentioned above come to the attention of the board, bearing on an officer's fitness for advancement, the board will take the necessary steps to ascertain the facts thereof to its satisfaction for consideration in arriving at its decision as to the officers best fitted of all those eligible for consideration to assume the duties of the next higher rank.

"The board is to arrive at its conclusions as to which officers are best fitted for advancement entirely without regard to the place such officers may happen to occupy on the list, it being borne in mind that, according to the principle of selection, seniority among officers in the same rank relates solely to their comparative precedence and has no bearing whatever upon their right to advancement.

"The present list showing the seniority of various officers in any rank indicates, as a rule, merely the comparative length of time each officer has been in the Navy.

"Advancement is not to be regarded as a reward for long service, but rather as the preferment of officers who have shown by the character of service already performed that they are best fitted, of all those eligible, to perform the duties of the higher rank for which recommended—such advancement being for the Navy's interests first and for the individual's but incidentally.

"Two points must be taken into consideration and affirmatively established before any candidate can properly be recommended for advancement. The first is that he must have a particularly good record; the second, that the Navy would be strengthened if he were taken as the standard type of officer of the rank to which he is to be advanced.

"Such records, therefore, as do not establish both of these points beyond question are to be at once eliminated from further consideration; and, from the remaining records, officers (equal in number to the number of vacancies to be filled) will be recommended for advancement whose records show that they have rendered, and are capable of rendering, the most valuable service to the Navy and may, therefore, be expected to perform best the duties of the rank for which recommended.

"The board will recommend the following numbers of officers who, of all those whose cases are submitted to the board as eligible for consideration for permanent and for temporary advancement, respectively, are, in the opinion of at least two-thirds of its members, best fitted therefor:

(Here are given the members in the corps to be recommended for promotion in the several grades.)

"The figures shown above relative to the number of officers to be recommended for advancement are subject to change under the following conditions: If the board in the course of its deliberations should decide not to recommend for permanent advancement to the next higher rank officers who hold temporary appointments with said higher rank, it will then recommend for temporary advancement to said rank a correspondingly less number than that shown in the above table. If officers carried in their present grades as additional numbers for any reason are included in such recommendations, the board will then make further recommendations of an additional number of officers equal to the number of such officers recommended, so that the total number of officers finally recommended for advancement will be equal to the numbers designated above, plus the number recommended of such officers carried in their present grades as additional numbers for any reason.

"The proceedinsg of the board will be conducted, in so far as may be practicable, in accordance with the provisions of naval courts and boards. The report of the board shall be in writing, signed by all of the members, and shall certify that the board has carefully considered the case of every officer eligible for consideration, and that in the opinion of at least three of the members, the officers therein recommended are the best fitted of all those under consideration to assume the duties of the next higher rank.

"The findings and recommendations of the board shall be regarded by the members and recorder as confidential. The records of the proceedings of the board will be forwarded to the Secretary of the Navy as soon as practicable, but not before 10 days have elapsed from the date of the convening of the board."

RATES NAMED ON CASTOR BEANS BY RAILROAD DIRECTOR GENERAL

Director General McAdoo announces that publication has been authorized, effective one day after filing with the Interstate Commerce Commission, of new rates on castor bean hulls and stems in both carload and less than carload quantities, the same as the rates on fertilizer, or fertilizer material.

Rates on this basis are to be established between points in the State of Florida and other States in southern classification territory, where castor beans are being produced.

The castor bean industry has become one of considerable importance, owing to the effort of the Government to have them produced in large volume, primarily, for the purpose of securing oil from the castor bean for use as lubricants for airplanes.

The stems and hulls will be ground and used as an ingredient for fertilizers.

No trouble to buy, cheap, convenient, a real investment—WAR-SAVINGS STAMPS.

VOL. 2 WASHINGTON, FRIDAY, SEPTEMBER 13, 1918. No. 411

RULING DEFINING THE STATUS OF MEXICAN CITIZENS IN U. S AND THEIR DUTY TO REGISTER

NOTICE BY THE STATE DEPARTMENT

Order by Provost Marshal General Is Quoted in Telegram Sent to Ambassador Fletcher—Meant to Allay Apprehension.

To inform Mexican citizens as to the precise operation of the selective draft law, the Secretary of State has sent a telegram to Ambassador Fletcher at Mexico City quoting a ruling of the Provost Marshal General. This was done in order to allay apprehension on the part of Mexican citizens who may desire to come to the United States.

Text of Telegram.

The telegram follows:

"Following ruling September 10 of Provost Marshal General on selective draft law as amended: 'It will be necessary for all Mexican citizens between the ages of 18 and 45 who are in the United States on September 12 to present themselves for registration on that day. A Mexican citizen who comes to the United States after September 12 is not required to register unless he declares his intention to become a citizen of the United States or unless a later proclamation shall require the registration of persons of his age in the United States.

"'Under the selective service law and regulations any nondeclarant Mexican citizen who registers may be exempted from performing military duty in the forces of the United States unless he waives his right thereto or neglects to return his questionnaire, and in the latter event local boards are authorized, under the regulations, to consider the case for such exemption, notwithstanding the registrant's failure to make a claim therefor. Under a recent act of Congress, any declarant Mexican citizen may be relieved from liability to military service upon filing an affidavit withdrawing his intention to become a citizen of the United States and claiming such relief from liability to military service.'"

ASSIGNED TO WAR MISSION.

Special Orders, No. 206:

259. Capt. Daniel Ward Thornton, Quartermaster Corps, will report to the Canadian war mission, Munsey Building, this city, as soon as practicable for temporary duty until not later than December 31, 1918, and upon the completion thereof will report to the officer in charge, construction division, for duty.

ALL CABLEGRAMS AFTER OCT. 1 TO BE IN PLAIN LANGUAGE

The Censorship Board has authorized the following announcement:

On and after October 1, 1918, no confirmation of a cablegram shall be allowed to leave the United States, its Territories, or possessions unless it be in plain language.

On and after November 1, 1918, no confirmation of a cablegram shall be allowed to enter the United States, its Territories, or possessions unless it be in plain language.

It is to be noted that code confirmations will not be passed by Postal Censorship even when accompanied by what purports to be or actually is a translation thereof.

SPECIAL CAMPAIGN TO RECRUIT OFFICE WORKERS FOR THE U. S.

The United States Civil Service Commission announces that as a part of its recruiting plan to meet the war needs of the Government offices, it will make a special drive for war office workers in connection with the Business Show and Efficiency Exposition to be held at New York October 21 to 26, inclusive, and at Chicago November 18 to 23, inclusive. There is urgent need in the Government service for large numbers of stenographers, typewriters, statisticians, statistical clerks, statistical machine operators, bookkeepers, operators of calculating machines, and other office devices, clerks trained in special or technical lines, and other office workers.

The commission will arrange to have recruiting stations in the exposition buildings, where applicants for office work in connection with the war program may obtain all desired information, and may take the civil-service tests for entrance to the service.

A campaign of publicity will be conducted in which all manufacturers of office equipment and supplies will be given an opportunity to cooperate.

It is expected that this effort will result in enlisting a large number of eligibles for office work in Government establishments where skilled help is badly needed.

COMMISSIONED IN THE ARMY.

Charles H. McDonald, chairman of the board of review of the Federal Trade Commission since the commission's creation, will leave at once on indefinite leave of absence, having accepted a commission as major in the Army in the Judge Advocate General's Department.

PROVOST MARSHAL GENERAL CORRECTS WRONG IMPRESSION AS TO NONPRODUCTIVE LIST

ORDER HAS NOT BEEN ENLARGED

Difference Between "Work or Fight" Regulation and the List Announced by Chairman Baruch of War Industries Board Explained.

The War Department authorized the following statement by Provost Marshal General Crowder as to "nonproductive" occupations and "nonpriority" industries:

An erroneous impression is current that the "nonproductive" list of occupations contained in the Provost Marshal General's "work or fight" regulation of last May (section 121A of the Selective Service Regulations) corresponds to the group of industries omitted from the "preference list" announced by the chairman of the War Industries Board on September 9. Because the former list was brief (only five classes of occupations), while the latter group is very large (including all industries except the 70 priority classes enumerated), and because the announcement of September 9 stated that the "preference list" is the "basis for industrial exemption from the draft," some persons have formed the impression that the small list of five "nonproductive" occupations has suddenly been enlarged by the Provost Marshal General to include the extensive group of industries omitted by the chairman of the War Industries Board.

Erroneous and Misleading.

This impression that the "nonproductive" list has been enlarged at all, and particularly that it is now identical with "nonpriority" industries, is so erroneous and misleading that it calls for prompt repudiation. The "nonproductive" list of five classified occupations has not been enlarged, and it will not be enlarged without the amplest and most explicit notice. Selective service boards are expressly directed until further notice to bring no other occupations under the "work-or-fight" order, except those expressly listed.

What, then, is the distinction between these two groups? The War Industries Board is charged with determining the principles upon which fuel, power, transportation, materials, capital, and labor ought to be allocated to the several industries most essential to the war program. An industry omitted from that list is, therefore, in the position of not being entitled to a priority privilege. The relation of that list to the selective-service system is that an industry included in it is thereby recommended to the

district boards as being a "necessary" industry; and the district boards may take advantage of that recommendation in determining whether an indispensable man in such an industry should be placed in a deferred class on that ground.

Industries Not Essential.

But there are, of course, many scores, perhaps hundreds, of industries not positively essential to the war program nor to the maintenance of national interest during the emergency. In these industries are, or will be, millions of registrants deferred on grounds of dependency, and many others in class 1 without deferment. At this point the "work-or-fight" order comes into play, but to only a very few classes of occupations—five in all expressly enumerated in that order and to a relatively small number of individuals. Among this extensive and unlisted group of "nonpriority" industries, it finds a very few which it designates as "nonproductive," meaning in general those occupations in which the man power within draft age could better, during the emergency, be replaced by woman's work or by older men or boys. The policy involved is that those men of draft age would serve the country best by getting out of those occupations, either into the military forces or into some other occupation. Now this other occupation may be in a priority industry or in a nonpriority industry. The "work-or-fight" order does not prescribe any occupation for them to get into. There are plenty of nonpriority industries to get into; though, naturally, they would do well to seek out a priority industry, if one is available. But the "work-or-fight" order does not attempt to dictate on that point; it merely gives them the option of getting out of the "nonproductive" occupation or of losing the benefit of their deferred classification or their high order number.

Difference in Positions.

Thus the War Industries Board is concerned merely with strengthening the priority position of a limited number of industries at the top of the scale, so to speak, in relation to war needs; while the Provost Marshal General's regulation is concerned mainly with strengthening the Army by taking the registrants who chose to stay in a small number of occupations at the bottom of the scale. The whole range of occupations in between the two lists remains open to receive those who may leave the five occupations named in the "work or fight" order.

Lawyers, for example, are not mentioned in the "preference list"; hence a lawyer could presumably not obtain a priority order for the transportation of a set of office furniture. Nor are lawyers mentioned in the "nonproductive" list; hence, a lawyer deferred on grounds of dependency does not have to give up his occupation in order to retain his deferment. On the other hand, pool rooms are not on "the preference list" while they do appear in the "nonproductive" list; hence, a registrant pool-room keeper not only could not obtain a priority order for the transportation of his pool-room furniture, but he must either go into some other occupation or lose his deferment if any.

The two groups ("nonpriority" and "nonproductive") therefore, not only are directed to different purposes, but they are not identical and presumably never will become identical. Certainly the public is entitled to understand that no additions will be made to the "nonproductive" list without ample and explicit notice.

IMPORTANCE OF MOTOR CORPS RELATED TO U. S. ARMY SERVICE TOLD BY THE WAR DEPARTMENT

PLANS ARE EXPECTED TO SUCCEED

More Than 100,000 Men are Ready To Ride About 25,000 Cycles—Over 3,000 Men in the Service at Headquarters—Many Trucks

The War Department authorizes the following:

The recent creation of the Motor Transport Corps to take over from all other corps control of all motor vehicles in the Army will entail the execution of plans of great size and scope.

The Motor Transport Corps' personnel and equipment with each American Army will comprise nearly as many men and officers as were engaged on both sides in the battle of Waterloo—enough motor trucks to stretch in an unbroken line across the State of Ohio if they were parked end to end with 5-foot spaces between them and enough motorcycles and other vehicles to stagger by their mere numbers the masters of warfare in any other times than these.

154,747 Listed.

The actual number of men and officers provided by the Motor Transport Corps to each American Army, according to the personnel chart of the corps, is to be 154,747.

The Army motor trucks with this unit will number 40,203; there will be 24,250 motorcycles, 7,995 passenger-carrying motor cars, and 6,593 ambulances, with a total of approximately 100,000 drivers and riders. The officers will number 4,298 and the noncommissioned officers 30,690.

The headquarters or executive organization for this service will consist of 3,122 men and 679 officers, and the total repair personnel in the 273 service parks provided for the upkeep of the army of motor vehicles consists of 34,319 men, a large percentage of them trained mechanics. Each additional American Army will, of course, require a similar motor transport corps personnel. By the time, therefore, that the United States has 4,000,000 troops in France nearly half a million of them will be engaged in motor transport work.

These are a few indications of the scope of the Motor Transport Corps. The service has already accomplished a great work, according to military authorities, in facilitating the rapid movement of troops and supplies of the American Army in France, and Army motor trucks throughout the United States are day by day helping in a no less important way.

Those interested in the service can secure information from the chief of the Motor Transport Corps at Washington.

$600,000,000 IS OFFERED IN TREASURY CERTIFICATES

Secretary McAdoo under the authority of the act approved September 24, 1917, as amended by the act approved April 4, 1918, offers for subscription, at par and accrued interest, through the Federal Reserve Banks, $600,000,000 or more Treasury certificates of indebtedness, Series IV F dated and bearing interest from September 17, 1918, payable January 16, 1919, with interest at the rate of 4½% per annum. Applications will be received at the Federal Reserve Banks. Subscription books will close at the close of business September 24, 1918. Certificates will be issued in denominations of $500, $1,000, $5,000, $10,000, and $100,000. Said certificates shall be exempt, both as to principal and interest, from all taxation now or hereafter imposed by the United States, any State, or any of the possessions of the United States, or by any local taxing authority, except (a) estate or inheritance taxes, and (b) graduated additional income taxes, commonly known as surtaxes, and excess profits and war profits taxes, now or hereafter imposed by the United States, upon the income or profits of individuals, partnerships, associations, or corporations. The interest on an amount of bonds and certificates authorized by said act approved September 24, 1917, or by said act as amended by said act approved April 4, 1918, or by the act approved July 9, 1918, the principal of which does not exceed in the aggregate $5,000, owned by any individual, partnership, association, or corporation, shall be exempt from the taxes provided for in clause (b) above. Upon ten days public notice, given in such manner as may be determined by the Secretary of the Treasury, the certificates of this series may be redeemed as a whole at par and accrued interest on or after any date, occuring before the maturity of such certificates, set for the payment of the first installment of the subscription price of any bonds offered for subscription by the United States after the offering and before the maturity of such certificates. The certificates of this series, whether or not called for redemption, will be accepted at par, with adjustment of accrued interest, if tendered on such installment date in payment on the subscription price then payable of any such bonds subscribed for by and allotted to holders of such certificates. The certificates of this series do not bear the circulation privilege and will not be accepted in payment of taxes. The right is reserved to reject any subscription and to allot less than the amount of certificates applied for and to close the subscriptions at any time without notice. Payment at par and accrued interest for certificates allotted must be made on and after September 17, 1918, and on or before September 24, 1918. After allotment and upon payment Federal Reserve Banks will issue interim receipts pending delivery of the definite certificates. Qualified depositaries will be permitted to make payment by credit for certificates allotted to them for themselves and their customers up to an amount for which each shall have qualified in excess of existing deposits when so notified by Federal Reserve Banks.

ORGANIZING FOR UNITED DRIVE FOR WAR WELFARE WORK FUNDS

Committee Representing Seven Societies Interested Has Been Formed.

Statement of the Third Assistant Secretary of War, September 12:

The plan of consolidating the campaigns for funds of the seven officially recognized organizations doing welfare work for the troops at home and abroad marks a distinct step in advance. The Government has long felt that some positive action would have to be taken to reduce the number of these drives. For months we have been besieged by letters from chambers of commerce and rotary clubs, asking us to relieve them of the constant burden of obtaining financial support for societies that were working with the troops along lines of morale. It was natural, therefore, that the organizations that were responsible for providing recreation facilities to the troops should merge their campaigns, in as much as they are engaged in a common program of service.

The arrangement which was brought about through the Commission on Training Camp Activities has been very cordially received by the seven societies and a committee of eleven, made up of representatives of the societies under the chairmanship of Mr. Raymond B. Fosdick, is acting as an organizing committee in connection with the formulation of plans for the campaign during the week of November 11. The campaign committee, under the chairmanship of Dr. John R. Mott of New York, is a subcommittee of this committee of eleven. The committee of eleven is as follows:

Chairman.—Raymond B. Fosdick.

Y. M. C. A.—John R. Mott and George W. Perkins.

Y. W. C. A.—Mrs. Henry P. Davison.

National Catholic War Council.—John G. Agar and James G. Phelan.

Jewish Welfare Board.—Mortimer Schiff.

War Camp Community Service.—Gov. Myron T. Herrick.

American Library Association.—Frank A. Vanderlip.

Salvation Army.—George Gordon Battle.

At large.—John D. Rockefeller, jr., and Cleveland H. Dodge.

Red Cross Drive in Spring.

Balancing this united drive in the fall for these organizations will be the Red Cross drive in the spring. In this connection it should be remembered that the Red Cross is giving generous support and assistance to all now existing charities having to do with military and civilian relief abroad which have been willing to cooperate with it. So far as subscription from the public is concerned, the burden of proof lies very definitely upon the comparatively few organizations which have not cooperated in this way. Unless he has personal knowledge which would justify gifts to some one of these causes, any American citizen can feel that he is doing his full share if he subscribes what he can to the Liberty loans and gives what he can to the united drive in the fall and to the Red Cross in the spring.

HEALTH MISSION TO ITALY UNDER RED CROSS AUSPICES

Announcement was made on August 31 by the war council of the American Red cross of the personnel of the medical unit which will sail for Italy within a few weeks to conduct a health campaign in that country with the stamping out of tuberculosis as its particular objective.

The Italian tuberculosis unit of the American Red Cross, as the organization will be known, will be under the supervision of Col. Robert Perkins, Red Cross commissioner for Italy.

Included in the personnel of the unit, which numbers 60 persons, are many of this country's best-known tubercular specialists, as well as physicians who have been very successful in the lines of work which they will be called upon to perform. The director of the unit is Dr. William Charles White, of Pittsburgh.

Others are:

Dr. John H. Lowman, professor of clinical medicine at Western Reserve University, Cleveland, chief of the medical division; Dr. Louis I. Dublin, of New York, statistician of the Metropolitan Life Insurance Co., chief of the division of medical statistics; Dr. Richard A. Bolt, of Cleveland, connected with the health department of that city, chief of child-welfare division; Dr. E. A. Paterson, of Cleveland, chief of division of medical inspection of public schools; Dr. Robert G. Paterson, of Columbus, Ohio, head of the tuberculosis branch of the State health department, chief of the division of education and organization; Miss Mary S. Gardner, head of the bureau of public-health nursing of the American Red Cross, chief of division of public-health nursing.

The executive manager of the organization is Lewis D. Bement, of Framingham, Mass.

FUEL ADMINISTRATOR'S ORDER ON COAL AT BREEZE DUMPS

The United States Fuel Administration issues this order:

It appearing to the United States Fuel Administrator that there is a shortage of labor in the beehive coke districts, and that the labor employed in reclaiming old breeze dumps at beehive coke plants can be more effectively employed in the production of coke needed in the war industries and that the elimination of this work will appreciably relieve the overburdened railroad transportation facilities,

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said Fuel Administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that from and after 7 a. m. September 16, 1918, and until further or other order in the premises the reclaiming of coke from old breeze dumps at beehive ovens shall be discontinued.

H. A. Garfield,
United States Fuel Administrator.

RED CROSS OFFERS TO PROVIDE MOURNING EMBLEMS FOR U.S. MEN

The American Red Cross will provide the mourning brassards to be worn by the relatives of men who have given their lives to their country, according to an announcement made by the war council. These brassards, which are to be used in lieu of general mourning, were suggested and designed by the woman's committee of the Council of National Defense, the idea being indorsed by President Wilson in a letter he sent to the woman's committee. Brassards will be furnished free to the parents or widows of men who have died in the service and at cost to other members of the family.

Worn on the Left Sleeve.

The brassard, which is to be worn on the left sleeve, midway between elbow and shoulder, is a band of black broadcloth or other material three inches wide on the surface of which the regulation military star is embroidered in gold thread. The number of stars on a brassard will denote the extent of the sacrifice made by each family.

The brassards will be made and distributed by the chapters of the Red Cross working in conjunction with local units of the woman's committee of the Council of National Defense. An initial supply of materials for the manufacture of the mourning emblems has been purchased by the Red Cross and will be forwarded to the 14 divisions of the organization for distribution through their chapters. It is expected that the first of the brassards will be ready for distribution about the middle of September. A brief statement accompanying the announcement says:

Should Avoid Commercialism.

"In adopting this insignia the woman's committee desired it should never be commercialized, but that it should always be possible for the members of the families of those who have made this supreme sacrifice to prepare for themselves this badge of honor."

Cattle Loan Committees Named for Western Towns

The War Finance Corporation has announced the personnel of the committees which will manage the cattle loan agencies at Kansas City and Dallas as follows:

KANSAS CITY.

Asa E. Ramsay, Federal reserve agent at Kansas City, chairman; J. Z. Miller, jr., governor Federal reserve bank of Kansas City, vice chairman; M. L. McClure, director of the Federal reserve bank of Kansas City; James F. O'Donnell, president Nebraska State Bank, O'Neill, Nebr.; W. H. Moore, Kansas City, manager and secretary.

DALLAS.

W. F. Ramsey, Federal reserve agent at Dallas, chairman; R. L. Van Zant, governor Federal reserve bank, Dallas, vice chairman; M. Sansom, Fort Worth, director of the Federal reserve bank of Dallas, manager; H. B. Jones, banker and ranchman, Tucumcari, N. Mex.; W. H. Browning, jr., cashier, First State Bank of Pecos, Tex.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place.
Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

TREASURY CERTIFICATES ARE OVERSUBSCRIBED $144,529,500

Secretary McAdoo announces that the fifth biweekly issue of United States Treasury certificates of indebtedness in anticipation of the fourth Liberty loan was oversubscribed $144,529,500. The Secretary stated that this is a most gratifying result, the oversubscription being the largest ever recorded on any issue of United States Treasury certificates of indebtedness.

Ten of the twelve Federal Reserve Bank districts oversubscribed their quotas. The total subscriptions aggregate $644,529,500. The aggregate of subscriptions for certificates in anticipation of the fourth Liberty loan to date is $3,404,971,000.

Federal Reserve Bank.	Quota.	Subscription.
U. S. Treasury	.....	$2,000,000
Boston	$43,300,000	57,324,000
New York	[illegible]	219,078,500
Philadelphia	35,500,000	42,011,000
Cleveland	45,200,000	71,084,000
Richmond	17,200,000	18,857,000
Atlanta	14,000,000	21,242,000
Chicago	70,000,000	88,271,000
St. Louis	20,000,000	25,591,500
Minneapolis	17,200,000	17,200,000
Kansas City	21,000,000	25,013,000
Dallas	12,000,000	14,225,500
San Francisco	37,300,000	40,500,000
Total	500,000,000	644,529,500

No trouble to buy, cheap, convenient, a real investment—WAR-SAVINGS STAMPS.

American Official Communiques on Operations of U. S. Forces

The War Department authorizes the following:

American Official Communique No. 121.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES.
September 12, 1918.

Section A.—This morning our troops, operating in the St. Mihiel sector, made considerable gains. Assisted by French units, they broke the enemy's resistance and advanced at some points to a depth of five miles. We have counted 8,000 prisoners up to the present. The operation is still in progress.

Second Part of American Official Communique No. 117.

The commander in chief has awarded the distinguished service cross to the following-named officers and men of the American Expeditionary Forces for acts of gallantry, as set forth after their names:

Pvt. EMMET B. CLARY, Machine-Gun Battalion. "Shocked and bruised by a shell near Soissons, France, July 19, 1918, he was taken to an aid station and put with the wounded who were to be evacuated, but when Infantry reinforcements passed by he joined them, participating in their attack and fought effectively with rifle and bayonet. He took five prisoners and was ordered to escort them to the rear. On his way back he ascertained the location of his company commander, and after disposing of his prisoners he reported back to his organization and asked for further duty."

First Lieut. BERNARD VAN T. HOE, Infantry. "For extraordinary heroism in action northeast of Chateau Thierry, France, July 28, 1918. He directed his platoon so skillfully in attack near Sergy, and conducted ducted himself with such bravery and fearlessness that his men captured six machine guns from the Prussian Guards and took 25 prisoners."

First Lieut. GEORGE W. FURBUSH, Jr., Infantry. "Near Vaux-France, July 1, 1918, although wounded, he continued in displaying the greatest courage and disregard of all personal danger at all times. Throughout the critical period of 48 hours, July 20-21, 1918, near Sergy, he particularly distinguished himself when leading his platoon into position in face of fire on the crest of hill 212, and when presiding over the reorganization of the position thus won."

Second Lieut. DONALD W. GREEN, Infantry. "For extraordinary heroism in action northeast of Chateau Thierry, France, July 26 to August 1, 1918. He set an example of heroism and devotion to duty at Croix Rouge Farm, when he continued to lead his platoon through heavy fire for five days after being wounded."

Sergt. HERBERT F. McKENNA, Infantry. "For extraordinary heroism in action near Villers-Sur-Fere, France, on July 28, 1918. At the beginning of the attack against the enemy positions on the north bank of the river Ourcq he was wounded in the arm by a machine-gun bullet, yet he continued in the advance and took charge of his platoon when its commander was killed. When the first attack was over he received first aid and then returned to his company, where he assumed the duties of first sergeant in addition to his duties as a platoon commander."

Supply Sergt. BYRON W. PEYTON, Infantry. "For extraordinary heroism in action northeast of Chateau Thierry, France, July 29, 1918. In response to a call from the attacking battalion for ammunition he drove a combat wagon, in broad daylight, into the front-line positions near Fere-en-Tardenois and delivered the ammunition required by his comrades on the front."

Corpl. RUFUS WISEMAN, Infantry. "For extraordinary heroism in action northeast of Chateau Thierry, France, July 29, 1918, to August 2, 1918. He was in charge of a detail for carrying ammunition to a machine-gun section. He had performed his duties and had been given permission to withdraw to the rear, but he remained with his detail for four days on the firing line under a heavy bombardment and machine-gun fire, assisting the machine-gun crew. During these four days he was suffering from the effects of gas, but refused to be evacuated."

Pvt. VICTOR VAN YORK, Infantry. "For extraordinary heroism in action near Villers-Sur-Fere, France, July 28, 1918. Though severely wounded in the ankle he refused to leave the field of battle, and next day made the attack on the heights north of the River Ourcq, remaining with his company until again wounded."

Private FRANK E. TAYLOR, Infantry. "For extraordinary heroism in action northeast of Chateau Thierry, France, July 27, 1918. After he and a comrade located a hostile machine gun in a clump of trees 500 meters north of a chateau which their platoon was holding, east of Ferre-En-Tardenois, they secured permission of their platoon commander to attempt to force the enemy to abandon this position and advanced over open ground and in the face of fire. With their rifles they drove the enemy from their gun, killing one and wounding another."

Private FRANK M. FORD, Infantry. "For extraordinary heroism in action northeast of Chateau Thierry, France, July 27, 1918. After he and

(Continued on page 7.)

PROCEEDINGS OF THE CONGRESS OF THE UNITED STATES BRIEFLY TOLD

SENATE.

Various features of the war-revenue bill were objected to yesterday by witnesses before the Finance Committee. Joseph J. Klein, of New York, told the committee the income of the Government would be less and less each year until the war closes, due to curtailment of luxuries, price fixing, and the limitation by the Government of profits. He advocated a tax on undistributed corporate earnings and a levy of 1 or 2 per cent on gross sales as a substitute for the war and excess-profits taxes. Representatives of retail druggists, credit men, dyers, and taxicab owners were heard. Reductions in the rate of taxation were urged.

Chairman Chamberlain, of the Military Committee, has received a letter from Acting Secretary of War Crowell in which the statement is made that the department declines to indorse the pending bill before the committee providing for the creation of a separate department of aeronautics with a Cabinet officer as its head. The communication calls attention to the fact that an Assistant Secretary of War has been given full power in all matters of aviation and that the results sought to be accomplished by the proposed legislation will be practically attained. The bill is declared by the department to be wrong in principle.

HOUSE.

The Ways and Means Committee yesterday made an unanimous report to the House on the bill recommended by Secretary McAdoo intended to aid in the sale of the fourth Liberty loan issue. The bill was reported practically as recommended by the Treasury Department following an explanation by Assistant Secretary Leffingwell. The chief purpose of the bill is to provide a limited exemption from income surtaxes and war and excess profits taxes upon income to be derived from the fourth Liberty loan bond issue, the report of Chairman Kitchen told the House. It will also free a larger portion of the income from the previous Liberty loan issues. The bill exempts from surtaxes, war-profits taxes, and excess profits taxes, interest on the fourth Liberty loan bonds not in excess of $30,000 owned by any person, partnership, corporation or association; it also provides that the interest on the previous Liberty bond issues shall be exempt in the same manner to the extent of one and one-half times the amount of the fourth loan bonds subscribed and held on the date of the tax return, but not to exceed in any event $45,000. Exemption from these taxes on liberty bonds is to continue only until two years after the termination of the war. The issuance of war savings certificates is to be increased from two billions to four billions, thus making two series, and a purchaser may buy the limit of $1,000 of each series. Authority is given the Secretary of the Treasury to deposit proceeds from war profit taxes as well as from income and excess profits taxes with designated Government depositaries; also to make arrangements with foreign countries to stabilize foreign exchange. Another section of the bill amends the trading-with-the-enemy act so as to empower the President to investigate, regulate, and prohibit by means of license or otherwise, transactions in bonds or certificates of indebtedness of the United States and the hoarding of gold or silver, in addition to powers already granted by law. Another section would permit any national bank to lend a borrower, in addition to the limitation of one-tenth of the capital stock and surplus of such bank under existing law, an amount not to exceed 10 per cent of the capital stock and surplus if the borrower discounts with the bank suitable paper secured by not less than a like amount of bonds of the United States issued since April 24, 1917, or certificates of indebtedness.

Representative Magee, of New York, introduced a bill providing that uniforms shall be supplied to naval officers and midshipmen at the Naval Academy by the Government at cost. A provision written into the Army bill which recently became a law gives officers of the [illegible] this privilege.

Representative Warren Gard, of Ohio, read in the House a letter from Provost Marshal General Crowder, in which that officer stated that Members of Congress can not waive their exemption under the selective-draft law, as the law provides specifically for exemption of civil officers of the Federal and State governments. The fact that a man is a Member of Congress automatically exempts him, Gen. Crowder pointed out, stating that drafting a member of Congress would automatically deprive him of his vote, which might be "against the wishes of his constituents, and would deprive the Nation of a valued counsellor."

NEED TO CONSERVE WOOL CLOTH IS URGED BY CHAIRMAN BARUCH

Bernard M. Baruch, chairman of the War Industries Board, authorizes the following:

While no real shortage is to be feared in the supply of woolen cloth or clothing this winter, the country is warned against a mistaken belief that there will be a surplus of free wool over Government requirements. Such a belief might arise through a misconstruction of a statement issued by Gen. Wood, Acting Quartermaster General, in summing up the needs of the military forces to July next. In several instances this was interpreted as meaning that the wool supply was above the demand. That is misleading. The statement referred to the fact that no shortage of clothing need be feared, because of the large stocks of finished clothing and cloth now on hand.

Woolens Section Statement.

The woolens section of the War Industries Board, which has a thorough understanding with Gen. Wood, issued a statement that there is at the present time no free wool available for civilian consumption; and renews its warning there must be conservation of wool and of all things made of wool to prevent serious shortage and real distress for a long time to come. This warning applies particularly to the use of cloth and clothing now made up, which will be difficult of renewal when the present stocks are exhausted.

It is announced in a statement issued to-day by Herbert E. Peabody, chief of the woolens section of the War Industries Board, after conferences with experts of the wool section and representatives of the woolen industry, that no program for future civilian consumption can be undertaken at this time. Wool must be imported to meet Government needs, and until there have been such importations and a surplus is disclosed no plans can be made for civilian needs.

Following is the announcement from the woolens section:

The public statement of the Acting Quartermaster General, in which he has disclosed the wool requirements for the Government for the period July 1, 1918, to July 1, 1919, brings many inquiries as to what wool may be available for civilian consumption. It may now be definitely stated that at present there is no wool available for civilian allocation. The Acting Quartermaster General discloses the fact that a large quantity of wool must be imported to meet military necessities; and until such importations have been made in amount to cover Government needs, a program for future civilian consumption can not be undertaken at this time. However, in order that the woolen industry may have the closest touch with the situation, and in order that everyone concerned may be assured that careful consideration is being given the needs of the industry by men from the industry, the Textile Division of the War Industries Board has requested the advisory committee of the War-Service Committee of the Wool Manufacturing Industry—Messrs. George B. Sanford, Henry A. Francis, and Franklin W. Hobbs—to act in a similar capacity to the woolens section of the War Industries Board, and a meeting will be held September 25.

Conservation is Urged.

Conservation of wool and all of the things made of wool can not be too strongly urged, and emphasis can not be too often repeated.

The woolens section has already gone on record that if careful and intelligent planning in buying and using articles of wool is seriously undertaken by the people of this country, they may safeguard themselves from real distress through a wool shortage for a long time to come.

SEALED PROPOSALS.

DEPARTMENT OF THE INTERIOR.
Washington, September 1 , 1918.

Sealed proposals, in duplicate, will be received at the department until 2 o'clock p. m. Friday, October 4, 1918, and then opened for furnishing track scale complete at the St. Elizabeths Hospital, Washington, D. C., in accordance with specifications, copies of which may be obtained upon application to the chief clerk of the department.

S. G. HOPKINS,
Assistant Secretary.

LABOR DEPARTMENT ADVISORS FOR THE LOCAL DRAFT BOARDS

The Department of Labor authorizes the following:

Immediately upon the Provost Marshal General's announcement of the regulations under the amended selective-service act, covering the appointment of three industrial advisers to the district draft boards, the Federal directors of the United States Employment Service for the States were instructed from Washington to call at once a meeting of their State advisory boards for the purpose of recommending the Department of Labor's nominees as industrial advisers for each of the district draft boards in their States.

Methods of Nominations.

The nominations will be made by the Secretary of Labor on these recommendations. The nominees may be members of community labor boards of the Federal Employment Service or may hitherto have had no connection with the Employment Service.

The Director General's instructions to the Federal directors to aid in selecting the nominees state in part:

The service to be rendered by the industrial adviser nominated by the Department of Labor is of the very highest importance. For the proper utilization of man power it is essential that the district draft board should have the best information not only as to what men who come before it for classification are at the time engaged in war work, but also what men coming before it are skilled in trades essential to the proper carrying on of industry although, at the time not engaged in war work, and should have full knowledge also of depleted skilled trades and the general industrial man power needs, both in the community for which the district board sits and in the country at large.

A Position of "Great Honor."

This position of great honor and responsibility should be filled by a man of broad intelligence and knowledge and unbiased judgment who commands the confidence of both management and of labor and of the community generally.

"It is recognized that only by the maintenance of the industrial army at its highest efficiency can the Army in the field be properly supplied and the war carried on to a successful conclusion. The men who aid in the maintenance of the industrial army are doing a service not only to importance to the men who help equip the Army in the field."

RED CROSS NEEDS 300 WOMEN TO DRIVE MOTORS IN FRANCE

The American Red Cross makes public the following:

Three hundred women motor drivers for service in France are wanted by the American Red Cross within the next six months. The recruiting of these drivers will begin immediately. It is expected the first contingent will sail about October 1 for motor-messenger service, ambulance service, and, to a limited extent, for camion service.

Candidates for this service will be selected from the American Red Cross Motor Corps in all cities where such motor corps now exist. Volunteers for this work are sought, and the candidate must meet the requirements for this overseas duty as set forth by the War Department—25 years of age, loyalty, and health. The American Red Cross will pay the transportation, and, if necessary, the volunteers will be given an allowance of 450 francs a month for expenses when out of Paris, where they will be employed principally, and 600 francs a months for expenses when in Paris.

Special Qualifications.

Special qualifications for this service are a certificate of the First Division Red Cross Motor Corps Ambulance and Truck Driver, or successful passing of examination in mechanics and first aid as specified for American Red Cross First Division Motor Ambulance and Truck Drivers. Women desiring to volunteer for this service are requested to make application at once to their local captain of the American Red Cross Chapter Motor Corps, where such corps exist, or to the director of motor corps of their division. About 50 women will be sent over to France every month for six months. Additional calls for women drivers probably will follow.

ORDER REGULATING GRADES OF ATLANTIC BUNKER COAL

The United States Fuel Administration issues the following:

The Tidewater Coal Exchange having made a written recommendation to the United States Fuel Administrator that coal which has been or may be classified by said exchange for consignment to one additional pool created by it at New York, Philadelphia, and Baltimore, and numbered 71 is suitable for bunkering steamships engaged in overseas trade.

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that the "Regulation relative to required quality and grades of coal for bunkering steamships at Atlantic and Gulf ports" established by order dated April 1, 1918, and amended by orders dated May 15, 1918, July 2, 1918, and July 18, 1918, is hereby further amended so that subparagraph (c) section 4 of such regulation shall read as follows:

"(c) Coal originating at mines on the Pennsylvania Railroad, the Baltimore & Ohio Railroad, the Western Maryland Railway, or on any of their connecting lines, which has been or may be classified by the Tidewater Coal Exchange for consignment to either pools 9 or 71, when coal from such pools is used by itself and not mixed with coal from any other pool."

This order shall become effective August 14, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

APPOINTMENTS ANNOUNCED BY THE CHIEF OF ORDNANCE

The War Department authorizes the following announcement of appointments by Maj. Gen. C. C. Williams, Chief of Ordnance:

Louis J. Horowitz as special assistant to the Chief of Ordnance in charge of tanks. In this capacity Mr. Horowitz will have authority to decide all questions pertaining to the engineering, manufacturing and inspection of tanks. Mr. Horowitz, previous to his connection with the Ordnance Department, was president of the Thompson Starrett Construction Co., New York.

Director of Training.

Brig. Gen. John T. Thompson, United States Army, retired, in addition to his duties as director of arsenals and advisory engineer, has been made director of ordnance training. In this position he will determine the type of training to be given the commissioned, enlisted and civilian personnel of the Ordnance Department and will make provisions for this training. Gen. Thompson will also give final approval to all subjects to be taught, and the character and scope of examinations, and will establish a system of inspection of all the schools operated by the Ordnance Department.

Supervisor of Employment.

Capt. S. E. Blunt, United States Army, has been appointed employment supervisor and will work in conjunction with the commanding officers of the several arsenals and other ordnance establishments to secure the necessary personnel for their efficient operation.

A board of officers has been appointed to formulate and enforce safety regulations for shell-loading and explosives plants. The personnel of the board is as follows: Lt. Col. W. C. Spruance, chairman, Maj. C. F. Backus, Maj. Egbert Moxham, Maj. G. E. Carleton, and Capt. A. D. Reilly.

Cafeteria Keeper Fined By Food Administration

The United States Food Administration issues the following:

Because the Britling Cafeteria, at Louisville, Ky., served excessive amounts of sugar to its patrons, it will contribute $1,000 to the American Red Cross by way of penalty. The Food Administration, rather than close the cafeteria, allowed it to make this contribution in lieu of other action. It was also deprived of its baking license for two weeks for failure to use the prescribed amount of wheat substitutes.

Louis A. Federer, wholesaler, commission merchant, and broker, of fresh fruits in St. Louis, has also been deprived of his Food Administration license. Federer failed to remit to the consignor a check covering the sale of one car of cantaloupes. His failure to make remittance was in defiance of an order from the Food Administration.

Remember! the men in our Army and Navy do not expect luxuries. Should we at home expect them? Buy necessities and war-savings stamps.

American Official Communiques

(Continued from page 4.)

a comrade located a hostile machine gun in a clump of trees 500 meters north of a chateau which their platoon was holding, east of Ferre-En-Tardenois, they secured the permission of their platoon commander to attempt to force the enemy to abandon this position and advanced over open ground and in the face of fire. With their rifles they drove the enemy from their gun, killing one and wounding another."

Private HARVEY STICKLES, Infantry. "For extraordinary heroism in action northeast of Chateau Thierry, France, July 29–30, 1918. Several times during the night of July 29, 1918, and three times during the afternoon of the 30th, he left the shelter of battalion headquarters and went out into an intense bombardment to repair telephone lines connecting battalion and regimental command posts. He had several narrow escapes and was once thrown to the ground by the burst of an exploding shell, yet he continued to perform his important work after others had failed."

Second Lieut. ELMER T. DOOCY, Infantry. "For repeated acts of extraordinary heroism in action near Suippes, northeast of Chalons-Sur-Marne, France, July 14–15, and near Sergy, northeast of Chateau Thierry, France, July 28 and 30–31, 1918. After being severely wounded, with utter disregard of his own safety and comfort, he remained on duty with his platoon under heavy fire of gas and high explosive shells. Again, on hill 212, near Sergy, he led his platoon and that of another wounded officer forward into a machine gun nest under heavy fire, capturing four prisoners and two machine guns, and two days later, at night, near Sergy, at great risk of his own life, he bravely went out in front of a German sniper and brought back into the line a wounded corporal of his platoon."

Sergt. CLAUDE V. HART, Infantry. "For extraordinary heroism in action near Sergy, France, July 28, 1918. He coolly, and with utter disregard of danger, led his platoon against enemy machine gun emplacements. Four of the foe were captured, together with their two machine guns, which he turned and operated on the retreating Germans, until he was severely wounded."

Sergt. MITCHELL J. S. EARL, Infantry. "For extraordinary heroism in action northeast of Chateau Thierry, France, July 26–27, 1918. Although seriously wounded during the advance near Croix Rouga Farm, he nevertheless continued in the attack under heavy enemy fire from artillery and machine guns, thereby setting, to the men of his command, an example of exceptional bravery and devotion to duty."

Corpl. ROBERT M. BORNTON, Infantry. "For extraordinary heroism in action northeast of Chateau-Thierry, France, July 26, 1918. After being wounded, he remained in command of his squad and continued to direct the fire of their two automatic rifles for more than two hours, and until he had been wounded three more times."

Corpl. NARY ROBERTS, Infantry. "For extraordinary heroism in action northeast of Chateau-Thierry, France, July 26–27, 1918. Three times wounded in action, he nevertheless continued in the attack under heavy enemy fire from artillery and machine guns, thereby setting the men of his command an example of exceptional bravery and devotion to duty."

Corpl. SYDNEY E. MANNING, Infantry. "For extraordinary heroism in action near Croix Rouge Farm, northeast of Chateau-Thierry, France, July 27, 1918. Corpl. Manning, on the morning of July 27, 1918, was in charge of an automatic rifle squad. One gunner was killed and one carrier and himself wounded by shell fire. Although wounded, he took the rifle and ammunition and continued the advance. On reaching the top of the hill he was again wounded by machine-gun fire. He still advanced with his platoon. On reaching the bottom of the hill, his platoon was forced to withdraw, being flanked on both sides. He remained at the bottom of the hill alone and covered the withdrawal, keeping the enemy from closing in on his platoon. He then rejoined his platoon, having received nine wounds."

First Lieut. GEORGE H. NOBLE, Infantry. "For extraordinary heroism in action east of Sergy, northeast of Chateau Thierry, France, July 28, 1918, he gave proof of unhesitating devotion and energy during the offensive operations of Sergy, brilliantly leading his platoon to the assault in disregard of all danger. While charged with the support and protection of a reconnaissance in No Man's Land, he gave the best example of calmness, decision, and courage under intense machine-gun fire. Wounded in this action, he refused to be evacuated and remained in command of his platoon until ordered off the field by his major."

The War Department announces the following emergency addresses of the foregoing:

Pvt. Emmet B. Clary, Machine Gun Battalion. No record.

First Lieut. Bernard Van T. Hof, Infantry. Krya Van T. Hof, father, 824 Sweet Street N.E., Grand Rapids, Mich.

First Lieut. George W. Furoush, jr., Infantry. George W. Furbush, father, Pumping Station, Waltham, Mass.

Second Lieut. Donald W. Green. Mrs. Nellie W Green mother, 1356 East Fifty-sixth Street, Chicago, Ill.

Sergt. Herbert F. McKenna, Infantry. Rev. M. J. Fitzpatrick, guardian, 375 Lafayette Street, New York, N. Y.

Supply Sergt. Byron W. Peyton, Infantry. Mrs. J. L. Peyton, mother, 328 West First Avenue, Columbus, Ohio.

Corpl. Rufus Wiseman, Infantry. William Wiseman, father, R. F. D. No. 3, Williamsport, Ohio.

Pvt. Victor Van York, Infantry. W. T. Van York, father, 22 West Thirty-ninth Street, New York, N. Y.

Pvt. Frank D. Taylor, Infantry. No record.

Pvt. Frank M. Ford, Infantry. John T. Ford, father, Bonner Road, Forest Park, Baltimore, Md.

Pvt. Harvey Stickles, Infantry. No record.

Second Lieut. Elmer T. Doocy, Infantry. Edward Doocy, father, 226 West Jefferson Street, Pittsfield, Ill.

Sergt. Claude V. Hart, Infantry. R. B. Hart, father, Cherokee, Iowa.

Sergt. Mitchell J. S. Earl, Infantry. No record.

Corpl. Robert M. Bornton, Infantry. No record.

Corpl. Nary Roberts, Infantry. No record.

Corpl. Sydney E. Manning, Infantry. Mrs. Lizzie Manning, mother, Fredericton, Me.

First Lieut. George H. Noble, Infantry. No record.

WILL SHIP WESTERN CATTLE TO PASTURES IN THE EAST

The Food Administration issues the following:

Large shipments of cattle from the drought-ridden regions of Texas and Oklahoma to pasture land in Pennsylvania, Virginia, and other Eastern States, are about to be undertaken by the Railroad Administration, upon request of the Food Administration. To make possible this food conservation measure, a decrease of 25 per cent in freight rates has been granted, through recommendation of the Food Administration, to take effect as soon as the new tariffs can be published.

To Be Sold in East.

Cattle buyers in the East will purchase western stock outright, according to the plan laid before the Food Administration last Monday by a delegation representing both eastern and western interests. Shipments in train-load lots will begin as soon as the plan gets well under way.

Thousands of cattle will die within the next few weeks in the West if measures are not taken at once to bring relief, the delegation declared, but shipment at the established rates could not be undertaken without substantial loss.

Cattle Below Weight.

State and local food administrators in Texas and Oklahoma will cooperate in aiding eastern buyers, who will soon be in the field, to start the movement toward the Atlantic coast. The cattle are of light weight, below the 475-pound dressed-weight Army specification. Housewives have been recently urged by the Food Administration to buy cuts from these light beeves, to further assist in relieving this situation, as the heavy cuts have a ready market for export.

Last year enough cars were requisitioned through the efforts of the Food Administration and the Commission on Car Service to carry 150,000 cattle out of drought-stricken districts of Texas and southern New Mexico into better pasturage elsewhere. Shippers on the railway lines affected bore the temporary withdrawal of cars with patriotic equanimity, and the movement was a success.

RED CROSS HOSPITAL BUREAUS.

For the convenience and comfort of relatives visiting sick or convalescent soldiers and sailors at the base hospitals in this country, the American Red Cross will build small information houses near the hospitals at each big cantonment. Guides will be supplied to show visitors directly to the ward they seek.

PROGRESS IN TRAINING UNFIT MEN FOR USEFUL WAR SERVICE

The following statement is authorized by the War Department:

The establishment of development battalions to relieve divisions, replacement organizations, etc., of all unfit men and to train such of them as can be made useful for combat or noncombat forces in the United States or overseas is proceeding steadily.

In order that the Army may be effective it is important that men for overseas be suitable for any class of combat service, and the physical examinations required are very rigid and have heretofore precluded the use of large numbers of men of exceptional trade skill or high professional ability and knowledge, and one of the very important functions of the development battalion is to provide means for utilizing this material in capacities where very minor defects do not interfere with their effective use.

Replacement of Men.

In this way it is possible to replace men who are perfectly fit for overseas service by men who are of what is called "limited-service classification."

At this time men in all branches of the Army heretofore engaged on semicivilian work, or work which can be equally well performed by men with slight physical defects, are being replaced, and ultimately, through the operation of the development battalions, practically all of the permanent or semicivilian work of the Army in the United States will be done by these men.

The first of a series of monthly reports have been received from 29 camps in which there are now operating 51 development battalions, and to these have been transferred about 90,000 men. Other battalions are to be formed, and the indications are that the total number of men who will be in development battalions, at least in the first instance, will approximate 100,000.

Unfit Carefully Examined.

As fast as these men are received in the battalions they are carefully examined by the personnel organiaztion and also by a selected medical group, and are classified. They are then placed in squads, platoons or companies, depending on the numbers, and undergo various forms of training, designed to correct their minor defects, or in serious cases are sent to hospitals for treatment.

As rapidly as the men are brought to their maximum conditions they are rated and are then available for transfer out of the battalions to such work as they are fitted for.

In this way there is a constant stream of men coming into the battalions, being developed, and then transferred out to active organizations in the Army or to semicivilian duties.

With the incoming draft, including men up to 45 years of age, there will probably be a considerable increase in the number of men transferred to the development battalions.

Special Orders, No. 198: Lieut. Col. James A. Blair, jr., United States Army, will take station in Philadelphia, Pa., in connection with his duties with the United States Shipping Board Emergency Fleet Corporation.

CURTAILMENT IN USE OF PAPER AND BOARD BY DRUG LABELS AND DRUG BOX MANUFACTURERS

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

With the privilege granted to them to use until exhausted present stocks of any description on hand, these suggestions for curtailment in the use of paper and board made by the War Service Committee of Drug Labels and Drug Box Manufacturers have been accepted by the pulp and paper section of the War Industries Board, effective September 16:

PAPER.

1. Writing papers used as label papers to be standardized on the basis of 17 by 22—20 pounds.

2. Coated paper used for labels to be standardized on the basis of 25 by 38—60 pounds.

3. Writing papers used for prescription blanks to be standardized on the basis of 17 by 22—16 pounds.

BOARD FOR CARTONS.

4. Boards to be used for cartons up to 8 ounces to be standardized on a 15-point basis.

5. Boards to be used in making cartons 8 ounces and over to be standardized on an 18-point basis.

STOCK SET-UP BOXES.

6. Oblong powder boxes to be reduced to four sizes and to one size for seidlitz powders.

7. Square pill boxes to be reduced to four sizes.

8. Round pill boxes to be reduced to four sizes.

9. Capsule sliding boxes to be reduced to three sizes.

PAPER FOR EDGES AND STRIPPING.

10. The use of gold paper for edges shall be eliminated. Only plain papers are to be used for stripping when the present stock on hand in fancy paper is exhausted.

Pledge to Be Signed.

Each board and paper mill will be put upon the War Industries Board's preference list, conditioned upon its signing a pledge that it will furnish no board or paper to any customer who will not also sign a pledge, in duplicate, that he will exercise the greatest possible economy in the use of board and paper and will observe all rules and regulations of the conservation division and of the pulp and paper section of the War Industries Board.

The drug label and drug box manufacturers need not exact from their customers such a written pledge, but must impress upon their customers and consult with them concerning the importance of conservation.

CONTRACT LET FOR 300 HOUSES.

The Department of Labor authorizes the following:

A contract for 300 houses, utilities and town planning at Project No. 389, Watertown, N. Y., has been awarded to Edward K. Fenno, 204 North Beech Street, Syracuse, N. Y. The contract is on a fixed fee basis; the estimated cost is $1,504,474.

CURTAILMENT ORDERED IN FELT USED IN SLIPPER MANUFACTURE

Bernard M. Baruch, chairman of the War Industries Board, authorizes the following:

Because of Government needs for felts for war uses and a reduction in the available amount of raw materils, B. M. Baruch, chairman of the War Industries Board, has approved a curtailment in the production of the felt shoe and bedroom slipper industry. Every possible cooperation will be given the felt mills in the production of felts for convalescent slippers, hospital slippers, lumbermen's boots, etc., which are required by the Government and the Red Cross, and are essential. If allotments of raw material could be made the felt mills it would be under the condition that the felt should go first for an absolute requirement for civilians, such as in overcoats.

Working on Conservation Plan.

The felt section of the War Industries Board, of which Sylvan I. Stroock is chief, is working in connection with the conservation division on a conservation plan covering the felts now in the possession of the felt shoe and slipper manufacturers, whereby a much smaller quantity of felt will be used in each slipper through restrictions in quality, weight, and colors. This will stretch to some extent their supply of finished merchandise. But before long this industry will reach a point where it will be unable to supply the demand.

The Government has not available raw material which can be allotted to the mill for the manufacture of felt for shoes and slippers for indoor use beyond the materials which are already ordered. The felt mills are now producing to capacity for war purposes and can not be spared or diverted to the manufacture of felt for civilian industries. The probabilities are it will be a considerable time before the felt mills will be in a position to produce felt for civilian slipper manufacture.

Limited Permits to Makers.

The felt section has decided to grant permits to felt manufacturers to produce felts for shoes or slippers only on the contingency that the felt mills produce such felts from the raw materials which they own, and that the manufacture of such felts will not in any way interfere with or cause the mills to delay or defer the fulfillment of any Government contracts, direct or indirect, which they now have or which may be placed with them and which require priority of shipment.

Representatives of the felt shoe and slipper manufacturing industry were warned at a recent meeting with the felt section to prepare themselves for the situation that has arisen in their industry. F. E. Young, chairman of the national association, was advised to have the organization confer with Charles A. Otis, chief of the resources and conversion section of the War Industries Board, on arrangements whereby the felt shoe plants can go into the manufacture of items required by the Government and in this way possibly keep their plants, or part of the plants, running. Their stocks in hand will run them through this season, possibly into next season, and they have time in which to prepare.

LIST OF CASUALTIES REPORTED AMONG THE UNITED STATES FORCES OVERSEAS

New List of American War Prisoners Now Held Within the German Empire

The War Department authorizes publication of the following list of prisoners of war at various camps within the German Empire:

RESERVE LAZARETT 1, BAYREUTH.

Pvt. (first class) David Rittenburg. Israel I Rittenburg, brother, 24 Canterbury Street, Dorchester, Mass.

CAMP CASSEL.

Pvt. Alfred P. Jones. Benjamin E. Jones, father, Hotel Sterling, Easton, Pa.

Pvt. Herbert V. Jordan. Mrs. Lennia Jordan, mother, 228 Broadway, Hanover, Pa.

Pvt. Watson Bradley. Miss Elsie T. Carpenter, friend, Moorestown, N. J.

Pvt. Dolbert Stephenson. John L. Stephenson, father, Bedford, Ind.

Pvt. Frank Ostrander. Fred A. Ostrander, father, 1202 Fourth Street, Jackson, Mich.

Pvt. Frank Tangle. Miss Barbara Tangle, sister, 1629½ East Third Street, Bethlehem, Pa.

CAMP RASTATT.

Pvt. Archie B. Clark. Rose E. Clark, mother, 315 North Eleventh Street, Coshocton, Ohio.

Corpl. Brant A. Farley. A. M. Farley, father, 918 West Mound Street, Columbus, Ohio.

Pvt. Claude Jackson. Alex Jackson, father, R. F. D. No. 2, Hickman, Ky.

Pvt. Gip Piland. A. H. Piland, father, Uniontown Ky.

Pvt. Frank Wilmer. Bennard Wilmer, father, Westport, Ind.

Corpl. Charles Morin. Fred Morin, brother, 778 Bassett Street, Columbus, Ohio.

Pvt. Vasily Potechny. John Potechny, father, McAdoo, Pa.

Pvt. Jesse Amore. Mrs. Katherine Amore, mother, Plainsfield, Ohio.

CAMP UNKNOWN.

Pvt. (first class) Dallie Kelly. Mrs. Lottie Kelly, mother, Osgood, Ind.

Pvt (first class) John J. Gilliland. Jefferson A. Gilliland, father, general delivery, Webber Falls, Okla.

Pvt. Frank Machules. John Bostis, friend, 821 West Thirty third Place, Chicago, Ill.

Pvt. Burt Eaton. Burt Eaton, father, Ellensburg, Wash

Pvt. Alvin R. Anderson. Robert Anderson, father, Kerkhoven, Minn.

Pvt. Frank J Rice. Frank Rice, father, 207 Broadway, Scranton, Pa.

Sergt. Earl C. Ranch. Mrs. Lottie Ranch, wife, 101 South Georgia Street, York, Pa.

Pvt. Eli Levin. Alexander Levin, brother, Utica, Mich.

Corpl. William W. Williamson. Mrs. Margaret Williamson, mother, 18 South Main Street, Lambertville, N. J.

Pvt. Harry Wilson. Joe Wilson, father, 823 North Seventh Street, Philadelphia Pa.

Pvt. Tony Civilli. Patsey Dondry, friend, 313 North Fifth Street, Lebanon, Pa.

Pvt. Emanuel Steiger. Fred Steiger, father, Glenham, S. Dak.

Pvt. Sam Thomas. John Hollwitz, friend, 802 Nectar Street, Philadelphia, Pa.

Sergt. Firmer M Keller. Leston Keller, brother, South Whitley, Ind.

Pvt. Alex Melnick. Miss Platina Melnick, sister, Czelnorvice, Katro, Zivetoro, Kiev, Russia.

Pvt. (first class) Fred Greger. Chester K. Gregor, father, 1226 State Street, Erie, Pa.

Pvt. Antoni Kaszewski. Miss Mary Kaszewski, sister, 2364 Margaret Street, Philadelphia, Pa.

First Lieut. Van Winkle Todd. Mrs Van Winkle Todd, wife, 423 Lincoln Avenue, Orange, N J.

First Lieut. Arthur L. Whiton. E. C. Whiton, father, Nortonville, N. Dak.

Following is an additional list of soldiers who, it has been ascertained, are prisoners of war at various camps in the German Empire:

CAMP RASTATT.

Pvt. Vladimir Ruzicka. August Ruzicka, father, Greenlawn Avenue, Columbus, Ohio.

Pvt. Elisha Burns. E. I. Burns, father, Buckhorn, Ky.

Pvt. Alma Weats. Mrs. Alma Weats, mother, 99 Clinton Avenue, Columbus, Ohio.

Pvt. Charles Morris. Walker Morris, brother, 3911 Federal Street, Chicago, Ill.

Pvt. (first class) Robert Hawkins. Mrs. Grace Belle Cole, sister, 7 Robinson Street, Binghamton, N. Y.

Pvt. Joseph A. McKeown. Mrs. Margaret Coady, friend, 1620 Hutchinson Street, Philadelphia, Pa.

Pvt. Valentine Pfluger. Wendlin Pfluger, father, 2035 Mahantonda Street, Pottsville, Pa.

DARMSTADT HOSPITAL.

Pvt. Ernest A Rouch. Mrs. Mary L. Rouch, mother, 452 Dumpier Street, York, Pa.

Pvt. Lyle O. Talbolt. William Talbolt, father, State Street, Lowville, N. Y.

Pvt. Frank Siers. Jink Siers, father, Nebo, W. Va.

Pvt. Jesse A. Lynch. Mrs. Alda B. Lynch, wife, Mountain View, Okla.

Pvt. (first class) Thomas J. Brady. Mrs. Anna Brady, mother, 351 Eighth Street, Troy, N. Y.

CAMP CASSEL.

Pvt. John K. Wilson. Dr. Henry Wilson, father, Somerset, Pa.

DAYREUTH HOSPITAL.

Pvt. (first class) Stanley Crawford. Mrs. Catherine Shock, sister, 17 Essex Lane, Wilkes-Barre, Pa.

Pvt. Vincent L. Carey. Mrs. Margaret Carey, mother, 609 Sixteenth Street, New Brighton, Pa.

Pvt. Joseph F. Martin. Joe Martin, father, Vienna, Ill.

The following prisoners are reported wounded:

DARMSTADT HOSPITAL.

Pvt. Charles Olson. Mrs. Josephine Olsen, mother, Windber, Pa.

STRALKOWO BEI POSEN.

Pvt. John Hurter. William Bunge, friend, Route 4, Medford, Wis.

It is reported that 2nd Class Seaman William Albert Miller escaped from Brandenburg, January 31. Emergency address: Mrs. Elizabeth Grebeck, mother, 8845 Bruley Avenue, Chicago, Ill.

The department has been informed that Pvt. Carl C. Enderlin died in hospital at Langensalza August 12, 1918. Emergency address: Mrs. Emily Enderlin, mother, 121 Freemont Street, Mount Oliver, Pittsburgh, Pa.

AMERICAN MEDICAL DOCTORS ANSWER CALL OF THE NATION

The Council of National Defense authorizes the following:

Applications for enrollment in the Volunteer Medical Service Corps have been coming in at a gratifying rate since the blanks were mailed a week ago. A total of 19,225 Volunteer Medical Service Corps letters were received in the period September 3 to September 7. Fully 95 per cent of the envelopes—or 18,263—have contained filled-out application blanks accompanied or not accompanied by a letter. These are being classified as rapidly as possible. This quick response on the part of the patriotic physicians of the country is very gratifying to the central governing board of the Volunteer Medical Service Corps.

Generous Response to Appeal.

In response to the appeal that State executive committees be enlarged and strengthened for the work of handling the Volunteer Medical Service Corps matters, and also the request that a representative in each county be quickly designated, practically all of the States in the country have complied and have sent in the personnel of the State executive committees and of the county representatives to the headquarters of the Volunteer Medical Service Corps in Washington. The make-up of each State committee has been the joint work of the central governing board and the State committees, medical section, Council of National Defense, in each State. There has been the closest cooperation, and the officials of the central governing board are assured that the executive committees will all hold frequent meetings and keep in close touch with the situation in their respective States.

20,000 Answer Call.

The information received during the past week from the nearly 20,000 doctors, and that which will continue to be received, will be at the immediate disposal of the Government authorities for consideration and use so far, especially as the doctors under 46 years are concerned. Also the central governing board believes that perfecting the machinery of the Volunteer Medical Service Corps by the strengthening of the State executive committees will fulfill the announced purposes of the Volunteer Medical Service Corps to make the doctors of the utmost possible service to the Surgeon Generals of the Army, Navy, and Public Health Service, and also for the various civilian needs.

NATIONAL BANK CHARTERS APPLIED FOR AND GRANTED

Application to the Comptroller of the Currency during the week ending Friday, September 13, 1918, for authority to organize National Banks and to convert State Banks into National Banks; charters issued; charters extended and reextended; increases and reductions of capital approved; changes of title approved and National Banks placed in voluntary liquidation were as follows:

APPLICATIONS FOR CHARTER.

For organization of National Banks:	Capital.
The College National Bank of Berkley, Cal.	$200,000
The National Bank of Clayville, N. Y.	25,000
The Whitestown National Bank of Whitesboro, N. Y.	25,000
The First National Bank of Monticello, Utah	25,000
The First National Bank of Hugoton, Kans. To succeed the Hugoton State Bank	25,000
For conversion of State Banks:	
The First National Bank of Cloverdale, Cal. Conversion of the Bank of Cloverdale	50,000
The First National Bank of Mead, Colo. Conversion of the Mead State Bank	25,000
The First National Bank of Saltville, Va. Conversion of the Saltville Bank	25,000
Total	400,000

CHARTERS ISSUED.

Original organizations:	
The First National Bank of Cutler, Cal.	$25,000
The Farmers and Merchants National Bank of Calipatria, Cal. Succeeds the Calipatria Branch of the American State Bank of Brawley, Cal.	50,000
Total	75,000

CHARTER EXTENDED.

The First National Bank of Bristol, N. H., until close of business September 12, 1938.

INCREASE OF CAPITAL APPROVED.

The First National Bank of San Diego, Cal. Capital increased from $600,000 to $1,000,000	$400,000
The Boonville National Bank, Boonville, Mo. Capital increased from $75,000 to $200,000	125,000
Total	525,000

SUMMARY.

	No. of banks.	Capital.
Applications for charter	8	$400,000
Charters issued	2	75,000
Charters extended	1	
Increase of capital approved	2	525,000

FIELD ARTILLERY OFFICERS.

Special Orders, No. 170:

164. The appointments of the following-named officers in the Field Artillery, National Army, with rank from July 16, 1918, are announced:

TO BE MAJOR.

Capt. Ellerbe Winn Carter, National Guard.

TO BE CAPTAIN.

First Lieut. John Peyton Hobson, jr., National Guard.

TO BE FIRST LIEUTENANTS.

Second Lieut. Woodford Hector Dulaney, National Guard.

Second Lieut. William Edward Welgand, National Guard.

Second Lieut. John Elder Blackledge, National Guard.

They are assigned to the 38th Division for duty.

AMERICAN SUPPLY OF SEA MINES IS WELL UP WITH WAR NEEDS NAVY DEPARTMENT REPORTS

PREPARED FOR ALL ENEMY SHIPS

Explosives Sufficient to Pave the Atlantic Eight Times Against Hostile Vessels, Ordnance Bureau Statistician Asserts.

The Navy Department authorizes the following:

Mine production by the Navy Bureau of Ordnance has been so highly developed that there is now a daily production of 1,000 mines, complete in every detail. This means that, should the exigencies of naval warfare require it, the Navy Bureau of Ordnance could produce annually 365,000 mines. The bureau, however, is keeping so far ahead of mine requirements of American and allied naval forces in European waters that it is unnecessary to work on mine assembly or loading either Sundays or holidays.

Eight Times Over the Atlantic.

If all the mines produced by the Bureau of Ordnance since America entered the war were planted (the same distance being maintained between the mines as in mining operations at sea) the mine belt would cross the Atlantic eight times.

This satisfactory condition of mine production is the result of the development and standardization by the Navy Bureau of Ordnance, since the war began, of a new type of American mine. This new mine has all the advantages of the older types and practically none of their disadvantages, this being particularly true in their loading and laying. The new mine must be one of the safest in the world to handle, for there has not been an explosion or accident either loading or laying. Yet experience has proved that these mines are a tremendously potent anti-submarine weapon.

Intended to Be Effective.

In the design of these mines special care has been taken to fulfill all requirements of the Hague convention. Should the mine break adrift from its anchor it is immediately rendered inactive by internal mechanism placed there for that specific purpose, and it floats on the surface where it can easily be destroyed. Should a ship strike a floating American mine the firing mechanism would not function.

To obtain these mines in such enormous quantities, as well as to preserve secrecy regarding their characteristics, a radical departure from usual manufacturing methods was adopted. Naval plants did not possess facilities for manufacturing as many as 1,000 mines per month, and such plants were congested with other work. It was impracticable to develop a great plant for the sole purpose of manufacturing mines, since there was not sufficient time for this purpose. The expedient was, therefore, adopted of dividing the mine into many parts and having these manufactured at different commercial plants, all the parts being brought together and assembled, the mine being then loaded at a central mine depot. The work was divided among 140 principal contractors and more than 400 subcontractors.

The unit cost of the new mine is about one-half that of mines before the war, notwithstanding the prevailing high cost of labor and raw materials. This is due to the fact that all the elements of the mine have been standardized in the same way that passenger automobile parts are standardized and that quantity production methods are followed.

ORDER PERMITTING STUDENT NURSES TO GO TO FRANCE FOR ARMY SERVICE

The War Department authorizes the following statement from the office of the Surgeon General:

The 50 American hospitals which organized base hospital units for service in France have been notified by the Surgeon General that they may invite a limited number of their student nurses to go to France, where they can have the privilege of rendering service and, at the same time, complete their training under representatives of their own schools in base hospitals abroad.

This action is the result of advices received from the Medical Department headquarters of the American Expeditionary Forces.

Many of the hospitals which sent base units abroad had expressed the desire to send some of their student nurses abroad in the manner now suggested by the office of the Surgeon General. Not until word had been received from overseas that such a plan was desired by the Medical Department in France was action taken by the authorities in America.

The Medical Department wishes it to be thoroughly understood that while the assignment of these students is much desired by the medical authorities abroad the War Department does not wish in any way to interfere with the work of the hospitals in this country. It remains entirely with the hospital authorities whether the plan is adopted or not.

Selection of Pupils.

The pupils selected, most of whom will be seniors, will be enrolled in the Army School of Nursing and after taking their oaths, will be assigned to duty under the nursing staff of their own base hospital on the other side. Each unit of 25 will be in charge of a graduate nurse, who will be mutually acceptable to the schools sending their students and to the office of the Surgeon General. The training schools have been invited to recommend graduate nurses to command the student nurses.

The plan of using student nurses abroad coincides with the method of hospital nursing in civilian hospitals in this country which has been adopted by the Army in its base hospitals in America.

Prior to the present war only graduate nurses were employed in Army hospitals. The experience of civilian hospitals has been that the greater part of the nursing in hospitals can be done by student nurses under the instruction and observation of graduate nurses. All the great hospitals in this country follow this plan with satisfactory results.

As graduate nurses can be more useful in France, it was decided by the Army Medical Department to adopt the civilian system in its base hospitals in this country, so that student nurses could take the places of graduate nurses. Already more than 1,000 applicants have been assigned to base hospitals at camps or are awaiting assignment. After a year's training in the hospitals in this country, these Army student nurses can and may be used in the American hospitals overseas. Applications are still being received for enrollment in the Army School of Nursing.

May Learn New Methods.

The Medical Department is now working on a plan which will give these student nurses an opportunity to learn those branches of nursing which are not taught at Army hospitals. It is believed that an effective system of exchange can be worked out with civilian hospitals whereby the students in both classes of training schools may get the advantages of training offered by each class of school. By spending a certain period in a civil hospital, the Army nurse will learn the special work in the nursing of women and children. In her absence her place will be taken by a civilian student nurse, who thereby will receive a valuable course in Army nursing. Nurses' training school authorities have requested such exchange. Under the plan proposed the civilian nurses who have had the special course in the Army hospitals would be eligible to enter the Army Nurse Corps, which consists entirely of graduate nurses. The plan of exchanging nurses between training schools is generally followed in civilian life.

New Position Created.

In order to take advantage of the services of those women who have offered to nurse wounded soldiers, and who are not eligible for admission to the Army School of Nursing or the civil hospital schools of nursing, the Surgeon General has created the position of "hospital assistants."

Women accepted as "hospital assistants" will be assigned to convalescent hospitals in this country where training units are not to be established. Hospital assistants who have not satisfactorily completed the courses given by the American Red Cross in elementary nursing and hygiene, first aid to the injured, and dietetics, will be required to take a similar course extending over a period of at least six weeks.

To be eligible for admission, candidates must be married women between the ages of 21 and 40, whose husbands are overseas, and who are free to give this service; also single women between the ages of 35 and 45. They must be graduates of high schools or present an acceptable equivalent.

Candidates desiring to be considered for admission to the Division of Hospital Assistants of the Army School of Nursing should make application in person or in writing, or through the division directors of the Bureau of Nursing of the American Red Cross, to the Army School of Nursing, Surgeon General's office, Washington, D. C.

AUTOMOBILE SHOWS CANCELED BECAUSE OF WAR EXIGENCIES

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

The National Automobile Chamber of Commerce has canceled the national automobile shows of 1919, to have been held during January and February in New York and Chicago, at the request of Bernard M Baruch, chairman of the War Industries Board, and George N. Peek, commissioner of finished products.

Going further to meet the views of the War Industries Board, the automobile industry leaders have urged promoters of local shows for automobiles, trucks, or accessories to abandon all plans for such during the coming winter.

Desire for Cooperation.

The reason given to the industry for this action by the Automobile Chamber of Commerce is a desire to cooperate with the War Industries Board in plans for conservation of fuel, labor, and transportation.

The question of advisability and practicability of holding these shows, both national and local, was taken up with Messrs. Baruch, Peek, Alexander Legge, and Judge Edwin B. Parker, of the War Industries Board, by Hugh Chalmers and Alfred Reeves, of the National Automobile Chamber of Commerce, and Mr. Peek strongly urged that all such exhibitions be abandoned for the winter. Mr. Chalmers presented the views of the War Industries Board to his chamber of commerce and Mr. Peek has received from Mr. Reeves, general manager of the chamber, a letter stating that the directors of the chamber concurred unanimously in the opinion of the board and has adopted the following resolution:

Text of Resolution.

"*Resolved*, That the promotion of national automobile shows during the winter of 1918–19, with consequent use of transportation, fuel, and labor, would, in the opinion of this board, be inconsistent with the patriotic obligations of the industry and that, therefore, national shows be suspended until further action of the association.

"*Resolved*, That for reasons expressed in the foregoing resolution, promoters of local and other shows be respectfully requested not to hold automobile, truck, or accessories exhibitions during the winter of 1918–19."

PICKLES FOR U. S. SOLDIERS.

War Department Finds Them In Favor at Army Cantonments.

The War Department authorizes the following:

The men of the Army, in camps, cantonments, and in the overseas forces, are fond of pickles. Right now there is a shortage in the sizes of pickles specified by the Army specifications. For the 230,000 gallons required for overseas, the subsistence division of the Quartermaster Corps has received bids on less than 100,000 gallons. This situation will be relieved by the use of larger pickles until after the new crop is in.

The subsistence division is now studying the advisability of using vinegar made from watermelons. It is found that there is a large wastage of the watermelons grown in the South, and the vinegar manufactured therefrom is a splendid product. The cost of producing this vinegar is less than that of cider vinegar.

SEALED PROPOSALS.

Sealed proposals, in duplicate, to be publicly opened by the depot quartermaster, Marine Corps, 1100 South Broad Street, Philadelphia, Pa., on September 17,1918, are hereby invited for furnishing 2,000 reams, mimeograph paper, size 8 by 10½ inches and 2,000 reams mimeograph paper, size 8 by 13 inches, to be delivered to the depot quartermaster, Marine Corps, Philadelphia, Pa.

New Rulings on U. S. Imports Issued by War Trade Board; Guide to American Merchants

The War Trade Board authorizes the following:

The War Trade Board, in a new ruling (W. T. B. R. 221), has authorized the importation of fresh tomatoes from the Bahamas to New York when moved as deck cargo upon the Cuba-New York mail steamers. Fruits and vegetables are on the list of restricted imports; but in this, as in other similar cases, the War Trade Board has found it possible to aid a vital West Indies industry without affecting the general tonnage situation, since the tomatoes in question can be carried as deck load without excluding other more essential cargo and without imposing any further demands upon tonnage. Licenses will be issued for the above-mentioned shipments up to and including December 31, 1918.

Mahogany Logs Not Imported Except for Government Use

By a new ruling of the War Trade Board (W. T. B. R. 222), all outstanding licenses for the importation of mahogany logs and mahogany lumber have been revoked as to ocean shipment after September 10, 1918. Hereafter no licenses for the importation of these commodities will be issued except to cover such shipments as the director of lumber of the War Industries Board shall certify to be suitable and necessary for Government use.

War Trade Board Rules On South American Imports

The War Trade Board in a new ruling (W. T. B. R. 223) has authorized the importation of hides and skins from the east coast of South America which were purchased before June 15, 1918, but which the importer has not been able to bring into this country on account of the restrictions upon imports. Licenses will be issued for such imports, provided the hide, leather, and leather goods division of the War Industries Board certifies that the goods in question were bought or contracted for by the American importer prior to June 15, 1918, and that title has actually passed or the importer has become irrevocably bound for the payment of the purchase price.

General Import License for Surplus Stores in Ships

The War Trade Board announces in a ruling (W. T. B. R. 224), that a general import license, to be known as PBF No. 26, has been issued, covering the importation of surplus ships' stores and supplies which the bureau of transportation of the War Trade Board may order to be removed from vessels in United States ports.

License Assures Wooled or Pickled Sheepskin

By a new ruling of the War Trade Board (W. T. B. R. 225) applicants for licenses to import wooled and/or pickled sheepskins are required to furnish to the bureau of imports of the War Trade Board, before licenses may be granted, an agreement not to sell the skins so imported at a price in excess of the price fixed by the price-fixing committee appointed by the President.

Animal Hair Restricted on War Trade Import List

The War Trade Board, in a new ruling (W. T. B. R. 226), has placed animal hair, other than horse hair, hair of the angora goat, camel, and other like animals, on the list of restricted imports. All outstanding licenses for the importation of this commodity have been revoked as to ocean shipment from abroad after September 15, 1918, and no new licenses will be issued except for ocean shipments from abroad made on or before September 15, 1918, shipments from Canada or Mexico by other than ocean transportation, and shipments coming as return cargo from Europe and Mediterranean Africa when shipped from convenient ports where loading can be done without delay.

The War Trade Board have further restricted the importation of furs not on the skin, prepared for hatters' use, including furs carroted. All outstanding licenses for the importation of these commodities have been revoked as to ocean shipments made after September 15, 1918. Hereafter no licenses will be issued except for shipments from Canada or Mexico by other than ocean transportation, and for shipments from Europe or Mediterranean Africa when coming as a return cargo from convenient ports where loading can be done without delay.

FOOD ADMINISTRATION IMPOSES PENALTIES UPON FIVE FIRMS

The Food Administration issues the following:

Five firms, which evidently did not take Food Administration regulations seriously, have been penalized for failure to obey them. One refused to attend hearings of its case; another ignored notification of its delinquencies utterly; while a third violated several regulations at once.

Accused of Overcharging.

Because they sold wheat flour at excessive prices, without proper substitutes and in greater quantity to the consumer than allowed by regulation, the Brennan Grain Co., Chelsea, Mass., can not purchase wheat flour from licensed dealers until further notice, pursuant to an order issued to all licensees by the Food Administration. The order became effective Tuesday, September 10.

Although officials of the company were summoned to a hearing and reprimanded, they continued their violations. Then they ignored a summons to appear before their county food administrator, and later a like call to a hearing of charges against them before the Federal food administrator for the State.

Brokers Lose License.

The William Thomas Co., 214 Washington Street, New York City, brokers in fresh fruits, have had their license revoked for an unlimited period for soliciting shipments of strawberries by methods that constituted unfair business practice. Representatives of the company failed to reply to letters from the Food Administration and are reported to have left the country without settling for shipments. They claimed, according to the evidence, to be able to sell berries for growers at a material advance over cash market prices then current.

Oneida Millers Penalized.

George A. Taylor Co., Oneida, N. Y., millers, warehousemen, and elevator operators, have had their license revoked from September 16 to November 16. They failed to put their license number on bills and accounts, as required, and sold wheat flour without substitutes and in excessive quantities.

Harris & Dixon, Indianapolis, have been closed for one week for profiteering in sugar, while Eli Emil, of the same city, has suffered a like penalty for charging too high prices for sugar and wheat flour and for failure to sell the latter with substitutes.

WARFARE URGED ON RATS.

The Council of National Defense has asked the State Councils of Defense to undertake a systematic campaign for the extermination of rats and mice. The necessity and importance of this campaign are shown by the statement of the council that according to careful investigation rats and mice consume annually food and property worth $200,000,000, or as much as it would take the labor of 200,000 men to produce. In addition to this they increase the fire risk and menace health.

Draft Call for Typists and Stenographers

The War Department authorizes the following from the office of the Provost Marshal General:

A call has been issued by the office of the Provost Marshal General for the following white limited-service men for use as stenographers and typists. They will entrain September 23 for the places indicated:

Alabama:	
Jackson Barracks, La	10
Fort Thomas, Ky	40
Arizona:	
Fort Sam Houston, Tex	3
California:	
Fort McDowell, Cal	50
Colorado:	
Jefferson Barracks, Mo	75
Connecticut:	
Camp Devens, Ayer, Mass	10
Delaware:	
Fort Slocum, N. Y	5
District of Columbia:	
Fort Slocum, N. Y	5
Florida:	
Fort Screven, Ga	8
Georgia:	
Fort Screven, Ga	25
Idaho:	
Fort McDowell, Cal	3
Illinois:	
Jefferson Barracks, Mo	50
Columbus Barracks, Ohio	200
Indiana:	
Columbus Barracks, Ohio	75
Iowa.	
Columbus Barracks, Ohio	50
Kansas:	
Jefferson Barracks, Mo	75
Kentucky:	
Fort Thomas, Ky	20
Columbus Barracks, Ohio	25
Louisiana:	
Jackson Barracks, La	20
Maine:	
Camp Devens, Ayer, Mass	3
Maryland:	
Fort Slocum, N. Y	25
Massachusetts:	
Camp Devens, Ayer, Mass	30
Michigan:	
Columbus Barracks, Ohio	50
Minnesota:	
Camp Grant, Rockford, Ill	55
Mississippi:

Fort McDowell, Cal	2

A SUMMARY OF OPERATIONS BY CONSTRUCTION DIVISION

The War Department authorizes the following:

To provide for the needs of the Army, the construction division has undertaken since April, 1917, a total of 323 operations, and now has in prospect 153 more. The total cost of this program is estimated to be $1,083,766,193.

To the end of August, 93 operations had been completed, including the camps and cantonments. The cost of the finished operations was $277,745,847. Additions and alterations of minor character are not figured as "jobs."

Some of the Projects.

There are now under construction 393 jobs, which will represent a cost approximating $636,858,351. Practically all of the work now under construction will be finished by January 1, 1919. However, some of the larger jobs, which are of a permanent nature, will not be completed until October, 1919. Included in the present construction are the development of eight port terminals at a cost of approximately $150,000,000. One of these, the Brooklyn Army supply base, estimated to cost $40,000,000, will have the largest warehouses in the world. The other terminals in the course of construction are: South Boston, Mass., which is estimated to cost $28,000,000; New Orleans, La., $10,000,000; Charleston, S. C., $25,000,000; Norfolk, Va., $20,000,000; Philadelphia, Pa., $15,000,000; Newark, N. J., $10,000,000; Newport News, Va., about $5,000,000.

Ammunition and Other Depots.

Projects now under way include a large number of ammunition depots, quartermaster's warehouses, and storage depots in inland cities, hospitals, ordnance plants, new training camps, and the enlarging of other camps to provide accommodations for the increasing army and the newer methods of training. The major portion of this class of work will be finished by January 1, 1919.

Wrapping and Book Paper Regulations Issued by the War Industries Board

The manufacturing division, pulp and paper section, War Industries Board, issues the following:

Regulation No. 26.

WRAPPING PAPERS.

1. The following are established as the trade customs stock sizes for commercial wrapping papers, except as hereinafter provided for:

6 x 9	20 x 30	36 x 48
9 x 12	24 x 36	40 x 48
12 x 18	27 x 37	48 x 60
15 x 20	30 x 40	48 x 64
18 x 24		

Rolls may be manufactured in a size of either dimension expressing a stock sheet size or a multiple thereof.

Sizes smaller than 24 x 36 shall be packed flat, larger sizes may be packed quire fold, but it is recommended that soft fold or flat be ordered and that in sizes smaller than 24 x 36 rolls instead of sheets be adopted as a matter of economy and as an aid in conservation of labor and waste at the mills.

2. The following are established as substance weights for all grades of wrapping papers: 24 x 36—20, 25, 30, 35, 40, 50 60, 70, 80, 90, 100, 112, 125, 150 pounds to 480 sheets; subject to the following regulations:

3. In manufacturing the following maximum substance weights are established for the grades specified:

A. 100 per cent sulphate kraft—

All size sheets up to and including 36 x 48 and all size rolls in a size of either dimension expressing a stock sheet size or a multiple thereof, 24 x 36—50 pounds to 480 sheets.

All size sheets larger than 36 x 48 and all size rolls in a size of either dimension expressing a stock size sheet larger than 36 x 48 or a multiple thereof, 24 x 36—80 pounds to 480 sheets.

B. Miscellaneous grades (containing part sulphate, sulphite, ground wood or a combination of these pulps)—

All size sheets up to and including 36 x 48 and all size rolls in a size of either dimension expressing a stock sheet size or a multiple thereof, 24 x 36—70 pounds to 480 sheets.

All size sheets larger than 36 x 48 and all size rolls in a size of either dimension expressing a stock size sheet larger than 36 x 48 or a multiple thereof, 24 x 36—112 pounds to 480 sheets.

C. Butchers' grades—

Dry-finished, 24 x 36—40 pounds to 480 sheets.

Water-finished, 24 x 36—50 pounds to 480 sheets.

Manila, 24 x 36—60 pounds to 480 sheets.

4. Bogus and screening, mill wraps, pattern, straw, and rag, may be manufactured in the usual sizes and weights, sheets or rolls, in any substance weight not exceeding 24 x 36—175 pounds to 480 sheets.

5. Any order for other than a stock size, i. e., a size not specified above must be for not less than five tons of a size, must be made in a substance weight, must be for one delivery, and must not exceed the maximum substance weight basis established for the grade.

6. Any order for any weight other than a substance weight may be manufactured in quantities not less than 25 tons of one size, one weight, for one delivery, provided such special weight does not exceed the maximum substance weight established for the grade and the size be acceptable to mill.

7. Paper required for converting purposes exclusively are exempt from these regulations, i. e., for envelopes, tablets, drinking cups, bags, etc.

8. The manufacture of colors in any one mill shall be limited to six colors exclusive of white or natural; two shades of any one color shall be considered as two colors.

Regulation No. 25.

BOOK PAPERS.

1. The following are established as the trade customs stock sizes for book papers:

24 x 36	29 x 52	36 x 48
25 x 38	30½ x 41	38 x 50
26 x 29	32 x 44	41 x 61
26 x 40	33 x 46	42 x 56
28 x 42	34 x 44	44 x 56
28 x 44	35 x 45	44 x 64

Rolls may be manufactured in a size of either dimension expressing a stock size, or a multiple thereof.

2. The following are established as substance weights for all grades of book papers containing less than 75 per cent of ground wood: 25 x 38—30, 35, 40, 45, 50, 60, 70, 80, 85, 90, 100, 120, 150 pounds to 500 sheets, subject to the following regulations.

3. In manufacturing, the following maximum substance weights are established for all work not specifically provided for below:

M. F., 25 x 38—50 pounds to 500 sheets.

S. & S. C., 25 x 38—60 pounds to 500 sheets.

English finish, 25 x 38 pounds—60 pounds to 500 sheets.

Eggshell, 25 x 38—60 pounds to 500 sheets.

Offset and drawing, 25 x 38—70 pounds to 500 sheets.

Coated, 1S or 2S, 25 x 38—80 pounds to 500 sheets.

4. For special purposes, any substance weight up to the following maximum weights may be manufactured:

For lithographing, M. F. & S. & S. C., four or more colors, 25 x 38—70 lb. to 500 sheets.

For end sheets, all grades, 25 x 38—90 lb. to 500 sheets.

For maps, all grades, 25 x 38—80 lb. to 500 sheets.

For sheet music, all grades, 25 x 38—85 lb. to 500 sheets.

For music covers, all grades, 25 x 38—90 lb. to 500 sheets.

For music books, all grades, 25 x 38—70 lb. to 500 sheets.

For toy books, all grades, 25 x 38—100 lb. to 500 sheets.

For envelopes or bags for seed, all grades, 25 x 38—80 lb. to 500 sheets.

For hangers, or calendar backs, all grades, 25 x 38—100 lb. to 500 sheets.

Offset for covers and mailing folders, not to be inclosed, and post cards, 25 x 38—120 lb. to 500 sheets.

Coated for covers and post cards, 25 x 38—150 lb. to 500 sheets.

5. Any orders for other than a stock size, i. e., a size not specified above, must be for not less than five tons of a size, must be made in a substance weight, must be for one delivery, and must not exceed the maximum substance weight basis established for the grade and use specified.

6. Orders for any weight in other than a substance weight may be manufactured in quantities of not less than 25 tons of one size, one weight, and for one delivery, provided such special order does not exceed the maximum substance weight basis established for the grade and use specified.

7. All colored book except white, natural, or India tint and all laid and watermarked book paper shall be eliminated, when order is for less than 25 tons, but 25 tons or more may be manufactured, provided it is for one color, one size, one weight, and for one delivery, and provided such special order does not exceed the maximum substance weight basis established for the grade and use specified.

8. Coating mills may order the odd sizes and weights necessary for their finished product, but such finished product must conform to the regulations established for same.

PLANS OF THE GENERAL STAFF TO ENLARGE U. S. ARMY CAMPS

The War Department authorizes the following:

Decision has been reached by the General Staff to effect changes in use, size, and capacity of various training camps. The necessary construction will be begun at once by the construction division.

It has been decided to establish Infantry replacement camps at the following camps: Lee, Pike, Gordon, Grant, and MacArthur. In addition, at each of these points central officers' training schools will be established. The approximate increase in men to be stationed at each camp and the cost of the necessary changes required by the proposed arrangements are as follows:

Camp.	Proposed increase in number of men.	Estimated cost of change.
Lee	9,000	$3,591,600
Gordon	6,000	2,240,000
Pike	11,000	4,884,660
MacArthur	(*)	96,000
Grant	20,000	7,418,055
Taylor	(*)	(*)
Custer	14,000	4,814,820
Sherman	10,000	3,389,197
Dodge	7,000	2,835,210

* Not yet estimated.

Other changes decided upon are to remove the tank training school now located at Gettysburg, Pa., to Raleigh, N. C.

To remove the depot brigade now located at Camp Jackson to Camp Sevier.

To remove the depot brigade now located at Camp Gordon to Camp McClellan.

To remove the Infantry school of arms now located at Fort Sill to Columbus, Ga.

U. S. TROOPS HAVE CUT OFF ST. MIHIEL SALIENT AND CAPTURED 13,000 GERMANS GEN. MARCH ANNOUNCES

MEN IN HIGH SPIRITS

Chief of Staff Tells How Pershing's Men in Two Days Have Regained Territory Held by Enemy for Four Years—Declares America Will Go Through With It.

Press interview by General March, September 14, 1918.

GENTLEMEN: Last Saturday, the last time I spoke to you, the position of the various armies along the front was pointed out; and since that time the British and French have continued their advance on the 40-mile front between Havrincourt Wood and St. Gobain Highlands until they are now nowhere more than 5 miles from the Hindenburg line. Progress has become slower, owing to increasingly heavy artillery fire by the enemy from his line of defense, generally the old Hindenburg line. In Flanders, the Belgians have taken over 6 miles of front, which until recently were held by British troops, and have advanced their line somewhat, near Dixmude, northeast of Ypres. The British on Thursday and Friday improved their position along Le Basse Canal, 6 miles north of Lens.

The American Offensive.

The American movement at St. Mihiel is, of course, freshest in your mind. The old St. Mihiel salient was the first one that was established along the western front in September, 1914, and is the last one to go; the narrowest and most angular of all salients, projecting 12 miles into the French line and having important military bearing because it is across the railway of the Meuse Valley, cutting of Verdun from Commercy and Toul and leaving only one supply line, the one that goes out to the west toward Rheims. This salient was cut off by the American army in less than two days, parts of Thursday and Friday, by quick, sharp blows on both flanks. On the south flank our troops advanced along a 10-mile front between Xivray and Fey en Hays,

(Continued on page 6.)

President Warns Bridgeport Strikers They Must Return to Work at Once Or Be Barred From War Industries

COTTON INDUSTRY STATEMENT AUTHORIZED BY THE PRESIDENT

Plan to Secure the Stabilization of Prices and Distribution Is Outlined.

To avoid misinterpretation of the statements made concering the stabilization of the cotton industry, the President authorizes the following:

The demand for high-grade cotton which is out of proportion to the available supply, and the fact that the Government, through early agreements with the Allies, must act as a common buyer for Allied purchases, make it necessary to secure some basis of distribution of all grades of cotton. Based on the standard grades established by the Department of Agriculture, an effort will be made to provide a way by which the low-grade cotton will be brought to sale and use along with the high-grade cotton at reasonable and just prices.

Protection to All Parties.

It is believed that by this course both the producer and consumer will be better protected than by continuation of the present chaotic conditions of the market.

The plan is to create, subject to the approval of the President, a cotton committee to devise methods for (a) broadening the channels of distribution and use of the great stock of low grades now practically unmarketable, (b) eliminating speculation and hoarding, and (c) apportioning the foreign orders.

May Recommend Fair Price.

It may be part of this committee's duty to recommend basic prices on cotton. If, after investigation, it is found necessary, a fair price will be fixed.

During this investigation and in order to avoid stagnation, a separate committee of three is being set up with authority to buy cotton for the use of the United States Government and the allies, at prices to be approved by the President.

SENDS LETTER TO UNION

Machinists Told They Will Also Lose Any Draft Exemption Privileges They Hold on Account of Being Essential Workers—Statement on the Taking Over By U. S. of the Smith and Wesson Plant.

The President authorizes publication of the following letter to District Lodge No. 55, International Association of Machinists, and other striking workmen of Bridgeport, Conn.:

THE WHITE HOUSE,
Washington, September 13, 1918.

Gentlemen:

I am in receipt of your resolutions of September 6 announcing that you have begun a strike against your employers in Bridgeport, Conn. You are members of the Bridgeport branches of the International Union of Machinists. As such, and with the approval of the national officers of your union, you signed an agreement to submit the questions as to the terms of your employment to the National War Labor Board, and to abide the award, which in accordance with the rules of procedure approved by me, might be made.

The members of the board were not able to reach a unanimous conclusion on all the issues presented, and as provided in its constitution, the questions upon which they did not agree were carried before an arbitrator, the unanimous choice of the members of the board.

The arbitrator thus chosen has made an award which more than 90 per cent of the workers affected accept. You who constitute less than 10 per cent refuse to abide the award, although you are the best paid of the whole body of workers affected, and are, therefore, least entitled to press a further increase of wages because of the high cost of living. But, whatever the merits of the issue, it is closed by the award. Your strike against it is a breach of faith calculated to reflect on the sincerity of national organized labor in proclaiming its acceptance of the principles and machinery of the National War Labor Board.

If such disregard of the solemn adjudication of a tribunal to which both parties submitted their claims be temporized with, agreements become mere

scraps of paper. If errors creep into awards, the proper remedy is submission to the award with an application for rehearing to the tribunal. But to strike against the award is disloyalty and dishonor.

The Smith & Wesson Company, of Springfield, Mass., engaged in Government work, has refused to accept the mediation of the National War Labor Board and has flaunted its rules of decision approved by Presidential proclamation. With my consent the War Department has taken over the plant and business of the company to secure continuity in production and to prevent industrial disturbance.

It is of the highest importance to secure compliance with reasonable rules and procedure for the settlement of industrial disputes. Having exercised a drastic remedy with recalcitrant employers, it is my duty to use means equally well adapted to the end with lawless and faithless employes.

Therefore, I desire that you return to work and abide by the award. If you refuse, each of you will be barred from employment in any war industry in the community in which the strike occurs for a period of one year. During that time the United States Employment Service will decline to obtain employment for you in any war industry elsewhere in the United States, as well as under the War and Navy Departments, the Shipping Board, the Railroad Administration, and all other Government agencies, and the draft boards will be instructed to reject any claim of exemption based on your alleged usefulness on war production.

Sincerely yours,

WOODROW WILSON.

District Lodge No. 55, International Association of Machinists, and other striking workmen of Bridgeport, Conn., 1087 Broad St., Bridgeport, Conn.

The Smith & Wesson Plant.

With reference to the announcement by the President that he has approved the taking over of the plant and business of the Smith & Wesson Co., of Springfield, Mass., the following statement is authorized by the War Department:

The plant of the Smith & Wesson Co., at Springfield, Mass., manufacturing pistols for the War Department, has commandeered under section 120 of the national defense act, for the duration of the war and an officer of the Ordnance Department has been placed in charge of further operation of this industry.

This action was made necessary by the refusal of the Smith & Wesson Co. to abide by the award of the National War Labor Board, rendered August 22, 1918. This is the only instance of a manufacturer under contract with the War Department arbitrarily rejecting an award by the agency set up by the President for the maintenance of industrial peace during the war.

The War Labor Board's finding in the Smith & Wesson case was made upon a recommendation by Joint Chairman Frank P. Walsh and Frederick N. Judson, acting joint chairman in the absence of Mr. Taft. The Walsh-Judson report recommended that the company discontinue, for the period of the war, its practice of compelling employees to sign individual contracts, one clause of which bound the employees not to join a trade-union; that the right to join trade-unions be extended to the workers, and that a system of collective bargaining be established in the Smith & Wesson plant. Under the operation of such a system the workers elect shop committees to represent them in negotiations with the employer on all questions of industrial relations. The demand of the workers for a 25 per cent increase in pay was not conceded in the recommendation, it being stated that the question of wages could best be worked out through the operation of the collective-bargaining system. These recommendations were duly approved by the War Labor Board, and it became the duty of the Smith & Wesson Co., as well as its employees, to comply. The workers have indicated their willingness to do so, but the company demurred on the ground that it had not agreed to submit any of its legal rights to the War Labor Board for determination and that to comply with the award would be to abandon methods upon which it had built its business to a high state of efficiency. Further, in its letter rejecting the War Labor Board's findings, it said:

"The Smith & Wesson Co. sees no reason why it should abandon its lawful and legitimate method of doing business known and proved by it to be conducive to industrial peace and high efficiency for the fantastic method outlined by the War Labor Board in its recommendations for dealing with its employees."

Strike at the Plant.

A strike at the Smith & Wesson plant involving demands for collective bargaining, the right to join trade unions and the elimination of the individual contract, were the direct cause of government intervention in the controversy between the company and its employees.

The language employed by the company in the foregoing pargraph was held to be calculated to induce other employers to avoid the jurisdiction of the War Labor Board and to defeat the object of the President in its creation, and the company's general attitude toward the reasonable findings of the board was

(Continued on page 5.)

RULES FOR REGISTRATION OF BRITISH SUBJECTS AND CANADIANS LIVING IN U. S.

ORDERS SENT BOARDS

Terms of Treaty to Be Followed in Permitting Certain Registrants to Join Military Service of Their Own Country—Allowed Until Oct. 12 to Make Choice—Men 20 to 44 Included.

The War Department authorizes the following from the office of the Provost Marshal General:

Subjects of Great Britain, including Canadians, between the ages of 20 and 44, both inclusive, who registered September 12, will be given until October 12, 1918, to join the military forces of Great Britain under the terms of the reciprocal treaties between the United States and Great Britain and Canada.

Telegram of Instructions.

The following telegram of instructions was sent out to all State draft officials last night by the Provost Marshal General:

"Communicate the following instructions to all local boards of your State. Examine the registration cards of all persons who registered on September 12, 1918, and place in a separate file the cards of all British subjects, including Canadians, whether nondeclarants or declarants, who were on September 12, 1918, between 20 and 44 years of age, both inclusive.

"In order to comply with Article Two of the treaties between this country and Great Britain and Canada, the involuntary induction of any such person shall be suspended until and including October 12, 1918.

"The registration cards of all British subjects, including Canadians, between 20 and 44 years of age, both inclusive, at the time of registration, who register after September 12, 1918, in pursuance of the President's proclamation of August 31, 1918, shall be placed in a separate file as received and the involuntary induction of any such person shall be suspended in accordance with article two of said treaties for the period of 30 days after the respective dates of registration.

Mailing of Questionnaires.

"When instructions are given to mail questionnaires, no questionnaires shall be mailed to British subjects, including Canadians, whose involuntary induction is suspended as above directed until the expiration of the time within which any such person may be involuntarily inducted into military service.

"British subjects, including Canadians, who were 18 or 19, or were 45 years of age on September 12, 1918, or at the time of registration, if they register after September 12, 1918, are not covered by the terms of the treaties between the United States and Great Britain and Canada.

"Such persons can only be involuntarily inducted into the military service of the United States, provided they are declarants, that is, have taken out their first papers in this country. If they are declarants they do not enjoy the privilege of enlisting or enrolling or leaving the United States for the purpose of enlisting or enrolling in the military forces of their own country."

Reasons for Certain Ages.

Col. Charles B. Warren, senior officer under General Crowder, explained that the reason why 18 and 19 year old registrants and 45 year old registrants occupy a different status than those between 20 and 44, is that the treaties between the United States and Great Britain and Canada arbitrarily fixed the ages at 20 to 44, both inclusive, for military service in this country of British subjects.

HOUSING CORPORATION POLICY WITH REGARD TO LOCAL NEEDS DEFINED BY BOARD PRESIDENT

COMMUNITIES SHOULD RENDER AID

Cities Profiting by War Work Must Exhaust Their Own Building Resources Before U. S. Will Give Assistance.

The Department of Labor authorizes the following:

Otto M. Eidlitz, president, has issued the following statement relative to the policy of the United States Housing Corporation:

The desire of the Government that all building not required for essential war purposes should be suspended during the period of the war, except in the rare cases where a new building is indispensable to the health and protection of our civil population, was made clear to the public by the War Industries Board as long ago as last March. That policy remains unchanged.

With forced expansion of many industries to meet the demands made upon them by war necessities, and the consequent concentration of large numbers of newly recruited employees, a serious shortage of houses for workers exists in particular industrial centers, and the proper housing of those workers is an important war need.

State and Local Help.

The United States Housing Corporation, created to study and ameliorate such conditions, believes that State and local bodies can contribute in many ways the help sorely needed. We ask publicity in order to remove certain misunderstandings which have developed as to the exact function of this corporation. Many communities have the impression that an unlimited national fund for housing has been voted. Some even imagine that this fund will be apportioned without a critical scrutiny of conditions in the locality seeking aid, and without consideration of alternatives. That is a misconception.

The Federal Government will build houses for war workers only as a measure of final relief. Not until every community concerned has exhausted its own resources should national aid be sought or will it be granted.

The need of the Government for materials, transportation, and especially for man power is incompatible with the normal amount of new construction both in regions where war work is being done and elsewhere. This general condition should be taken into account where the need of housing has become urgent, and appeals be made that citizens, whatever their prior customs, open their houses to boarders, except where there are adolescent children. Patriotism demands this with other sacrifices. Furthermore, all available buildings should be converted to provide reasonable housing facilities for war workers.

In this connection it should be urged that communities which have profited by war orders may also well spend some of their new earnings upon homes for working people. Again, transportation should be improved where by so doing workers in outlying towns can be brought to the industries in the localities affected by a housing shortage.

Furthermore, the United States Housing Corporation will not expend Government funds to build war houses except upon the request of that Department of the Government which is interested in the products manufactured in the community in question. Where a community with war contracts complains of a housing famine, but has made no effort itself to remedy the situation, further Government contracts will assuredly be withheld.

The United States Housing Corporation will not be in a position to lend financial assistance to private enterprises. It is, however, deeply interested in and wishes to encourage any undertakings calculated to relieve the housing situation for workers in essential industries where the need for such relief is urgent; where the cost to the workmen for such houses, either on a rental or selling basis, is well within their means, and where the character of the housing proposal measured up to the standards established by this corporation.

Approval of Projects.

To this end, a policy has been formulated, under which the United States Housing Corporation, after a careful investigation of the merits of each case, will undertake to obtain official approval of a project and thereby secure for it the benefits of priority orders, should they be required, clearance and transportation of materials and such other assistance as it is deemed proper and expedient to render, to assure the prompt completion of the work.

To secure the approval of this corporation it will be necessary for a concern or individual to make independent arrangements for the complete financing of a housing project and agree in the carrying out of the undertaking to comply with such stipulations as this corporation will impose. Should the above outlined policy suggest to private interests a basis of cooperation, whereby the urgent need of housing for workers in essential war industries can be met, the United States Housing Corporation will give thorough consideration to proposals. All correspondence or requests for personal interviews should be directed to the United States Housing Corporation, 613 G Street, NW., Washington, D. C.

Complete Returns of August 24 Registry Shows 157,963 Men of 21 Answered Call

The War Department authorizes the following from the office of the Provost Marshal General:

Complete tabulated returns are now available for the registration on August 24 of all young men who had reached the age of 21 years since June 5, 1918.

The complete tabulation shows that the actual registration on that day of 157,963 was just 48 less than the total number estimated for the entire country.

Basis of Estimates.

The estimates were projected on the basis of 79/365 of the registration in each State on June 5, 1918, when all those were required to register who had reached their twenty-first birthday since June 5, 1917; the figure 79 in the above fraction representing the number of days between June 5, 1918, and August 24, 1918, and 365 the number of days between June 5, 1918, and June 5, 1917.

The actual registration by States on August 24, in comparison with the advance estimates, follows:

REGISTRATION OF AUGUST 24, 1918.

United States.	Advance estimate.	Reported registration.
Alabama	3,395	3,914
Arizona	391	335
Arkansas	2,824	2,797
California	3,768	3,923
Colorado	1,343	1,357
Connecticut	2,238	2,205
Delaware	387	416
District of Columbia	555	610
Florida	1,249	1,254
Georgia	3,048	3,[illegible]
Idaho	643	685
Illinois	9,545	9,506
Indiana	4,265	4,140
Iowa	3,812	3,737
Kansas	2,691	2,646
Kentucky	3,880	3,773
Louisiana	3,040	2,699
Maine	1,100	1,106
Maryland	2,209	2,188
Massachusetts	5,310	5,269
Michigan	5,454	5,178
Minnesota	3,969	3,747
Mississippi	2,543	2,660
Missouri	5,540	5,341
Montana	922	870

Wyoming	325	2[illegible]
Alaska	------	------
Hawaii	------	------
Porto Rico	------	------
Total	158,011	157,963

Forty-eight men less than estimated.

Gen. Crowder's Birthday Greeting to Pershing

Maj. Gen. E. H. Crowder, Provost Marshal General, has sent to Gen. Pershing, on the occasion of the latter's birthday, the followings message:

"The Nation responded yesterday (Sept. 12) with an enrollment which promises to exceed all estimates, thus assuring an uninterrupted flow of man power to the army under your command."

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor.*

RATES BY MAIL.

Daily	One year	$5.00
	Six months	3.00
	One year, postage prepaid to foreign countries	8.00
	Six months, postage prepaid to foreign countries	4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

Secretary Lane Would Admit Women to Trade Schools in New York City

Secretary of the Interior Lane wrote the following letter Friday to the school authorities of New York City as to the question of whether women should be admitted to trades schools heretofore maintained for men:

"As the war continues and as men are called in larger numbers for active military service and for service in the industries connected directly with the war, the demand for women to take the places of men in skilled trades and to do work requiring special preparation will continue to increase. Most women have not had the preparation necessary to enable them to fill these positions and do this work, and most of them must get it in the night schools or in other schools especially organized for this kind of instruction. To organize, equip, and maintain separate schools for women would entail much unnecessary expense. It would therefore seem wise for the City of New York and all other cities in which there is considerable demand for women for such work to admit women to the classes which have been maintained for men in the several trades and occupations. This is only an extension of the plan of coeducation which has generally been adopted throughout the country and which has usually been satisfactory."

American Official Communiques on Operations of U. S. Forces

The following is authorized by the War Department.

American Official Communique No. 120—Continued.

HEADQUARTERS AMERICAN EXPEDITIONARY FORCES,
September 11.

SECTION B.

The Commander in Chief has awarded the distinguished service cross posthumously to the following officers and men of the A. E. F. for acts of gallantry set forth after their names:

Second Lieut. WILLIAM P. HYMAND, Infantry. "For extraordinary heroism in action at Seringes et Nesles, France, on July 29, 1918. After the capture of Seringes et Nesles by the organization of which he was a part, and while holding a portion of the town with his platoon, he found that one of his men was missing. Being told that the man was wounded and lying beyond a hedge at the edge of the village, he unselfishly attempted to locate him, was caught in direct machine-gun fire and killed."

Corpl. JOHN CONNERS, Infantry. "On the river bank, near Chateau-Thierry, France, July 15, 1918, he commanded a squad that kept two machine guns in operation to prevent Germans landing until all in the group were killed. He was the last to fall, being shot as he was in the act of throwing a hand grenade into a boat filled with enemy."

Corpl. JAMES R. PATTEN, Infantry. "He was an example to the men of his platoon when they were under fire for the first time, near Condene, Brie, France, July 17, 1918. He continually circulated among his men, encouraging and cautioning them. Mortally wounded by shrapnel, he refused to be evacuated, but stayed with his platoon until he died, with a last word of encouragement on his lips."

Pvt. JAY LER ANTES, Medical Dept., Infantry. "He fearlessly exposed himself to barrage and machine-gun fire at Cantigny, France, on May 28-29, 1918, to perform his duty as a stretcher bearer. In order that the suffering of wounded might be relieved and lives saved, with unselfish heroism he left the security of the trench to go to wounded in a machine-gun emplacement and while performing this noble duty was killed."

Pvt. RAYMOND BARNES, M. G. Bn. "On July 18, 1918, near Bersey Le Sec, France, he was mortally wounded by a shell, but as soon as he regained consciousness he went forward, rejoined his squadron and fought with it until ordered to an aid station by his platoon commander."

Pvt. WM. J. BERGEN, Infantry. "For extraordinary heroism in action near Villers Sur Fere, France, July 28, 1918. On duty as a litter bearer, he was killed while going into heavy machine-gun and shell fire to rescue the wounded. He had worked tirelessly and fearlessly throughout the attack on the enemy north of the River Ourcq."

Pvt. J. W. SHUMATE, Infantry. "After his platoon was practically wiped out and had been withdrawn near Chateau-Thierry, France, on June 6, 1918, he continued forward to his objective and remained throughout the night under heavy fire in hope of keeping the ground gained until reinforcements came up and was later killed in action on June 14."

The War Department authorizes the publication of the emergency addresses of foregoing officers and men:

Second Lt. William P. Hyman, 166th Inf., Co. F., L. T. Hyman, father, Iowa Falls, Iowa.

Corpl. John Conners, 302 Inf., Co. M., Mrs. Timothy Connors, mother, 121 Liberty St., Rockland, Mass.

Pvt. Jay Ler Antes, Med. Dept., Inf., no record.

Corpl. James R. Patten, Infantry. No James R. Patten on record. There is a Corpl. James R. Patton, 337th Inf., Co. I, William A. Patton, father, 312 Center St., Hancock, Mich. Also Corpl. James R. Patton, 111th Inf., Co. E, James J. Patton, father, 4810 Florence Ave., Philadelphia, Pa.

Pvt. Raymond Barnes, M. G. Bn., Co. B, 2 Brig., M. G. Bn., Greene M. Barnes, father, R. F. D. No. 5, Taylorsville, N. C.

Pvt. Wm. J. Bergen, Inf., 165th Inf., Co. K, Mrs. Wm. J. Bergen, wife, 2472 Marion Ave., New York, N. Y.

Pvt. J. W. Shumate, Inf., 23d Inf., Co. M, John S. Shumate, father, South Charleston, W. Va.

American Official Communique No. 122.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 13.

Section A.—In the St. Mihiel sector we have achieved further successes. The junction of our troops advancing from the south of the sector with those advancing from the west has given us possession of the whole salient to points twelve miles northeast of St. Mihiel and has resulted in the capture of many prisoners.

Forced back by our steady advance, the enemy is retiring and is destroying large quantities of material as he goes. The number of prisoners counted has risen to 13,300. Our line now includes Herbeuville-Thillet - Hattonville - St. Benoit-Xammes - Jaulny - Thiaucourt, and Vieville.

SEALED PROPOSALS.

Office Quartermaster General, 109 East Sixteenth Street, New York City, N. Y. Sealed proposals, in triplicate, will be received at this office until 12 o'clock, noon, September 24, 1918, for furnishing Vegetable Ivory Jerkin Buttons and Wood Tent Poles. Information on application at this office.

WORK OF CONGRESS BRIEFLY TOLD

SENATE.

The Senate yesterday passed the House bill to establish a minimum wage board and create the necessary machinery for fixing the minimum wage of women and minors in the District of Columbia. The Senate also adopted a resolution introduced by Senator Calder, of New York, asking the War Industries Board to inform the Senate concerning its orders and the law granting it the authority under which it requires permits to be granted by State Councils of National Defense for all building operations that do not pertain to the prosecution of the war.

Senator Smoot, of Utah, introduced a resolution conferring a gold medal and the thanks of Congress upon John M. Browning, of Ogden, Utah, inventor of the Browning machine gun with which the United States Army is being equipped.

Conferees on the oil land leasing bill who are deadlocked over the differences between the two houses, have invited Secretaries Daniel and Lane and Attorney General Gregory to meet with them and aid in settling the differences. The Senate also adopted a resolution calling upon the Bureau of Mines to report what effect upon oil production the pasage of the bill now in controversy will have.

The effect of the pending war revenue bill upon life insurance companies was discussed at length with the Finance Committee yesterday by Job E. Hedges, of New York. Under certain provisions of the measure, he insisted, the companies would be compelled to dissipate each year's entire surplus. As proposed in the pending bill Mr. Hedges said the normal income tax differential would put a premium upon the distribution of the surplus by reducing from 18 to 12 per cent the tax upon distributed incomes of corporations generally. This he said would be detrimental to the interests of policy holders and after giving his reasons at length Mr. Hedges urged that the bill be amended so as to give life insurance companies also the benefit of the 12 per cent rate. He suggested that this could be accomplished by applying the lower rate to as much of the companies' net income as they should invest in forthcoming Liberty bonds. Before the same committee Judge J. Harry Covington, representing the National-Petroleum War Service Committee, asserted that the country is facing a crisis in oil production which threatens seriously its war program. He recommended the appointment of a commission to study the petroleum situation for the purpose of reaching a solution of the problem. Unless some method is devised to encourage development of oil lands a marked shortage is certain to result. As a substitute for the war excess profits on oil lands he suggested a tax of 20 per cent on actual sales which, he argued would permit the explorer and developer to reap a fair return.

HOUSE.

By vote of 149 to 0 the House last evening passed the bill to facilitate the sale of the Fourth Liberty Loan bond issue, by exempting from income surtaxes all individual holdings up to $30,000. The entire day was devoted to its consideration with the result that the war revenue bill was not taken up and general debate on that measure was not concluded until to-day. Some opposition developed in the course of the debate to that provision of the bill giving the President power to "investigate, regulate or prohibit transactions in bonds or certificates of indebtedness." Replying to the supporters of a motion to strike this proviso from the bill, Chairman Kitchin told the House there are syndicates in certain parts of the United States that are trying to buy up Liberty bonds of all issues for the purpose of unloading them on the market, even at less than was paid for them, for the purpose of forcing down the price of the bonds and compel the Government to increase the interest rate on all its bonds to 5, 6, or even 7 per cent. He stated that the transactions of this syndicate were known to the Treasury Department, and it was for the purpose of curbing them that the change in the law was asked.

U. S. CHEMISTS SUPPLYING DYES FORMERLY MADE IN GERMANY

The remarkable success of the American chemists and chemical manufacturers in developing the dyestuffs industry, when the supplies of dyes from Germany were cut off, is strikingly shown in a report just issued by the United States Tariff Commission, entitled "Census of Dyes and Coal-Tar Chemicals, 1917."

Firms Here in 1917.

At the outbreak of the European war, Germany dominated the world's trade in dyes and drugs derived from coal tar. Before the war, seven American firms manufactured dyes from imported German materials. In 1917, 190 American concerns were engaged in the manufacture of dyes, drugs, and other chemicals derived from coal tar, and of this number, 81 firms produced coal-tar dyes from American materials which were approximately equivalent in total weight to the annual imports before the war. The total output of the 190 firms, exclusive of those engaged in the manufacture of explosives and synthetic resins, was over 54,000,000 pounds with a value of about 69 million dollars.

Large amounts of the staple dyes for which there is a great demand are now being manufactured in the United States. A few of the important dyes, such as the vat dyes derived from alizarin, anthracene, and carbazol, are still not made. The needs of the wool industry are being more satisfactorily met than the needs of the cotton industry.

The report gives in detail the names of the manufacturers of each dye or other product and the quantity and value of each produced, except in cases where the number of producers is so small that the operations of individual firms would be disclosed. Seventeen hundred and thirty-three chemists or engineers were engaged in research and chemical control of this new industry, or 8.8 per cent of the total of 19,643 employees. The report also contains an interesting account of the history and development of the industry since the outbreak of the European war.

SELLING OF ADVERTISEMENTS WITH A REBATE IS PROHIBITED

War Industries Board Order Intended to Stop Paper Loss by "Forced" Circulation.

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

Because advertising agents and agencies profess confusion through lack of understanding of the regulation authorized by the War Industries Board that there must be discontinuance of the practice of selling advertisements in newspapers and periodicals with a guarantee of circulation and a rebate should the circulation fall short of the guarantee Thomas E. Donneley, chief of the pulp and paper section of the War Industries Board, issues this explanatory statement:

Purpose of Ruling Explained.

To advertising agents and agencies:

There has been considerable misunderstanding concerning the following ruling to all newspapers and periodicals:

"Discontinue selling advertising with a guarantee of circulation requiring a rebate if circulation falls below guaranteed amount."

The purpose of this ruling is to prevent the printing of copies of newspapers and periodicals which are not called for by the legitimate circulation, but are printed by the publisher and circulated by forced means in order to make good the guarantee and save this rebate. Such circulation is, of course, a waste of paper and during the war must be stopped.

Statements of Past Circulation.

There is nothing in our regulations which prevents the publisher from making a sworn statement of past circulation, but hereafter publishers can not guarantee future circulation. Advertisers must buy their advertisement upon the reputation of the newspaper or periodical and their belief that the circulation is a bona fide one and will be maintained. This is a positive order and must not be evaded.

PRESIDENT WARNS STRIKERS TO RETURN TO WORK AT ONCE

(Continued from page 2.)

deemed such as might be expected to disturb industry and to interfere with production.

The recommendations contained in the War Labor Board's finding are in thorough accord with the principles and policies to govern industrial relations for the period of the war promulgated by the President and made the constitution of the War Labor Board. These principles and policies were adopted by duly selected representatives of organized employers and workers of the United States. It is the policy of the War Department to give effect to the decisions of the War Labor Board in all cases coming under the jurisdiction of the Department.

GENERAL MARCH TELLS OF AMERICAN VICTORY GAINED BY PERSHING'S MEN AROUND ST. MIHIEL

(Continued from page 1.)

up through the undulating plain of the Woevre. On the west flank on an 8-mile front they advanced across the heights of the Meuse, a ridge which is 6 miles wide and broken by deep, branching ravines. By the evening of the first day the south flank had been driven in 5 miles and the north flank 3 miles. By evening of the second day (Friday) the salient had been wiped out. Gen. Pershing's communiques which have been published in the OFFICIAL U. S. BULLETIN and the newspapers, indicate over 13,000 prisoners. The removal of the salient shortens the line 22 miles, restores rail communication between Verdun and St. Mihiel and Toul, and gives very much better base for future offensive operations than existed before this drive began. It is to be noted that the German communique says that they withdrew quietly from this sector in accordance with a carefully arranged plan, but this does not cover the 13,300 men they left behind. They constitute the combatant strength of an entire German division.

Gen. Pershing's Staff.

The first American Army which is organized under Gen. Pershing's personal command did not take with it Gen. Pershing's personal staff. They remained at the General Headquarters, American Expeditionary Force.

The staff of the First American Army is as follows:

Chief of Staff, Lt. Col. Hugh A. Drum, who has five assistant chiefs of staff, Lt. Col. Jens Bugge, Lt. Col. Willey Howell, Col. Robert McCleave, Lt. Col. John L. DeWitt, Lt. Col. Lewis H. Watkins.

Chief of Artillery, Maj. Gen. Edward F. McGlachlin.

Following are heads of the administrative and technical services—Adjutant General, Col. Joseph F. Barnes; Inspector General, Col. Jacob C. Johnson; Judge Advocate, Lt. Col. Blanton Winship; Chief Quartermaster, Maj. George Luberoff; Chief Surgeon, Col. Alexander N. Stark; Chief Engineer, Brig. Gen. J. J. Morrow; Chief Signal Officer, Lt. Col. Parker Hitt; Chief Ordnance Officer, Col. Edward P. O'Hern; Chief of Motor Transport Corps, Col. Wm. H. Winters; Chief of Air Service, Col. William Mitchell.

Chiefs of Chemical Warfare Service and additional administrative and technical services have not been designated at the time this information arrived. This staff is the staff that is handling this movement under Gen. Pershing.

"America Going Through With It."

In connection with the military program, there has appeared in the public press an intimation that there is some talk that America isn't going through with this war. That, of course, is preposterous in its falsity at a time when we are asking the Congress to give us an increase in the age limit which will carry every available man "over there," and are upon the point of asking for over seven billion dollars more for the military program this year. And with everything moving at the highest speed, it is inconceivable that any such propaganda can be considered seriously by anybody. America is going through with it.

The increased program calls for increased effort in France, increased port facilities, etc., and I have here a cablegram which indicates the way things are going over there in that respect:

> "This afternoon 35,000 men came ashore at one of our base ports and 11,000 more will be off before noon to-morrow. Fifteen ships came in at 10 o'clock this morning, out of which 12 were unloaded and will be ready to return to-morrow before noon."

The system is so well organized that these great masses of troops are handled and the ships returned in this very short time.

Praise for Forty-second Division.

I have received from France a copy of an order issued by Gen. Naulin, commanding the 21st French Army Corps, referring to our 42d Division, which has always done good work. We have heretofore published other commendations of that division and this is the last one received:

> "At the moment when the 42d American Division is on the point of leaving the 21st Army Corps, I desire to express my keen satisfaction and my sincere thanks for the services which it has rendered under all conditions.
>
> "By its valor, ardor, and its spirit it has very particularly distinguished itself on July 15 and 16 in the course of the great battle where the 4th Army broke the German offensive on the Champagne front.
>
> "I am proud to have had it under my orders during this period. My prayers accompany it in the great struggle engaged in for the liberty of the world.
>
> "(Signed) NAULIN."

All reports from the fighting sections in France indicate the same high spirit, the lack of pessimism which has always characterized our troops in France, and everyone gets into the swing of it the minute he gets there. The quickness and rapidity with which they handled the fight at St. Mihiel is attributed not only to the fine staff work which brought it off, but the individual soldier himself. It is hot stuff.

Questions and Answers.

Q. Reports from the Military Affairs Committee to the effect that 90 per cent of the American force was being assembled in one place by Gen. Pershing. Gen. March in one of his interviews made the statement that 90 per cent of the Americans were in American sectors. Will Gen. March let us have the facts?

A. The facts are that the 90 per cent of the American Army to which I referred embraces both combatant and noncombatant troops. It referred to the American Army which is on the firing line, and the American Army which is serving that Army with ammunition and supplies. It means that they were not in British sectors or in French sectors. It does not mean that over a million men were established at one point. At no time has that been stated by me to the Senate Military Affairs Committee or to anybody else.

Q. Location of the 29th Division?

A. Last reported on line in the Vosges.

Q. Can anything be told of the location and recent activities of the 77th, 42d, and 27th Divisions?

A. Seventy-seventh in the advance from the Vesle to the Aisne; 42d not reported since relieved during advance on the Vesle August 2; 27th on line in Flanders.

Q. What American divisions are in the fighting between Rheims and north of Soissons?

A. Recently reported 32d, 77th, and 28th.

Q. Who are in command of the following divisions?

A. First, Maj. Gen. Charles P. Summerall; 2d, Maj. Gen. John E. Lejeune (Marine Corps); 30th, Maj. Gen. Edward M. Lewis; 35th, Maj. Gen. Peter E. Traub; 41st, Brig. Gen. William S. Scott; 77th, Brig. Gen. Evan M. Johnson, as far as is known.

Q. Has Gen. Greble been retired?

A. Yes; he has.

Q. Has the 40th Division reached France?

A. The 40th Division has landed; part of it is in England.

The next question has to do with personnel of the American forces in Russia. I am not going to give that out yet.

Monument in Paris To Women of America By Women of France

The Red Cross issues the following:

A committee, in which the wife of Marshal Joffre, the Duchess d'Uzes, Mme. J. Siegfried, and the presidents of the three Red Cross societies, Madame Carnot, Countess d'Haussonville, and Madame Perouse, are prominent figures, has received a subscription for the purpose of erecting a monument in honor of the women of the United States. Their statement follows:

> **"We, women of France, knowing that we can never adequately express our gratitude toward the women of the United States for their generosity and devotion in their ceaseless giving, desire to see raised in a prominent place in Paris a commemorative monument, so that future generations may always keep in mind this beautiful sisterhood that forms an imperishable bond between us."**

P. O. DEPARTMENT SUPPLIES.

The purchasing agent of the Post Office Department, Washington, D. C., will receive proposals until 2 o'clock p. m. September 23, 1918, for furnishing three hundred 1-gallon oblong plain tin cans, fitted with 1¼-inch cork-lined screw cap and wire ring handle, each can in sawed lumber box, ends ⅝ inch, sides, top, and bottom ⅜ inch, and fifty 5-gallon cans similar to above, and until 2 o'clock p. m. September 30, 1918, proposals for furnishing 76000 time cards for street letter boxes.

RED CROSS HOME SERVICE

Information for Soldiers' and Sailors' Families, Issued by Department of Civilian Relief.

Compensation and Insurance for Disabled Man.

If an enlisted man is discharged from the service for disability incurred in the line of duty, he or anyone on his behalf should write to the Bureau of War-Risk Insurance, Attention of Compensation and Insurance Claims Section, and ask to be furnished with the prescribed forms upon which to file claims for compensation and insurance, with instructions for their execution. The letter should be as follows:

Pvt. John Howard Smith. Serial No. 85634. Formerly of Company L, 125th Infantry, American Expeditionary Forces.

BUREAU OF WAR-RISK INSURANCE,
ATTENTION OF COMPENSATION AND INSURANCE CLAIMS SECTION,
TREASURY DEPARTMENT,
Washington, D. C.

GENTLEMEN: I, the above-named enlisted man, was discharged from the service on June 15, 1918, for disability due to tuberculosis incurred in line of duty. I have a wife, Elizabeth Brown Smith, and two children, John Howard Smith, jr., 10 years old, and Elizabeth Smith, 5 years old, all of whom are living with me at 84 Pine Street, Rockford, Ill.

I have also a mother and father, Joseph Walter Smith and Mary Hunter Smith, 132 Willow Street, Rockford, Ill., who have been dependent upon me to the extent of $10 per week jointly for the last three years.

Please furnish the necessary forms upon which to file claims for compensation and insurance.

Very truly, yours,
JOHN HOWARD SMITH,
84 Pine Street, Rockford, Ill.

Notice of Death of Beneficiary of Compensation or Insurance.

If a person dies who is receiving compensation or insurance payments under the war-risk insurance law, a member of the family or other appropriate person should promptly notify the Bureau of War-Risk Insurance, Attention of Compensation and Insurance Claims Section, as follows:

Compensation claim No. 345. Private John Howard Smith, deceased, April 12, 1918. Serial No. 85,634. Formerly of Co. L, 125th Infantry, American Expeditionary Force.

BUREAU OF WAR RISK INSURANCE,
ATTENTION OF COMPENSATION AND INSURANCE CLAIMS SECTION,
TREASURY DEPARTMENT,
Washington, D. C.

GENTLEMEN:

On August 31, 1918, Mrs. Elizabeth Brown Smith, widow of the above-named enlisted man, who was receiving from the Bureau of War Risk Insurance compensation and insurance payments on account of his death, died at her home, 84 Pine Street, Rockford, Ill.

Very truly, yours,
KATE HIGGINS SMITH,
132 Willow Street, Rockford, Ill.

Notice of Change of Address of Beneficiary of Compensation or Insurance.

If the person who has been receiving compensation or insurance payments under the war-risk insurance law moves to a new address, such person should promptly notify the Bureau of War-Risk Insurance, Attention of Compensation and Insurance Claims Section, as follows:

Compensation claim No. 345. Private John Howard Smith, deceased, April 12, 1918. Serial No 85,634. Formerly of Co. L, 125th Infantry, American Expeditionary Force.

BUREAU OF WAR RISK INSURANCE,
ATTENTION OF COMPENSATION AND INSURANCE CLAIMS SECTION,
TREASURY DEPARTMENT,
Washington, D. C.

GENTLEMEN:

As the widow of the above-named enlisted man I am receiving compensation and insurance payments from your office and have been receiving checks addressed to 132 Willow Street, Rockford, Ill. Please take notice that I have now moved to 84 Pine Street, Rockford, Ill., and that checks should now be sent to this address.

Very truly, yours,
ELIZABETH BROWN SMITH,
(Mrs. JOHN HOWARD SMITH),
84 Pine Street, Rockford, Ill.

Nonreceipt of Allotments and Allowances from War Risk Bureau.

Letters should not be written to the Bureau of War-Risk Insurance inquiring in reference to delayed allotments and allowances until two months have elapsed since the man entered the service. If no reply is received to this original inquiry, which should be sent directly to the Bureau of War-Risk Insurance and should be signed by a relative, within 30 days after its transmission, or, in other words, within 90 days after the man has entered the service, home service sections should prosecute an inquiry through Red Cross channels. Such a letter should be written only by a class A relative or by a class B relative to whom an allotment carrying an allowance has been made. Class B relatives should not write unless they are dependent upon the enlisted man and have received definite word that he has made an allotment in their favor through the Bureau of War-Risk Insurance. The letter, whether written by a class A or class B relatives, should be as follows:

Private John Howard Smith. Serial No. 85634. Co. L., 125th Field Artillery, Camp Gordon, Atlanta, Ga. Age, 26 years. Entered service October 20, 1917.

BUREAU OF WAR-RISK INSURANCE,
ATTENTION OF ALLOTMENT AND ALLOWANCE SECTION,
TREASURY DEPARTMENT,
Washington, D. C.

GENTLEMEN:

My son, the above-named enlisted man, has now been in the service for more than 60 days and I have not receive the allotment and allowance due me under the war-risk insurance law, although he has informed me that he made an allotment in my favor and requested an allowance. I am solely dependent upon him for support. Please inform me when I may expect payment.

Very truly, yours,
MARY HUNTER SMITH
(Mrs. Joseph Walter Smith),
132 Willow Street, Rockford, Ill.

Claims for Exemption from Compulsory Allotment.

If a wife or child (i. e., a class A relative) makes inquiry as to the reason for the nonreceipt of any allotment or allowance, and an answer is received from the Bureau of War Risk Insurance that the enlisted man has claimed exemption from compulsory allotment, the relative should receive a communication from the legal section of the Bureau of War Risk Insurance giving an opportunity to combat the claim for exemption. If no such communication is received, the relative should write to the legal section of the Bureau of War Risk Insurance as follows:

Private John Howard Smith. Serial No. 85634. Co. L, 125th Infantry, Expeditionary Force. Age, 26 years. Entered service October 20, 1917. Allotment No. 346870.

BUREAU OF WAR RISK INSURANCE,
ATTENTION OF LEGAL SECTION,
TREASURY DEPARTMENT,
Washington, D. C.

GENTLEMEN: I am the wife of the above enlisted man. I have received no allotment or allowance. I have been informed that the reason for this is that my husband has claimed exemption from compulsory allotment. Will you please inform me upon what ground this claim was based, so that I may have an opportunity to present my reply?

Very truly, yours,
ELIZABETH BROWN SMITH
(Mrs. John Howard Smith),
132 Willow Street, Rockford, Ill.

Nonreceipt of Allotment from War or Navy Department.

The relatives of an enlisted man who is not entitled to an allowance under the war-risk insurance law can receive an allotment only through the War or Navy Department. They should not write to these departments concerning the allotment until they have received definite word from their man in the service that he has made the allotment. If the initial payment is not received within one month after the making of the allotment, if made in this country, or within two months after the making of the allotment, if made abroad, relatives may then write to the appropriate allotment office. The body of the letter should read as follows:

My brother, the above-named enlisted man, has informed me that on July 6,

(Continued on page 10.)

LIST OF CASUALTIES REPORTED AMONG THE UNITED STATES FORCES OVERSEAS

SECTION NO. 1, SEPTEMBER 14, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	10
Missing in action	37
Wounded severely	68
Died of wounds	5
Died from aeroplane accident	2
Wounded slightly	2
Wounded, degree undetermined	6
Total	130

Killed in Action.

Capt. Jo Hunt Reaney. Mrs. Harriett Reaney, Devils Lake, N. Dak.

Corpl. Frank S. Webb. Mrs. W. F. Webb, 414 Cambridge Street, Worcester, Mass.

PRIVATES.

Leslie Barlow Austin. Mrs. Amy Jane Austin, 1423 Young Street, Owosso, Mich.

John M. Bailey. Mrs. Mary Bolner, Paw Paw, W. Va.

Herbert J. Barnes. Mrs. Martha Barnes, care of Mrs. Perry, 1308 Dean Street, Brooklyn, N. Y.

William Bradbrook. Thomas Bradbrook, box 177, Greystone, R. I.

John Brennan. Mrs. Susie V. Alexander, 797 Vermont Avenue, Port Norfolk, Va.

George K. Curtis. Mrs. E. L. Curtis, Crossett, Ark.

Herman K. Davis. Mrs. Amelia Davis, Zebulon, Ga.

Mike Foy. Charlie Foy, Serapta, La.

Died of Wounds.

PRIVATES.

Frederick Barrack. Mrs. W. A. Barrack, 707 Second Street NW., Washington, D. C.

Henry J. Behm. Mrs. Lena Behm, 53 Eleventh Avenue, Newark, N. J.

Russell E. Carter. G. H. Carter, Hillsboro, Oreg.

Frank W. Mueller. Stephen Mueller, Albany, Minn.
Fred O'Brein. Mrs. Jane Sackett, Veteran's Home, Waupaca, Wis.

(Continued on page 10.)

UNOFFICIAL REPORTS COMING IN OF REGISTRATION ON THURSDAY

The War Department authorizes the following from the office of the Provost Marshal General:

Unofficial reports received at this office up to noon Friday indicate that Thursday's registration was conducted everywhere throughout the United States without untoward incidents of any kind. In several States the actual registration appears to have exceeded the estimated quotas. Projected returns from Arkansas, District of Columbia, Louisiana, Minnesota, Mississippi, Oregon, Rhode Island, Tennessee, Vermont, Virginia, and Wisconsin indicate that the registration would exceed the estimates for those States by about 8.5 per cent.

D. C. Board First to Report.

Local Board No. 3, of the District of Columbia, was the first to report, and gave a total of 4,217.

Hoping to be the first to report Dr. Sallon, chairman, and Secretary Heymann of Local Board No. 39 and Samuel J. Buck, chairman of Local Board No. 40, both of Philadelphia, brought their reports to Washington by train Thursday night, and called at the Provost Marshal General's office early Friday morning. Their reports, with serial numbers complete, showed a registration of 3,748 for Local Board No. 39, and 5,425 for Local Board No. 40.

The fourth to report was Local Board No. 157 of New York City, Dr. N. Gordon, chairman. Dr. Gordon also sent messengers by train to Washington with his report, which showed a registration of 3319. A force of twenty volunteer stenographers working steadily throughout the day, enabled this board to complete its report within five minutes after the registration booth in that district closed at 9 p. m. The report included not only the serial numbers assigned to each registrant, but the name, age, color and nationality of each registrant.

Provost Marshal General Crowder and Col. Charles B. Warren, senior officer under General Crowder in charge of the registration, personally inspected the system employed by Local Board No. 3 of the District of Columbia, of which Postmaster Merritt O. Chance, of Washington, is chairman, the first board to report. Under this plan copies of the registration cards were made and serial numbers assigned to cards as registration proceeded.

NAVY YARD CONTRACT LET.

The Department of Labor authorizes the following:

A contract for siding and excavation at project No. 27 A, B, and C, Washington Navy Yard, has been awarded to R. G. Colins, Munsey Building, Baltimore, Md.

The contract is on a lump sum basis for siding and a unit price per cubic yard for the excavation.

INDIAN OFFICE PROPOSALS.

Proposals on the list of electric lighting fixtures for two dormitories, Tishomingo, Okla., will be received at the Office of Indian Affairs, Washington, D. C., until 2 o'clock p. m., September 26, 1918.

LIST OF CASUALTIES OVERSEAS

THE WEEKLY WEATHER FORECAST

The Weather Bureau has issued the following forecast for the period September 16 to 21, inclusive:

North and Middle Atlantic States.—Prospects somewhat uncertain, owing to possible development of tropical disturbance over south Atlantic; it will probably move northeastward, and generally fair weather should prevail with nearly normal temperatures, except for showers about the middle of the week.

South Atlantic and East Gulf States.—Generally fair weather during the week, with nearly normal temperatures.

West Gulf States.—Generally fair weather during the week, with nearly normal temperatures.

Ohio Valley and Tennessee.—Showers about Tuesday and again toward the end of the week; nearly normal temperatures.

Region of Great Lakes.—Some prospect of showers about middle of the week; otherwise generally fair weather indicated; temperatures near or slightly below normal.

Upper Mississippi and Lower Missouri Valleys.—Showers probable early in the week and again toward the close in the lower Missouri Valley; otherwise generally fair weather indicated; temperatures will average near or slightly below the normal.

Northern Rocky Mountain and Plateau Regions.—Frequent local rains during the week, with somewhat lower temperatures during early days; nearly normal thereafter.

Southern Rocky Mountain and Plateau Regions.—Some prospect of local rains early in the week; otherwise generally fair, with nearly normal temperatures.

Pacific States.—Quite frequent rains indicated in Washington, Oregon, and northwest California; generally fair elsewhere during the week. No decided temperature changes.

Red Cross Home Service

(Continued from page 7.)

1918, at Camp Gordon, Atlanta, Ga., he allotted $10 a month of his pay to me through your office. Please inform me whether this allotment is on record in your office and when I may expect to receive payment.

Very truly yours,
KATE HIGGINS SMITH,
132 Willow Street, Rockford, Ill.

If no reply is received to the above inquiry within two weeks after its transmission, the home-service section should prosecute an inquiry through Red Cross channels.

Enlisted Man Reported Missing.

If the relatives of an enlisted man are notified that he is reported missing they may write as follows to the bureau of communication, American Red Cross, asking if any further information has been secured (the bureau of communication does not wait for inquiry from the family before commencing its search for a missing man):

Private John Howard Smith. Serial No. 85634. Co. L, 125th Infantry, American Expeditionary Force. Age, 26 years. Entered service July 30, 1917.

BUREAU OF COMMUNICATION,
AMERICAN RED CROSS,
Washington, D. C.

GENTLEMEN:

I have received official notification from the War Department (or I have been informed from a credible source) that my son named above is reported missing. Will you promptly send me any information you obtain in your search for him?

Very truly, yours,
MARY HUNTER SMITH,
(Mrs. Joseph Walter Smith),
132 Willow Street, Rockford, Ill.

Replies Must be to the Family.

War Department regulations require the bureau of communication to send such information directly to the family. If there is a good reason why a home-service section should write on behalf of the family, this fact should be explained in the letter, so that the bureau of communication will have authority to answer through a third person.

SUPPLIES FOR ST. ELIZABETHS.

Proposals will be received by the Superintendent of St. Elizabeths Hospital, Washington, D. C., until 4 o'clock p. m., September 18, 1918, for furnishing ten gross of safety matches, fifty dozen soup bowls, six dinner bells, fifty dozen tea cups, six dozen two-quart pitchers, fifty dozen dinner plates, and one dozen tea strainers.

SEALED PROPOSALS.

The Division of Supplies, Department of the Interior, is advertising for proposals to furnish 150 metal automobile tags, the proposals to be opened at 2 o'clock p. m., September 17, 1918.

Health Conditions at Army Camps Within the United States as Reported to the Surgeon General for Week Ending Sept. 6

The War Department authorizes the following:

Herewith is a detailed report on the health conditions of troops in the United States (including Porto Rico) for the week ending September 6. The report of the Division of Sanitation to the Surgeon General of the Army for that week is as follows:

1. General.—The admission rate for disease, 960, is slightly higher than last week, while the noneffective rate, 36, is a trifle lower. The death rate for disease, 2.65, continues remarkably low, and approaches the record low rate for the year, 2.12, reported for the week ending July 26. A marked decrease in the number of new cases of pneumonia, 333, as compared with last week, 429, is noted. Venereal admissions are nearly double in number those of the preceding week. The increase is chiefly in cantonments and due to the influx of new men who are diseased when they come to camp. The number of new cases of other special diseases as compared with last week follows:

	This week.	Last week.
Measles	608	764
Meningitis	14	15
Dysentery	26	30
Malaria	149	163

2. Divisional camps: The noneffective rate in many camps of this group is disproportionately high, due to the relatively small commands and the large number of sick left behind by divisions going overseas; 172 new cases of measles were reported from camps of this group, against 180 last week. Camp Shelby leads in the number of new cases with 58, McClellan with 38, and Camp Sheridan with 31; 116 new cases of pneumonia were reported from camps of this group, as compared with 167 last week. The disease continues to prevail, chiefly among colored men recently inducted, at Camps Wheeler and Shelby. Camp Shelby reports 31 new cases, and Camp Wheeler 22. There were 12 deaths from pneumonia at Camp Wheeler out of a total of 28 deaths from all camps of this group.

3. Cantonments: Camp Dix reports the lowest admission rate (181), and Camp Custer the lowest noneffective rate (7.6) of all camps of this group. Camp Pike reports an admission rate of 4,345, leading camps of all groups in this respect. This extremely high rate is due to venereal diseases alone, 3,534 new cases being admitted during the week. Fewer cases of measles are reported than last week. Camp Gordon reports 87, Camp Taylor 53, Camp Las Casas 35. Camps Funston, Meade, and Pike appear next in order in the number of new cases; 153 new cases of pneumonia are reported from camps of this group, against 209 last week. Of this number, Camp Devens reports 35, Camp Dix 18, and Camp Gordon 20. The disease is prevailing chiefly among newly inducted colored men. Of new cases of malaria, Camp Johnston reported 14, and Camp Pike 11, out of a total of 58 new cases from all camps of this group.

4. Departmental and other troops: Sick rates continue low at stations of this group. There were 33 new cases of pneumonia, chiefly among colored men, reported from the port of embarkation, Newport News, out of a total of 64 cases from all stations of this group. Normal conditions prevail elsewhere.

Summary.

Troops.	Noneffective rate.		Weekly admission rate for disease.		Death rate.			
					All causes.		Disease only.	
	This week.	Last week.	This week.	Last week.	This week.	Last week.	This week.	Last week.
Divisional camps	43.3	46.1	19.8	23.0	4.6	5.6	3.9	5.4
Cantonments	36.9	40.1	21.1	19.9	2.3	3.4	2.1	3.7
Departmental, etc	31.3	29.5	13.3	15.1	3.6	4.2	2.6	2.5

[1] First figure in this column for each camp gives the total number of new cases during the week; the figure in parentheses is the number of those cases which were contracted during the week by men in that camp's command at the time of contracting the disease—the difference, therefore, is the number of cases first reported during the week which were either (*a*) cases brought from civilian life by recruits, or (*b*) cases brought by men transferred from other camps to the camp under which the case is reported, or (*c*) old cases which have previously evaded detection. An interrogation point signifies that the report from that camp did not segregate cases contracted at the camp from other cases.

New cases of typhoid fever were reported from following camps: Fremont, 2; MacArthur, 1; Shelby, 1; Bevens, 1; Lee, 2; Meade, 1; Travis, 1; and Newport News, 1.

Causes of deaths by camps.

Camp or department.	No. of deaths.	Causes.

Soldiers Who Died Last Week.

List of names of soldiers (not members of the American Expeditionary Forces) reported to The Adjutant General's office as having died during the week ending September 6, 1918. (Included in this list are the names of soldiers, not members of the American Expeditionary Forces, not previously published who died prior to the week mentioned and subsequently to March 8, 1918. These names are indicated by an asterisk):

Camp Beauregard, La.—Pvt. (first class) John W. Fank, 2824 Second Street, New Orleans, La.*

Camp Custer, Mich.—Pvt. Philip H. Hokenstrom, 130 East Prospect Street, Jackson, Mich.;* First Lieut. Walter F. Peterson, Rushford, Minn.

Camp Devens, Mass.—Pvt. Thomas Elijah, Arredondo, Fla.; Pvt. Eddie J. Gore, Morriston, Fla.; Pvt. Henry Howard, 901 Pierce Street, Tampa, Fla.; Pvt. Apostolos Raptopoulos, Kostordon, Asia;* Pvt. Alex Thomas, 161 Magnolia Street, Jacksonville, Fla.; Pvt. Calvin Thomas, 629 West Broadway, Ocala, Fla.

Camp Dix, N. J.—Pvt. Ira P. Turner, Shepherd, Tex.

Camp Dodge, Iowa.—Pvt. McKinley Jairrels, R. F. D. No. 6, Heflin, Ala.; Pvt. George S. Kubacki, Geneseo, N. Dak.; Pvt. Charles E. Olson, Culbertson, Mont.; Pvt. Lauritz Vangerud, R. F. D. No. 2, Kindred, N. Dak.*

Camp Gaillard, Panama.—Recruit Perry Joseph Smith, 1754 Belleplaine Avenue, Chicago, Ill.*

Camp Gordon, Ga.—Pvt. Harris Anderson, R. F. D. No. 3, box 59, Hartwell, Ga.;* Pvt. Jasper A. Dickey, Mineral Bluff, Ga.; Pvt. James Gadson, Gough, Ga.;* Pvt. Rufus Ramsey, R. F. D. No. 2, Sylvester, Ga.; Pvt. Ed. Ross, Plains, Ga.;* Pvt. Morris Smith, R. F. D. No. 3, Hahira, Ga.*

Camp Greene, N. C.—Pvt. Ed. Henderson, Zwolle, La.;* Recruit Annanias Wooten, La Grange, N. C.*

Camp Holabird, Md.—Pvt. Max Chernin, 41 Broad Street, New Haven, Conn.*

Camp Jackson, S. C.—Pvt. Sylvanus Tomlinson, Matanzas, Fla.

Camp Johnston, Fla.—Sergt. (first class) William A. Evans, 1490 Mobile Avenue, Portland, Oreg.

Camp McArthur, Tex.—Second Lieut. John W. Faulkner, Vivian, W. Va.

Camp Meade, Md.—Pvt. Alden L. Haller, Andrews, Ind.; Pvt. Alpha Moore, R. F. D. No. 1, Burton, W. Va.;* Pvt. Samuel Wells, Whick, Ky.*

CampMerritt, N. J.—Pvt. Clyde Miles, R. F. D. No. 3, Lawrenceville, Ill.; Pvt. Claude Perkins, R. F. D. No. 2, Social Circle, Ga.

Camp Pike, Ark.—Pvt. Harvey Bush, Hayti, Mo.; Pvt. William Pickett, Garland City, Ark.

Camp Sevier, S. C.—Pvt. Charles Wakefield, jr., 53 Ford Avenue, Ogdensburg, N. Y.

Camp Shelby, Miss.—Rct. James Nolan, R. F. D. No. 3, Farmersville, La.; Pvt. Maurice R. Salmon, R. F. D. No. 3, Collierville, Tenn.; Pvt. David Elmer Sansom, Mayflower, Ark.

Camp Sheridan, Ala.—Pvt. Bert. Dunlap, Eutaw, Ala.

Camp Stuart, Va.—Pvt. Phillip Dwash, 50 Vernon Street, Roxbury, Mass.; Pvt. Harry Record, 127 Valls Avenue, South Memphis, Tenn.

Camp Taylor, Ky.—Pvt. Ralph Loren Bartlett, 711 South Clay Avenue, Jacksonville, Ill.; Pvt. James Blinco, 546 Jacob Street, Louisville, Ky.;* Pvt. James Allen Cash, R. F. D. No. 1, Auburn, Ky.; Pvt. George O'Connor Cunneen, 1852 Brightwood Street, East Cleveland, Ohio; Pvt. James Harold Pruden, Cortland, Ind.; Pvt. Otis Walker, 204 Veterner Avenue, Lexington, Ky.

Camp Travis, Tex.—Pvt. Cornelius Porter, Paris, Tex.

Camp Upton, N. Y.—Pvt. John Graham, Salisbury, N. C.; Pvt. Pertney Green, Hallsboro, Va.

Camp Wadsworth, S. C.—Pvt. Harold W. Knorr, East Durham, N. C.; Pvt. Joe Webb, Greyshill, S. C.

Camp Wheeler, Ga.—Pvt. Willie Booker, R. F. D. No. 4, Macon, Ga.; Pvt. James Conway, R. F. D. No. 2, Abbeville, Ga.; Pvt. Oliver Coplin, R. R. No. 1, box 139, McRae, Ga.; Pvt. Joseph Curry, R. F. D. No. 1, care of Wm. Drieger, Dixie, Ga.; Pvt. Eddie Davis, R. F. D. No. 3, Rhine, Ga.; Pvt. Eddie Deamond, Winfield, Ga.; Pvt. Sidney Jones, Toomsboro, Ga.; Pvt. Lonnie Reynolds, St. Marys, Ga.; Pvt. James Stewart, R. F. D. No. 1, box 105, Register, Ga.;* Pvt. Arthur Taylor, 112 Collinsville Street, Macon, Ga.; Pvt. Ben Thomas, Pittsview, Ala.; Pvt. Callie Webb, Sandersville, Ga.

Fort Andrews, Mass.—Capt. Edward F. Chase, 21 Baltimore Street, Lynn, Mass.

Fort Bayard, N. Mex.—Pvt. Leo V. Doyle, care of Charles O'Neill, Alta Vista, Iowa;* Pvt. Clarence M. Johnson, 160 Dunbar Street, Cadiz, Ohio;* Pvt. Arthur Pasley, R. F. D. No. 1, Levee, Ky.;* Pvt. Lester M. Peterson, Nez Perce, Idaho.*

Fort Bliss, Tex.—Sergt. Burton L. Williams, R. F. D. No. 2, box 43, Quitman, Ga.*

Fort Canby, Wash.—Pvt. Arthur L. Baldwin, Camas Valley, Oreg., via Roseburg, Oreg.

Fort Constitution, N. H.—Col. George T. Patterson, North Platte, Nebr.*

Fort Leavenworth, Kans.—1st Class Pvt. Archer T. Terrell, Plains, Tex.

Fort Riley, Kans.—Pvt. Albert E. Friedel, Brookings, S. Dak.; 1st Class Pvt. Martin S. Nolan, Artesian, S. Dak.; Pvt. George Saunders, 232 Fifth Street, Hutchinson, Kans.

Fort Rosecrans, Cal.—Pvt. Edwin Duncan, 619 East Ocean Avenue, Long Beach, Cal.

Fort Russell, Wyo.—Pvt. Aime A. Gignac, 107 Gagnon Street, Fall River, Mass.

Fort Sheridan, Ill.—Pvt. Hobert G. Wilfong, Hampton, W. Va.*

Fort Sill, Okla.—Pvt. Joseph M. Gillespie, 93 Garrison Avenue, Battle Creek, Mich.; Pvt. Chester P. Harlan, 2021 Barth Avenue, Indianapolis, Ind.*

Fort Strong, Mass.—Pvt. Benjamin R. Rosenberg, 231 South Laura Avenue, Wichita, Kans.

Fort Williamsbridge, N. Y.—Corpl. Edgar Lovett, R. F. D. No. 4, Lumberton, N. C.

Fort Worden, Wash.—Pvt. Carl J. Engvall, Brush Prairie, Wash.*

Fort Worth, Tex.—Pvt. Lee C. Gillespie, 1202 South Main Street, Tulsa, Okla.

Vancouver Barracks, Wash.—Pvt. Alfred C. Miller, R. F. D. No. 4, Alhambra, Ill.

Whipple Barracks, Ariz.—Pvt. Samuel Wheeler, 1333 Seventh Street, Santa Monica, Cal.

Brindley Field, N. Y.—Second Lieut. G. S. Gideon, Titusville, Pa.*

Ellington Field, Tex.—Pvt. George H. Beyler, 413 South Park Street, Madison, Wis.

Allentown, Pa.—Pvt. Leroy D. Shuster, 608 Euclid Avenue, Greensburg, Pa.

Augusta, Ga.—Maj. Walter Whitney, Augusta Arsenal, Augusta, Ga.

Brooklyn, N. Y.—Pvt. James W. White, 281 Nassau Street, Brooklyn, N. Y.

Coffeyville, Kans.—Pvt. Ward W. Gillespie, Coffeyville, Kans.*

Columbus, N. Mex.—Horseshoer Debert R. Martin, Corbin, Ky.*

Davenport, Iowa.—Pvt. William Clifford Brodbeck, Paint Street, Chillicothe, Ohio.

Dayton, Ohio.—Pvt. Alfred Piatt, 38 Gaylor Avenue, Plymouth, Pa.

Deming, N. Mex.—Pvt. Boon Hays, R. F. D. No. 3, Wynnewood, Okla.;* Pvt. Fred Lee, Chireno, Tex.; Pvt. William N. Ross, Pioneer, Tex.*

Ellis Island, N. Y.—Pvt. Bernard R. Drogalis, Minersville, Schuylkill County, Pa.

Orange, N. J.—Pvt. Dominic Masucci, Hartford Street, Newark, N. J.*

Otisville, N. Y.—Pvt. Alonzo Nunn, Baldwin, Miss.;* Pvt. James W. Worthington, Hamilton, Mo.

San Antonio, Tex.—Recruit Ralph W. Berger, 317 South Ninth Street, Salina, Kans.;* Second Lieut. Lawton Bryan Evans, 2229 Pickens Road, Augusta, Ga.*

San Francisco, Cal.—Col. Ernest A. Greenough, 1015 Sherman Street, Alameda, Cal.; Pvt. Frank Perito, box 234, Dalton, Ill.; Pvt. David Soria, 275 Turk Street, San Francisco, Cal.

Seward, Nebr.—Pvt. Foster C. Kinsman, Beaver City, Nebr.*

Takoma Park, D. C.—Pvt. Benjamin Smiley, Olive Branch, Ill.

Watertown, Mass.—Pvt. James Moore, 272 Sprague Street, Fall River, Mass.

Waynesville, N. C.—Q. M. Sergt. Charley L. Woodward, 111 Red Cross Street, Wilmington, N. C.

PROTECTING HORSES IN ITALY.

Slaughter is Prohibited by Decree Issued on July 24.

Consul General Wilber, at Genoa, reports:

By a decree of July 24 the slaughtering of horses, asses, and mules suitable for raising or for breeding is forbidden in Italy. The suitableness of an animal for raising or for breeding will be determined by the communal veterinary or by an expert appointed by the mayor.

The same decree prohibits the transportation of freshly slaughtered horseflesh from one commune to another.—Commerce Reports.

VOL. 2 WASHINGTON, MONDAY, SEPTEMBER 16, 1918. No. 413

President Thanks the Army in France for Victory; King George Cables Mr. Wilson His Congratulations

MR. WILSON'S MESSAGE OF CONGRATULATIONS TO GENERAL PERSHING

THE WHITE HOUSE,
Washington, September 14, 1918.

Gen. John J. Pershing, American Expeditionary Force, France.

ACCEPT my warmest congratulations on the brilliant achievements of the army under your command. The boys have done what we expected of them and done it in the way we most admire. We are deeply proud of them and of their chief. Please convey to all concerned my grateful and affectionate thanks.—WOODROW WILSON.

"FAR-REACHING RESULTS" SEEN BY THE BRITISH SOVEREIGN

LONDON.

The President of the United States of America, Washington.

ON behalf of the British Empire I heartily congratulate you on the brilliant achievement of the American and allied troops under the leadership of General Pershing in the St. Mihiel salient.

The far-reaching results secured by these suceessful operations which have marked the active intervention of the American Army on a great scale under its own administration are the happiest augury for the complete and, I hope, not far distant triumph of the allied cause.—George, R.I.

DIRECTOR GENERAL'S ORDER REGULATING THE ISSUANCE OF ANNUAL AND TRIP PASSES

Stipulations as to Their Use by Officers and Employees of Railroads Under Government Control—Effective January 1, 1919.

The United States Railroad Administration issues the following:

SEPTEMBER 1, 1918.

Circular No. 19 (Effective Jan. 1, 1919).

ANNUAL AND TIME PASSES.

1. The issuance of annual and time passes will be confined to the offices of the Director General, director of operation, the several Federal managers, the general manager on lines where there is no Federal manager, and the Federal manager Pullman car lines.

2. Annual and time passes issued over the facsimile signature of the Federal managers (or general managers on lines where there is no Federal manager) and

(Continued on page 2.)

CONFIRMATIONS OF CABLEGRAMS MUST BE IN PLAIN LANGUAGE

IN THE OFFICIAL U. S. BULLETIN of Friday, September 13, 1918, there appeared an announcement of the Censorship Board to the effect that confirmations of cablegrams must be in plain language on and after certain specified dates. Inadvertently the word "confirmations" was omitted from the caption under which the statement was printed, and it was to that extent misleading. The new requirement applies only to confirmations and not to the use of authorized codes in the original cablegrams. The rules and regulations promulgated by the chief cable censor on May 21, 1918, continue to govern the transmission of cablegrams themselves.

The order issued on September 13 reads as follows:

"On and after October 1, 1918, no confirmation of a cablegram shall be allowed to leave the United States, its Territories, or possessions unless it be in plain language.

"On and after November 1, 1918, no confirmation of a cablegram shall be allowed to enter the United States, its

LARGE GERMAN SHIP BASE IN THE VIRGIN ISLANDS SEIZED BY U. S. PROPERTY CUSTODIAN

Hamburg-American Properties at St. Thomas Transferred by "Camouflage," Mr. Palmer States—Had Possibilities for a Naval Station.

The Alien Property Custodian's office authorizes the following:

A. Mitchell Palmer, Alien Property Custodian, announces that he has seized a German base in Virgin Islands.

For many years the Hamburg-American Line has been subsidized by the German Government, and for many years it had in the harbor of St. Thomas, Danish West Indies, now known as the Virgin Islands, a large marine plant, consisting of land, buildings, docks, warehouses, large water tanks, and cisterns, lighters, motor boats, loading paraphernalia, and coaling facilities.

This plant admitted of possibilities as a naval base, and that it was so considered by the Germans is shown by the fact that their principal building com-

manding the harbor is of reinforced concrete, and the plaza in front of it is said to have an 8-foot foundation of concrete, fit for gun emplacements.

The business agent of the Hamburg line at St. Thomas, who was also the German Consul, on January 22, 1917, made a "camouflage" sale of the Hamburg line plant to its lawyer, Jorgensen, when he ascertained that on January 17, 1917, the United States had purchased the islands of the Danish West Indies from Denmark, and when he seemed to think that the United States would be forced by the acts of the German Government into formally declaring war.

The sole consideration mentioned in this pretended sale was Lawyer Jorgensen giving his client, the Hamburg-American Line, his note for $210,000, payable three months after date, and renewable every three months until after the war. There was no interest to be paid until after the final settlement, and there were other stipulations which made it apparent that the sale was only an attempt to cover up the German ownership.

"Camouflage" is Detected.

Learning of this transaction, Mr. Palmer's representative in St. Thomas, Darwin O. Curry, insisted upon Lawyer Jorgensen's making a sworn report of the transaction. When that report reached Mr. Palmer, he saw through the subterfuge and cabled his representative, Curry, to take possession of the Hamburg-American Line properties, which he did March 12, 1918.

Jorgensen protested and sought refuge in his Danish citizenship, claiming rights under the treaty by which the islands were sold by Denmark, but the activity of the Alien Property Custodian's staff in discovering other German business which Jorgensen was transacting for the Hamburg Line, months after war had been declared by the United States, finally convinced Jorgensen that it was useless to persist in his attitude, and he executed a deed to the Alien Property Custodian of the Hamburg Line plant on the Custodian's assuming whatever obligations were attached to that note. The note itself was found in Jorgensen's possession, and seized.

German Rights Taken.

The gradual smoking-out of the Hamburg Line's attorney was interesting, and the result most satisfactory, as it forever deprives the Germans of that marine or naval base in the Virgin Islands, because a deed is to be made to the United States by Mr. Palmer, as President Wilson will take over that property for the needs of our Navy and Customs Departments.

When the Islands were Danish owned they were known as the Danish West Indies, and consist of a group of islands, the most important being St. Thomas, St. Croix and St. John. St. Thomas lies forty miles east of Porto Rica, right in the track of vessels sailing to and from Europe, Central and South America, the East Indies, the Panama Canal and the Gulf and Atlantic Coast States. It has a splendid harbor with natural protection, and which can be easily fortified. The islands have had their varying periods of prosperity and depression, and the harbor of St. Thomas has had a most interesting history, and will have, under American ownership, a future.

TOTAL OF $7,685,245 LOANED TO FARMERS DURING AUGUST BY FEDERAL FARM BOARD

During the month of August $7,685,245 were loaned to farmers of the United States by the Federal land banks on long-time first mortgages, according to the monthly statement of the Farm Loan Board. The Federal Land Bank of Spokane leads in amount of loans closed, $1,155,410; with the Federal Land Bank of St. Paul running second, $919,200. The other 10 banks closed loans in August, as follows: Wichita, $702,100; New Orleans, $699,465; Houston, $683.765; Columbia, $607,215; Omaha, $595,300; Louisville, $592,800; Springfield, $448,250; St. Louis, $432,840; Berkeley, $426,400; and Baltimore, $423,500.

On September 1 the total amount of mortgage loans placed since the establishment of the Federal land banks was $124,877,354, covering 55,325 loans closed. During August 2,500 applications were received asking for $8,175,040. During the same period 2,297 loans were approved, amounting to $7,686,245. Altogether 99,070 have applied for loans under this system, aggregating $258,493,125.

The grand total of loans closed is distributed by Federal land bank districts, as follows:

Spokane	$19,359,695
St. Paul	17,804,100
Omaha	14,517,340
Wichita	13,595,000
Houston	11,253,999
New Orleans	9,050,305
St. Louis	8,243,130
Louisville	7,962,000
Berkeley	7,609,100
Columbia	5,925,790
Springfield	4,839,695
Baltimore	4,717,200

ORDER REGULATING ISSUANCE OF RAILROAD PASSES

(Continued from page 1.)

countersigned by the person indicated thereon will be limited to—

(a) For, or on account of, their own officers and employees who do not require annual or time transportation on lines beyond their jurisdiction.

(b) For, or on account of, such officers and employees of the corporation as may be specifically authorized by the Director General.

(c) To officers and employees of the American Railway Express Co. whose duties are confined solely to lines under their jurisdiction.

3. Annual and time sleeping or parlor car passes will be issued by the Federal manager Pullman car lines to officers and employees under his jurisdiction.

4. All annual and time passes not included in paragraphs 2 and 3 will be issued only by the Director General or director of operation.

5. Annual passes bearing the personal signature of the Director General will be good on all lines under Federal control, on all trains, and for seats in railroad-operated parlor or chair cars.

6. Annual and time passes bearing the facsimile signature of the Director General will be issued by the director of operation, and will be good on all lines under Federal control or within the territory or over the lines specified thereon, and will bear express limitation as to certain trains upon which the pass will not be honored. Such passes will bear the countersignature of C. R. Gray, director; W. T. Tyler, senior assistant director; or J. H. Keefe, assistant director.

7. Annual and time sleeping or parlor car passes, other than for officers and employees of the Pullman car lines, and annual and time steamship passes, bearing the facsimile signature of the Director General, will be issued by the director of operation with the same countersignature as provided in preceding paragraph.

8. Federal managers, and general managers on lines where there is no Federal manager, will forward to the director of operation, on or before November 1, a list of annual or time passes (including sleeping car or steamship passes) required for officers or employees over lines other than those under their control, indicating the lines or territory over which the passes are desired.

TRIP PASSES.

9. Trip passes will be issued over the facsimile signature of the Director General or of the Federal managers (or of general managers on lines where there is no Federal manager) and the Federal manager of Pullman car lines, and will be countersigned by the person indicated thereon. Trip passes issued by the Federal and general managers and Federal manager Pullman car lines will be limited to the lines under their respective jurisdiction.

10. Trip passes bearing the facsimile signature of the Director General, with countersignature of person indicated thereon, will be issued by the director of operation, regional and district directors. Such trip passes will be honored for transportation over the lines indicated thereon.

11. Federal managers, and general managers on lines where there is no Federal manager, and the Federal manager of Pullman car lines desiring trip passes for, or on account of, their officers or employees over other lines under Federal control, will make request for same to the Federal or general manager of such railroad in the same manner that exchange trip passes have heretofore been handled.

GENERAL.

12. Passes will not be issued which include the privilege of free meals in dining cars, at restaurants, or on steamships.

13. The current regulations of the Interstate Commerce Commission covering the issuance and record of passes must be observed.

C. R. GRAY,
Director, Division of Operation.

SENDING OF CABLEGRAMS.

Territories, or possessions unless it be in plain language.

"It is to be noted that code confirmations will not be passed by Postal Censorship even when accompanied by what purports to be or actually is a transmission thereof."

POSTMASTER GENERAL'S ORDERS ON TELEGRAPH AND TELEPHONE

OFFICE OF INFORMATION,
POST OFFICE DEPARTMENT,
September 13, 1918.

The following orders affecting the telegraph and telephone service have been announced by Postmaster General Burleson:

To all telephone and telegraph companies:

Some telephone and telegraph companies have reported to the Department that they are being seriously embarrassed in the operation of their services by employees leaving immediately upon submitting their resignations. In many cases they do so to engage in nonessential work. In order that the telephone and telegraph services may not be handicapped in their operation employees should give the usual two week's notice when they desire to terminate their employment.

To all telegraph and telephone companies:

Telegraph and telephone companies are hereby authorized to file claims with the local exemption boards for deferred classification for employees who are absolutely indispensable to the operation of the service. The claims for deferred classification shall be sworn to by the supervisory officer under whom the employee works. However, before filing the claim with the local exemption board it must be approved by the division head in charge of the territory in which the employee is registered.

David J. Lewis, Chairman, John C. Willever, Vice President, Western Union Telegraph Co., and Edward Reynolds, General Manager, Postal Telegraph-Cable Co., are hereby designated to make the necessary studies and recommendations to the Postmaster General with a view to standardizing the rate schedule of telegraph service throughout the United States.

David J. Lewis, Chairman, Harry B. Thayer, Vice President, American Telephone & Telegraph Co., and Charles Y. McVey, President of the Ohio Telephone Co., are hereby designated to make the necessary studies and recommendations to the Postmaster General with a view to standardizing the rate schedules of telephone service throughout the United States.

William S. Ryan, assistant superintendent, Division of Post Office Service; John B. Colpoys, special agent, Department of Labor; Union N. Bethell, first vice president, American Telephone & Telegraph Company; F. B. MacKinnon, United States Independent Telephone Association, and Miss Julia S. O'Connor, representing the organized telephone workers of the country, are appointed a committee to investigate the working conditions of and wages paid to employees of the telegraph and telephone companies, and report as to what improvements, if any, should be made in the working conditions, the wages which should be paid the various classes of employees, and the feasibility of standardizing the same.

Flying Field Fatalities In Week Ending Sept. 7

The War Department authorizes the following:

Herewith is a summary of deaths due to aviation accidents in training at flying fields in this country for the week ending September 7, 1918:

Place at which fatality occurred.	Number of fatalities.
Barron Field, Everman, Tex	2
Kelly Field, San Antonio, Tex	2
Mather Field, Sacramento, Cal	2
Taliaferro Field, Fort Worth, Tex	1
Total	7

The 7 deaths represent 1 fatality for every 1,469 hours flown, or 117,520 miles air travel. At 23 fields other than those named there were no fatalities.

CHANGES IN BUNKERAGE RULES BY THE WAR TRADE BOARD

The War Trade Board announces, in a new ruling (W. T. B. R. 229), the following amendment to subparagraph (j) of Article V of "General Rules No. 1, Governing Granting Licenses for Bunker Fuel, Port, Sea, and Ship's Stores and Supplies":

"If a vessel is fitted with wireless telegraphy the sending apparatus shall be sealed in such manner that no message can be sent without the knowledge of the master. The master shall be responsible for seeing, first, that no message to the enemy is sent by wireless telegraphy; second, that no reports are made of vessels sighted or of any weather conditions experienced; third, that no wireless messages of any kind are sent within 200 miles of England, France, Portugal, or Italy, except emergency messages relating to vessels or persons in distress unless specifically authorized by War Time Radio Instructions promulgated by authorized representatives of the Navy Department, in which case the specific provisions of such instructions are to be followed exactly."

The following is added to General Rules No. 1 as Article VII thereof:

"No application for bunkers by any vessel under the American flag shall be approved, excepting on the same understanding respecting wireless messages as is outlined in subparagraph (j) of Article V for neutral and unrequisitioned American vessels."

IRRIGATION CONTRACT AWARDED.

Under authority of the Secretary of the Interior, contract has been awarded to the Reynolds-Ely Construction Co., of Springville, Utah, for earthwork on the main canal stations 93 to 103-10 King Hill irrigation project, Idaho. The work involves about 37,000 cubic yards of grading, and the total contract price is $20,535.

When you buy war-savings stamps you do not give—you receive.

FURTHER CURTAILMENT IN FARM IMPLEMENT OUTPUT NECESSARY

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

Curtailment of the output of all farm implements, including tractors, and a reduction of stocks in order to conserve iron and steel will be discussed by Judge Edwin B. Parker, priorities commissioner, Monday morning next with the war service committee representing the agricultural implement manufacturers.

An interesting phase of the discussion, Judge Parker believes, will be in connection with curtailment of the output of farm tractors, and independent tractor manufacturers not represented by the war service committee of the industry are asked by the War Industries Board to send their representatives to the meeting.

Elimination of Types.

The conservation division of the War Industries Board announced July 12 a comprehensive elimination program for the farm-implement and farm-operating-equipment industry which discontinued manufacture of approximately 3,000 surplus types of plows and tillage implements. Out of 303 types of plows only 65 will be manufactured after December 31. The 300 odd types of corn planters and drills were reduced to 10, and 107 types of barrows cut to 44. Further elimination of unnecessary types and additional standardization of farm implements was promised by the conservation division.

Other Conservation Necessary.

It was expected that this action would release automatically for war purposes and other necessary industries a large amount of steel and iron, besides reducing stocks carried by factories, jobbers, and other distributors and thereby freeing much capital invested. That further conservation in iron and steel by this industry is necessary and must be made through other curtailments of output of implements, including tractors, is indicated by the forthcoming meeting of representatives of the industry with Judge Parker.

U. S. Navy Officer Wins British Admiral's Praise

The Navy Department has received a report from Vice Admiral Sims forwarding a letter written by Rear Admiral H. S. Grant, Royal Navy, commending Commander W. C. Asserson, U. S. N., for the excellent work done by that officer on the occasion of the collision between two convoys on the night of July 4, 1918, and also for his prompt action in towing a Norwegian steamship and four motor launches from another vessel safely into Oneglia.

Secretary Daniels has commended Commander Asserson for his excellent performance of duty.

Commander Asserson is a native of Virginia, born August 21, 1875, and when appointed to the Naval Academy in 1893, was a citizen of New York. His wife, Mrs. Isabella P. Asserson, resides at 209 Oak Avenue, Takoma Park, Washington, D. C.

Official U. S. Bulletin

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

POLICY REGARDING ATHLETICS IN STUDENTS' TRAINING CORPS

The War Department authorizes the following:

The committee on education and special training has sent to presidents and commanding officers at all Students' Army Training Corps institutions the following letter defining its policy with reference to athletics:

1. It will be the policy of the committee strongly to encourage athletic sports within each institution, and among neighboring institutions in cases in which the distances are so short as to necessitate no interruption of the weekly schedule of academic and military training.

2. Athletic sports as formerly pursued, involving extended trips and specialized training, are inconsistent with the soldiers' program of drill and study. Athletic directors and professors of physical education who are already in the employ of Students' Army Training Corps institutions can be used in connection with intermural sports, and for the assistance of the officers in charge of military physical training.

3. The commanding officer at each institution will be in charge of the physical condition and training of the men under his command, and will be responsible for coordinating the military training, routine, and discipline with athletic sports.

COMMITTEE ON EDUCATION AND SPECIAL TRAINING,
R. I. REES,
Colonel, General Staff Corps, Chairman.

Give up your luxuries that the Kaiser may be made to give up his ambitions.

American Official Communiques on Operations of U. S. Forces

The following is authorized by the War Department:

American Official Communique No. 123.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 14, 1918.

Section A.—In the St. Mihiel sector our advanced units have maintained touch with the enemy's forces and have repulsed a counter attack attempted by them in the region of Jaulny.

We are now able to estimate the success obtained during the two previous days. The dash and vigor of our troops and of the valiant French divisions which fought shoulder to shoulder with them are shown by the fact that the forces attacking on both faces of the salient effected a junction and secured the results desired within 27 hours.

Besides liberating more than 150 square miles of territory and taking 15,000 prisoners we have captured a mass of material. Over 100 guns of all calibers and hundreds of machine guns and trench mortars have been taken. In spite of the fact that the enemy, during his retreat burned large stores, a partial examination of the battle field shows that great quantities of ammunition, telegraph material, railroad material, rolling stock, clothing, and equipment have been abandoned. Further evidence of the haste with which the enemy retreated is found in the uninjured bridges which he left behind.

French pursuit, bombing and reconnaissance units, and British and Italian bombing units divided with our own air service the control of the air and contributed materially to the success of the operation.

Section B.—The commander in chief, in the name of the President, has awarded the Distinguished Service Cross to Capt. J. M. McNamee, M. C., R. F. A., British Army, attached to the —— Battalion Engineers, for extraordinary heroism throughout the advance across the Rivers Ourcq and Vesle, northeast of Chateau Thierry, France, July 30, 1918, to August 6, 1918. "Volunteering, he led a detachment of engineers up to the front lines on July 30, 1918, for the purpose of assisting the advance of the infantry with thermite and smoke bombs. That night he led his men through a heavy enemy barrage, exhibiting courage and leadership. For three days and nights he remained with his men in the extreme front line in the Bois Cles, greatly aiding in repulsing enemy counterattacks by laying barrages of thermite and phosphorus, cleaning out machine-gun nests in the same manner, and enabling our infantry to attack behind smoke screens. On August 5 he took another detachment into St. Thibaut and brought ammunition into the village before it was occupied by our infantry and while the enemy patrols were still there. The advance of the infantry across the two rivers, the Ourcq and Vesle, was greatly facilitated and the lives of many of them were saved by the smoke screen which Capt. McNamee successfully prepared. Throughout his entire advance across these two rivers he conducted himself with extraordinary heroism, setting an example to the men of the regiment to which he was attached, constantly exposing himself to danger in making reconnaissances and at the same time shielding his men."

American Official Communique No. 124.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 15, 1918.

Section A.—In the St. Mihiel sector there was increased artillery and aviation activity.

A counterattack launched by the enemy at daybreak near St. Hilaire was easily repulsed and a number of prisoners taken.

On the left bank of the Moselle our lines have been advanced 1 to 2 miles and now include the towns of Vilcey and Norroy.

The normal extension of our lines beyond Jaulny resulted in the bringing in of 72 additional guns abandoned by the enemy in his hasty retreat. This brings the total number of guns captured to date to more than 200.

The War Department announces the emergency addresses of the following officers and men awarded the Distinguished Service Cross by Gen. Pershing as reported in Communique No. 113, September 5, 1918.

Corpl. Anthony C. Bills, Field Artillery. Anthony Bills, father, 315 Wood Street, Du Bois, Pa.

Pvt. (1st class) Walter A. Shaminski, Infantry. Joe Shaminski, father, 242 South Beach Street, Mount Carmen, Pa.

Pvt. (1st class) Franklin D. McVickers, Infantry. Mrs. Ellen McVickers, mother, 1106 Jackson Avenue, Portage, Pa.

Pvt. Albert S. Hartwell, Signal Service Unit. Pauline Hartwell, 16 Rue Pomerou, Paris, France.

Second Lieut. William H. Spencer, Infantry. Mrs. Mary E. Spencer, 1432 Clara Avenue, St. Louis, Mo.

The emergency address of Second Lieut. Fred A. Tillman, Aviation Section, Signal Corps, mentioned in the American Official Communique No. 113, issued September 5, is Fayetteville, Ark. Father, Representative John N. Tillman, Fayetteville, Ark.

The emergency address of Maj. Benjamin S. Berry, Marine Corps, who was mentioned in the American Official Communique No. 113, issued September 5, 1918, is Chester, Pa. Father, William H. Berry, 711 East Fourteenth Street, Chester, Pa.

WORK OF CONGRESS BRIEFLY TOLD

SENATE.

The Finance Committee Saturday afternoon took up the consideration of the bill passed by the House designed to stimulate the sale of Liberty bonds. Assistant Secretary of the Treasury Leffingwell was before the committee and explained the purposes of the measure and the necessity for its enactment. The bill will be reported to the Senate early this week, with a view to its enactment into law before the campaign for the fourth Liberty loan begins. Phillip A. Gadsen, representing a national committee on public utilities, before the committee urged the elimination from the bill of further taxes on such institutions. Unless Federal help is extended to public utilities, he said, they would be forced into receiverships by the dozen.

The Foreign Relations Committee considered and gave its approval to the draft treaties between this country and France and Greece. They are along the lines of the treaty for the same purpose between the United States and Great Britain.

Members of Congress from cotton-producing States at a conference Saturday decided to appoint a joint committee to protest to the President against the creation of any committee to investigate the cotton situation, with a view to fixing prices if necessary. The joint committee selected consists of Senator Smith, of South Carolina, chairman, and Senators Smith, of Georgia; Ransdell, of Louisiana; Sheppard, of Texas; Simmons, of North Carolina; and Underwood, of Alabama; Representative You: , of Texas, chairman; Representatives Wingo, of Arkansas; Candler, of Mississippi; Bell of Georgia; and McClintic, of Oklahoma.

HOUSE.

General debate on the war revenue bill was concluded Saturday afternoon and its consideration under the 5-minute rule began this morning. Chairman Kitchin expressing the hope that the measure would be finally disposed of by Friday next. An agreement was reached that the bill should have a privileged status until the final vote is taken.

In the course of the discussion Saturday afternoon, Representative Fess, of Ohio, chairman of the Republican Congressional Campaign Committee, explained that he aimed criticism at no one in his statements that the Republican Party stood against an "inconclusive peace." He declared, in the course of a discussion of the question of peace, that his greatest fear was that the inherent American "kindness of heart" would yield to German peace plans before Germany was beaten sufficiently to remove her as a menace to future world safety.

Street in Naples Named In Mr. Wilson's Honor

The Department of State is in receipt of a telegram from the American Embassy in Rome which states that the mayor of Naples has informed the embassy that the municipality has given the name of Woodrow Wilson to one of its streets in honor of the President.

NEW RULES ON STIMULATION OF NEWSPAPER CIRCULATION

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

To differentiate between acceptable and nonacceptable methods of stimulating circulation to be employed by the daily and Sunday newspapers, the War Industries Board, through the pulp and paper section, of which Thomas E. Donnelley is chief, issues the following statement, with accompanying new and additional regulations, to be observed as part of the general plan for the conservation of print paper:

Growth of Population.

The regulations governing daily and Sunday newspapers, dated August 5, placed no limitations upon the natural growth of circulation, because it would be obviously unfair to cut down circulation to the six months' period of January to June, 1918, in communities where there has been an unusual increase in population due to war activities. But to allow newspapers to artificially stimulate circulation would defeat the purposes of the regulations of August 5, which were designed to reduce the total tonnage used by the newspaper industry 15 per cent in daily editions and 20 per cent in Sunday editions.

It is therefore necessary to add the following regulations:

No publisher shall sell his paper at retail less than his published prices.

No publisher shall use premiums, contests, or similar means to stimulate his circulation.

No publisher shall issue holiday, industrial, or similar special numbers.

Ruled Legitimate Methods.

The following have been ruled as legitimate methods of stimulating circulation:

First. Advertising the newspaper on bill boards.

Second. Advertising the newspaper on dead walls.

Third. Making poster announcements of forthcoming features.

Fourth. Buying space in contemporary papers announcing special features.

Fifth. Making announcements in its Sunday or daily editions of special features to come.

Sixth. Canvassing without premiums.

U. S. Navy Officer Praised For Help Given British

The British Admiralty under date of August 4, 1918, forwarded to Vice Admiral Sims a letter in which especial comment was made of the action of the U. S. S *Lydonia* and its commander when an enemy submarine attacked a British steamship on May 8, 1918.

Secretary Daniels has, accordingly highly commended the commanding officer of the *Lydonia*, at that time, Lieut. Commander Richard P. McCullough, U. S. N., for his promptness of action on the above mentioned occasion, and for his cooperation with a British naval vessel, as a result of which the enemy submarine was destroyed.

Lieut. Commander McCullough is a native of New Jersey, from which State he was appointed to the Naval Academy in 1900, graduating in 1904.

BRASS BEDSTEAD ECONOMY PROGRAM PLACED IN EFFECT

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

The conservation division of the War Industries Board announces that there has gone into effect the program for conservation of brass worked out July 16 by the division with the brass-bedstead manufacturers and accepted by the latter.

This program contemplates:

1. Each manufacturer to reduce his line of brass bedsteads to not more than 10 patterns.

2. Each manufacturer of brass bedsteads to restrict his use of tubing for posts to 2-inch diameter. The tubing to be used is the iron-lined brass-covered only.

3. The use of head and foot angles larger than 1 by 1 by ⅛ inches to be discontinued.

4. The use of side-rail angles larger than 1½ by 1½ by ⅛ inches to be discontinued.

5. Each manufacturer of brass beds to reduce the height of head ends, of the continuous-post and corner-ball patterns to 45 inches, measured to top of bend, not including casters.

6. Each manufacturer to reduce the height of foot ends of the continuous-post and corner-ball patterns to 30 inches, measured to top of bend, not including casters.

7. Each manufacturer of brass beds to reduce the height of the head end of the Colonial pattern so that the pillars for such patterns shall not exceed 48 inches in length.

8. Each manufacturer of brass beds to reduce the height of the foot end of the Colonial pattern so that the pillars for such patterns shall not exceed 33 inches in length.

9. The number of fillers in beds 3 feet and 3 feet 6 inches wide is not to exceed three.

10. The number of fillers in beds 4 feet and 4 feet 6 inches wide is not to exceed five.

11. No manufacturer to use for fillers, or cross rods, any tubing larger than 1¼-inch diameter.

12. To assist the manufacturers in using up various styles of trimmings now in stock, each of the above-mentioned 10 patterns may be trimmed in two ways, i. e., two different styles of trimmings, but otherwise identical.

13. No additional material for eliminated styles and sizes shall be ordered after this date, except to even up existing stocks on hand, and under no circumstances shall any of these eliminated styles and sizes be manufactured after December 1, 1918.

OFFICERS HELD RESPONSIBLE.

General Order No. 67:

III. Organization commanders will certify on packing lists of property to accompany troops overseas that no unauthorized articles or inflammable materials are included in the troop baggage.

Such oils, cleaning materials, etc., as are prescribed by regulations and orders will be packed separately and plainly marked in order that they may be separated from other property when placed aboard ship.

TREASURY CERTIFICATES IN PAYMENT OF INCOME TAXES

Secretary McAdoo has sent a letter to those who paid income and excess profits taxes this year, advising them of the issue of Treasury certificates of indebtedness maturing July 15, 1919, which will be accepted at par with an adjustment of accrued interest in payment of income and profits taxes. This letter was sent to every taxpayer who paid $100 or more in income or excess profits taxes this year. It is as follows:

"Dear Sir:

"Those who pay taxes to the Government are contributing to winning the war no less really, and in a spirit no less patriotic, than those who buy Liberty Bonds and War Savings Certificates. It may, in fact, be justly said that the taxpayer helps more patriotically than the bond buyer, because to pay taxes is to part with money—to make a genuine sacrifice—whereas to buy a Government bond is to lend money on impregnable security—to secure a privilege—not to make a sacrifice.

The War Revenue Act.

"Under the war revenue act, which became a law upon the President's approval on October 3, 1917, some $4,000,000,000 in taxes were imposed and collected. For the fiscal year ending June 30, 1919, we must look forward to expenditures on the part of the Government, including loans to the allies, of nearly double the amount of expenditures for the fiscal year which ended June 30, 1918, and in order to pay a proper part of our war bills as we go and avoid the economic and social evils incident to a disproportionate public debt, I have, in pursuance of the duty imposed upon me by law, advised the Congress that we should raise by taxation for the fiscal year 1919 twice as much as in 1918, viz, $8,000,000,000.

Just as the number of bondholders in the United States has, during the period of the war, increased from a few hundred thousand to some twenty million, so will the number of those who have income and profits taxes to pay increase from a few hundred thousand to millions.

I know that the Treasury Department can count upon the same loyal and ungrudging acceptance of the burdens which the war must cast upon those of us who stay at home and keep the economic and industrial machinery revolving to support our boys in France, as was given in the fiscal year just passed.

New Certificate Issue.

In order that those who have income and profits taxes to pay may prepare themselves in advance for these large payments and accumulate gradually the funds necessary to meet them, an issue of 4 per cent Treasury certificates of indebtedness maturing July 15, 1919, is offered for subscription. These certificates will be accepted at par, with an adjustment of accrued interest in payment of income and profits taxes when payable at or before the maturity of the certificates, and if the purchaser does not have occasion to use them in that manner, they will be paid in cash at maturity with interest. A circular describing these certificates is inclosed with this letter. The certificates may be purchased at any Federal reserve bank or through your own bank or trust company.

Similar certificates were issued in connection with the taxes payable during the fiscal year just ended to an amount in excess of $1,600,000,000. They were, I believe, purchased chiefly by large corporations and wealthy persons. I am addressing this letter to those who have paid income and profits taxes generally, because I believe that the increased taxes and the probable increase in the number of taxpayers make it desirable that even those whose taxes are measured in small amounts should be preparing themselves to meet these payments, and that it will be to their advantage to participate in purchases of this issue of Treasury certificates.

Contributes in Many Ways.

The taxpayer who buys these certificates contributes in many ways to help in our great problem of winning the war. First, he pays the Government money before it is due, receiving interest from the Government meanwhile; second, he practices economy and thrift and thereby releases goods and services to the Government which are greatly needed for winning the war; third, he saves himself trouble and money and relieves the banking institutions, to which he would otherwise have to turn, from the pressure which his failure to prepare in advance for the payment of his taxes would involve.

The man who buys Treasury certificates to the amount of the taxes he will have to pay, and thereby anticipates their payment, will do a wise and helpful thing not only for himself but for his country, and will contribute in a most definite and patriotic way to the triumph of America in her moral combat with the enemies of liberty and democracy—the Kaiser's legions of lust and license—and share in the new glory of America's vindicated ideals of justice and humanity.

Cordially, yours,

W. G. McAdoo.

REPORT FOR TWO WEEKS ON ALL COAL LOADED ON CARS

A report was made to Director General McAdoo by the car service section of the Railroad Administration on the quantity of coal of all kinds loaded by roads for the week ended August 31, 1918, as compared with the same period of 1917. A summary of the report follows:

	1918.	1917.
Total cars bituminous	220, 216	188, 740
Total cars anthracite	41, 281	42, 817
Total cars lignite	3, 750	3, 190
Grand total cars all coal	265, 247	234, 647

A summary of reports for the week ended September 7, 1918, based on actual reports from most roads, but with the results of some roads estimated, follows:

	1918.	1917.
Total cars bituminous	191, 766	168, 935
Total cars anthracite	32, 234	32, 908
Total cars lignite	3, 070	2, 914
Grand total cars all coal	227, 070	204, 757

Increase of 1918 up to and including week ending September 7, over same period of 1917, 539,438 cars.

RULES FOR EXPORT OF CERTAIN GOODS FROM INSULAR PORTS

The War Trade Board announces in a new ruling (W. T. B. R. 217) the following regulations with respect to the exportation from the insular possessions of the United States and the Panama Canal Zone of conserved commodities originating in the continental United States:

1. No export license shall be granted for the exportation from an insular possession of the United States or the Panama Canal Zone of any conserved commodity (commodities included in the export conservation list) which has originated in the continental United States, unless an application has been made and the license for such exportation has been obtained prior to the shipment of the said commodity from the continental territory of the United States.

2. When application is made for a license to export a conserved commodity from any insular possession of the United States or the Panama Canal Zone, the application must be accompanied by satisfactory evidence showing whether the commodity to be exported originated in the continental United States. If the commodity originated in the continental United States, the date on which it was shipped to the insular possessions or the Panama Canal Zone should be shown in the evidence which accompanies the applications.

3. The foregoing regulations shall not apply to the exportation of small quantities of conserved commodities such as it has been customary to ship in carrying on the normal local commerce between any of the insular possessions of the United States or the Panama Canal Zone and near-by foreign countries.

RESTRICTIONS PUT ON IMPORT OF HEMP AND OTHER SEEDS

In a new ruling (W. T. B. R. 231), hemp seed, canary seed, and alfalfa seed, used principally for feeding of caged birds and, in the case of canary seed, to a certain extent, for feeding blooded stock, have been placed on the list of restricted imports by the War Trade Board as from September 18, 1918. All outstanding licenses for the importation of these seeds have been revoked as to ocean shipments from abroad after September 18, 1918, the importation of hemp seed and canary seed by ocean shipment from abroad after that date being totally prohibited.

No licenses will hereafter be issued for the importation of alfalfa seed for ocean shipment from abroad after September 18, 1918, except for such shipments as the seeds stocks committee of the Department of Agriculture may approve, and applications therefor must be submitted to the seeds stocks committee for its recommendation before action thereon is taken.

It is estimated that a saving of 1,800 dead-weight tons will be effected by the restrictions on these seeds which come in the case of hemp seed from China, canary seed from Argentina, and alfalfa seed from Russian Turkestan. Adequate substitutes for these seeds for the feeding purposes mentioned above are found in the United States.

GERMAN-OWNED STEEL PLANT IS SOLD FOR $1,312,000 BY ALIEN PROPERTY CUSTODIAN

MONEY TO BUY LIBERTY BONDS

The Orenstein-Arthur Koppel Company Now 100 Per Cent American—Cited as an Example of Prewar German Methods.

A. Mitchell Palmer, Alien Property Custodian, sold the Orenstein-Arthur Koppel Co. at public auction Thursday afternoon (Sept. 12), in front of the main office building of the company's plant at Koppel, Pa., to N. A. Chamberlain, auditor of the Pressed Steel Car Co., for $1,312,000.

This concern was the first of the large German-owned corporations taken over by Mr. Palmer to be placed on the auction block. The proceeds are to be invested in Liberty bonds. The sale was under the supervision of Joseph F. Guffey, director of the bureau of sales of the Alien Property Custodian's office, and included all of the assets of the company.

Only American Owners.

Only American citizens can buy the Orenstein-Arthur Koppel Co. When the sale is formally consummated it will mark the transformation of the company from a 100 per cent German-owned concern into a 100 per cent American business corporation. The sale by Mr. Palmer wipes out every vestige of German ownership, the concern becoming thoroughly American in its character.

The Orenstein-Arthur Koppel Co. is a branch of the Arthur Koppel Aktiengesellschaft, a German corporation, the main office of which is in Berlin. It is engaged in the manufacture of mining machinery, coal cars, transportation systems, and goods of that character, and does a very large business in construction which is used inside of plants for the carriage of loads, either by overhead or surface tracks. Much material of this kind has been supplied to the United States and the British Government.

Included in the sale of the Orenstein-Arthur Koppel Co. are a number of subsidiary companies, which it owns. They are the Koppel Land Co., the Beaver Connecting Railroad Co., the Koppel Water Co., and the Koppel Sales Co., of Koppel, Pa.; the Pennsylvania Car & Manufacturing Co., of Pittsburgh; and the Universal Railway Products Co., of New York.

The plant at Koppel consists of an erecting shop, machine shop, forge shop, car shop, woodworking shop, track shop, power building, works office building, and central office building. The company also owns 49 houses, a hotel building, about 450 acres of land, and about 709 plotted lots.

In addition to its plant at Koppel, the company owns a large warehouse at Willow Avenue and Seventeenth Street, Hoboken, N. J., which will also be included in the sale.

Example of German Methods.

The Orenstein-Arthur Koppel Co. furnishes an excellent example of the German prewar methods in obtaining a foothold in an essential American industry—an industry through which valuable military information was obtained and sent to Germany. About 10 years ago the Orenstein & Koppel-Arthur Koppel Aktiengesellschaft, a German corporation with its principal office in Berlin, organized a branch in this country under the laws of Pennsylvania. It was called the Orenstein-Arthur Koppel Co.

The company established itself at Koppel, which is about 35 miles from Pittsburgh. As the business of the company grew, the subsidiary companies were organized and branch offices were established in New York, Chicago, Pittsburgh, and San Francisco.

Many Branches Elsewhere.

The parent concern in Germany had many branches and plants in South American countries, Cuba, and Mexico, German Africa, England, and Russia, and the establishment of a branch plant in this country completed the chain that would give the Germans practically world control of this particular industry.

The Orenstein-Arthur Koppel Co. installed light railway equipment in practically all American munition plants, steel plants, and kindred concerns. It had contracts with the Westinghouse Co., with the United States Steel Corporation, with the Du Pont Works, and with nearly half of the big industrial plants operating in this country.

Under these conditions it can readily be seen how easy it was for this German-owned concern to supply information of great military importance to the German Government regarding the big industrial and munition plants in this country. The American business was conducted by a committee composed of Arthur Riche, Karl Hansen, and Eric Joseph, all of them German subjects now interned.

Taken Over Several Months Ago.

The Orenstein-Arthur Koppel Co. was taken over by the Alien Property Custodian some months ago. Since then it has been operated as an American concern under the supervision of T. Hart Given, who was appointed by Mr. Palmer as his representative at the plant.

Director McAdoo Urges Shopmen to Do Best

In a speech to railroad shopmen at Altoona, Pa., Director General McAdoo urged every shopman to put forth his best endeavor in getting locomotives in working order. The Director General said:

"Every bad locomotive is a Prussian soldier.

"Every idle locomotive is working for the Kaiser.

"Every live locomotive is an American soldier.

"Every moving locomotive is working for Uncle Sam.

"Let us get on top of the Prussian locomotives and make American soldiers out of them."

HOW THE HIGHWAYS TRANSPORT COMMITTEE AIDS WAR PROGRAM

The Highways Transport Committee of the Council of National Defense authorizes the following:

That the work of the War Industries Board, looking to the conservation of all materials entering into manufactures; the efforts of the Fuel Administration tending to the saving of space in railroad transportation that coal in needed quantities may be transported the coming fall and winter; the efforts of the Railroad Administration looking to the curtailment of unnecessary use of rail transport in every way possible are being supplemented in a most material way through the medium of the activities of the Highways Transport Committee, Council of National Defense, is the view being strongly expressed by those leaders in Washington in most direct touch with big war problems.

View of Gen. Goethals.

Among others, Maj. Gen. George W. Goethals, Assistant Chief of Staff, United States Army, sees in the work of the Highways Transport Committee a potential force capable of aiding in a vital way the work of the great war bodies of Washington. Recent utterances of the United States Fuel Administration and the War Industries Board drive home the need for conservation of rail transportation, especially in the States east of the Mississippi. So urgent is this need no interference with it will be brooked by those in authority.

Gen. Goethals, in a letter touching its activities, refers especially to the "great value" of the work of the Highways Transport Committee "in speeding up the delivery of munitions and other Army supplies." In promoting the rural motor express idea, the return loads bureau, its plan of cooperation with the Federal Railroad Administration and the relief of terminal congestion, this body is daily producing concrete and satisfactory results along the line of those of its activities referred to by Gen. Goethals.

Letter to Mr. Hargreaves.

The letter of the latter, addressed to R. C. Hargreaves, secretary, commenting upon the extension of the committee's work throughout the country, says in part:

> It is with pleasure that I have noted the splendid work which is being done by the Highways Transport Committee in helping to increase the Nation's transportation facilities by the development of the highways and the effective and efficient use of the motor truck.
>
> So far as this department is concerned, the work of your committee is of great value in that it tends to result in speeding up the delivery of munitions and other Army supplies which might otherwise be delayed through terminal congestion during this war time.

COTTON REGULATED IN ITALY.

For the duration of the war and until six months after the conclusion of peace, reports Consul General David F. Wilber, of Genoa, firms in Italy possessing machinery suitable for the production of yarns and manufactures of cotton necessary to the military administration must, under a recent decree, set aside a certain proportion of their equipment for the exclusive production of goods desired by the military authorities.—Commerce Reports.

WAR INDUSTRIES BOARD CHAIRMAN TELLS WHY THE BUILDING OF NEW SCHOOLHOUSES SHOULD WAIT ON THE END OF THE WAR

The War Industries Board authorizes the following:

Bernard M. Baruch, chairman of the War Industries Board, has written a letter to Mayor John F. Hylan, of New York, on the subject of the school-building program that New York desired to put under way, amounting to more than $9,000,000. The case of New York is typical of the whole country, and the board's ruling, which the letter expresses, is intended as a wide precedent.

While agreeing heartily to the necessity of providing to the fullest for the education of the children, Mr. Baruch points out the danger at this time of allowing the construction side of such plans to militate against the fulfillment of the war program, which is seriously threatened by nonmilitary demands. He asks that methods be dvised to make existing plants do the work instead of building new ones during the period of increasingly heavy pressure on man power, materials, especially steel, and the other elements involved.

Text of the Letter.

The letter reads:

The Honorable the MAYOR OF NEW YORK.

MY DEAR MR. MAYOR: Out of New York's need for school buildings, which you have set forth in your letter to me dated September 6, there flows a condition Nation-wide, and which reaches to the very front of our battle line. Perhaps few of us realize the close relationship between the brick that is set in the walls of a building and the shot that is fired at the crumbling structure of German world domination. Yet the association is direct and intimate and it is our duty to understand this fact and, understanding, to act upon it.

Because the case of New York is typical of the whole country; because the rule in one case must be, and is, evenly applied to all, I am glad that you brought to my personal attention the matter in which you are interested, since it affords an opportunity to make plain the extraordinary situation we face and the need for a whole-hearted, unexcepted cooperation to the end of winning the war.

Effect of Unnecessary Work.

It is not too much to say that every unnecessary effort weakens the fighting efficiency of ourselves and our associates in the war. Every unnecessary undertaking of an industrial nature delimits the scope of our activities at the front. It ties up labor, capital, materials, facilities, transportation, and fuel — the six great elements that form the base of our economic structure. There is, at any given time, only a limited amount of each of these bases available. At this moment of strain all should be concentrated upon those enterprises directly connected with the war. To divert them to other ends, no matter how fine those ends may be in themselves, is at this period worse than a crime—it is a blunder that may cost us dear.

I am a graduate of New York's grammar schools and her city college. That fact makes me look with kindlier interest upon your request, but it does not and can not blind me to the necessities of the case.

Claims of Children Recognized.

I would not have you think, my dear Mr. Mayor, that what I say to you is to be taken as disdaining the claims of our children to be educated; that is furthest from my thought. What I do seek is your agreement that at this grave time there should be first in our hearts and our minds the unity of sacrifice; the willingness to do without that which is not an unescapable necessity; to suffer, if so be it, deprivation to escape heavier privation; to make need and not desire our law.

Surely, under your direction, New York, for the time being, can make one building do the work of two; she can devise expedients whereby none of her young shall be unschooled, and yet no obstacle be placed in the way of the war program. She can and will do what other of our cities and States have done in abandoning plans for new roads, for new structures, and kindred developments, which widen the gap between our limited supply and the ever-increasing demand arising from our war needs.

To postpone your enterprise in such a way as to work no hardship and do it cheerfully and willingly and in the spirit of the unfailing courage that animates our forces at the front, for whose welfare the sacrifice is made, is to set an example that will be a tonic and a stimulant to the rest of the country, which will be no slower in responding to the civilian order of the day: He serves best who saves most.

Not Physically Possible.

There is still one more thought that I wish to convey to you and that is: Even were the War Industries Board able to see its national duty as coinciding with your request, my reply would still have to be no, for the simple reason that it is not physically possible for me to release the materials you ask for because there are no free supplies of these materials, unless—and this is unthinkable—you would expect that they be taken from the very vitals of our war-making machinery. And this applies with equal force to the heavy demand on man power, already acutely short, your proposed enterprise entails.

Your sympathy and support will help the Nation; your failure to cooperate will add to our embarrassment. I am certain that between these two courses your choice will offer no difficulty. It will be that which the Nation has made: To win the war and win it quickly.

I am, with respect, sincerely,

B. M. BARUCH.

KILLED ATTEMPTING RESCUE.

The Navy Department is informed that Russell Charles Jones, seaman second class, U. S. N., was killed on September 11 at Port Arthur, Tex., while attempting to rescue people from a burning hotel. Jones enlisted June 14, 1917, at Kansas City, Mo.; father, Jesse G. Jones, Mercerburg, Pa.

CHANGE MADE IN NAME OF WAR CANTONMENT COMMISSION

The following announcement is authorized by the War Department:

"The jurisdiction of the commission hitherto known as the Cantonment Adjustment Commission having been extended to embrace all other construction work which may be from time to time during the war carried on by the War Department, such as aviation fields, warehouses, storage facilities, and the like, it has been deemed desirable, in the interest of accuracy of description of the function of the commission, to change its name to the 'Emergency Construction Wage Commission,' and it is directed that from this date the commission shall be so designated."

The Emergency Construction Wage Commission, formerly known as the Cantonment Adjustment Commission, has been assigned responsibility not only for the adjustment and control of wages, hours and conditions of labor in the construction of cantonments, as originally specified, but also, under later direction of the Secretary of War, for all other army construction work now being done or which shall be done by the War Department.

The personnel of the commission consists of three persons, appointed by the Secretary of War; one to represent the Army, one the public, and one to represent organized labor.

The commission appointed by the Secretary of War consists of E. M. Hopkins, chairman, representing the public; Col. J. H. Alexander, representing the Army; and J. R. Alpine, acting president of the American Federation of Labor, representing organized labor.

Campaign to Get More Workers for the Mines

Through its Mining Division the United States Employment Service of the Department of Labor has opened a drive to secure adequate working forces for the coal and war metal mines of the country.

The campaign will be handled by James Lord, Chief of the Mining Division of the Employment Service, who also is president of the Mining Department of the American Federation of Labor; E. B. Chase, general manager of the Berwind-White Coal Mining Co., of Philadelphia, representing the mine operators, and William Diamond, former statistician of the United Mine Workers.

As the opening step a circular letter, signed by Director General Densmore, is being sent out to the secretaries of 3,500 locals of the United Mine Workers in all parts of the United States. Through the use of their transfer card records these secretaries are expected to report to the Mining Division of the Employment Service the names, addresses, and present locations of all practical mine workers who to their knowledge have in the past few years left the mines for other work. As soon as the reports of transfers have been received the Employment Service will get in touch with all those who have left the industry for less important occupations and by means of personal solicitation urge their return to the mines.

ADDITIONAL NAMES OF AMERICAN PRISONERS OF WAR AND THE GERMAN CAMPS WHERE THEY ARE BEING HELD

The War Department authorizes the publication of the following list of soldiers who are prisoners of war at various camps in Germany:

CAMP CIESSEN.

Pvt. Frank J. Aliano. Joseph Aliano, father, 66 Park Street, Bristol, Conn.

Pvt. William H. Sefton. Mrs. Amy Sefton, mother, 1729 Smith Street, North Providence, R. I.

Pvt. Thomas A. Lysett. Mrs. T. H. Lysett, mother, 140 Beckman Street, Saratoga Springs, N. Y.

Pvt. (first class) John J. Milan. Mrs. M. Milan, mother, 925 East Broadway, South Boston, Mass.

Pvt. Walter Chmiel. Stella Chmiel, sister, 572 Ogden Street, Bridgeport, Conn.

Pvt. George C. Collver. Mrs. Alice Collver, mother, 893 Grand Avenue, New Haven, Conn.

Pvt. Frank Gillespie. J. N. Gillespie, uncle, 683 Columbia Road, Dorchester, Mass.

Pvt. Lee W. Lamere. Mrs. Elizabeth Lamere, mother, 269 Elm Street, Lakeport, N. H.

Pvt. (first class) Oliver T. Elliott. Oliver C. Elliott, father, 17 Davis Street, Boston, Mass.

Pvt. Harry Svitak. Mrs. Carrie Svitak, mother, 2744 East Pacific Street, Philadelphia, Pa.

Pvt. (first class) William R. Hier. George W. Hier, father, Box 158, Bristol, Vt.

Pvt. Frank J. Antkonik. John Antkonik, father, George Street, Webster, Mass.

Pvt. Maurice B. Fischman. Mrs. M. Fischman, wife, Lamberton Street, New Haven, Conn.

Pvt. Eugene C. Mielewski. John Mielewski, father, 18 Eden Street, Providence, R. I.

Pvt. Tony Bichum. Michael Bichum, brother, 38 Grove Street, New Britain, Conn.

Capt. Edwin W. Barnes. Miles J. Barnes, father, 604 Second Avenue, West Haven, Conn.

Pvt. George N. Fortin. William O. Fortin, father, 433 Dexter Street, Central Falls, R. I.

Pvt. Frank Daley. Mrs. H. E. Daley, mother, 66 Garfield Street, Hyde Park, Mass.

Pvt. Elijah Collins. R. F. Collins, father, Warwick, R. I.

Pvt. Rocca Summa. Tony Summa, brother, Mill Street, Waterbury, Conn.

Pvt. George Evans Newton. Anna Newton, mother, 65 Capitol Avenue, Hartford, Conn.

Pvt. James N. Muldoon. W. J. Muldoon, father, 10 Bigelow Street, Brighton, Mass.

Pvt. Roy R. Mason. Miss Sadie Mason, sister, 601 West Orange Street, Gainesville, Fla.

Pvt. Clyde D. Charrette. Dr. H. A. Sinter, uncle, South Deerfield, Mass.

Pvt. Charles F. Sturgeon. Mrs. Bertha Sturgeon, mother, 2 Mill Street, Bristol, Conn.

Pvt. Carl Holst. Mrs. M. Holst, mother, 1258 Commonwealth Avenue, Allston, Mass.

Pvt. (first class) Owen Dougherty. Mrs. Roger Dougherty, mother, 722 Seville Avenue, Chester, Pa.

Pvt. Mellvill Harger. Mrs. Bertha Harger, mother, 37½ East Main Street, Battle Creek, Mich.

Pvt. Lawrence Perlmutter. Mrs. Lena Perlmutter, mother, 16 East One hundred and eleventh Street, New York, N. Y.

Pvt. Alexander Kraukuszeski. Stanley Kraukuszeski, Dobre, Poland.

Pvt. Fillipo Daniele. Joseph Daniele, 343 Union Street, Lynn, Mass.

Pvt. Frank Bretschneider. Anton Bretschneider, brother, 1612 Loomis Street, Chicago, Ill.

Corpl. Robert Walker. Mrs. Bridgett Walker, 232 Grand Street, Jersey City, N. J.

Pvt. (first class) Earle C. Rodgers. Samuel Rodgers, father, Danville, Vt.

Pvt. William C. Sweeney. Mrs. Mary Sweeney, mother, 376 Athens Street, Boston, Mass.

Pvt. Randolph S. Stewart. Alfred Stewart, father, 227 West Main Street, Plainsville, Conn.

Pvt. (first class) Lionel S. Robinson. Mrs. Mary E. Robinson, mother, R. F. D., box 104, East Hampton, Conn.

Pvt. Edward M. Pope. Frank E. Pope, father, Hardwick, Vt.

Pvt. Frank Narowski. Ludvika Kapusta, 8 Water Street, Derby, Conn.

Pvt. John A. Minor. Mrs. Ellen Minor, mother, 1190 Whalley Avenue, New Haven, Conn.

Pvt. Burnett A. Herdman. Mrs. Martha Herdman, mother, 635 North High Street, Middletown, Conn.

Pvt. Ejnar J. Turning. Ernest Turning, father, 83 Prospect Street, Middletown, Conn.

Pvt. (first class) Charles Cropper. Walter Cropper, father, 76 Dagget Street, New Haven, Conn.

Pvt. William J. Chappa. John Chappa, box 33, Saugatuck, Conn.

Pvt. Homer Akers. Mrs. Leone Akers, mother, route No. 3, Norwood, Mo.

Pvt. Alex Stefanowsky. William Stefanowsky, Kieff, Russia.

Mechanic Peter F. Plant. Fred St. Lawrence, uncle, 15 Kidder Street, Quincy, Mass.

Pvt. Charles H. McGovern. Homer Bennit, 143 Henry Street, New Haven, Conn.

Pvt. Herbert V. Johnson. Charles Johnson, father, 10 Court Street, New Haven, Conn.

Mech. John F. Cronin. Mrs. Anna May Hodge, sister, 102 Main Street, Portland, Conn.

Pvt. Harry C. Caverly. Joseph Caverly, brother, 255 Green Street, Manchester, N. H.

Pvt. William Cardell. Mary Cardell, mother, 19 Homestead Avenue, Granston, R. I.

Pvt. Chester D. Gravatt. Mrs. Henry Gravatt, mother, 144 Embury Avenue, Ocean Grove, N. J.

Pvt. Vincent Allen. Thomas Allen, father, 2 Summer Street, Norwalk, Conn.

Pvt. Battiste Cuzzipoli. Antonio Cuzzipoli, brother, R. F. D. No. 55, Springdale, Conn.

Pvt. (first class) Enoch H. Doble. W. H. Doble, father, 24 South Street, Quincy, Mass.

Pvt. Edward J. Murray. Mrs. Elizabeth Murray, mother, 24 Berlin Avenue, Southington, Conn.

Pvt. (first class) Percival S. Barnes, Miles Barnes, father, 604 Second Avenue, West Haven, Conn.

Pvt. Tony Carione. Patsy Carione, father, 13 George Street, Norwalk, Conn.

Pvt. Lester E. Clark. Mrs. Marie Clark, mother, 355 Norton Street, New Haven, Conn.

Pvt. George J. McDonald. Mrs. Rachael McDonald, 2558 Washington Street, Roxbury, Mass.

Pvt. Leo A. Maher. Frank B. Maher, brother, 5 Rowell Street, Dorchester, Mass.

Pvt. Francesco Mulfitano. Alasanto Mulfitano, father, State Street, Port Chester, N. Y.

Pvt. Herman F. Moreau. Mrs. C. Moreau, mother, 34 Cabot Street, Providence, R. I.

Pvt. Michael M. Olie. Peter Olie, father, Box 23, Pequabuck, Conn.

Pvt. (first class) Oliver J. Ouellette. Alfred Ouellette, father, Lyndonville, Vt.

Pvt. Louis Pecerrilo. E. Pecerrilo, brother, 15 Auburn Street, New Haven, Conn.

Pvt. (first class) Emmit J. Prosser. Mrs. Martha M. Prosser, mother, 209 N. Sheridan Street, Minneapolis, Kans.

Pvt. (first class) Edward W. Prunier. Albert E. Prunier, brother, 248 West Hazel Street, New Haven, Conn.

Pvt. (first class) Danel E. Sala. C. Sala, father, West Wareham, Mass.

Pvt. James Sexton. Mrs. M. F. Burke, sister, 31 Fairview Street, Brattleboro, Vt.

Pvt. (first class) Ernesto DeMartino. Carlo DeMartino, brother, 1035 Broad Street, Hartford, Conn.

Pvt. Frank Sutcliffe. Joseph Sutcliffe, brother, Fairhaven, Mass.

Pvt. Harry Swanson. Mrs. N. K. Swanson, mother, 164 Beach Street, Waverly, Mass.

Corpl. Charles J. Szilanskis. John Szilanskis, father, 10 Cross Street, South Norwalk, Conn.

Pvt. (first class) John L. Whalen. Mrs. Thomas A. Whalen, mother, 59 Congreve Street, Roslindale, Mass.

Pvt. Louis Sandler. Moris Sandler, father, 2211 South 6th Street, Philadelphia, Pa.

Pvt. Frank J. Meyer. John Meyer, father, 321 Douwalter Street, Reading, Ohio.

Pvt. (first class) Ellis M. Young. Dr. E. W. Young, uncle, 640 Broadway, Everett, Mass.

Pvt. Howard M. Garton. Albert Garton, father, 47 Trenton Street, Providence, R. I.

Pvt. Harold Owen. Mrs. Owen, mother, 48 Elliott Street, New Haven, Conn.

Pvt. William Hopke. Mrs. Bertha Hopke, mother, 358 Bainbridge Street, Brooklyn, N. Y.

Pvt. Carl Sudock. Mrs. Eva Sudock, mother, 470 Oak Street, New Haven, Conn.

Pvt. Adillard Barbeau. Toussaint Barbeau, father, Dyer Street, Danielson, Conn.

Pvt. Alfred M. Gesner. Mrs. A. M. Gesner, Hadlyme, Conn.

Mech. Augustus H. Chapman. L. H. Chapman, father, Colchester, Conn.

CAMP SAARBRUCKEN.

Pvt. Edward Thune. Fred Thune, brother, 938 Grape Street, Syracuse, N. Y.

Pvt. John A. Murphy. Jane E. Murphy, mother, 2 Winter Street, Amesbury, Mass.

Cpl. Jack Bathgate. Mrs. Mary Bathgate, mother, Plainfield, Avenue, Orange, Conn.

Cpl. Thomas F. Barry. James Barry, father, Olive Street and Grand Avenue, New Haven, Conn.

Pvt. Joseph P. Leary. John Leary, father, 14 Warwick Street, Middletown, Conn.

Pvt. (first class) Lester Bigelow. Mrs. William Bigelow, mother, 749 Dixwell Avenue, New Haven, Conn

Pvt. William J. Lilly. Miss Anna Kelly, friend, 250 Bristol Street, Southington, Conn.

CAMP LANDSHUT.

First Lieut. Burr W. Leyson. Burr W. Leyson, father, 114 State Street, Boston, Mass.

Second Lieut. William H. Plyler. Mrs. Loula Plyler, mother, Kershaw, S. C.

Capt. Joseph F. Williamson. Frederick F. Williamson, father, Sebastopol, Cal.

HOSPITAL AT GOTTINGEN.

First Lieut. Harold A. Goodrich. A. H. Goodrich, father, New Haven, Mo.

CAMP TUEBINGEN.

Pvt. Edward Roberts. Mrs. Belle Roberts, mother, Iroquois, S. Dak.

CAMP RASTATT.

Capt. Benjamin P. Burpee. Wm. B. Burpee, father, 250 North Bay Street, Manchester, N. H.

CAMP PARCHIM.

Pvt. William C. Nelson. Harry Nelson, brother, Wenatchee, Wash.

CAMP LECHFELD.

Lieut. Herman Whitmore. Mr. Whitmore, 22 Mount Vernon Street, Haverhill, Mass.

CAMP HAMELN.

Lieut. Louis M. Edens. Mrs. Claire Belle Edens, wife, Cabool, Mo.

MILITARY HOSPITAL, DANZIG.

Pvt. Hoyt D. Decker. W. F. Decker, father, 431 West Aberbewine Avenue, Vincennes, Ind.

CAMP OHRDRUF, THURINGEN.

First Lieut. Samuel Miller. Mrs. Ida Miller, mother, Lakeville, Pa.

CAMP VILLINGEN.

Second Lieut. Clyde C. Vaughan. Mrs. J. H. Vaughan, mother, Liberty Hill, Tex.

Sub-Lt. Harold Willis. John P. Willis, father, 243 Park Street, Newton, Mass.

CAMP STRALSUND.

Hamlet Horatio Durant. Mrs. Clara Offhouse, 818 Bellevue Avenue, Detroit, Mich.
John F. Egan. Miss Sarah Brown, 95 Union Park Street, Boston, Mass.
Ray E. George. Albert L. George, Kolin, Mont.
Charles T. Gott. Mrs. Stella Gott, Mellett, Ind.
John R. Graham. Gus E. Graham, 1319 Virginia Street, Berkeley, Cal.
James W. Guerry. Mrs. C. H. Smith, 337 Adams Street, Macon, Ga.
Frederick J. Harter. Mrs. Laura Harter, Witten, S. Dak.
Cleo C. Heuchan. Harry Henry Heuchan, 827½ South Walnut Street, Muncie, Ind.
Clement W. Hilderbrand. Mrs. Lillian M. Starr, 128 Melrose Avenue, Seattle, Wash.

TAX ON BRITISH LUXURIES.

Commercial Attaché Philip B. Kennedy, in London, England, has transmitted a newspaper clipping giving the full text of the report of the select committee of the House of Commons on the luxury tax, including a list of all articles proposed for taxation. The document may be examined in the bureau and inquiries regarding the proposed measure will be answered upon request.—Commerce Reports.

AMERICAN PRISONERS OF WAR AND GERMAN CAMPS WHERE HELD

(Continued from page 9.)

CAMP GRANDENZ.

First Lieut. Andrew S. Robinson. Mrs. Alice Robinson, 12 East Fourteenth Avenue, Columbus, Ohio.
Capt. Francis J. Cahill. Dr. John T. Cahill, brother, 12 Main Street, Hoosick Falls, N. Y.

CAMP PFORZHEIM.

First Lieut. J. F. Crawford. Eliza H. Crawford, wife, Warsaw, N. Y.

CAMP TUCHEL.

Sergt. Frank L. Smith. Mrs. R. L. Smith, mother, 21 South Avenue, Revere, Mass.
Sergt. Joseph P. Nolan. P. P. Nolan, father, 62 Chestnut Street, Hartford, Conn.
Pvt. Harold C. Lawrence. R. H. Lawrence, father, 315 South Fourteenth Street, Independence, Kans.
Corpl. John E. Smith. Mrs. Pearl Smith, wife, 325½ Main Street, Lyons, Iowa.
Corpl. George D. McHugh. Mrs. Amelia McHugh, mother, 109 Tyler Street, New Haven, Conn.
Corpl. Henry E. Woods. William O'Brien, uncle, 319 Sixty-eighth Street, Brooklyn, N. Y.
Sergt. Frederick Miller. Mrs. Mary Miller, mother Evergreen Court, New Haven, Conn.
Pvt. Edward A. Patenaude. Mrs. Olive Patenaude, mother, 89 Peck Avenue, West Haven, Conn.
Sergt. Harold Carlson. Mrs. E. C. Carlson, mother, 83 Lansdale Street, Dorchester, Mass.
Sergt. Walter J. Reynolds. Mr. Reynolds, father, 502 Orchard Street, New Haven, Conn.
Sergt. Thomas J. Kirk. Mrs. Mary Kirk, 229 Spring Street, Medford, Mass.
Corpl. Sewall W. Rich. T. A. Rich, father, 19 Radford Lane, Dorchester, Mass.

CAMP DARMSTADT.

Pvt. John W. Jones. Mrs. Mary Jones, mother, 1014 Church Street, Oxford, Ala.
Corpl. Joseph Sabatini. Charles Sabatini, father, 11½ Sackman Street, Brooklyn, N. Y.
Pvt. Howard N. Webb. Mrs. S. Webb, mother, 9 Jackson Street, Ansonia, Conn.
Pvt. Louis G. Ziegra. Mrs. Mary Ziegra, mother, Deep River, Conn.
Sergt. Erving A. Dresser. Allen F. Dresser, father, 35 Pine Street Bristol, Conn.
Corpl. Melvin R. Carlson. Martin Carlson, father, 55 Paul Gore Street, Jamaica Plain, Mass.
Pvt. (first class) Arthur Heon. Napoleon Heon, father, 10 Railroad Street, St. Johnsburg, Vt.
Pvt. (first class) Arthur S. Johnson. Martha M. Johnson, mother, 377 Chappel Street, New Haven, Conn.
Pvt. (first class) Newman S. Gee. Mrs. Thomas Gee, mother, Caribou, Me.
Pvt. Ernest A. French. Mrs. Martha French, mother, 42 Irvington Street, New Haven, Conn.
Pvt. Carl Fey. Mrs. Lottie Troup, 314 Canal Street, Schuylkill Haven, Pa.
Pvt. Paul A. Peterson. John E. Peterson, father, 32 Walnut Street, South Farms, Middletown, Conn.
Corpl. Harold A. Bergman. Mrs. W. A. Bergman mother, 21 Townsend Street, New Haven, Conn.
Pvt. (first class) William J. Wright. Minturn T. Wright, father, Chestnut Street, Chestnut Hill, Pa.

CAMP UNKNOWN.

Mechanic James F. Rodgers. Mrs. James F. Rodgers, wife, 2004 Amber Street, Philadelphia, Pa.
Corpl. James J. McCaffry. Mrs. Sarah McCaffry, mother, 2144 North Second Street, Philadelphia, Pa.
Pvt. William B. Adams. William B. Adams, father, 4228 Cleveland Street, St. Louis, Mo.
Pvt. Isaac Bollinger. Mrs. Anna Bollinger, mother, 214 Woerner Avenue, Jeffersonville, Ind.
Corpl. Lawrence Boyle. Robert Felton, uncle, R. F. D. No. 1, Toronto, Ohio.
Pvt. (first class) Robert F. Spicer. Mrs. Mary Spicer, mother, 8618 Tinicum Avenue, Philadelphia, Pa.
Pvt. (first class) Gilmore R. Brown. Mrs. Jennie Brown, mother, Brookville, Pa.
Corpl. Richard F. Metcalf. Dr. Ben H. Metcalf, father, 170 Winthrop Street, Winthrop, Mass.
Pvt. James Coffey. Mrs. Delia Coffey, mother, 2629 Federal Street, Philadelphia Pa.
Pvt. John W Jones. Mrs. E. C. Bamback, sister, 22 Plymouth Avenue, Buffalo, N. Y.
Mechanic William A. Shaner. Miss Viva Viola Butter, sister, Ellwood City, Pa.
Pvt. Hugh Dial. J. H. Dial, father, Ida, La.
Pvt. Frank J. Bernas. Mrs. Mary Bernas, mother, Franklin Hotel, 360 East Washington, Elmira N. Y.
Pvt. Vasil Lugin. Mrs. Matrona Lubonacz, sister, Wolost, Selo, Liswkowitz, Russia.
Pvt. William D. Bell. Mrs. Cecelia E. Bell, mother, 495 Hancock Street, Quincy, Mass.
Corpl. Howard C. Viering. L. Tabell, 671 Third Avenue, West Haven, Conn.

CAMP LIMBURG.

Pvt. John L. Burr. John A. Burr, father, R. F. D. No. 4, Washington, Pa.
Corpl. Charles A. Bunting. Mrs. T. R. Bunting, mother, 649 North Thirty-fifth Street, Philadelphia, Pa.
Pvt. Serafine S. Defaria. Mrs. Marie L. Goulaiter, mother, Rua, Cuizeiro, Capelo, Fayal, Azores Islands.

Complete List of Colleges and Schools in America Where Boys May Be Trained for U. S. Military Duty: Radical Change Made in the Length of Courses

The War Department authorizes the following:

A radical change has been made in the college year to meet the war emergency of training soldiers in collegiate schools. The two-term system is to be replaced by an all-year course divided into terms of three months' duration. The War Department, through the committee on education and special training, is now contracting with the colleges which have been accepted for units of the Students' Army Training Corps for nine months of academic work for the student soldiers.

Each college will furnish, with the allied academic subjects, also a war-aims course dealing with the underlying issues of the war. This may be a definite course similar to the course already established in the vocational section of the Students' Army Training Corps, or the same purpose may be accomplished by classes in history, Government, economics, philosophy, or modern literature.

Rapid Progress Being Made.

Rapid progress is being made in the execution of the devised plans for the Students' Army Training Corps. In the 400 colleges, universities, and technical schools which have thus far accepted the War Department's offered contract to place their facilities at the Nation's service for the combined military and academic training of their young men students under Army control, steps to house, feed, drill, and instruct from 100,000 to 150,000 enrolled pupils are being taken. The outlook is that October 1, or soon, thereafter, will see the entire project in successful operation.

Soldiers in the United States Army.

Students over 18 entering the fall term of the designated colleges become by voluntary induction soldiers in the United States Army, sheltered, fed, clothed, and equipped at Government expense, and with the pay of privates. But students younger than 18 who shall enter any of these schools this autumn may receive similar training at their own expense until they arrive at military service age, when, after registering on dates to be hereafter announced, they may be inducted as soldiers into the Students' Army Training Corps.

The student soldiers will be given military instruction under officers of the Army and will be kept under observation and test to determine their qualifications to become candidates for officers' commissions or for technical experts, such as engineers, chemists, or doctors. After a certain period they will be selected and assigned to military duty in one of these ways: (1) Sent to a central officers' training camp, or (2) to a noncommissioned officers' training school, or (3) kept in the original school for further intensive work in a specified line for a limited time, or (4) put into technical training of military value, or (5) transferred to a cantonment for duty with troops as a private.

The student soldiers of the Students' Army Training Corps will be housed variously, as the facilities at each institution shall permit. So far as available fraternity houses and dormitories will be used. Where needed barracks will be built. Pending the determination and adjustment of exact costs at each school, the Government will allow for subsistence and housing a per diem rate of $1 for each man, a rate based on five months' experience with 100 collegiate institutions and 100,000 soldiers in the National Army Training Detachment, and showing that the average cost of housing is 15 to 20 cents a day and of subsistence (Army ration or equivalent) 70 to 80 cents. Inasmuch as the Government's assumption of costs will not begin until about October 1, schools opening prior to that time may collect a proportion of the tuition fees to cover the advance period, and students who shall have registered under the selective-service act on September 12 will need to provide their own expenses until inducted into the Students' Army Training Corps.

Hours for Instruction.

Under the scheme of instruction planned for this corps, 11 hours a week will ordinarily be devoted to strictly military subjects, drill and physical training, and 42 hours to lectures, recitations, laboratory instruction, and the necessary preparation therefor, covering a restricted choice among a wide range of subjects usually found in a college curriculum. The subjects will vary as the student soldiers' objective varies and by permission courses may be enlarged or changed.

The Government expects to withdraw from the Students' Army Training Camp at the end of the first quarter those students who are 20 or more years of age, but those of 18 and 19 years may remain in school for some months longer, depending on the military needs.

No units of the Students' Army Training Corps will be established at secondary schools for the present, but a similar system to them may be instituted for these younger men at a later date. Young men of draft age of grammar-school or equivalent education may, however, offer to enter the vocational section of the corps through application to their local board. At present about 27,500 men are called for this section each month. Men in this section who show fitness may be assigned for further training in the collegiate section.

The Vocational Section.

What will now be known as the vocational section of the Students' Army Training Corps has been in operation since last April under the name of the National Army Training Detachments. It was established to provide the expanded Army quickly with a reserve supply of soldier specialists trained along vocational lines of important military value. Its range of instruction included radio and signal work, horse shoeing, auto mechanics, truck and tractor driving and repairing, locomotive repairing, instrument repairing, and similar work. These soldiers are assigned by local draft boards on call [illegible] or selected from the [illegible] to the various cantonments. The course of instruction covers six hours of vocational training and three hours of military instruction and drill daily for two months. Thus far [illegible] established at [illegible]. This vocational section is now to be merged in the Students' Army Training Corps, but the conditions of entrance will be as before, namely, by assignment of local boards as vacancies occur or as new units are established.

These institutions have been enrolled:

INSTITUTIONS IN COLLEGIATE SECTION OF STUDENTS' ARMY TRAINING CORPS.

Drake University, Des Moines, Iowa.
Grinnell College, Grinnell, Iowa.
Tufts College, Tufts College, Mass.
Boston College, Chestnut Hill, Mass.
University of Mississippi, University Post Office, Miss.
St. Louis University, St. Louis, Mo.
Dartmouth, College, Hanover, N. H.
Hamilton College, Clinton, N. Y.
Syracuse University, Syracuse, N. Y.
Davidson College, Davidson, N. C.
Ohio University, Athens, Ohio.
Dickinson College, Carlisle, Pa.
Lehigh University, South Bethlehem, Pa.
Armour Institute of Technology, Chicago, Ill.
Crane Junior College, Oakley Boulevard and Van Buren Street, Chicago, Ill.
De Pauw University, Greencastle, Ind.
Stevens Institute of Technology, Hoboken, N. J.
University of Buffalo, Buffalo, N. Y.
The Long Island College Hospital, Brooklyn, N. Y.
North Carolina State College, West Raleigh, N. C.
Trinity College, Durham, N. C.
The University of North Carolina, Chapel Hill, N. C.
The University of North Dakota, Grand Forks, N. Dak.
Miami University, Oxford, Ohio.
University of Cincinnati, Cincinnati, Ohio.
Western Reserve University, Cleveland, Ohio.
Temple University, Philadelphia, Pa.
Wofford College, Spartansburg, S. C.
Boston University, Boston, Mass.
Washington University, St. Louis, Mo.
Oberlin College, Oberlin, Ohio.
University of South Dakota, Vermilion, S. Dak.
Case School of Applied Science, Cleveland, Ohio.

Sealed Bids Wanted

General Engineer Depot, United States Army, 1438 U Street, Washington, D. C.—Sealed bids are wanted until dates indicated under circular proposals as follows for furnishing miscellaneous supplies for the General Engineer Depot. Additional information may be had upon application to the purchasing officer as above:

Proposal No. 1109, opening of September 24, 1918.—680 rubber tires for 60-inch, portable searchlight carriages.

Proposal No. 1111, opening of September 20, 1918.—300 power driven trench pumps as per specifications.

Proposal No. 1112, opening of September 24, 1918.—Railway Equipment as per specifications.

Proposal No. 1113, opening of September 24, 1918.—830,555 square yards poultry netting as per specifications.

Proposal No. 1114, opening of September 24, 1918.—Electrical supplies as per specifications.

Better than money because they earn money; buy a WAR-SAVINGS STAMP TO-DAY.

LIST OF QUARTERMASTER PURCHASES PASSED BY THE BOARD OF REVIEW

The following is a list of purchase orders and contracts approved by the board of review of the office of the Quartermaster General of the Army:

August 19, 1918.

CONTRACTS.

Schneider Bros., Brooklyn, N. Y., wool trousers.

J. David & Co., New York City, wool trousers.

Super-Mel Clothing Corporation, New York City, wool service coats.

Christie Clothing Co. (Ltd.), Montreal, Canada, wool service coats.

Max Wagner, Rochester, N. Y., wool trousers.

August 20, 1918.

PURCHASE ORDERS.

Nickel Commission Co., St. Louis, Mo., butter.

A. Braun Mfg. Co., St. Louis, Mo., pickles.

Wellington, Sears & Co., Boston, Mass, tent duck.

G. Washington Sales Co., Brooklyn, N. Y., coffee.

Stix, Baer & Fuller D. G. Co., St. Louis, Mo., towels.

Midso Gasoline Co., Tulsa, Okla., gasoline.

Vacuum Oil Co., New York City, oil.

Reading Saddle & Mfg. Co., Reading, Pa., hammers.

Columbus Packing Co., Columbus, Ohio, fresh beef.

Cannon Mills, New York City, terry cloth (gas masks).

Prudential Oil Co., New York City, gasoline.

Continental Car Co. of America, Louisville, Ky., troop seats.

H. Verhoeff & Co., Louisville, Ky., white oats.

Halliday Elevator Co., Cairo, Ill., white oats.

Twistlewood & Co., Cairo, Ill., white oats.

Walnut Creek Milling Co., Great Bend, Kans., bran.

Houser & Sutton, Newton, Ill., hay.

Houser & Sutton, Newton, Ill., timothy hay.

Jacob Miller & Son, Philadelphia, Pa., flannel shirts.

Kurshan Bros., New York City, canvas padding.

Smith, Hogg & Co., New York City, duck (29-inch).

S. W. Kamp & Son, Spencerville, Ohio, hay, recomp.; hay, baled.

International Motor Co., New York City, armored car.

American Steel & Wire Co., Washington, D. C., nails.

Continental Car Co. of America, Louisville, Ky., "B" bodies.

CONTRACTS.

The Linen Thread Co., New York City, thread.

Hope Webbing Co., New York City, gray tape.

Susquehanna Webbing Co., Bloomsburg, Pa., olive-drab webbing.

Messer Manufacturing Co., Boston, Mass., wool trousers.

Bradford Dyeing Association, New York City, dyeing and finishing twill.

Brightwood Manufacturing Co. (Inc.), New York City, puttees.

H. C. Tack Co., Cleveland, Ohio, tacks; saddlers' tack.

R. Wallace & Sons Manufacturing Co., Wallingford, Conn., spoons.

Cassidy-Fairbanks Manufacturing Co., Chicago, Ill., dough scrapers.

Lewiston Bleachery & Dye Works, Lewiston, Me., bleaching duck.

Middlesex Embroidery Works, South River, N. J., Coast Artillery colors.

Ramapo Finishing Corporation, Sloatsburg, N. Y., tent duck.

H. C. Tack Co., Cleveland, Ohio, saddlers' tacks.

Krout & Fite Manufacturing Co., Philadelphia, Pa., white twill.

Porter Bros. & Collins (Inc.), Albany, N. Y., flannel shirts.

Rosenwald & Weil, Chicago, Ill., wool trousers.

Wiseberg Manufacturing Co., Atlanta, Ga., cotton breeches.

Hope Webbing Co., Providence, R. I., olive-drab webbing.

United States Whip Co., Westfield, Mass., whip lashes.

Cohen, Goldman & Co. (Inc.), New York City, overcoats.

Edward Mrieger & Co., New York City, raincoats.

Selden Worsted Mills, Lawrence, Mass., shirting flannel.

Cohen Bros. Co., Milwaukee, Wis., leather jerkins.

Proser Bros., New York City, wool service coats.

The Felters Co. (Inc.), Boston, Mass., interlining felt.

George S. Colton Elastic Web Co., Easthampton, Mass., olive-drab webbing.

Royal Coat Co., New York City, raincoats.

Lonker & Stevens, Philadelphia, Pa., overcoats.

Sidney Blumenthal & Co. (Inc.), New York City, olive-drab melton.

Fred M. Hoyt & Bro., Troy, N. Y., hair brushes.

August 21, 1918.

PURCHASE ORDERS.

Green & Green Co., Dayton, Ohio, hard bread.

Gasoline Distributing Co., Long Island City, gasoline.

Standard Oil Co. of New Jersey, New York City, kerosene-gasoline.

The Felters Co. (Inc.), Boston, Mass., backing felt (chevrons).

The Draper Mfg. Co., New York City, steel barrels.

Brampton Glove Co., Georgetown, Ontario, wool gloves.

Deery Bros., Salem, Mass., sock linings

American Sugar Refining Co., New York City, sugar.

Colgate & Co., New York City, soap chips.

Great Western Sugar Co., Denver, Colo., sugar.

Knot Hooper & Co., New York City, gray twill

Waterlee Creamery Co., Omaha, Nebr., evaporated milk.

Frank W. Hunt & Co., Boston, Mass., underlifts.

Knot Hooper & Co., New York City, gray twill.

L. C. Chase & Co., Boston, Mass., automobile lap robes.

Hooper Sons' Manufacturing Co., Philadelphia, Pa., white tape.

CONTRACTS.

E. I. du Pont de Nemours & Co. (Inc.), New York City, hair brushes.

The Ames Bonner Co., Toledo, Ohio, hair brushes (2).

Mohawk Brush Co., Albany, N. Y., hair brushes.

O. Dennin's Sons (Inc.), Troy, N. Y., hair brushes.

Florence Manufacturing Co., Florence, Mass., hair brushes.

Grand Rapids Brush Co., Grand Rapids, Mich., hair brushes.

Underwood Typewriter Co., Washington, D. C., typewriters.

International Harvester Corporation, Chicago, Ill., medical carts.

Lester Austern (Inc.), New York City, raincoats (foot).

The Ford Manufacturing Co., Waterford, N. Y., underwear.

International Harvester Corporation, Chicago, Ill., ration carts.

Wald Walker & Co., New York City, raincoats (foot).

Queen Raincoat Co., New York City, raincoats (foot).

August 22, 1918.

CONTRACTS.

Enterprise Hat & Cap Co., New York City, denim hats

William Wicks Ribbon Co., Glendale, N. Y., twill tape.

Cranska Thread Co., Worcester, Mass., cotton thread.

Monarch Aluminum Ware Co., New York City, flour scoops.

H. C. Tack Co., Cleveland, Ohio, saddler's tacks.

Monarch Aluminum Ware Co., New York City, flour scoops.

Arkell Safety Bag Co., New York City, liners (coffee bags).

C. S. Osborne & Co., Newark, N. J., saddler's mallets.

American Handle Co., Jonesboro, Ark., ax helves.

Chicago Flexible Shaft Co., Chicago, Ill., clipper plates.

Talcott Bros. Co., Talcottsville, Conn., olive-drab melton.

Rosenfield Raincoat Co., New York City, raincoats.

French River Textile Co., Mechanicsville, Conn., olive-drab melton.

Phoenix Auto & Raincoat Co., New York City, raincoats.

Linen Thread Co., New York City, linen thread.

True-Fit Waterproof Co. (Inc.), New York City, raincoats.

Robinson Raincoat Co., New York City, raincoats.

Cohen, Goldman & Co. (Inc.), New York City, wool trousers.

Ansonia O. & C. Co., Ansonia, Conn., olive-drab webbing.

Frankel Uniform Co., New York City, wool trousers.

Simmons Co., Kenosha, Wis., steel folding cots.

August 23, 1918.

CONTRACTS.

Cohrle Bros. Co., Philadelphia, Pa., olive-drab webbing.

Columbus Bathing Suit Co., Boston, Mass., wool trousers.

E. L. Sprague Co., Fitchburg, Mass., olive-drab flannel shirts.

S. Stroock & Co., New York, N. Y., automobile lap robes.

Ansonia O. & C. Co., Ansonia, Conn., olive-drab webbing.

United Shoe Repairing Machine Co., Boston, Mass., awl blades.

Stern, Davis & Co. (Inc.), New York, N. Y., venetians.

Raab & Wieder, Philadelphia, Pa., olive-drab flannel shirts.

Windsor Waist Co., Philadelphia, Pa., olive-drab flannel shirts.

M. Simiansky & Co., New York, N. Y., venetians.

Becker & Weinshel, Milwaukee, Wis., wool trousers.

H. C. Tack Co., Cleveland, Ohio, tacks.

Sperling & Stern, New York, N. Y., venetians.

Ritch & Gresheim, Philadelphia, Pa., wool trousers.

Mystic Rubber Corporation, West Medford, Mass., raincoats, foot.

Modern Pants Co., Worcester, Mass., wool trousers.

J. P. Stevens & Co., New York, N. Y., cheesecloth.

Hart Schaffner & Marx, Chicago, Ill., woolen service coats.

Important Notice to U. S. Purchasing Agents

Purchasing agents for the various Government departments and the special United States war administrations are earnestly reminded to send to the Official U. S. Bulletin at the earliest possible moment all copy for bids to be advertised and purchase awards, in order that these may be promptly and correctly printed in the Bulletin in accordance with the orders of the Secretary of War and other heads of departments.

The task of preparing this copy for publication, with a view to absolute correctness and continuity, is a considerable one, but, with the cooperation of the purchasing agencies, should result in a great help, not only to the departments themselves, but to bidders throughout the country, all of whom, through the medium of the Official Bulletin, are desirous of keeping informed of the Government's needs.

Official U. S. Bulletin

PUBLISHED DAILY under order of THE PRESIDENT of THE UNITED STATES by COMMITTEE on PUBLIC INFORMATION
GEORGE CREEL, Chairman ★ ★ ★ COMPLETE Record of U. S. GOVERNMENT Activities

VOL. 2 WASHINGTON, TUESDAY, SEPTEMBER 17, 1918. No. 414

TEXT OF AUSTRIA'S "PEACE CONFERENCE" NOTE AND PRESIDENT'S REPLY REJECTING PROPOSAL

APPOINTMENTS TO STAFF CORPS OF CIVILIANS 18 TO 45 MAY BE MADE, SUBJECT TO CONDITIONS

Restrictions Governing Applications Are Set Forth—Recommendations Must be Submitted to Personnel Branch of Operations Division of General Staff.

The War Department authorizes the following statement by the Adjutant General:

The memorandum from The Adjutant General's office, dated August 14, 1918, prohibiting consideration of application for appointment from civil life between the ages of 18 to 45 inclusive is hereby revoked so far as concerns Staff Corps, but subject to the conditions and restrictions stated below.

(a) Qualified men between the ages of 18 and 45 belonging to the deferred classifications on grounds other than industry, occupation, or employment, including agriculture, may be commissioned direct from civil life by the usual procedure.

(b) Men in group C having physical disqualifications that would prevent them from being drafted as group A, men for general service but otherwise qualified for commissions in certain duties, may be commissioned direct from civil life by the usual procedure.

(c) Men who are within class 1, group A, or who would be classified in class 1, group A, except for industry, occupation, or employment, including agriculture, qualified for general service between the ages of 18 and 45, must be first inducted into the service before consideration will be given to their appointment as officers.

For those who are not required to go through the officers' training camps arrangements will be perfected whereby the appointment as officers will immediately follow induction into the service. All Staff Corps will be required hereafter to submit their recommendations for appointments from civil life to commissions in the Army to the personnel branch of the operations division of the General Staff before action by The Adjutant General. All such recommendations will be accompanied by a list or abstract showing name, grade, age, education, qualifications and physical condition of applicant, his selective-service classification, and a brief statement as to why it is desirable to appoint from civil life.

U. S. Declines Austria's Proposal For an Unofficial Peace Conference

The Secretary of State issues the following statement:

I am authorized by the President to state that the following will be the reply of this Government to the Austro-Hungarian note proposing an unofficial conference of belligerents:

The Government of the United States feels that there is only one reply which it can make to the suggestion of the Imperial Austro-Hungarian Government. It has repeatedly and with entire candor stated the terms upon which the United States would consider peace and can and will entertain no proposal for a conference upon a matter concerning which it has made its position and purpose so plain.

Transmitted to the State Department Through the Swedish Legation and Translation Finished Late This Afternoon.

LEGATION OF SWEDEN,
AT WASHINGTON, D. C.,
September 16, 1918.

EXCELLENCY: I have the honor to communicate to you the following note addressed by the Imperial and Royal Government of Austria-Hungary to the Royal Government of Sweden and received by me on this day by telegraph:

"Although it was declined by the enemy powers, the peace proposal made on December 12, 1916, by the four allied powers, which never desisted from the conciliatory intent that had prompted it, nevertheless was the beginning of a new phase in the history of this war. From that day the question of peace after two and a half years of fierce struggle suddenly became the main topic of discussion in Europe, nay, in the world, and has been steadily gaining prominence ever since. From that day nearly every belligerent State has repeatedly voiced its opinion on the subject of peace.

"The discussion, however, was not carried on along the same lines. Viewpoints varied according to the military and political conditions, and so, thus far at least, no tangible or practical result has been achieved. Notwithstanding those fluctuations a lessening of the distance between the viewpoints of the two parties could be noted, though no attempt will be made to deny the great divergencies of opinion which divide the two enemy camps and which it has heretofore been impossible to reconcile. One may be, nevertheless, permitted to notice that some of the extreme war aims have been departed from, and that the fundamental basis of a universal peace is to some extent agreed upon. There is no doubt that on either side the desire of the peoples to reach an understanding and bring about peace is becoming more and more manifest. The same impression is created when the manner in which the peace proposal of the four allied powers was received in the past is compared with the subsequent utterances of their adversaries, whether they came from responsible statesmen or from personages holding no office, but likewise wielding political influence. By way of illustration confined to a few instances, the allies in their reply to President Wilson's note advanced claims which meant nothing less than the dismemberment of Austria-Hungary, the mutilation and radical changes in the political structure of Germany, and also the annihilation of European Turkey. With time, those terms that could not be enforced without a crushing victory were modified or partly aband-

AUSTRIA'S PROPOSAL FOR PEACE CONFERENCE

oned by some of the official declarations of the entente.

"Thus Mr. Balfour, in the course of last year, plainly declared to the English Parliament that Austria-Hungary was to solve her domestic problems by herself and that Germany could not be given another constitution through foreign influence. Mr. Lloyd George afterwards annouuced in the beginning of this year that the allies were not fighting for the dismemberment of Austria-Hungary or to despoil the Ottoman Empire of its Turkish Provinces, or, again, to bring internal reforms to Germany. We may also add that in December, 1917, Mr. Balfour categorically repudiated the assumption that British policy had pledged itself to create an independent State including the German territory lying on the left bank of the Rhine. As for the utterances of the Central Powers, they leave no doubt that those States are merely fighting to defend the integrity and safety of their territories. Much greater than in respect to concrete war aims is the evidence that the principles upon which peace could be concluded and a new order of things established in Europe and throughout the world have in a way drawn nearer to one another. On this point President Wilson in his address of February 12 and July 4, 1918, formulated principles that have raised no objection from his allies and whose wide application will shortly meet with objections from the four allied powers provided to be general and consistent with the vital interests of the States concerned. To agree upon general principles, however, would not suffice; an agreement should also be reached as to their interpretation and application to the several concrete questions of war and peace.

"To an unprejudiced observer there can be no doubt that in all the belligerent States, without exception, the desire for a compromise peace has been enormously strengthened; that the conviction is increasing that the further continuance of the bloody struggle must transform Europe into ruins and into a state of exhaustion that will check its development for decades to come—and this without any guarantee of thereby bringing about the decision by arms which four years of efforts, hardships, and immense sacrifices have failed to bring about. Now, by what means, in what manner can the way be paved that will finally lead to such a compromise? Can anyone in earnest expect that goal to be attained by adhering to the method heretofore followed in the discussion of the peace problem? We dare not answer that question in the affirmative. The discussion as conducted until now from one rostrum to another by the statesmen of the several countries was substantially but a series of monologues. It lacked sequence above all. Speeches delivered, arguments expounded by the orators of the opposite parties received no direct immediate reply. Again, the publicity of those utterances, the places where they were delivered excluded every possible serviceable result. In such public utterances the eloquence used is of the high-pitched kind which is intended to thrill the masses. Whether, intentionally or not, the gap between conflicting ideas is thus widened. Misunderstandings that can not easily be eradicated spring up, and a simple straightforward exchange of ideas is hampered as soon as mentioned, and even before an official answer can be made by the adversary every declaration of the statesmen in power is taken up for passionate and immoderate discussion by irresponsible persons, but the statesmen themselves are obsessed by a fear that they may unfavorably influence public opinion in their country and thereby compromise the chances of the war, and also of prematurely disclosing their true intentions. That is why they use thunderlike [the French text has "donnantes" which is here meaningless; tonnantes, with the given meaning herewith was probably the word sent and distorted in transmission, speech and persist in upholding unflinching points of view. If therefore it were intended to seek the basis for a compromise apt to make an end of the war whose prolongation would mean nothing but suicide, and to save Europe from that catastrophe resort should be had in any event to some other method which would permit of continuous and direct converse between the representatives of the governments and between them only. Such an exchange of views would take in the conflicting views of the several belligerent States to the same extent as the general principles on which to build up peace and the relations between States, and might first lead to an understanding as to those principles. The fundamental principles once agreed upon, an effort should be made in the course of the informal negotiations to apply them concretely to the several peace questions and thereby bring about their solution. We indulge the hope that none of the belligerents will object to this proposed exchange of views. There would be no interruption of military operations. The conversation would go no further than deemed useful by the participants; the parties concerned could be put to no disadvantage thereby. The exchange of views, far from doing any harm, could be but beneficial to the cause of peace; what might fail at the first attempt could be tried over again; something will at least have been done toward elucidating the problems. How many are the deep-rooted misunderstandings that might be dispelled! How many the new ideas that would break their way out! Humane sentiments so long pent up could burst forth from all hearts, creating a warmer atmosphere while safeguarding every essential point and dispel many a discussion which at this time seems important. We are convinced that it is the duty of all belligerents to mankind to take up together the questions whether there is no way, after so many years of a struggle which, notwithstanding all the sacrifices it has cost, is still undecided and the whole course of which seems to demand a compromise, of bringing this awful war to an end. The Imperial and Royal Government therefore comes again to the Governments of all the belligerent States with a proposal shortly to send to a neutral country, upon a previous agreement as to the date and place delegates who would broach a confidential nonbinding conversation over the fundamental principles of a peace that could be concluded. The delegates would be commissioned to communicate to one another the views of their respective governments on the aforesaid principles and very freely and frankly interchange information on every point for which provision should be made.

"The Imperial and Royal Government has the honor to apply for your kindly good offices and to request that the Royal Government of Sweden kindly communicate the present communication, which is addressed to all the belligerent States simultaneously, to the Government of the United States of America and of Great Britain.

"BURIAN."

Be pleased to accept, Excellency, the assurance of my most distinguished consideration.

W. A. F. EKENGREN.

His Excellency,
Mr. ROBERT LANSING,
Secretary of State of the United States, etc., etc., etc.

The foregoing note was transmitted to the State Department Monday. The translation was completed late that afternoon.

RED CROSS TO SUPPORT NURSES IF TAKEN PRISONERS BY ENEMY

If any American Army or Navy nurses are captured by the Germans, the American Red Cross will support them during captivity, according to an announcement made from American Red Cross headquarters. This decision follows closely upon the announcement that under the law the pay of Army nurses, if captured, can not be paid because they are technically not on duty.

The Red Cross will undertake to supply to captured American nurses not only food and clothing, but necessary money to pay their board, if the German prison camps treat them as of officer's rank and require them to pay for board and lodging, or go to work as is expected of captured Army officers. The Red Cross will assume this responsibility until such time as the Government changes this regulation.

TELEPHONE SERVICE CHARGES FOR MAKING INSTALLATIONS EXPLAINED IN A NEW ORDER

INSTRUCTIONS ANSWER INQUIRIES

Postmaster General in Bulletin No. 8 Says Charges Do Not Apply to Extension Bells, Push Buttons Nor to Directory Listings.

The Post Office Department issues the following:

Telegraph and Telephone Service.
Bulletin No. 8.

SEPTEMBER 14, 1918.

Order No. 1931, issued by me under date of August 28, provided certain charges for all installations of telephones on and after September 1, 1918, also a charge for the "moving" of telephones. On account of the many inquiries regarding the order the following instructions are issued:

1. Installation charges made effective by Order No. 1931 shall be referred to by telephone companies and collected from subscribers as "service connection charges," and shall be based on the minimum net rate charged to the subscriber. These service connection charges shall be collected from all applicants for new or additional service at the time of application and before such new service or additional service is established.

2. In cases of "changes of name" or where no lapse of service occurs the minimum charge of $3 shall apply in all cases.

3. Service connection charges do not apply to extension bells, push buttons, or miscellaneous equipment of like character, nor to directory listings.

4. With the exceptions above noted the service connection charge shall apply to each class of service and class of equipment furnished the applicant for which the company shall have a regular separate established rate, and the amount of the service connection charge shall be determined by the amount of the regular established rate, in accordance with the terms of Order No. 1931.

5. All subscribers who pay the service connection charges established under Order No. 1931 shall be relieved of any other service connection charges, cancellation charges, charges made in liquidation of damages on account of short terms, and short term rates; and the use of one year or any other period in excess of one month as a minimum contract period for telephone service.

6. The "Moving charge" referred to in Order No. 1931 applied only to changes in the location of equipment on the premises. Such changes are generally known as "Inside Moves." For purposes of economy in administration and for the convenience of the public the charge for moving a telephone set from one location to another on the same premises shall be $3. The charge for moving all other equipment from one location to another on the same premises shall be based on the cost of labor and materials.

7. Order No. 1931 abolishes the distinction heretofore made by some companies between a new installation or a new service connection and an Outside Move; and all changes in the location of the subscriber which have heretofore been described as Outside Moves will hereafter be treated as new "Service connections" and subject to the service connection charges of Order No. 1931 and of these instructions supplementary thereto.

8. Service connection charges do not apply to the service known as "service stations" or "switching service"; and they do not supersede special installation or construction charges or mileage charges of any kind.

A. S. BURLESON,
Postmaster General.

Comparative Registration Figures On The Returns Received To Date

The War Department authorizes the following statement from the Provost Marshal General. Following are comparative figures on the returns to date on the last registration:

	Estimate.	Actual.	Percentage of estimate.	Comparison with estimate. Increase, per cent.	Comparison with estimate. Decrease, per cent.
Arkansas	198,746	187,122	94		6
Connecticut	213,329	197,426	93		7
Delaware	29,489	30,033	102	2	
District of Columbia	43,152	52,751	122	22	
Florida	110,940	111,058	101	1	
Indiana	340,920	350,852	103	3	
Iowa	287,847	280,303	98		2
Maryland	162,090	177,098	109	9

Wisconsin	326,377	308,861	95		5

Bids on Additional Housing Projects are Requested

The Department of Labor authorizes the following:

Bids have been requested by the United States Housing Corporation for the construction of the following projects: Waterbury, Conn., 149 houses; Indian Head, Md., 100 houses, 1 school and 3 dormitories.

Contract was awarded to Ed Schoeck, 79 Montgomery Street, Waterbury, Conn., for clearing site at the Waterbury project.

TIN AND PLATINUM ON LEVEL.

Both Much Desired by the Government for War Uses.

Red Cross workers throughout the country are requested to devote part of their time to collecting platinum and tin for Government uses. The campaign is being undertaken at the request of the War Industries Board. Despite the wide gulf that has hitherto separated lowly tin from aristocratic platinum, these two extremes in metals are now brought to a common level by the necessities of war. Each is regarded as of equal importance to many of the essential industries of the country, and as there is a shortage of both materials, the Government has called upon the Red Cross to help make up the deficit.

New Poster is Expected To Help in War Work By Cutting Down Mails

A poster printed in appropriate typing and coloring has been prepared in response to numerous requests by Chambers of Commerce, Boards of Trade, libraries, and other public institutions. The purpose of the poster is self-evident. It reads as follows:

ASK FOR IT HERE

Copies of the poster will be sent to all applicants who are in a position to aid in this public service. It is hoped that its wide publicity will help to lessen the war burden put upon the mails and serve to minimize the work of all government departments at Washington.

Remember! the men in our Army and Navy do not expect luxuries. Should we at home expect them? Buy necessities and war-savings stamps.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

RATES BY MAIL.

- One year $5.00
- Six months 3.00
- One year, postage prepaid to foreign countries 8.00
- Six months, postage prepaid to foreign countries 4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

CORRECTS PRESS STATEMENT ABOUT ARMY NURSE SUPPLY

The War Department authorizes the following:

Brig. Gen. Charles Richard, Acting Surgeon General while Gen. Gorgas is in France, emphatically denies a statement said to have been given to the press recently, to the effect that the nursing needs of the Army have been met.

That part of the statement which is especially harmful gives assurance "that the nursing needs of the Army have already been met, and that 27,000 nurses have been enrolled by the Red Cross in response to the Surgeon General's request for 25,000 graduate nurses by January 1, 1919."

34,000 Still Needed.

Although the Red Cross, the nurse reserve of the Army, reports a total enrollment of more than 27,000 nurses, this does not represent the number of women available for active service. Twenty-five thousand nurses must be obtained before the first of the year. More than 16,000 are now on the rolls of the Army Nurse Corps, leaving 9,000 still to be obtained. Moreover, it is estimated that before July 1, 1919, 50,000 nurses will be required. Thus, in less than a year 34,000 nurses must step forward to meet the need.

Gen. Richard feels that the matter is so important that under no consideration should a false impression of the Army's need for nurses be allowed to prevail. He cites figures to show that the statement alleged to have been given out was drawn up without a clear understanding of the facts.

American Official Communiques on Operations of U. S. Forces

American Official Communique No. 124—Continued.

HEADQUARTERS AMERICAN EXPEDITIONARY FORCES,
September 15, 1918.

Section B.—The Commander in Chief has awarded the Distinguished Service Cross to the following noncommissioned officer and enlisted men of the American Expeditionary Forces for acts of gallantry set forth after their names:

Corpl. ELSEWORTH O. TERRILL, Infantry. "For extraordinary heroism in action in the vicinity of Hagenbach, Alsace, east of Belfort, France, August 21, 1918. When Corpl. Terrill's right hand and arm were badly mangled by the explosion of a grenade during an enemy raid into our lines, he placed his injured hand in his trousers pocket to support it, went over the top with his comrades and joined in the pursuit of the defeated and retreating Germans, throwing hand grenades with his left hand as he followed them back to their own lines."

Pvt. JOHN ZYCHE, Infantry. "For extraordinary heroism in action in the vicinity of Hagenbach, Alsace, east of Belfort, France, August 21, 1918. In an enemy raid on the position held by his regiment, Pvt. Zyche had his right eye shot out at the beginning of the action. He applied first aid himself, went back to his battle position, assisted in driving off the raiding party, operated his rifle until the end of the action and continued to fire upon the retreating Germans as long as they could be seen."

The Commander in Chief has awarded the Distinguished Service Cross posthumously to the following enlisted man for act set forth after his name:

Pvt. JOHN McGEARY, Infantry. "For extraordinary heroism in action near Villers Sur Fere August 1, 1918. He left his shelter and went out into heavy shell and machine-gun fire to rescue a wounded comrade, receiving fatal wounds in the attempt."

EMERGENCY ADDRESSES.

Corpl. Elseworth O. Terrill, Inf., Mrs. Elizabeth C. Terrill, 65 Union Street, Rahway, N. J.

Pvt. John Zyche, Inf., Mrs. Mary Chippadus, 14 McKemel Street, Brooklyn, N. Y.

Pvt. John McGeary, Inf., Mary McGeary, 883 Eighteenth Avenue, New York, N. Y.

American Official Communique No. 125.

HEADQUARTERS AMERICAN EXPEDITIONARY FORCES,
September 16, 1918.

Section A.—Aside from local combats in which we took prisoners and a further increase of artillery and aviation activity there is nothing to report from the St. Mihiel sector.

Section B.—There is nothing to report in this section.

GOVERNMENT NEEDS HUNDREDS OF SKILLED WOMEN WORKERS

The Department of Labor announces the following:

Hundreds of skilled women are needed for immediate service in Washington, according to an announcement made by the District of Columbia office of the United States Employment Service of the Department of Labor. This office is already placing about 400 women a week in good salaried positions.

Government demands call for 1,000 stenographers and typists at once. In addition 200 women with college training or its equivalent and two years business experience can be placed in responsible positions immediately, and requests are on hand for a large number of qualified machine operators.

All applicants will be required to register with a local office of the United States Employment Service and show their qualifications for the work they desire. In all positions which come under the jurisdiction of the classified civil service applicants may be required to enter the war service by way of a civil-service assembled or nonassembled examination. Close cooperation in filling Government positions is being worked out between the United States Civil Service Commission and the United States Employment Service.

PROCEDURE GOVERNING EXPORT OF COMMODITIES TO ICELAND

The War Trade Board announces in a new ruling (W. T. B. R. 227) the following regulations governing the procedure with respect to the issuance of licenses for the exportation of commodities to Iceland:

1. The exporter should apply for license to the Bureau of Exports, Washington, D. C., using Application Form X, attaching thereto Supplemental Information Sheet X-103, together with any other supplemental sheets concerning commodities that are required.

2. Exporters in the United States before filing applications for export licenses must obtain from the prospective importer in Iceland advice that there has been issued by the Government of Iceland a certificate authorizing the importation of the proposed consignment. The number of such certificate must be forwarded by the importer in Iceland to the American exporter and specified on Supplemental Information Sheet X-103.

3. Applications for shipments consigned to the Government of Iceland need not bear import certificate numbers.

4. Commodities to be exported to Iceland may only be shipped on vessels flying the Danish flag.

WORK OF CONGRESS BRIEFLY TOLD

SENATE.

The National Wholesale Dry Goods Association, through its counsel, S. L. Swartz, yesterday protested against certain features of the pending war revenue bill and asserted that under the normal and war tax sections every merchant and seller of merchandise would be compelled to pay over to the Government in taxes two-thirds of his annual profits. He submitted an amendment providing that a reasonable allowance be made of the increased cost of merchandise over the average cost during the prewar period, asserting that the bill fails to take into account the present abnormally high merchandise values. He argued that unless proper revision is made for a decline a commercial and financial panic will result after the war. George W. Pound, representing pipe-organ manufacturers and the piano industry, urged that the taxes imposed on these articles be assessed only against ordinary organs and on player-pianos. Requests for modifications of proposed taxes were made before the committee by representatives of the watch and clock and adding machine industry, the tobacco industry, potash interests, and a number of lumbermen's organizations. The watch and clock makers want their product removed from the list of articles to be taxed as jewelry.

Harold Abbott, of Chicago, president of the American Feed Manufacturers' Association, protested before the Agricultural Committee against provisions in the recently passed agricultural extension bill which prohibit interstate and foreign shipments in adulterated cattle feeds. He declared the legislation would force the feeding to cattle of valuable food products and destroy large numbers of alfalfa mills.

HOUSE.

Considering the war-revenue bill yesterday under the five-minute rule, much headway was made in the House on that measure. The income-tax rates were agreed to without amendment and after only a short discussion. An amendment intended to exempt from the income tax the salaries of the President, Federal judges, and State officials was debated throughout much of the afternoon, but in the end the tax imposed in the bill as reported from the committee was agreed to. Every effort to amend the bill in this particular was voted down. A final vote was not taken on a motion to exempt State and municipal bonds from taxation, although on a rising vote it was rejected practically two to one. A point of no quorum was made at that juncture and the House was compelled to adjourn.

The Appropriations Committee learned yesterday that the cost of equipping and maintaining the new Army called into existence by the recent draft will be in excess of five billions of dollars. It was said to be quite probable that between two and three billion of this sum will have to be immediately available, and it was said that if this be true further revenue must be provided for in the bill now before the House. It is the present plan, if further revenue must be provided, not to amend the measure now before the House, but to let the Senate make such additions as may be necessary to meet the new situation. This plan would be adopted in the interest of expedition.

Establishment of central power plants in big manufacturing areas as a coal conservation measure was urged by Fuel Administrator Garfield before the Interstate Commerce Committee in urging prompt action on the emergency power bill. These plants, he said, should be controlled and financed by the Government. He pointed out that in many cases Government contracts have been delayed for lack of power.

Acting Secretary of War Crowell sent to the House a proposal for legislation providing free and immediate entry of merchandise bought abroad for the use of the War and Navy Departments. Prompt action is urged and it is pointed out that serious loss of time has resulted from delays in compelling these military supplies and materials to take the usual course through the customs. The Treasury Department asked the House for an appropriation of $30,000 to repair the damage done to an entrance of the Chicago Federal Building by a recent bomb explosion.

EXPORTATION OF FOODSTUFFS TO WEST AFRICAN COLONIES

The War Trade Board announces in a new ruling (W. T. B. R. 228) the withdrawal of W. T. B. R. 188, issued August 12, 1918, and the adoption of the following regulations governing the exportation of foodstuffs, fodders, and feeds to the following British and French West African colonies: Gambia, Gold Coast, Nigeria, Sierra Leone, Togoland, Dahomey, Ivory Coast, French Congo, French Guinea, Senegal.

Prospective importers in these colonies will be required to obtain the approval of the governors of their respective colonies for all orders for foodstuffs, fodders, and feeds.

Rules for Exporters.

Exporters in the United States making application for the exportation of foodstuffs, fodders, and feeds will be required on and after September 1, 1918, to attach Supplemental Information Sheet X–117 to the regular Application Form X, and state thereon that they hold a bona fide firm order from the consignee named in the application for the quantity of the commodity specified thereon, and that such order has been duly approved by the governor of the colony of destination named in the application subsequent to June 1, 1918.

Attention is called to the fact that the previous announcement, referred to above, stated that the approval of the governor should be dated subsequent to July 1, 1918. Exporters should, therefore, note that this date has been changed to June 1, 1918, and that Supplemental Sheet X–117 has been changed accordingly.

A country worth fighting for is a country worth saving for. Buy THRIFT STAMPS.

PROTECTION TO GOVERNMENTS' INTERESTS IN SHIP MATTERS

Special Department of Justice Organization to Look After Admiralty Affairs.

Attorney General Gregory authorizes the following statement:

With the vast increase in the number of vessels operated by the Shipping Board and by the transport services of the Army and Navy, the subject of Admiralty litigation in which the United States is interested has become one of great and growing importance. The department is therefore giving its attention to the development of a special organization in order promptly and effectively to protect the interests of the Government in these cases.

Special Assistant Appointed.

I have appointed Mr. Ira A. Campbell, of San Francisco, a special assistant to the Attorney General in Admiralty matters. Under the general supervision of an Assistant Attorney General Mr. Campbell will be charged with the duty of coordinating and overseeing the work of the Admiralty staff which the department is building up in the principal ports of this country and of arranging for the proper conduct of Admiralty cases which arise in foreign ports.

Mr. Campbell, who is one of the leaders of the Admiralty bar upon the Pacific coast, has been acting as Admiralty counsel to the Shipping Board, and in that position, which he resigns to come to the Department of Justice, has been intimately in touch with the great expansion of the American merchant marine which is now in progress. He comes with the highest credentials as to his character and professional ability.

Cooperation of Departments.

In working out the problems which will confront the Department of Justice in dealing with the Admiralty matters the department will, of course, invite and welcome the closest cooperation of the governmental agencies which operate the ships—the Army, the Navy, and the Shipping Board.

PROMISE SAVING OF TIN.

Sauerkraut Makers to Give Bulk Goods Preference in Sales.

A campaign for the conservation of tin will be undertaken immediately by the manufacturers of sauerkraut, who were in conference with the Food Administration. While it will be impossible for this industry to inaugurate many of the conservation measures adopted by other manufacturers, as the 1918 pack is already well under way, the Food Administration has been assured that every possible effort will be made to push the sale of bulk goods and of kraut not packed in tin.

Give our boys in the Army and Navy every fighting chance. Pledge yourself to save to the utmost of your ability and to buy war-savings stamps.

CONSERVATION SCHEDULES FOR FURNITURE MANUFACTURERS LIMITING STYLES AND MATERIAL, AND MAKING OTHER RULES

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

A general conservation program for the furniture industry, covering material, labor, transportation, and capital, was announced to-day by the conservation division of the War Industries Board after conferences with representatives of the manufacturers. The schedules issued deal with household chairs, upholstered furniture, parlor frame furniture, case goods, dining-room furniture, bedroom furniture, dining tables, and library, parlor, and bedroom tables.

Reduction in Styles.

The reductions in the number of styles made will save material and release capital now tied up in large and varied stocks, and there will be a lessened demand on transportation space through new packing regulations. The conservation division makes a special appeal to retailers for cooperation in making the schedules acceptable.

Letter to Manufacturers.

The following letter has been sent all manufacturers:

WAR INDUSTRIES BOARD,
CONSERVATION DIVISION,
Washington, September 16, 1918.

To furniture manufacturers:

In the present emergency it is of primary importance that the country's resources be used to full advantage and that we husband our supplies of material, equipment, and capital to aid in carrying on the war. In addition, it is imperative to conserve every available cubic inch of car-carrying capacity. This division, in cooperation with numerous industries, has put into effect plans of economy in order that materials and equipment can be saved and the amount of capital invested in manufacturers' and dealers' stocks be reduced.

It is believed that manufacturers of furniture can materially reduce the number of patterns they are now making. Furthermore, each manufacturer should discontinue the use of metal of any sort for any purpose where its use is not absolutely essential. The elimination of all unnecessary burlap, which is urgently required for war purposes, is desirable. In addition, it is essential that care be exercised in the packing of all merchandise for shipment, not only to reduce the amount of space in freight packages, but adequately to protect the goods from danger of injury in transit.

The inclosed program has been drawn up with the assistance and advice of representatives of all branches of the industry. It will be made effective unless substantial reasons are immediately presented to show that by some modification the needs of the Government can be met more effectually.

While part of this schedule is not effective until January 1, 1919, it is understood, of course, that as rapidly as possible all manufacturers will put into effect the provisions in this schedule. We will be glad to receive any suggestions that you may have to submit whereby greater economies can be brought about.

Will you please acknowledge this letter promptly, assuring this division of your cooperation.

CONSERVATION DIVISION,
WAR INDUSTRIES BOARD.

SCHEDULE FOR UPHOLSTERED-FURNITURE MANUFACTURERS.

1. The number of patterns manufactured to be reduced in all lines at least 50 per cent on active patterns as of July 1, 1917. It is understood that this does not mean that a reduction to less than 50 patterns per $100,000 of output must be made by any manufacturer. Any difference in size, style, or wood is to be construed as constituting a pattern.
2. No new patterns to be made by any manufacturer for the duration of the war, except in cases where the provisions of this schedule necessitate the substitution of new patterns for those at present in use.
3. All metal-wheel casters to be eliminated.
4. Wood dowels to be substituted for metal screws wherever possible.
5. Colors of leather to be limited to black and one shade of brown or tan.
6. Colors of imitation leather to be limited to black and one shade of brown or tan.
7. All over-stuffed davenports to be made and packed with detachable legs where practical, and as far as possible with detached backs and ends.
8. The piano-box style of crate to be used in packing all over-stuffed davenports.
9. All over-stuffed chairs and rockers to be made and packed with detachable legs and runners where practical.
10. All semi-upholstered furniture, including suites, sofas, divans, chairs, and rockers, to be made either partial or completely K. D., wherever practical.
11. All couches, lounges, and day beds to be made and packed K. D.
12. Wherever possible all goods to be packed and shipped in pairs.
13. All dimensions of crates to be as small as safe packing will permit.
14. This schedule to take effect January 1, 1919, in so far as it applies to production of patterns not conforming to this program. It is understood that this permits the completion of work in process at this date.

SCHEDULE FOR PARLOR FRAME FURNITURE MANUFACTURERS.

1. The number of patterns manufactured to be reduced in all lines at least 50 per cent on active patterns as of July 1, 1917. It is understood that this does not mean that a reduction to less than 50 patterns per $100,000 of output must be made by any manufacturer. Any difference in size, style, or wood is to be construed as constituting a pattern.
2. No new patterns to be made by any manufacturer for the duration of the war, except in cases where the provisions of this schedule necessitate the substitution of new patterns for those at present in use.
3. All metal wheel casters to be eliminated.
4. Wood dowels to be substituted for metal screws wherever possible.
5. All over-stuffed davenport frames to be made with detachable legs and as far as possible with detached backs and ends.
6. All overstuffed chair and rocker frames to be made with detachable legs and runners.
7. All couch, lounge, and day-bed frames to be made K. D.
8. All semiupholstered furniture frames, including sofas, divans, chairs, and rockers to be made K. D. wherever practical.
9. Wherever possible all goods to be packed and shipped in pairs.
10. All dimensions of crates to be as small as safe packing will permit.
11. This schedule to take effect January 1, 1919, in so far as it applies to production of patterns not conforming to this program. It is understood that this permits the completion of work in process at this date.

SCHEDULE FOR HOUSEHOLD CHAIR MANUFACTURERS.

1. The number of patterns manufactured to be reduced at least 50 per cent on active patterns as of July 1, 1917. It is understood that this does not mean that a reduction to less than 30 patterns per $100,000 of output must be made by any manufacturer. Any difference in size, style, or wood is to be construed as constituting a pattern.
2. No new patterns to be made by any manufacturer for the duration of the war, except in cases where the provisions of this schedule necessitate the substitution of new patterns for those at present in use.
3. All metal wheel casters to be eliminated.
4. All springs to be eliminated from slip-seat diners. All springs in other types of chairs and rockers to be eliminated as far as possible.
5. Wood dowels to be substituted for metal screws wherever possible.
6. The colors of leather to be limited to black and one shade of brown or tan.
7. The colors of imitation leather to be limited to black and one shade of brown or tan.
8. The manufacture of arm dining-room chairs to be discontinued.
9. The manufacture of dressing-table chairs to be discontinued.
10. Woods to be used are divided into six classes—class 1, oak, ash, chestnut, elm; class 2, beech, birch, maple, rock elm; class 3, mahogany; class 4, walnut; class 5, gum; class 6, white maple.

Each manufacturer to use not more than 4 of the above classes.

11. All short-post chairs, both in the white and finished, to be made and shipped K. D.
12. All long or continuous post chairs when shipped in the white to be made and shipped K. D.
13. When packed in crates all chairs to be nested in pairs and as many pairs packed together in same crate as practical.
14. All dimensions of crates to be as small as safe packing will permit.
15. This schedule to take effect January 1, 1919, in so far as it applies to production of patterns not conforming to this program. It is understood that this permits the completion of work in process at this date.

SCHEDULE FOR CASE GOODS MANUFACTURERS.

1. The number of patterns manufactured to be reduced in all lines at least 50 per cent on active patterns as of July 1, 1917. It is understood that this does not mean that a reduction to less than six suites per $100,000 of output must be made by any manufacturer. Any difference in size, style, or wood is to be construed as constituting a pattern.
2. No new patterns to be made by any manufacturer for the duration of the war, except in cases where the provisions of this schedule necessitate the substitution of new patterns for those at present in use.
3. All metal pulls, trimmings, drawer locks, drawer guides, metal dustproof bottoms, and metal-wheel casters to be eliminated.
4. All dust-proof bottoms to be eliminated except on bottom frame.
5. All drawer linings to be eliminated.
6. Wood dowels to be substituted for metal screws wherever possible.
7. All colors of leather to be limited to black and one shade of brown or tan.
8. All colors of imitation leather to be limited to black and one shade of brown or tan.

Dining room furniture.

9. The use of mirrors to be eliminated entirely.
10. Sideboards and buffets to be limited to the following lengths: 40 inches, 44 inches, 48 inches, 54 inches, 66 inches, 72 inches.
11. China closets to be limited to the following widths: 30 inches, 34 inches, 38 inches, 42 inches, 46 inches, 50 inches.
12. Serving tables to be limited to the following lengths: 34 inches, 38 inches, 42 inches, 46 inches.
13. Dining-table tops to be limited to the following sizes extreme measurement: 42 inches, 48 inches, 54 inches, 60 inches. It is understood that this does not mean extended lengths.
14. Chairs. The manufacture of dining-room arm chairs to be discontinued.
15. Sideboards and buffets packed for shipment to have no projection above the top, and top backs to be packed in same package.
16. China closets packed for shipment to

Conservation Schedules for the Manufacturers of Furniture

have no projection above the top, and top backs to be packed in same package.

17. Serving tables packed for shipment to have no projection above the top. Serving tables without stretchers to have legs detached. Serving tables with stretchers or shelves to be made with detachable ends; legs, shelves and center stretchers to be packed flat and all parts packed in the same package.

18. Dining tables. All dining tables without stretchers to be constructed so that legs can be detached and packed in the space between the rims wherever possible. Dining tables having stretchers to be packed with tops detached; legs to be nested. All pedestal tables, to be K. D.; base, top and pedestal to be detached.

19. Wherever possible all goods to be packed and shipped in pairs.

20. All dimensions of crates to be as small as safe packing will permit.

Bedroom furniture.

21. The use of all mirror plate to be reduced at least 25 per cent.

22. The use of beveled mirrors to be discontinued.

23. Dressers and bureaus to be limited to the following sizes: 36, 40, 44, 48, and 52 inches.

24. Vanity dressers to be limited to the following sizes: 40, 44, 48, and 52 inches.

25. Chiffoniers and chifforettes to be limited to the following sizes: 30, 34, 38, and 42 inches.

26. Chifforobes and dresser-robes to be limited to the following sizes: 40, 44, and 48 inches.

27. Toilet tables and writing tables to be limited to the following sizes: 32, 36, 40, and 44 inches.

28. Wardrobes to be limited to the following sizes: 28, 32, 36, 40, 44, and 48 inches.

29. Dressers and bureaus when packed for shipment to have no projection above the top and where practical toilets to be packed in same package.

30. Vanity dressers to be packed with pedestal ends together and mirrors detached.

31. Chiffoniers and chifforettes when packed for shipment to have no projection above the top and where practical toilets to be packed in the same package.

32. Chifforobes and dresser-robes when packed for shipment to have no projection above the top, and where practical toilets to be packed in the same package.

33. Toilet tables and writing tables when packed for shipment to have no projection above the top. When made with four legs without stretchers, legs to be packed detached. When made with stretchers, to be made with detachable ends and packed under body of case; center stretchers to be packed flat.

Triplicate-mirror toilet tables to be packed with rail under mirror detached; end mirrors to be folded against the center mirror and packed lengthwise on top of case; all to be packed in one package.

34. Wardrobes to be made of K. D. construction and packed K. D. when shipped.

35. Wherever possible all goods to be packed and shipped in pairs.

36. All dimensions of crates to be as small as safe packing will permit.

37. This schedule to take effect January 1, 1919, in so far as it applies to production of patterns not conforming to this program. It is understood that this permits the completion of work in process at this date.

SCHEDULE FOR DINING-TABLE MANUFACTURERS.

1. The number of patterns manufactured to be reduced at least 50 per cent on active patterns as of July 1, 1917. It is understood that this does not mean that a reduction to less than 30 patterns per $100,000 of output must be made by any manufacturer. Any difference in size, style, or wood is to be construed as constituting a pattern.

2. No new patterns to be made by any manufacturer for the duration of the war, except in cases where the provisions of this schedule necessitate the substitution of new patterns for those at present in use.

3. Round or square pillar tables to be made only in the following size pillars: Six inches, 7 inches, 8 inches, 9 inches, and 10 inches.

4. The manufacture of all 6-inch round-pillar tables to be discontinued.

5. The manufacture of all octagon and shaped pillar tables to be discontinued.

6. Not more than 15 regular patterns of pillar or platform tables to be continued by each manufacturer, and all special patterns to be discontinued.

7. Each manufacturer to restrict his production of leg patterns in common turned 5-leg tables to three sizes and not more than four styles.

8. Each manufacturer to eliminate all leg sizes above 4 inches in common turned leg tables.

9. Each manufacturer to limit the sizes of dining table tops extreme measurement to 42 inches, 48 inches, 54 inches, and 60 inches. It is understood that this does not mean extended lengths.

10. Forty-two-inch oak tables to be made in plain oak only.

11. Forty-eight-inch oak tables to be made in plain or quartered oak.

12. 54-inch and 60-inch oak tables to be made in quartered oak only.

13. Each manufacturer to eliminate all plank or double tops in all plain oak patterns.

14. The use of all metal rim fasteners, metal top, and base locks, metal wheel casters, metal dowel pins, and metal parts on drop-leg attachments to be discontinued.

15. Wood dowels to be substituted for metal screws wherever possible.

16. All dining tables without stretchers to be constructed so that legs can be detached and packed in the space between the rims wherever possible. Dining tables having stretchers to be packed with tops detached; legs to be nested. All pedestal tables to be K. D.; base, top, and pedestal to be detached.

17. Wherever possible all goods to be packed and shipped in pairs.

18. All dimensions of crates to be as small as safe packing will permit.

19. This schedule to take effect January 1, 1919, in so far as it applies to production of patterns not conforming to this program. It is understood that this permits the completion of work in process at this date.

SCHEDULE FOR LIBRARY, PARLOR, AND BEDROOM TABLE MANUFACTURERS.

1. The number of patterns manufactured to be reduced at least 50 per cent on active patterns as of July 1, 1917.

It is understood that this does not mean that a reduction to less than 50 patterns per $100,000 of output must be made by any manufacturer.

Any difference in size, style, or wood is to be construed as constituting a pattern.

2. No new patterns to be made by any manufacturer for the duration of the war, except in cases where the provisions of this schedule necessitate the substitution of new patterns for those at present in use.

3. All metal corner blocks or irons, metal drawers, drawer slides, drawer locks, feet, and metal wheel casters to be eliminated.

4. All dust-proof bottoms to be eliminated except on bottom frame.

5. Wood dowels to be substituted for metal screws wherever possible.

6. Library and davenport tables to be made only in the following sizes: 36 inches, 42 inches, 45 inches, 48 inches, 54 inches, 60 inches, 66 inches, 72 inches.

7. Parlor and bedroom tables to be made only in the following sizes: 16 inches, 20 inches, 24 inches, 30 inches.

8. Library, davenport, parlor, and bedroom tables with four or more legs without stretchers to be packed for shipment with legs detached. Tables with four legs with stretchers to be packed with legs and stretchers detached. Tables with solid ends with or without stretchers or shelf to be packed ends and stretchers detached. Tables with one or more pedestals to be packed with top and pedestals detached.

9. All parts to be packed in one package.

10. All goods to be packed and shipped in pairs wherever possible.

11. All dimensions of crates to be as small as safe packing will permit.

12. This schedule to take effect January 1, 1919, in so far as it applies to production of patterns not conforming to this program. It is understood that this permits the completion of work in process at this date.

SOLDIERS' NEXT OF KIN SHOULD SEND IN CHANGES IN ADDRESS

The War Department authorizes the following statement from the Acting Adjutant General:

Owing to the fact that persons designated by soldiers to receive advice in the event of their death, injury, capture, etc., fail, in very many cases to notify The Adjutant General's office promptly of changes in their addresses, that office is experiencing considerable difficulty in obtaining delivery of some of its casualty telegrams.

The telegram is, of course, sent in every case to the address appearing on the soldier's record, and if the party named has in the meantime moved elsewhere it is returned as undeliverable. The Adjutant General's office finds it impracticable in most cases to locate the addressee who thus fails to receive the desired notification.

It therefore devolves upon every person who knows that he has been designated by some soldier to receive messages of this nature to notify The Adjutant General immediately whenever he changes his address. Care should be taken, whenever a communication on this subject is addressed to The Adjutant General, to state the soldier's full name, his rank, and the designation of the organization in which he is serving. His serial number should also be given, if it is known.

The person who is primarily interested in this matter is, of course, the one who has been designated by the soldier for the purpose of receiving notice of any casualty which may occur in his case, and that person justly can not complain on account of not having received the desired notice if he has himself been at fault by neglecting to keep in touch with the military authorities at Washington.

All correspondents on this subject should be addressed to The Adjutant General, Washington, D. C.

P. C. HARRIS,
Acting The Adjutant General.

PROPOSALS INVITED BY OFFICE OF QUARTERMASTER, NEW YORK

The following announcements are made by the Office of Quartermaster General, 109 East Sixteenth Street, New York:

Sealed proposals in triplicate for furnishing 3,000,000 yards of 31-inch 28/36 combed cheesecloth, yarns to be about 20's single soft twist, both ways, delivery equal weekly October, November, and December, 1918, will be received here until 2 o'clock p. m., September 24, 1918. Information on application. Envelopes containing proposals to be indorsed "Proposals for combed cheesecloth," and addressed to the Cotton Goods Branch, Clothing & Equipage Division, 109 East Sixteenth Street, New York City.

Sealed proposals in duplicate for furnishing 2,000,000 yards of 39-inch 64/88 4.50 filling sateens in the gray, or as substitute construction 37½-inch 64/88 4.70 filling sateens in the gray, delivery early October and November, 1918, will be received here until 2 o'clock p. m., September 24, 1918. Information on application. Envelopes containing proposals to be indorsed "Proposals for 39-inch gray filling sateens," and addressed to the Cotton Goods Branch, Clothing & Equipage Division, 109 East Sixteenth Street, New York City.

Sealed proposals in duplicate for furnishing 15,000,000 yards, in any width to be specified by the bidder from 28 to 36 inches, inclusive, on a cloth counting 44/40, proportionate to 38½-inch, 8.20 plain cloth, delivery October, November, December, 1918, will be received here until 2 o'clock p. m., September 20, 1918. Information on application. Envelopes containing proposals to be indorsed "Proposals for 44/40 plain cloth," and addressed to the "Cotton Goods Branch, Clothing & Equipage Division, 109 East Sixteenth Street, New York City."

FEDERAL RESERVE BOARD'S WEEKLY BANK STATEMENT

Further increases in the discount activity of the Federal reserve banks in connection with the more recent war-finance operations of the Government accompanied by substantial issues of Federal reserve notes are indicated in the Federal Reserve Board's weekly bank statement issued as at close of business on September 13, 1918. Concentration of gold in the reserve banks continues, the additions to the banks' gold holdings being about 7.6 millions.

Investments.—Holdings of discounted paper show an increase for the week of 71.3 millions, the New York, Minneapolis, and Kansas City banks reporting the largest increases under this head. By far the greater portion of the additional holdings is made up of war-loan paper, which constitutes at present 66.4 per cent of the total discounts held, as against 65.3 per cent the week before. Acceptances on hand increased 6 millions, New York, Cleveland, and Philadelphia accounting for most of the increase shown. An increase of 5.7 millions in the total holdings of United States short-term securities is due largely to the temporary investment in these securities by the New York bank for the accommodation of local banks, also to the purchase from the Government of additional 1-year Treasury certificates, to secure further issues of reserve bank notes. Total investments show an increase for the week of 82.8 millions.

Government Deposits Larger.

Deposits.—Government deposits were 9.4 millions larger than the week before, members' reserve deposits increased 4.5 millions, the western banks showing considerable increases in their members' reserve balances. Net deposits are 20.6 millions larger than the week before.

Reserves.—Since the end of June gold reserves have increased by about 75 millions, partly through the exchange of Federal reserve notes for gold. The banks' reserve percentage shows a decline for the week from 54.7 to 53.7 per cent.

Note circulation.—Federal reserve agents report a net addition of 69.1 millions to the total of Federal reserve notes outstanding. The banks show an increase for the week of 64.7 millions of Federal reserve notes in circulation, besides an increase of 3.7 millions in their combined liabilities on Federal reserve bank notes in circulation.

Capital.—An increase of $194,000 in paid-in capital is due largely to payment for Federal reserve bank stock by newly admitted members. The largest gains under this head are shown for the New York, Boston, and Richmond banks.

Condition of Member Banks September 6, 1918.

Renewed investments in Treasury certificates following the September 3 issue accompanied by increases in deposits on Government and private accounts are indicated by the board's consolidated weekly statement showing condition on September 6 of 733 member banks in leading cities.

Treasury certificates on hand show an increase of 271.3 millions, while holdings of United States bonds other than circulation bonds declined 19.1 millions. For the central reserve cities an increase of 159.8 millions in Treasury certificates is accompanied by net liquidation of 16.7 millions of United States bonds. Aggregate loans secured by United States war obligations went up 14.8 millions, largely at the central reserve city banks. All other loans and investments decreased 62.8 millions, the banks in the central reserve cities reporting an even larger decrease of 72.6 millions. Of the total loans and investments the combined share of United States war obligations and loans secured by such obligations constitute 16.2 per cent, as against 14.9 per cent the week before. For the central reserve city banks a rise in this percentage from 16.1 to 18.3 per cent is noted.

Government Deposits.

Government deposits increased 67.9 millions, of which about 40 millions represents the increase at the banks outside the central reserve cities. Net demand deposits of all reporting institutions show an increase of 54.2 millions, by far the larger portion of the increase falling to the share of the central reserve city banks. Time deposits increased 8.3 millions. Reserve balances with the Federal reserve banks show a reduction of 40.8 millions for all reporting banks and of 34.7 millions for the central reserve city banks alone, while total cash in vault went up 1.3 millions.

For all reporting banks the ratio of loans and investments to total deposits shows a rise from 125 to 125.7 per cent. For the central reserve city banks this ratio remains unchanged at 116.3 per cent. The ratio of reserve balances (with the Federal reserve bank) and cash to total deposits declined from 15.5 to 14.9 per cent for all reporting banks, and from 17 to 16.2 per cent for the central reserve city banks. "Excess reserves" of all reporting banks work out at 88.9 millions as against 136.5 millions the week before. For the central reserve city banks a decrease of this item from 109.3 to 68.3 millions is noted.

Conservation Regulations Governing The Manufacture of Metal Bedsteads

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

Plans for conservation in material and transportation and release of capital in the metal-bedstead industry worked out July 15 by the conservation division of the War Industries Board with the manufacturers have become effective. These plans comprehend reductions in patterns of beds, designs of springs, and amount of tubing used, lower head and foot ends, discontinuance of joint manufacture of steel and brass beds and the use of brass ornaments on steel beds.

Regulations in Full.

Following are the instructions and regulations in full:

1. Each manufacturer to reduce his line of steel bedsteads to not more than 18 patterns.

2. Each manufacturer to reduce his line of steel cribs to not more than six patterns.

3. Each manufacturer who makes both steel and brass bedsteads to discontinue the manufacture of brass bedsteads. Present orders may be filled from existing stocks of raw materials, but no new orders to be placed or accepted for materials except for new standard sizes as herein defined.

4. Each manufacturer to reduce his line of steel springs to not more than 12 designs. Not more than six designs of any one line such as spiral, link fabric, or woven to be manufactured.

5. The manufacture of brass cribs to be discontinued.

6. The manufacture of panel beds to be discontinued.

Use of Tubing Restricted.

7. Each manufacturer of metal bedsteads to restrict his use of tubing to the following sizes: Round for head and foot ends 1-inch or 1.05-inch—1.9-inch or 2-inch (two sizes only). Round for cribs, $\frac{5}{8}$-inch—$\frac{7}{8}$-inch. Square, not over $1\frac{1}{2}$-inch. All tubing of the 1.9-inch or 2-inch diameter to be of light wall grade not over 18-gauge.

8. In the manufacture of springs no tubing larger than $1\frac{1}{2}$-inch diameter to be used (as risers over 4-inch are to be discontinued) except for three-piece beds, where $1\frac{1}{2}$-inch tubing may be used.

9. The use of head and foot angles larger than 1 by 1 by $\frac{1}{8}$ to be discontinued on beds.

10. The use of side rail angles larger than $1\frac{1}{2}$ by $1\frac{1}{2}$ by $\frac{1}{8}$ inch or its equivalent in weight to be discontinued on beds.

11. Each manufacturer to reduce the height of head ends to a maximum of 45 inches, not including casters.

12. Each manufacturer to reduce the height of foot ends to a maximum of 30 inches, not including casters.

13. The number of fillers in 3-foot and 3-foot 6-inch beds not to exceed three. In 4-foot and 4-foot 6-inch beds not to exceed five.

Fillers and Cross Rods.

14. Each manufacturer of metal bedsteads to restrict his use of tubing for fillers and cross rods to the following sizes: Round filler tubes for bedsteads $\frac{5}{8}$-inch or $\frac{7}{8}$-inch—1-inch or 1.05-inch (two sizes only). Square filler tubes for bedsteads 1-inch and the square equivalent to above sizes. Rectangular filler tubes for bedsteads the equivalent of 1-inch square. Round filler rods for bedsteads and cribs $\frac{1}{2}$-inch—$\frac{5}{8}$-inch—$\frac{3}{4}$-inch. Round cross tubing $\frac{5}{8}$-inch—$\frac{7}{8}$-inch—1-inch or 1.05-inch—$1\frac{1}{4}$-inch. Square cross tubing 1-inch—$1\frac{1}{4}$-inch. Round cross rods $\frac{1}{2}$-inch—$\frac{5}{8}$-inch—$\frac{3}{4}$-inch. The use of 1.9-inch or 2-inch tubing may be continued for fillers only where such material is procured from manufacturing scrap.

15. Each manufacturer to discontinue the use of white Demar enamel.

16. Each manufacturer to reduce the number of finishes in his line to 7.

17. Each manufacturer to discontinue the use of brass ornaments on bedsteads.

18. No additional material for eliminated styles and sizes shall be ordered after this date except to even up existing stocks on hand and under no circumstances shall any of these eliminated styles and sizes be manufactured after December 1, 1918.

State Councils of Defense Asked To Act as Industries Board Agents In Passing on New Building Work

The Council of National Defense issues the following:

To the several State councils of defense:

The War Industries Board asks the State councils of defense to act as its representatives in passing upon proposed construction, in order that all building which is not absolutely necessary may be stopped. This is part of the new plan of the War Industries Board, by which permits from the board will be required for construction projects, as specified in the attached circular No. 21. You will note that permits are required for all new construction projects, with a few exceptions relating principally to Government work.

This plan has been adopted only because of the imperative necessity of conserving labor, materials, and capital for war purposes.

Manner of Procedure.

The procedure will be as follows:

1. The person interested in a construction project will apply, with a full statement of the facts under oath, to the appropriate local representative of the State council of defense.

2. The local representative of the State council will then investigate the necessity of the proposed construction and transmit its recommendation, with a summary of the facts, to the State council for review.

3. The State council, or its appropriate committee, will review the case.

(a) If the State council decides in favor of the construction, it will at once send its recommendation, with a full statement of all the facts, to the nonwar construction section of the Priorities Division of the War Industries Board. The nonwar construction section will then grant or withhold the permit and notify the State council of defense and also the individual concerned of its action.

Notice By State Councils.

(b) If the State council decides against the proposed construction, it will notify the person concerned that his project has been disapproved.

4. The State council will report monthly to the nonwar construction section all applications submitted to it, including those decided adversely.

The War Industries Board will inform all persons applying directly to it that they must first take up their projects with the appropriate local representative of the State Council of Defense.

The ability of the War Industries Board to enforce this whole plan rests upon the fact that it controls priorities and has also secured from the manufacturers of building materials a pledge not to supply materials for projects which are not authorized under the regulations of the War Industries Board.

To carry on the work outlined above, we recommend that you create a small committee on Proposed Construction. We urge the selection of men of broad experience, who are known to be disinterested and who are so located that they can assemble frequently. If an existing committee can do this work, it can be assigned to them.

Duties of Committee.

The duties of this committee will be:

1. To create and direct the suborganization throughout your State. As the need of action is immediate, we believe in cases where practicable your County Councils or like organization should be utilized.

2. To see that the plan of the War Industries Board for the curtailment of construction is understood throughout the State and to create a public state of mind which will automatically discourage building.

3. To maintain regular communication with the War Industries Board on the one hand and with local representatives on the other hand, in order that the policies of the War Industries Board regarding construction may be uniformly applied locally.

4. To pass upon actual cases of proposed construction.

Further Information to be Sent.

The War Industries Board will shortly send you further information regarding procedure and will thereafter maintain direct communication with you. The board will also supply you with application and report blanks in quantity. We ask you, however, to set up your organization at once and notify us of your action.

It is hardly too much to say that the success of the entire priorities system of the Government will under this plan depend upon you. We trust you will give it your unremitting attention, and at the same time impress upon your entire organization the fact that this task will be one of their most important functions. We enclose a copy of a letter in which the Secretary of the Navy, as Acting Chairman of the Council of National Defense, has assured the Chairman of the War Industries Board of your full support.

Very truly yours,

ARTHUR H. FLEMING,
Chief of Section.

Secretary Daniels's Letter.

SEPTEMBER 7, 1918.

Mr. BERNARD M. BARUCH,
Chairman War Industries Board,
Washington, D. C.

DEAR SIR: Responsive to your letter of August 22, 1918, to the Secretary of War, as chairman of the Council of National Defense, it gives me pleasure to inform you that in pursuance of a resolution adopted by the Council of National Defense the State and county councils of defense throughout the Nation are being requested, through the State councils section of the Council of National Defense, to cooperate in carrying into effect this plan designed to defer until after the war all construction work which can not properly be classed as a direct or indirect war necessity; that labor, fuel, transportation, materials, and capital may be conserved, mobilized, and diverted into channels which will hasten the winning of the war.

The Council of National Defense without reservation pledges its entire organization—National, State, and county—to give to the War Industries Board wholehearted cooperation in carrying this plan into effect.

Yours, very truly,

JOSEPHUS DANIELS,
Secretary of the Navy and
Acting Chairman of the
Council of National Defense.

MILLION RIFLES IN A YEAR OUTPUT OF ONE U. S. PLANT; ALL OF 1917 ENFIELD TYPE

TWO MONTHS AHEAD OF SCHEDULE

Acting Secretary of War Tells of Work Done by Midvale Company. Telegram from Secretary Baker. Soldiers in Liberty Loan Drive.

Official press interview with the Acting Secretary of War:

On September 17, 1917, the Eddystone plant of the Midvale Steel & Ordnance Co. turned out its first rifle for the United States. To-day (Sept. 16) it is turning out its millionth rifle. Thus, in one year, this concern has turned out one million rifles of the so-called 1917 modified Enfield type. The plant was approximately two months ahead on its first delivery.

Cable from Secretary Baker.

I have a cablegram from Secretary Baker in response to a cable I sent him on the result of the registration which I will read to you:

"Our Army here is magnificent. The response of the Nation at home is worthy of it. Gen. Pershing's victory and the enrollment of America's vast man-power marks an epoch in America's participation in the war. Baker."

Mr. Crowell also issued the following statement in regard to use of returned soldiers in connection with Liberty loan drives:

Returned Soldiers in Loan Drive.

"The War Department is in receipt of a large number of requests for soldiers who have been returned from France to be used in connection with the Liberty loan drive in various parts of the United States.

"Such soldiers as have been returned from France and who are convalescent from their wounds to such an extent as will permit them being used will be at the disposal of the Treasury Department for that purpose.

Reports from Hospitals.

"Reports have been called for from the hospitals where such soldiers are receiving attention, and the number of such men will be determined upon when reports have been received of men who are adjudged by the doctors as physically fit to perform such duty."

REGULATIONS FOR DELIVERY OF FREIGHT AT DESTINATION

The United States Railroad Administration issues the following:

P. S. & A. CIRCULAR NO. 25.

WASHINGTON, *August 15, 1918.*

To allay any misunderstanding with respect to what constitutes delivery of freight at destination, as provided for by General Order No. 25, and for the purpose of defining when transportation charges are due, the following rules are promulgated:

1. The lien on property transported should not be released if there is doubt as to the willingness or ability of the consignee to promptly pay the transportation charges. In such cases the present practice should be continued and payment of freight charges exacted before placement of cars on private siding, before delivery of cars to terminal switching carrier or before seals are broken after placement on public team tracks. If commodities are transported in open cars freight charges should be collected before cars are unloaded, and if considered necessary, before placement on team tracks.

2. Cars consigned to bonded customers or to regular responsible customers are to be considered as delivered when placed upon industrial sidings or team tracks, either those connecting directly with the road haul carrier or those located on terminal switching lines.

3. Cars will be considered to be delivered when placed on interchange tracks with industrial railroads.

4. Under the provisions of paragraphs 2 and 3, cars will also be considered as delivered when constructively placed, as provided by demurrage rules.

C. A. PROUTY, *Director.*

Corrected Statements On Housing Contracts

The Department of Labor authorizes the following:

The following are corrected statements of the awards for projects No. 503 and No. 1368:

A contract for 576 houses for the same number of families, and the utilities and town planning at project No. 503, Philadelphia, Pa., has been awarded to Roydhouse Arey Co., 1209 Fidelity Building, Philadelphia, Pa. The contract is on a fixed fee basis.

A contract for 328 houses, and the utilities and town planning at project No. 1368, Seven Pines, Va., has been awarded to Owens-Ames-Kimball Co., Grand Rapids, Mich. The contract is on a fixed fee basis.

The following are complete statements of the awards for projects No. 457 and No. 59:

A contract for 119 houses accommodating 174 families and the utilities and town planning at project No. 457, Hammond, Ind., has been awarded to Wells Bros. Construction Co., Chicago, Ill. The contract is on a fixed fee basis.

A contract for 78 houses accommodating 90 families and the utilities and town planning at project No. 59, Bath, Me., has been awarded to Leighton Mitchell Co., 95 Milk Street, Boston, Mass. The contract is on a fixed fee basis.

Efforts of Railroad Administration To Improve Traffic Conditions and the Success Attained Shown in Statement

Director General McAdoo announces that the Railroad Administration is following up closely the question of eliminating circuitous routing and is meeting with close cooperation on the part of shippers generally.

Several months ago arrangements were made to check billing at the more important junction points, change routing, and send cars via direct routes, calling attention of the initial lines and shippers to round-about routing.

A report of very great interest shows that during a recent month three Wisconsin junctions rerouted 1,221 cars, with a saving of 93,750 car-miles. The real transportation economy in this, however, is the fact that all these cars were originally routed through Chicago and were diverted to other junctions, thereby avoiding handling through Chicago terminals, as well as making a saving in car-miles.

MORE CARE IN PACKING.

Director General McAdoo authorizes the following:

In the effort to improve the general handling of less than carload shipments and to reduce the amount of loss and damage claims particular attention has been directed to the feature of improper packing, resulting in more rigid inspection of packages before accepting for shipment.

Reports from one Middle West district indicate that during the period of four months just ending a total of 27,541 small shipments were turned down by the receiving clerks. Fourteen thousand five hundred and seventy of these shipments were repaired or recoopered, and were accepted by the railroads for shipment. Twelve thousand nine hundred and seventy-one of the shipments, however, were rejected entirely by the railroads. This, of course, means that consignees received their goods in much better condition, and undoubtedly also means a big saving to the railroads in avoiding numerous claims for loss and damage which would have accrued had the shipments been accepted as originally presented.

Particular attention is being given to this matter of less than carload shipments, and many thousands of car miles are being saved daily by the elimination of duplicate or unnecessary package cars.

NEW RATES ON VELVET BEANS.

Director General McAdoo authorizes the following statement:

At the present time there are no commodity rates applying on velvet beans, meal, cake, etc., from Memphis, Tenn., to points in Arkansas, Louisiana, and Oklahoma. In order to encourage the movement of these commodities there has been authorized the establishment from Memphis to all points in Arkansas, Oklahoma, and points in Louisiana (west of the Mississippi River) the same rates as now apply on cottonseed meal, subject to minimum carload weight of 40,000 pounds.

On account of the increased necessity for stock feed and the scarcity of cottonseed meal a demand has been created at points in the Southwest for velvet beans, velvet-bean meal, velvet-bean cake, copra meal, and soya-bean meal.

These commodities are used as live-stock feed the same as cottonseed meal. Live-stock feeders in the States of Oklahoma, Arkansas, and Louisiana, west of the Mississippi River, who have heretofore used cottonseed meal for feeding purposes, owing to the shortage of cottonseed meal must now seek some other feed. Shippers at Memphis, Tenn., advise that they are able to take care of the situation by supplying velvet beans, velvet-bean meal, velvet-bean cake, copra meal, and soya-bean meal, which commodities make good substitutes for cottonseed meal for feeding purposes.

138 FRUIT TRAINS OPERATED.

Director General McAdoo announces that a report from Hale Holden, regional director, of the Central Western Region, for the month of August shows that during that month 138 special fruit trains, with 5,640 cars, were operated through from California to the Missouri River and Chicago. The total California movement since commencement of the season about June 1 amounted to 446 trains, with 17,495 cars.

The Colorado fruit movement commenced about August 15, and during the latter portion of the month there were moved a total of 45 fruit specials, with 1,523 cars.

Roll Call of the Red Cross for Christmas Honor List

The Red Cross issues the following:

The Red Cross Christmas roll call in December, announcement of which was recently made by national headquarters of the American Red Cross, and through which it is hoped to enlist every American in every land in Red Cross ranks, will be held this year in cooperation with the annual campaign of the National Tuberculosis Association. This statement was made at national headquarters in Washington.

It is pointed out that the combined campaign in all probability will be far more effective than have previous drives of the National Tuberculosis Association. In the past the latter organization has carried on an independent campaign for the sale of Christmas seals, the proceeds of which have been devoted to the prevention of tuberculosis in the United States.

Arrangements are being made by the Red Cross war council to finance the National Tuberculosis Association this year, as it is felt that this war-time arrangement between the two organizations will leave the National Tuberculosis Association in an even stronger position after the war to carry on a work which, it is pointed out, should receive the wholehearted support of the whole country.

Executive Order Authorizing the Sale Of Lands by Alien Property Custodian

EXECUTIVE ORDER AUTHORIZING THE ALIEN PROPERTY CUSTODIAN TO SELL CERTAIN PROPERTY AT PRIVATE SALE.

By virtue of the authority vested in me by "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, known as the trading with the enemy act, and the amendment to such act embodied in "An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years, on account of war expenses, and for other purposes," approved March 28, 1918, I hereby, in the public interest, make the following determination, order, rule, and regulation:

The Alien Property Custodian is hereby authorized to sell at private sale, without public or other advertisement, certain real estate now being held and administered by him as such custodian, and heretofore, upon requirement by him, conveyed, transferred, assigned, and delivered to him as the property of Lilly Busch, whom he did after investigation determine to be an enemy within the purview of the said act as amended, described as follows to wit:

Beginning at a point in the westerly line of Northern Avenue, as the same is now legally established, distant 178.24 feet northwardly from the corner formed by the intersection of said westerly line of Northern Avenue with the northerly line of West One hundred and eighty-first Street; running thence westerly in a straight line which on its southerly side makes an angle of 87° 54′ and 52″ with said westerly line of Northern Avenue, 196.53 feet; thence in a straight line, still running westwardly but bearing to the north and making an angle on its northerly side with said last-mentioned straight line of 151° 3′ and 30″, 161.67 feet to the easterly line of Riverside Drive at a point therein distant 203.90 feet northwardly measured along the easterly line of said drive from the corner formed by the intersection of the said easterly line of Riverside Drive with the northerly line of West One hundred and eighty-first Street aforesaid; thence northwardly along the easterly line of Riverside Drive on a curve to the left having a radius of 375 feet, 39.658 feet to a point of tangency in said easterly line of said drive; thence still northwardly along the easterly line of said drive on a line tangent to said curve of 375 feet radius, 147.238 feet to a point of curve in said easterly line of said drive; thence still northwardly along the said easterly line of said drive on a curve to the right having a radius of 310 feet, 82.824 feet to a point of tangency in said easterly line of said drive; thence still northwardly along said easterly line of said drive on a line tangent to said curve of 310 feet radius, 16.302 feet to a point in said easterly line of said drive, said point being the intersection of the easterly line of said Riverside Drive with the northerly "record" line of the property described herein; thence eastwardly in a straight line, which on its southerly side makes an angle of 87° 37′ and 27.6″ seconds with said easterly line of Riverside Drive, 5.312 feet to an angle point in the aforesaid record line; thence in a straight line still running eastwardly but bearing to the north and making an angle on its southerly side with said last-mentioned straight line of 186° 38′ and 16″, 292.73 feet to a point in the westerly line of Northern Avenue as the same is now legally established; said point being distant 421.07 feet northwardly from the corner formed by the intersection of said westerly line of Northern Avenue with the northerly line of West One hundred and eighty-first Street; running thence southwardly along the west line of said Northern Avenue 242.83 feet to the point or place of beginning (references hereinbefore made to Riverside Drive and One hundred and eighty-first Street are intended to designate the same as existing on and before Mar. 14, 1910); excepting therefrom 2,204.3 feet, more or less, the area of square feet taken by the city of New York in a condemnation proceeding, as more particularly described on the damage map approved by the board of estimate and apportionment on or about July 2, 1914, and approved by the commissioners of assessment on or about April 13, 1915; together with (but without warranty with respect thereto) all strips or gores of land, if any, owned by party of the first part adjacent to said premises.

Subject to all and singular the covenants and restrictions contained in deeds recorded in liber 370 of conveyances at page 40, liber 411 of conveyances at page 332, liber 369 of conveyances at page 252, and liber 531 of conveyances at page 264, and variations between the fences and retaining walls and the record lines on south. (As shown on survey made by Earl B. Lovell, dated Aug. 9, 1909.)

And including in the premises hereby conveyed all right, title, and interest of party of the first part in and to any land lying in the bed of any street, road, or avenue opened or proposed in front of or adjoining said premises, and except as to the award for the excepted premises hereinabove referred to taken by the city in said condemnation proceedings, all of the right, title, and interest of party of the first part in and to any award for damage to said premises by reason of change of grade of any street.

Situated in the city of New York and State of New York.

My reasons for the foregoing determination, order, rule, and regulation are:

(a) The said Lilly Busch has filed with said Alien Property Custodian her petition pursuant to the provisions of section 9 of said trading-with-the-enemy act, asking that said property be returned to her, and because of the pendency of said petition said property can not be sold at public sale.

(b) An offer for the purchase of said real estate has been made heretofore, and is now pending, but said offer, if accepted, must be accepted at once.

(c) Said proposed sale is an advantageous one, and said Lilly Busch has consented in writing that said sale be made, and it is for the best interest of the United States, and of all persons who are or may be interested in said property, that the same be sold at once.

WOODROW WILSON.

THE WHITE HOUSE,
September 12, 1918.

CIVIL SERVICE COMMISSION ANNOUNCES EXAMINATIONS

The United States Civil Service Commission announces open competitive examinations as follows:

List No. 1. Examinations of the nonassembled type; that is, those in which competitors are not assembled for scholastic tests, but are rated upon the subjects of education, training, and experience, and corroborative evidence. Applications for these examinations are received at any time: Inspector of mechanical or electrical equipment, inspector of structural steel, supervising or traveling accountant, construction cost accounting supervisor, automotive engineer, automotive designer, automotive draftsman, automotive tracer, mechanical draftsman, War Department; special field agent in entomology, Department of Agriculture; tabulating mechanician, Census Bureau; elevator conductor, departmental service.

List No. 2. Delbert Taylor. Mrs. Flora May Taylor, R. F. D. No. 2, Springerton, Ill.
Ray Van Dorn. Charles Van Dorn, 218 North Market Street, Joliet, Ill.
Herman B. Waitman. Weslie Waitman, San Bernardino, Cal.
Floyd K. Welch. Mrs. Niles Oats, Lufkin, Tex.
Robert Wepfer. Jene Le Beau, 335 East North Avenue, Milwaukee, Wis.
Ed Whatley. Mrs. Margrette Whatley, Tallassee, Ala.
William L. Whidden. James Whidden, Spencer, Nebr.
Rosco R. Priestley. D. G. Priestley, Cherokee, Kans.
James W. Quinn. Dr. J. E. Quinn, Antioch, Cal.
Arthur Randall. James Randall, Mio, Mich.
Nicholas Rice. Mrs. Minnie Rice, 353 Peshine Avenue, Newark, N. J.
Roy Alvin Richardson. Mrs. Mary Barone, 32 Park Street, Buffalo, N. Y.
Albert Skierka, jr. Mrs. Anna Peterson, Chester, Mont.
Raymond Lloyd Smith. Cornelius A. Smith, West Nyack N. Y.
William Patrick Stowell. Mrs. Rosie Stowell, Western Port, Md.
Wenzel Frank Tikal. Mrs. Wenzel Tikal, 2003 South Thirteenth Street, La Crosse, Wis.
John G. Vincent. Mrs. Marie Vincent, Madeira, Portugal.

Prisoner.

Pvt. Norman L. Zimmerman. John A. Zimmerman, Meyersdale, Pa.

Previously Reported Missing in Action, Now Reported Wounded.

PRIVATES.

Edward A. Buchanan. Robert Buchanan, Nampa, Idaho.
Charles Burris. Miss Myrtle Burris, Hastings, Nebr.
Emilio Buso. Sartoretto Vincenzo, First Avenue, Raritan, N. J.
George J. Byrne. Patrick J. Byrne, Avon, Conn.
Floyd W. Campbell. William Campbell, 462 Ruthford Avenue, Trenton, N. J.
George R. Moore. Mrs. Jennie Moore, 2018 East Dauphin Street, Philadelphia, Pa.

Previously Reported Missing in Action, Now Reported Killed in Action.

Pvt. Edward H. Bair, jr. Edward H. Bair, sr., 515 North Main Street, Greensburg, Pa.
Lieut. Arthur Meredith Roberts. Mrs. D. Roberts, 4011 Altamond Road, Birmingham, Ala.

Previously Reported Killed in Action, Now Reported Wounded in Action.

PRIVATES.

Ernest Olsen. Holgar Fred Olsen, R. F. D. No. 2, box 88, Coral, Mich.
James Durand. Mrs. Mary D. Winholt, 1505 South Tenth Street, Springfield, Ill.
Frank A. Krider. Mrs. Mary Krider, Brazil, Ind.

Previously Reported Killed in Action, Now Reported Prisoner.

Pvt. Nick Pilipchuk. Nikita Pilipchuk, Proskurow, Russia.

MARINE CORPS

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	2
Wounded in action (severely)	2
Wounded in action (degree undetermined)	4
Missing in action	10
Total	18

Killed in Action.

Sergt. Myron H. Beals. Marion Beals, Plymouth, Mich.
Pvt. Lee Pitzer. John Martin Pitzer, R. F. D. No. 1, Hamersville, Ohio.

Wounded in Action (Severely).

PRIVATES.

Roy Striegel. Emeline Striegel, Burlington, Kans.
George H. Wissman. Emelie Wissman, 1025 Oak Street, Winetka, Ill.

Wounded in Action (Degree Undetermined).

Second Lieut. Jacob H. Heckman. Jacob Heckman, 220 Marchall Street, Elizabeth, N. J.

Wounded in Action (Degree Undetermined); Previously Reported Missing in Action.

PRIVATES.

Max Bradley. George E. Bradley, Ztomir, Bolin, Russia.
William E. Ballinger. O. F. Ballinger, 52 Patomic Street, Dayton, Ohio.
Gust A. Birttmen. Emma Thomke, 583 Livingston Avenue, St. Paul.

Missing in Action.

PRIVATES.

Irmis J. Doudeau. Dollard Doudeau, 20 Garner Street, Cohoes, N. Y.
Jesse D. Johnson. Alice A. Johnson, 1221 West Monroe Street, Spokane, Wash.
John Kurzawski. Frank Kurzawski, 17 Brown Street, Albion, N. Y.
Arthur O. Queck. William A. Queck, 41 Grant Avenue, Jersey City, N. J.
Omer A. Rice. Mary Elizabeth Rice, Valley, Nebr.
James H. Roberts. Elizabeth Roberts, 127 North Maderia Street, Baltimore, Md.
Leslie T. Shapton. Elizabeth Shapton, R. F. D. No. 1, Charlevoix, Mich.
Charles M. Shontz. Ellory G. Shontz, 45 Marshall Street, Shamokin, Pa.
Wilbert W. Sinclair. Asa F. Sinclair, Woodstock, N. H.
Andrew J. Sullivan. Thomas J. Sullivan, Mooresbridge, Ala.

KILLED IN SEAPLANE ACCIDENT.

The Navy Department is informed that Ensign Harry T. Catchpole, United States Naval Reserve Forces, was killed Friday in a seaplane accident near Five Fathom Bank lightship, off Cape May, N. J. Mother, Mrs. Anna Mary Catchpole, 1674 Amherst Street, Buffalo, N. Y.

LIST OF PURCHASE ORDERS AND CONTRACTS PLACED BY THE GENERAL ENGINEER DEPOT OF THE ARMY

Contracts have been awarded by the General Engineer Depot, War Department, as follows:

August 20, 1918.

Columbus McKinnon Chain Co., Columbus, Ohio, link coil chains.
Worthington Pump & Machinery Corporation, Washington, D. C., sets spare parts.
American Chain Co., New York City, link coil chains.
Millers Falls Co., Millers Falls, Mass., carpenter's tools.
Simmons Hardware Co., Philadelphia, Pa., gimlet bits.
Lufkin Rule Co., New York City, metallic tapes.
Goodell-Pratt Co., Greenfield, Mass., breast drills.
E. C. Atkins & Co. (Inc.), Indianapolis, Ind., saws.
Bridgeport Hardware Mfg. Corporation, Bridgeport, Conn., tool holders.
Clyde Iron Works, Duluth, Minn., spares for double-drum crabs.
Henry Disston & Sons Co., Philadelphia, Pa., files.
Hibbard, Spencer, Bartlett Co., Chicago, Ill., twist drill.
The Harold McCalla Co., Philadelphia, Pa., soft steel.
United Machine Works, New York City, blasting machine tester.
Mathias Klein & Sons, Chicago, Ill., pliers.
Cardinell Vellum Mfg. Co., Montclair, N. J., tracing paper.
Columbus Forge & Iron Co., Columbus, Ohio, anvils.
Seattle Frog & Switch Co., Seattle, Wash., turnouts.
Stanley Rule & Level Co., New Britain, Conn., carpenter's tools.
C. E. Jennings & Co., New Haven, Conn., carpenter's chests.
The Herschede Hall Clock Co., Cincinnati, Ohio, plane-table boards.
Lakeside Forge Co., Erie, Pa., angle wrenches.
Irvington Varnish & Insulator Co., Irvington, N. J., varnish cambric.
Shaw-Walker Co., Washington, D. C., steel letter files.
General Electric Co., Schenectady, N. Y., mountings for searchlights.
Sperry Gyroscope Co., Brooklyn, N. Y., high-intensity lamp mechanisms.
Westinghouse Electric & Manufacturing Co., Washington, D. C., spares for motors.
Canton Sheet Steel Co., Canton, Ohio, gauge steel sheets.
Clyde Iron Works, Duluth, Minn., spares for drum hoists.
The Hancock Inspirator Co., New York City, sets nozzles and tubes.
Anchor Webbing Co., Pawtucket, R. I., tape.
Detroit Graphite Co., Detroit, Mich., trench-cover gray paint.
Albert & J. M. Anderson Mfg. Co., Boston, Mass., electric equipment for Gantry cargo unloaders.
Howells Mining Drill Co., Plymouth, Pa., miner's spoons.
The Crane Co., Washington, D. C., hose gate valves.
Reading Chain Block Co., Reading, Pa., Triplex blocks.
Winsted Edge Tool Co., Winsted, Conn., carpenter's slicks.
Armstrong Bros. Tool Co., Chicago, Ill., steel clamps.
A. B. Dick Co., Chicago, Ill., Edison-Dick mimeoscopes.
L. F. Grammes & Sons, Allentown, Pa., OK clips.
Wardway Vehicle Works, Chicago Heights, Ill., clinching irons.
Adams Westlake Co., Chicago, Ill., switch lamps.
Indiana Lumber & Mfg. Co., South Bend, Ind., intrenching boxes.
Brazil Stamping & Mfg. Co., Chicago Ill., tin boxes.
Atlas Tack Co., Fairhaven, Mass., tacks.
Sperry Gyroscope Co., Brooklyn, N. Y., marching compasses.
Smith Hemenway, Irvington, N. J., shoeing pincers.
Charles Somerville Co., Washington, D. C., couplings.
Electro Bleaching Gas Co., New York City, liquid chlorine.

Important Notice to U. S. Purchasing Agents

Purchasing agents for the various Government departments and the special United States war administrations are earnestly reminded to send to the Official U. S. Bulletin at the earliest possible moment all copy for bids to be advertised and purchase awards, in order that these may be promptly and correctly printed in the Bulletin in accordance with the orders of the Secretary of War and other heads of departments.

The task of preparing this copy for publication, with a view to absolute correctness and continuity, is a considerable one, but, with the cooperation of the purchasing agencies, should result in a great help, not only to the departments themselves, but to bidders throughout the country, all of whom, through the medium of the Official Bulletin, are desirous of keeping informed of the Government's needs.

The Fairbanks Co., Washington, D. C., wood split pulley.
George F. Cahill, New York City, flood-light projectors.
Kreauter & Co., Newark, N. J., pinch bars.
Ramapo Iron Works, Hillburn, N. Y., turnouts.
Thomas Laughlin Co., Portland, Me., drop-forged steel.
Red Jacket Mfg. Co., Davenport, Iowa, hand pumps.
General Electric Co., Washington, D. C., motors.
The J. G. Brill Co., Philadelphia, Pa., sprocket chains.
John A. Roebling Sons Co., Trenton, N. J., cast-steel switch ropes.
W. H. Anderson Tool & Supply Co., Detroit, Mich., cold chisels.
Steger & Sons Piano Mfg. Co., Steger, Ill., mimeoscope boxes.
Lackawanna Steel Co., Buffalo, N. Y., steel rails.
W. Bingham Co., Cleveland, Ohio, round, cold, and soft steel.
Alfred F. Moore, Philadelphia, Pa., gauges.
Bethlehem Steel Co., Washington, D. C., tie plates.
Bausch & Lomb Optical Co., Rochester, N. Y., 44-inch mirrors.
Whitman & Barnes Mfg. Co., Akron, Ohio, flat track bits.

August 21, 1918.

McDonough Mfg. Co., Eau Claire, Wis., sawmills.
Rudolph & West Co., Washington, D. C., hammers, crosscut saws.
The Stanley Rule & Level Co., New Britain, Conn., block planes.
H. W. McCandles & Co., Washington, D. C., lamps, 6-volt.
The Machinists' Supply Co., Chicago, Ill., twist drills, hammers.
C. Hammond & Sons (Inc)., Ogontz, Pa., hammers, claw.
Dilworth, Porter & Co. (Inc.), Pittsburgh, Pa., boat spikes.
Illinois Malleable Iron Co., Chicago, Ill., screwed crosses and reducers.
Hugh Reilly Co., Washington, D. C., glass crystal negatives.
Morse Twist Drill & Machine Co., Washington, D. C., bit stock drills.
A. L. Swett Iron Works, Medina, N. Y., swage blocks and blacksmiths' cones.
Chicago Fuse Mfg. Co., New York City, fuses and wire.
Hibbard, Spencer & Bartlett Co., Chicago, Ill., miscellaneous tools.
Turner, Day & Woolworth Co., Louisville, Ky., adze handles, hammer handles.
Eugene Dietzgen Co., New York City, alidades, leveling rods.
Dennison Mfg. Co., Washington, D. C., jars, paste, library.
Peck, Stow & Wilcox, Southington, Conn., soldering outfits.
Whitaker Paper Co., Washington, D. C., paper for field maps.
Sallee Bros., Pocahontas, Ark., sledge handles.
H. C. White Co., North Bennington, Vt., hand stereoscopes.
Western Electric Co., New York City, portable microphone switching sets.
Radiator & Lamp Repair Co., Indianapolis, Ind., cans, steel.
Weibusch & Hilger (Ltd.), New York City, spoke nipple wrenches.
Keuffel & Esser Co., Hoboken, N. J., hot press imperial paper.
The Herschede Hall Clock Co., Cincinnati, Ohio, military clinometers.
Justrite Mfg. Co., Chicago, Ill., lamps.
Philip Lindemeyr, Baltimore, Md., paper, mimeograph.
Wood & Safford Machine Works, Great Falls, Mont., cylinder grinding attachment.
Wallace & Tiernan Co., New York City, automatic control compensating valves.
Connecticut Valley Mfg. Co., Centerbrook, Conn., auger bits.
Warren Tool & Forge Co., Warren, Ohio, blacksmiths' swages.
F. A. Hardy Co., Chicago, Ill., goggles.
Theo. Alteneder & Sons, Philadelphia, Pa., beam compasses.
Iron City Tool Works, Pittsburgh, Pa., rivet headers.
Troy Carriage Sunshade Co., Troy, Ohio, canvas rolls.

August 22, 1918.

Doubleday-Hill Electric Co., Washington, D. C., dry cells.
Kueffel & Esser Co., Hoboken, N. J., hot press imperial paper.
Chas. H. Higgins & Co., Brooklyn, N. Y., ink, drawing.
Herschede Hall Clock Co., Cincinnati, Ohio, military clinometers.
Western Electric Co., New York City, microphone switching sets.
E. Horton & Son Co., Windsor Locks, Conn., plate casting and chucks.
Radiator & Lamp Repair Co., Indianapolis, Ind., cans, steel.
Rudolph & West, Washington, D. C., fence wire.
Henry C. Karr, Washington, D. C., stop watches.
Oshkosh Manufacturing Co., Oshkosh, Wis., lug hooks and load binders.
Superior Machine Tool Co., Kokomo, Ind., sockets and chucks.
Red Jacket Manufacturing Co., Davenport, Iowa, hand-power force pumps.
Bausch & Lomb Optical Co., Rochester, N. Y., reading glasses.
Leet Bros. (Inc.), Washington, D. C., blue print dryer.
Corona Typewriter Co., Washington, D. C., typewriters.
Jones Hollow Ware Co., Baltimore, Md., cast-iron sugar kettles.
Crouse-Hinds Co., Syracuse, N. Y., condulets.
Simmons Hardware Co., Philadelphia, Pa., plumb bob.
Underwood Typewriter Co., Washington, D. C., typewriters.
Wheeler Reflector Co., Boston, Mass., copper reflectors.
Whitaker Paper Co., Washington, D. C., paper for field maps.
United States Rubber Co., New York City, thin rubber gloves.
Piqua Handle Co., Piqua, Ohio, chisel handles.
Morse Twist Drill & Machine Co., Washington, D. C., bit stock drills.
William Johnson, Newark, N. J., wing dividers.
Eugene Dietzgen Co., New York City, leveling rods.
Industrial Works, Bay City, Mich., spares for locomotive cranes.
H. D. Smith & Co., Plantsville, Conn., shoeing pincers.

LIST OF PURCHASE ORDERS AND CONTRACTS PLACED BY THE GENERAL ENGINEER DEPOT OF THE ARMY

Sallee Bros., Pocohontas, Ark., railroad pick handles.
Samuel Harris & Co., Chicago, Ill., twist drills.
Thompson & Co., Pittsburgh, Pa., raw linseed oil.
Davis-Bournonville Co., Washington, D. C., oxygen cylinders.

August 23, 1918.

F. J. Lewis Manufacturing Co., Chicago, Ill., roofing pitch.
Champion Tool Co., Meadville, Pa., cold chisels.
Whitaker-Glessner Co., Wheeling, W. Va., sheets stovepipe stock.
Joseph Gillott & Sons, New York City, mapping pens.
William Johnson, Newark, N. J., pinch dogs.
International Harvester Corporation, Chicago, Ill., tractors.
E. E. Court, Washington, D. C., Court's protractors.
Neal & Brinker Co., New York City, taper shank twist drills.
Ford Motor Co., Detroit, Mich., parts for searchlight carriages.
Sallee Bros., Pocahontas, Ark., railroad pick handles.
Simmons Hardware Co., Philadelphia, Pa., plumb bobs.
A. B. Dick Co., Chicago, Ill., mimeoscopes.
Goodell-Pratt Co., Greenfield, Mass., calipers.
Heller Bros. Co., Newark, N. J., tongs.
Campbell Glass & Paint Co., St. Louis, Mo., paints and enamels.
Eastman Kodak Co., Rochester, N. Y., printing frames.
Cant & Karwiese, Chicago, Ill., chisels and punches.
Adams & Westlake Co., Chicago, Ill., switch lamps.
Hibbard, Spencer & Bartlett Co., Chicago, Ill., wire.
Dayton Rubber Manufacturing Co., Dayton, Ohio, airless tires.
Beall Tool Co., East Alton, Ill., blacksmiths' countersinks.
Lineatime Manufacturing Co., Washington, D. C., line-a-times.
Kee-Lox Manufacturing Co., Rochester, N. Y., typewriter ribbons.
J. H. Williams Co., Brooklyn, N. Y., drop-forged hooks.
Buffum Tool Co., Louisiana, Mo., T screw drivers.
Oliver Iron & Steel Co., Pittsburgh, Pa., track bolts.
W. & L. E. Gurley, Troy, N. Y., striding levels.
Theo. Alteneder & Sons, Philadelphia, Pa., boxwood scales.
H. Cole Co., Columbus, Ohio, paper, tracing.
Wm. Schoolhorn Co., New Haven, Conn., pliers.
Clark Co., West Newton, Pa., black steel pipe.
Bussmann Manufacturing Co., St. Louis, Mo., fuses.
A. B. Goodyear, Bloomdale, Ohio, lead binders.
Georgia-Florida Yellow Pine Emergency Bureau, Washington, D. C., yellow pine.
Kennedy Manufacturing Co., Van Wert, Ohio, steel bags.
Eugene Dietzgen Co., New York City, protractors, brass.
Bethlehem Steel Co., Washington, D. C., tie plates.
Illinois Parlor Furniture Co., Washington, D. C., boxes.
Geo. B. Carpenter & Co., Chicago, Ill., snatch blocks.
Goodell-Pratt Co., Greenfield, Mass., chain drilling attachments.
Alpher & Kur, Washington, D. C., magnifying glasses.
Cardinell Vellum Manufacturing Co., Montclair, N. J., tracing paper.
National Tool Co., Pittsburgh, Pa., nut locks.
William Wharton, jr., Co., Easton, Pa., rail braces.
Kueffel & Esser Co., Hoboken, N. J., map measures.

August 24, 1918.

Hydrant and Valve Manufacturing, War Service Bureau, Washington, D. C., hydrants.
Walworth Manufacturing Co., Chicago, Ill., fire gate valves.
Winsted Edge Tool Works, Winsted, Conn., set chisels and gauges.
Georgia-Florida Yellow Pine Emergency Bureau, Washington, D. C., long-leaf yellow pine.
Buffalo Forge Co., Buffalo, N. Y., bar cutters.
Southern Pine Emergency Bureau, Washington, D. C., long-leaf yellow pine.
Barber & Ross, Washington, D. C., window sashes.
Pittsburgh Steel Co., Washington, D. C., soft steel wire.
Walker Refining Co., Austin, Tex., cubic feet oxygen.
Defiance Pressed Steel Co., Defiance, Ohio, barrier arms, protection fences.
Buff & Buff Co., Boston, Mass., prisms.
George D. Wetherill & Co., Philadelphia, Pa., paint.
M. G. Copeland Co., Washington, D. C., aprons, olive drab.
Bausch & Lomb Optical Co., Rochester, N. Y., magnifying glasses.
Henry C. Karr, Washington, D. C., stop watches.
Adams & Westlake Co., Chicago, Ill., switch lamps.
Mine Safety Appliance Co., Pittsburgh, Pa., safety mine lamps.
Sallee Bros., Pocahontas, Ark., sledge hammer handles.
Sperry Gyroscope Co., Brooklyn, N. Y., portable searchlights.
J. G. Brill Co., Philadelphia, Pa., fan belts, spark plugs, etc.
Goodrell-Pratt Co., Greenfield, Mass., chain drilling attachments.
E. D. Edwards & Co., Detroit, Mich., blocks, steel.
Devoe & Reynolds Co. (Inc.), New York City, asphaltum varnish.
Charles G. Scott & Co. (Inc.), Washington, D. C., office supplies.
C. B. Cottrell & Sons Co., New York City, gasoline engines.
Vane Calvert Paint Co., St. Louis, Mo., White paint.
Esterbrook Steel Pen Manufacturing Co., Camden, N. J., ball-pointed pens.
Robert Bishop Manufacturing Co., South Boston, Mass., torch wicks.
Richard Wilcox Co., Aurora, Ill., mounted grindstones.
Central Railway Signal Co., Pittsburgh, Pa., fuses.
Cleveland Stone Co., Cleveland, Ohio, mounted grindstones.
Henry Disston & Sons Co., Philadelphia, Pa., files.
Beall Tool Co., East Alton, Ill., counter sinks.
Whiting Foundry Equipment Co., Harvey, Ill., brass furnace.
General Electric Co., Schenectady, N. Y., electrical supplies.
The Lakewood Engineering Co., Cleveland, Ohio, clamshell buckets.
Lebanon Chain Works, Lebanon, Pa., shackles and hooks.
Ford & Kendig Co., Philadelphia, Pa., ells, flanges, and valves.
Eagle Glass & Manufacturing Co., Wellsburg, W. Va., oil cans.
The Industrial Works, Bay City, Mich., locomotive cranes.
The Ohio Locomotive Crane Co., Bucyrus, Ohio, locomotive cranes.
Cumberland Steel Co., Cumberland, Md., steel shaftings.
National Can Co., Washington, D. C., fuse boxes.
The Brown Hoisting Co., Cleveland, Ohio, locomotive cranes.
National Electrical Supply Co., Washington, D. C., cable.
Eastman Kodak Co., Rochester, N. Y., printing frames.
National Lamp Works, Cleveland, Ohio (Nela Park), foot-candle meters.
Sieber Products Manufacturing Co., Washington, D. C., Sieber punch
Ramapo Iron Works, Hillburn, N. Y., turnouts.
Wardway Vehicle Works, Chicago Heights, Ill., forge fire rakes.
Gordon Hollow Blast Grate Co., Greenville, Mich., spares for "tower edgers."
Rudolph & West Co., Washington, D. C., blocks.
E. E. Court, Washington, D. C., celluloid protractors.

August 26, 1918.

Walworth Manufacturing Co., Boston, Mass., wrenches.
The Chas. M. Higgins & Co., Brooklyn, N. Y., drawing ink.
The Lutz Co., Guttenberg, N. J., bath trays.
Roanoke Spoke & Handle Co., Roanoke, Va., pick handles.
Sneath Glass Co., Hartford City, Ind., ink stands.
Kee-Lox Manufacturing Co., Rochester, N. Y., carbon paper.
Lefax (Inc.), Philadelphia, Pa., Lefax notebook fillers.
The Lakewood Engineering Co., Cleveland, Ohio, clam-shell buckets.
The W. H. Butler Co., Washington, D. C., paint supplies.
Inland White Lead Co., Chicago, Ill., exterior paint.
The Osgood Co., Marion, Ohio, locomotive cranes.
Culver Stearns Manufacturing Co., Worcester, Mass., mimeoscope adapters.
National Tube Co., Washington, D. C., pipe fittings.
Beall Tool Co., East Alton, Ill., blacksmiths' counter skins.
Sherwin-Williams Co., Newark, N. J., galvanized-iron primer.
Hay Rubber Stamp Co., Washington, D. C., band daters.
American Crayon Co., Waltham, Mass., carpenters' crayons.
Champion Tool Co., Meadville, Pa., blacksmiths' tools.
Boorum & Pease Co., New York City, desk pads.
Campbell Glass & Paint Co., St. Louis, Mo., fire retardant paint.
United States Steel Products Co., Washington, D. C., rigid frogs.
H. D. Edwards & Co., Detroit, Mich., steel blocks.
National Can Co., Washington, D. C., fuse boxes.
Oliver Machinery Co., New York City, pattern-maker's lathes.
Industrial Works Co., Bay City, Mich., locomotive cranes.
Westinghouse Co., Schenectady, N. Y., searchlight parts.
The Carlisle & Finch Co., Cincinnati, Ohio, searchlight base.
Benjamin Moore & Co., Brooklyn, N. Y., deck and floor paint.
Means & Thatcher, Quincy, Mass., gray enamel.
Lackawanna Steel Co., Buffalo, N. Y., splice bars and spikes.
General Electric Co., Schenectady, N. Y., tea-kettle searchlight.
S. S. Stafford & Co., New York City, mucilage.
Midwest Manufacturing Co., St. Paul, Minn., pick handles.
Ohio Varnish Co., Cleveland, Ohio, black paint.
R. P. Clark & Co., Washington, D. C., clips.
Baer Bros., New York City, paints.
Samuel Cabot, Boston, Mass., creosote oil stain.
Keuffel & Esser Co., Hoboken, N. J., pantographs.
Rudolph & West Co., Washington, D. C., snatch blocks.
H. Mueller Manufacturing Co., New York City, calking hammer.
Oliver Iron & Steel Co., Pittsburgh, Pa., woodchoppers' wedges.
Hibbard, Spencer, Bartlett & Co., Chicago, Ill., babbitt metal.
New York Blueprint Paper Co., New York City, T-squares.
Eugene Dietzgen Co. (Inc.), New York City, drawing paper.
Southern Skein & Foundry Co., Chattanooga, Tenn., blacksmiths' cones.
Heller Bros. Co., Newark, N. J., farriers' knives.

August 27, 1918.

The Houston, Stanwood & Gamble Co., Cincinnati, Ohio, boilers, locomotive type.
Ohio Brass Co., Mansfield, Ohio, insulators.
Topping Bros., New York City, eye hooks.
American Steel & Wire Co., Pittsburgh, Pa., wire.
Peck, Stow & Wilcox Co., Southington, Conn., farriers' nippers.
Simmons Hardware Co., Philadelphia, Pa., machinists' hammers.
Champion Tool Co., Meadeville, Pa., turning hammers and tongs.
Southington Hardware Co., Southington, Conn., steel squares.

LIST OF PURCHASE CONTRACTS MADE BY BUREAU OF AIRCRAFT PRODUCTION

The following is a list of purchases contracted for by the Bureau of Aircraft Production:

[NOTE.—The first number at the beginning of each paragraph is the ORDER NUMBER, the second the CONTRACT NUMBER.]

August 22, 1918.

20038–A–16. 1816–A. Dayton-Wright Airplane Corporation, Dayton, Ohio, spares for planes.
710153. 2431–5. Tennessee Valley Iron & Railroad Co., Collinwood, Tenn, wood.
710159. 4557. Frank P. Jones, 807 Liberty Building, Philadelphia, Pa., lumber.
710160. 4558. Standard Aircraft Corporation, Elizabeth, N. J., lumber.
710161. 4560. William Whitman & Co. (Inc.), 25 Madison Avenue, New York City, balloon cloth.
710162. 4563. The Lawton Mills Corporation, care of E. N. Morris, P. O. Box 1057, 86–88 Worth Street, New York City, balloon cloth.
710164. 4564. Wellington Sears & Co., 66 Worth Street, New York City, N. Y., balloon cloth.
710165. 4565. Wellington Sears & Co., 66 Worth Street, New York City, N. Y., balloon cloth.
710169. 4566. Coventry Co., Anthony, R. I., balloon cloth.
720343. 4559. West Woodworking Co., 308 North Ada Street, Chicago, Ill., propellers.
720351. 4556. Standard Aircraft Corporation, Elizabeth, N. J., airplane.
730219. 4530. Splitdorf Electrical Co., 98 Warren Street, Newark, N. J., magneto parts.

August 24, 1918.

20038-A-35. 1816-A. Dayton Wright Airplane Co., Dayton, Ohio, spares for planes.
370140. 4569. Gray Tractor Co. (Inc.), Minneapolis, Minn., spare parts for tractors.
710170. 4540. E. S. Webster Co., 332-342 Congress Street, Boston, Mass., typewriter ribbon cloth.
710178. 4573. A. H. Wells & Co., Waterbury, Conn., copper tubing.
720309. 4510. Cyclemotor Corporation, Rochester, N. Y., engine spares.
720312. 4571. Howell & Lesser, San Francisco, Cal., airplanes.
720313 4572. U. S. Aircraft Corporation, Red Wood City, Cal., airplanes.
730240. 4574. Livingston Radiator & Manufacturing Co., New York, N. Y., radiators.
730247. 4549. Union Switch & Signal Co., Swissvale, Pa., engines and spares.
850006. 4555. Curtiss Aeroplane & Motor Corporation, Buffalo, N. Y., reimbursement erecting and equipping building at Buffalo.

August 26, 1916.

380891. 4581. Whittaker-Glessner Co., Portsmouth, Ohio, steel drums.
720314. 4570. Liberty Iron Works, Sacramento, Cal., airplanes.
720375. 4575. Curtiss Aeroplane & Motor Corporation, Buffalo, N. Y., spares for planes.
720376. 4578. American Propeller Co., Baltimore, Md., propellers.
730241. 4579. The Marlin-Rockwell Corporation, New York, N. Y., radiators for planes.
730252. 4580. Splitdorf Electrical Co., Newark, N. J., engine spares.
750033. 4583. Jones Metrola (Inc.), 29-31-83 West Thirty-fifth Street, New York City, N. Y., tachometers.
760120. 4576. Burke & James (Inc.), 240-258 East Ontario Street, Chicago, Ill., camera turret suspensions.

August 27, 1918.

410092. 4570. Oxygen Gas Co., Kansas City, Mo., hydrogen gas.
710181. 4584. Wellington Sears & Co., 66 Worth Street, New York City, N. Y., finished balloon cloth.
710182. 4585. Wellington Sears & Co., 66 Worth Street, New York City, N. Y., balloon cloth.
710183. 4588. Wellington Sears & Co., 66 Worth Street, New York City, N. Y., balloon cloth.

August 28, 1918.

30442–46. 2250–2. Wright-Martin Aircraft Corporation, New Brunswick, N. J., engine spares.
480064. 4582. Russell & Cowles, 99 Johns Street, New York, N. Y., motor boat.
480068. 4591. Field Mfg. Co., Owosso, Mich., crating machine shop truck bodies.
730255. 4589. Willard Storage Battery Co., Cleveland, Ohio, batteries.
730256. 4590. Electric Storage Battery Co., 1823–33 L Street NW., Washington, D. C., batteries.
750034. 4587. Sperry Gyroscope Co., Brooklyn, N. Y., air compasses.

August 29, 1918.

710189. 4593. The Wood Mosaic Co., New Albany, Ind., lumber.
710190. 4592. Amos Lumber Co., Edinburg, Ind., lumber.
710193. 4594. Park Drop Forge Co., Cleveland, Ohio, crank shaft forgings.
720443. 4595. Livingston Radiator & Mfg. Co., Seventy-fifth Street and Amsterdam Avenue, New York, N. Y., radiators.
730265. 4596. Union Switch & Signal Co., Swissvale, Pa., engines.
730266. 4597. Standard Gauge Steel Co., Beaver Falls, Pa., connecting rods.

August 30, 1918.

710200. 4601. Breese Veneer Co., Keneva, W. Va., lumber.
720456. 4599. John A. Roebling's Sons Co., Trenton, N. J., balloon cable.
720457. 4600. American Steel & Wire Co., 30 Church Street, New York, N. Y., balloon cable.
730268. 4598. Union Switch & Signal Co., Swissvale, Pa., services and material in repairing engines.
730271. 4602. Niagara Motors Corporation, Dunkirk, N. Y., engine spares.
730275. 4604. Ford Motor Co., Detroit, Mich., cylinders.

August 31, 1918.

730279. 4605. The Burd High Compression Ring Co., Rockford, Ill., engine spares.
730291. 4609. Trumpbour-Whitehead Brass & Copper Co. (Inc.), Canal, Mercer, and Howard Streets, New York, N. Y., copper radiator tubes.
760131. 4608. Eastman Kodak Co., Rochester, N. Y., drum-developing machine.

September 3, 1918.

30442–50. 2250–2. The Wright-Martin Aircraft Corporation, New Brunswick, N. J., cam shafts.
30442–51. 2250–2. Wright-Martin Aircraft Corporation, New Brunswick, N. J., engine spares.
30442–52. 2250–2. Wright-Martin Aircraft Corporation, New Brunswick, N. J., engine spares.
370153. 4613. Cincinnati Milling Machine Co., Cincinnati, Ohio, milling machine and attachment.
710205. 4617. The Steel-Alderfer Co., Cuyahoga Falls, Ohio, lumber.
730293. 4610. Burd High Compression Ring Co., Rockford, Ill., piston rings.
730296. 4612. Burd High Compression Ring Co., Rockford, Ill., piston rings.
730297. 4611. Burd High Compression Ring Co., Rockford, Ill., piston rings.
730303. 4618. The Hess-Bright Mfg. Co., Philadelphia, Pa., engine spares.

CONTRACTS PLACED BY QUARTERMASTER OF THE UNITED STATES MARINE CORPS

The following contracts have been placed by the Quartermaster of the United States Marine Corps:

August 26, 1918.

509. J. R. Stokes Lumber Co., Charleston, S. C., lumber.
367. L. H. Parke Co., Philadelphia, Pa., subsistence stores.
462. Austin, Nichols & Co. (Inc.), Brooklyn, N. Y., subsistence stores.
462. Francis H. Leggett & Co., New York, N. Y., subsistence stores.
545. The Nash Motors Co., Kenosha, Wis., spare parts for trucks.
548. The Nash Motors Co., Kenosha, Wis., spare parts for trucks.
546. Armour & Co., Chicago, Ill., orchestra supplies.
442. The Excelsior Shoe Co., Portsmouth, Ohio, shoes.
539. Kennelly Paper Co., New York, N. Y., paper.

August 27, 1918.

550. William Messer Co., New York, N. Y., muslin.
551. North & Judd Manufacturing Co., New Britain, Conn., hooks.
547. Woodley Soap Manufacturing Co., Boston, Mass., soap.
560. Joseph N. Snellenburg, Philadelphia, Pa., mattress covers.
550. Amory, Browne & Co., Boston, Mass., flannel.
552. American Steel & Wire Co., Washington, D. C., nails.
509. N. C. McDuffie & Co., Columbia, S. C., lumber.
509. Carolina Portland Cement Co., Charleston, S. C., lumber.
432. Alfred Lowry & Bro., Philadelphia, Pa., subsistence.
543. American-La France Fire Engine Co. (Inc.), Elmira, N. Y., combination engine and hose car; pumping engine.
509. Cheraw Sash, Door & Lumber Co., Cheraw, S. C., lumber.

August 28, 1918.

557. Mead Cycle Co., Chicago, Ill., bicycles and tires.
553. The Thread Agency, New York, N. Y., sewing cotton.
554. Crane Co., Baltimore, Md., plumbing supplies.
559. The Millville Mfg. Co., Philadelphia, Pa., toweling.
565. Frank T. Dunlap, Philadelphia, Pa., tag tape.
564. The Nash Motors Co., Kenosha, Wis., spare parts for Quad trucks.

August 29, 1918.

567. H. W. Johns-Manville Co., Philadelphia, Pa., tire felt.
382. F. H. Leggett & Co., New York, N. Y., hominy.
569. Parkesburg Iron Co., Parkesburg, Pa., boiler tubes.
563. John H. Mulholland, Philadelphia, Pa., license tags.
433. E. L. Stock, Washington, D. C., laundry stoves.
574. Wilson & Co., Chicago, Ill., subsistence stores.
574. Libby, McNeill & Libby, Chicago, Ill., subsistence stores.
577. Russell Manufacturing Co., Middletown, Conn., khaki webbing.
506. Steinwender, Stoffregen Coffee Co., St. Louis, Mo., subsistence stores.
506. International Salt Co. of New York, Scranton, Pa., subsistence stores.
500. W. M. Galt & Co., Washington, D. C., forage.
500. W. S. Hoge & Bro., Washington, D. C., forage.

August 30, 1918.

561. G. M. Williams & Co., Savannah, Ga., lumber.
555. Maggioni & Co., Port Royal, S. C., oyster shells.
573. F. J. Cooledge & Sons (Inc.), Atlanta, Ga., paint.
558. A. S. Bacon & Sons, Savannah, Ga., pine.
576. United States Rubber Co., New York, N. Y., fire hose.

August 31, 1918.

581. Standard Broom Co., Philadelphia, Pa., brooms.
585. Meadow River Lumber Co., Rainelle, W. Va., lumber.
572. Rinek Cordage Co., Easton, Pa., rope and marline.
579. Spray Engineering Co., Boston, Mass., painting machines and respirators.
570. Woodley Soap Mfg. Co., Boston, Mass., flannel.

NAVY DEPARTMENT CONTRACTS PLACED BY BUREAU OF SUPPLIES AND ACCOUNTS

The Bureau of Supplies and Accounts of the Navy Department has placed contracts as follows:

August 23, 1918.

40955. The Barrett Co., selling agents for Bethlehem Steel Co., solva naphtha.
40957. Globe-Wernicke Co., Washington, D. C., furniture.
40958. General Fireproofing Co., Washington, D. C., furniture.
40959. American Sheet & Tin Plate Co., Washington, D. C., steel sheets.
40960. Carnegie Steel Co., Washington, D. C., steel plates.
40961. Jones & Laughlin Co., Washington, D. C., steel angles.
40962. Imperial Shipbuilding Co., Detroit, Mich., coal barges.
40963. Interlake Engineering Co., Cleveland, Ohio, coal barges.
40964. Leonard Construction Co., Chicago, Ill., coal barges.
40965. Metropolitan Redwood Lumber Co., Metropolitan, Cal.
40966. Allen Bradley Co., Milwaukee, Wis., controllers.
40967. National Leather Co., New York City, belting. leather.
40968. Maloney Belting Co., Chicago, Ill., belting, leather.
40969. Kemp Machinery Co., Baltimore, Md., boring machines, hack saws.
40970. Federal Machine & Welder Co., Philadelphia, Pa., welding machines.
40971. Mueller Machine & Tool Co., Cincinnati, Ohio, drill.
40972. H. B. Underwood Corp., Philadelphia, Pa., bar-boring cylinder.
40973. Monarch Machine Tool Co., Sidney, Ohio,, lathes.
40974. Manning, Maxwell & Moore, New York City, N. Y., shapers.
40975. Lynd-Farquhar Co., Boston, Mass., lathes.
40976. D. Nast Machinery Co., Philadelphia Pa., shears, levers, workworking machinery.
40977. Georgia Car & Locomotive Co., Atlanta, Ga., cars.
40978. Niles-Bement-Pond Co., New York City, N. Y., boring machines.
40979. Globe Soap Co., Cincinnati, Ohio, soap powder.
40983. St. Louis Metal Ware Co., St. Louis, Mo., depth-charge cases.
40984. Garvin Machine Co., New York City, vises and attachments
40996. Manning, Maxwell & Moore, New York City, machine tools.
40997. Electric Storage Battery Co., Washington, D. C., spares for batteries.
40998. West Woodworking Co., Chicago, Ill., propellers.
40999. A. G. Spaulding Bro., New York City, commutating sets.
41008. Goodyear Tire & Rubber Co., Akron, Ohio, dynamotic gas valves.
41009. Rudolph & West Co., Washington, D. C., spares.
41010. American Sheet & Tin Plate Co., Washington, D. C., sheet steel.
41011. Boston Excelsior Co., New York City, excelsior.
41012. Rochester Stamping Co., Rochester, N. Y., buckets, water.
41013. Tennessee Line & Twine Co., Elizabethtown, Tenn., cotton twine.
41015. Whitney Lumber Co., Philadelphia, Pa., lumber.
41016. Eastern Lumber Co., Tonawanda, N. Y., pine, white.
41017. T. J. Shyrack & Co., Washington, D. C., pine, white.
41018. Germain Co., Pittsburgh, Pa., pine, white.
41019. G. Elias & Bros., Buffalo, N. Y., pine, white.
41020. W. H. Champion, Rochester, N. Y., pine, white.
41021. Smith, Fassett & Co., North Tonawanda, N. Y., pine, white.
41022. A. W. Burritt Co., Bridgeport, Conn., pine, white.
41023. Wyatt Prock Lumber Co., Philadelphia, Pa., pine, white.
41024. Several Chemical Co., San Francisco, Cal., nitric acid.
41025. Several Chemical Co., New York City, nitric acid.
41026. Several Chemical Co., New York City, nitric acid.
41027. Pratt & Whitney Co., Hartford, Conn., milling machines.
41028. Fairbanks Co., Washington, D. C., crank shapers.

August 24, 1918.

41030. Bausch & Lomb Optical Co., Rochester, N. Y., mirrors; searchlights.
41031. National Chain Co., Marietta, Ohio, chains.
41032. Carnegie Steel Co., Washington, D. C., steel.
41033. American Sheet & Tin Plate Co., Washington, D. C., steel plates and sheets.
41034. Phoenix Iron Co., Philadelphia, Pa., steel.
41035. Bethlehem Steel Co., South Bethlehem, Pa., steel angles.
41036. Pencoyd Iron Works, Carnegie Steel Co., Pittsburgh, Pa., channels.
41037. Maryland Transportation Co., Baltimore, Md., services.
41039. Goodyear Tire & Rubber Co., Akron, Ohio, training students.
41040. Cotton Specialty Co., Chicago, Ill., cotton mattress tufts.
41041. Dock & Mill Co., North Tonawanda, N. Y., spruce.
41042. Hammer Lumber Co., Philadelphia, Pa., spruce.
41043. Fairbanks Co., Washington, D. C., lathes.
41044. N. K. Fairbanks Co., New York City, N. Y., vegetable shortening.
41045. Armour & Co., Chicago, Ill., tinned vienna sausage.
41046. Campbell Glass & Paint Co., St. Louis, Mo., paint.
41048. The American Brass Co., Waterbury, Conn., brass tubing.
41049. Taunton-New Bedford Copper Co., Taunton, Mass., copper sheets.
41050. National Screw & Tack Co., Cleveland, Ohio, bolts.
41051. Browning Co., Cleveland, Ohio, locomotive cranes.
41052. Brown Hoisting Machine Co., Cleveland, Ohio, locomotive cranes.

August 26, 1918.

41057. Van Arsdale, Harris Lumber Co., San Francisco, Cal., pine.
41058. White Bros., San Francisco, Cal., lignum vitæ.
41059. Waltham Watch Co., Waltham, Mass., aero clocks.
41060. Keyless Auto Clock Co., New York City, aero clocks.
41061. Aluminum Co. of America, Washington, D. C., aluminum alloy.
41062. Bausch & Lomb Optical Co., Washington, D. C., range finders.
41081. General Electric Co., Schenectady, N. Y., single conductor cable.
41082. Clarence Whitman & Co., New York City, N. Y., mattress ticking.
41803. Wellman, Seaver, Morgan Co., Cleveland, Ohio, electric capstans.
41084. Revolvator Co., Jersey City, N. J., elevators.
41085. Okonite Co., New York City, N. Y., leaded cable.
41093. Adams & Eltinge Co., Chicago, Ill., furniture polish.
41094. Ohio Varnish Co., Cleveland, Ohio, lampblack.
41095. American Chain Co., Bridgeport, Conn., chain.
41096. National Tube Co., Washington, D. C., pipe.
41097. Canton Sheet Steel Co., Canton, Ohio, sheet steel.
41098. Carnegie Steel Co., Washington, D. C., steel plates.
41099. Bethlehem Steel Co., South Bethlehem, Pa., steel angles.
41100. Eastern Steel Co., Pottstown, Pa., bulb angles.
41101. Phoenix Iron Co., Philadelphia, Pa., channels.
41102. Pencoyd Iron Works, Carnegie Steel Co., Pittsburgh, Pa., shapers.
41103. American Sheet & Tin Plate Co., Washington, D. C., sheets and plates.
41104. Whitney & Barnes Mfg. Co., Akron, Ohio, reamers, bridge.
41105. Boston Electrolytic Oxygen Co., Everett, Mass., hydrogen.

August 27, 1918.

4116. Leader Iron Works, Decatur, Ill., steel tank.
41117. Walworth Mfg. Co., Boston, Mass., black pipe.
41118. Campbell Glass & Paint Co., St. Louis, Mo., vermillion paint.
41119. Sterling Paint & Color Co., Louisville, Ky., burnt sienna.
41121. St. Louis Frog & Switch Co., St. Louis, Mo., frogs and switches.
41122. Cincinnati Frog & Switch Co., Cincinnati, Ohio, frogs and switches.
41123. Am. Electrical Heater Co., Detroit, Mich., air heaters.
41124. Wetmore, Savage Co., Boston, Mass., electric wire.
41125. Atlantic Refining Co., Philadelphia, Pa., mineral oil.
41126. Standard Oil Co., San Francisco, Cal., mineral oil.
41127. Standard Oil Co., San Francisco, Cal., mineral oil.
41133. J. A. Roebling's Sons Co., Trenton, N. J., electric wire.
41134. Western Electric Co., New York, N. Y., flood lights.
41135. Hewitt Rubber Co., Buffalo, N. Y., hose.
41136. Taunton-New Bedford Copper Co., Taunton, Mass., naval brass.

August 28, 1918.

41138. The Thread Agency, New York City, N. Y., spool cotton.
41139. Owen M. Dawson, New York City, N. Y., spool cotton.
41148. American Wood Working Machine Co., Rochester, N. Y., band saws.
41149. Whitaker-Glessner Co., Philadelphia, Pa., sheets.
41150. Carnegie Steel Co., Washington, D. C., plates and angles.
41151. U. S. Steel Products Co., New York City, N. Y., angles.
41152. American Sheet & Tin Plate Co., Washington, D. C., sheets.
41153. Cleveland Wood, Iron & Steel Co., Washington, D. C., plates.
41154. American Wood Working Machine Co., Rochester, N. Y., plates.
41155. William Lunser & Co., New York City, N. Y., shellac.
41156. Lea Courtenay Co., Newark, N. J., pumps, salvage.
41158. Weinman Pump Manufacturing Co., Columbus, Ohio, salt-water pumps.
41159. William Sellers & Co., Philadelphia, Pa., sand machinery.
41160. Standard Sand & Machinery Co., Cleveland, Ohio, sand-mining machinery.
41163. Niles-Bement-Pond Co., New York City, N. Y., machines.
41164. Monarch Machinery Co., Sidney, Ohio, Eng. lathes.
41165. Hdsphane Glass Co. (Inc.), New York City, N. Y., reflectors.
41166. Taylor Instrument Co., Washington, D. C., inclometers.
41167. Macbeth Evans Glass Co., New York City, N. Y., globes.
41168. Ivanhoe Regent Works of General Electric Co., Cleveland, Ohio, globes.
41169. McKee Glass Co., Jeannette, Pa., globes.
41170. Keystone Forging Co., Northumberland, Pa., hook, chain.
41171. Endicott Forging & Manufacturing Co., Endicott, N. Y., hooks, hammock.
41172. Page-Storms Drop Forge Co., Chicopee, Mass., hooks, hammock.
41173. Success Manufacturing Co., Gloucester, Mass., hooks, hammock.
41174. Oliver Iron & Steel Co., Pittsburgh, Pa., hooks, hammock.
41175. Acme Harvesting Machinery Co., Peoria, Ill., hooks, hammock.
41176. Pan Motor Co., Saint Cloud, Minn., hooks, hammock.
41177. S. Keighley Metal Ceiling Manufacturing Co., Pittsburgh, Pa., lockers.
41178. Stanley & Patterson (Inc.), New York City, N. Y., waterproof vibrating bells.
41179. Cincinnati Frog & Switch Co., Cincinnati, Ohio, frogs and switches.
41180. Niles-Bement-Pond Co., New York City, N. Y., planing machines.

August 29, 1918.

41185. The Barrett Co., selling agents for Minn. By-Products Co., New York City, N. Y., solvent naphtha.
41186. Picklands, Brown & Co., Chicago, Ill., foundry coke.
41187. F. H. Lovell & Co., Arlington, N. J., deck fixtures.
41188. Detroit Lubricating Co., Detroit, Mich., mechanical oilers.
41191. Seltzer Engineering Co., Washington, D. C., surface condensers, etc.
41192. Crouse-Hinds Co., Syracuse, N. Y., searchlights.
41193. Togan Stiles Co., Grand Rapids, Mich., portable buildings.
41194. The Fairbanks Co., Washington, D. C., boring machines.

NAVY DEPARTMENT CONTRACTS PLACED BY BUREAU OF SUPPLIES AND ACCOUNTS

August 29, 1918.

41195. Swind Machinery Co., Philadelphia, Pa., drill presses.
41196. Elgin Tool Works, Elgin, Ill., bench lathes.
41197. Manning, Maxwell & Moore, New York City, N. Y., saws, hammers, etc.
41198. Joseph Clarke, Jr., Co., Louisville, Ky., water grinders.
41199. Chase Foundry & Manufacturing Co., Washington, D. C., turntables.
41200. H. A. Stiles & Co., Boston, Mass., blocks.
41201. Franklin Moore Co., Crusted, Conn., electric hoists.
41202. Bohn Refrigerator Co., St. Paul, Minn., refrigerators.
41203. Grand Rapids Refrigerating Co., Grand Rapids, Mich., refrigerators.
41204. Modern Refrigerator Co., Peru, Ind., refrigeraters.
41205. Sherritt & Stoer Co., Philadelphia, Pa., milling machines.
41206. Harrison Safety Boiler Works, Philadelphia, Pa., water heater.
41207. The Hopper Manufacturing Co., Springfield, Ohio, meters.
41208. F. E. Myers & Bro., Ashland, Ohio, pumps.
41209. American Chain Co. (Inc.), York, Pa., chains.
41210. W. & B. Douglas, Middletown, Conn., pumps.
41211. Gilbert & Parker Manufacturing Co., Springfield, Mass., tanks.
41212. Robinson Fire Apparatus Manufacturing Co., St. Louis, Mo., hose carts, 2 wheels.
41213. Prospect Manufacturing Co., Prospect, Ohio, chemical engines.
41214. W. S. Rubber Co., New York City, N. Y., fire hose.
41216. Federal Foundry Co., Cleveland, Ohio, portable sieves.

August 30, 1918.

41218. Northern Hardware Ener. Bu., Washington, D. C., white pine.
41219. White Gratwich Mitchell, Tonawanda, N. Y., white pine.
41220. Smith Fasset Co., Tonawanda, N. Y., white pine.
41221. Codling Lumber Co., Philadelphia, Pa., white pine.
41222. John W. Burke, New York City, N. Y., white pine.
41223. Eastern Lumber Co., Tonawanda, N. Y., white pine.
41224. A. W. Burritt, Bridgeport, Conn., white pine.
41225. International Lumber Co., Chicago, Ill., white pine.
41226. M. T. Davidson Co., Brooklyn, N. Y., ejector parts.
41227. Burton Swartz Cypress Co., Burton, La., cypress.
41228. G. Elias & Bro., Buffalo, N. Y., pine.
41229. Alpha Portland Cement Co., Easton, Pa., cement.
41230. Sevaby Manufacturing Co., Chicago, Ill., pumping outfits acid.
41231. Gilbert & Backer Manufacturing Co., Springfield, Mass., furnace forging.
41232. Chicago Varnish Co., Chicago, Ill., chrome green.
41233. Peaslee Gaulbert Co., Louisville, Ky., burnt sienna.
41234. Frolich Glass Co., Detroit, Mich., burnt sienna.
41235. Chilton Paint Co., College Point, N. Y., paint.
41236. Electrical Tachometer Corporation, Philadelphia, Pa., revolution cometers.
41237. Brown Instrument Co., Philadelphia, Pa., revolution cometers.
41238. A. W. Hastings & Co., Boston, Mass., frame windows.
41239. Ideal Basket Manufacturing Co., Chicago, Ill., fenders.
41240. Colorado Portland Cement Co., Portland, Colo., cement.
41241. Panama Flexible Metallic Tubing Co., Philadelphia, Pa., hose.
41242. American Pressed Steel Co., Washington, D. C., plates.
41243. Alan Wood & Lumber Co., Philadelphia, Pa., steel plates.
41244. American Sheet & Tin Plate Co., Washington, D. C., steel sheets.
41245. Martin Truck & Body Co., York, Pa., passenger cars.
41246. Tidewater Portland Cement Co., Baltimore, Md., cement.
41247. American Carbonic Machine Co., Grand Rapids, Mich., refrigerating equipment.
41248. Leach & Garner Co., Attleboro, Mass., silver, troy.
41249. I. M. Jacobson & Sons Co., Detroit, Mich., wiping solder.
41250. J. B. Swomball Co. (Ltd.), Chatham, New Brunswick, aeroplane spruce.
41251. O'Brien (Ltd.), Nelson, New Brunswick, aeroplane spruce.
41252. Geo. Birchill & Sons, South Nelson, New Brunswick, aeroplane spruce.
41253. J. B. Ritchie Co., New Castle, New Brunswick, aeroplane spruce.
41254. Shires Lumber Co., Campbellton, New Brunswick, aeroplane spruce.
41255. Fraser Lumber Co., Edmeston, New Brunswick, aeroplane spruce.
41256. Richards Lumber Co., Campbellton, New Brunswick, aeroplane spruce.
41257. Wm. Rutherford & Son, Montreal, Quebec, aeroplane spruce.
41258. Geo. B. Goodfellow, Montreal, Quebec, aeroplane spruce.
41259. Colonial Lumber Co., Pembroke, Quebec, aeroplane spruce.
41260. P. Q. Lumber Co., care of Geo. B. Scott, 705 Sears Building, (Dalhousie, New Brunswick), Boston, Mass., aeroplane spruce.
41261. Carnegie Steel Co., Washington, D. C., shapes.
41262. Carnegie Steel Co., Washington, D. C., bars.
41263. Carnegie Steel Co., Washington, D. C., bars.
41264. United States Light & Heat Corporation, Niagara Falls, N. Y., batteries.
41265. Dixie Portland Cement Co., Chattanooga, Tenn., cement.
41266. Atlas Portland Cement Co., New York City, N. Y., cement.
41267. Southern States Portland Cement Co., Rockmart, Ga., cement.
41268. Tidewater Portland Cement Co., Baltimore, Md., cement.

August 31, 1918.

41269. Ilg Electric Ventilating Co., Chicago, Ill., ventilating sets.
41270. Ilg Electric Ventilating Co., Chicago, Ill., ventilating sets.
41271. Walker Electric Co., Philadelphia, Pa., switchboards.
41272. D. K. Jeffries Lumber Co., Chicago, Ill., mess hall.
41273. Holcomb & Hoke Mfg. Co., Indianapolis, Ind., adapters.
41274. Century Electric Co., St. Louis, Mo., adapters.

PURCHASE ORDERS AND CONTRACTS OF SUBSISTENCE DIVISION, Q. M. G.

The following is a list of allotted articles of the subsistence division of the office of the Quartermaster General, dated August 24, together with the depot to which the allotment was made. The allotments marked "O. Q. M. G." are made to the office in this city for overseas' shipment:

Milk, Evaporated.

Highland Milk Condensing Co., Baltimore.
Denmark Condensed Milk Co., Chicago.
Badger Condensed Milk Co., Chicago.
Carnation Milk Products Co., Chicago.
Helvetia Milk Condensing Co., Chicago.
Libby, McNeill & Libby, Chicago.
Helvetia Milk Condensing Co., Kansas City.
Mohawk Condensed Milk Co., New York.
Borden's Condensed Milk Co., New York.
Waterloo Creamery Co., Omaha.
Oatman Condensed Milk Co., O. Q. M. G.
Alpine Evaporated Cream Co., O. Q. M. G.
Denmark Condensed Milk Co., O. Q. M. G.
Helvetia Milk Condensing Co., O. Q. M. G.
Van Camp Products Co., O. Q. M. G.
Mohawk Condensed Milk Co., O. Q. M. G.
Highland Milk Condensing Co., O. Q. M. G.
Wisconsin Condensed Milk Co., O. Q. M. G.
Wisconsin Butter & Cheese Co., O. Q. M. G.
Grand Ledge Milk Co., O. Q. M. G.
Servus Evaporated Milk Co., O. Q. M. G.
Libby, McNeill & Libby, O. Q. M. G.
Borden's Condensed Milk Co., O. Q. M. G.
Utah Condensed Milk Co., O. Q. M. G.
Larimer Co. Cooperative Milk Co., O. Q. M. G.
Colorado Condensed Milk Co., O. Q. M. G.
Federal Condensed Milk Co., O. Q. M. G.
Snohomish Dairy Products Co., O. Q. M. G.
Carnation Milk Products Co., O. Q. M. G.
Helvetia Milk Condensing Co., Fort Sam Houston.
Carnation Milk Products Co., San Francisco.
Utah Condensed Milk Co., San Francisco.
Alpine Evaporated Cream Co., San Francisco.
Helvetia Milk Condensing Co., St. Louis.

Sugar, Granulated.

Pennsylvania Sugar Refining Co., Philadelphia, Pa.
W. J. McCahan Sugar Refining Co., Philadelphia, Pa.
American Sugar Refining Co., New York.
American Sugar Refining Co., New Orleans, La.
Franklin Sugar Refining Co., Philadelphia, Pa.

Beans.

S. Pfeifer & Co., New Orleans, La.

Salmon.

Pacific American Fisheries, Bellingham, Wash.
Hoonah Packing Co., Bellingham, Wash.
Nelson Lagoon Packing Co., Bellingham, Wash.
Columbia Salmon Co., Seattle, Wash.
Northwestern Fisheries Co., Seattle, Wash.
Clark Graham Co., Seattle, Wash.
Thinklet Packing Co., Seattle, Wash.
Alitak Packing Co., Seattle, Wash.
Everett Packing Co., Seattle, Wash.
Carlisle Packing Co., Seattle, Wash.
Columbia Salmon Co., Seattle, Wash.
San Juan Fishing & Packing Co., Seattle, Wash.
Sunny Point Packing Co., Seattle, Wash.
Moore Packing Co., Portland, Oreg.
Tenakee Fisheries, Seattle, Wash.
Everett Packing Co., Everett, Wash.
Libby, McNeill & Libby, Chicago, Ill.
G. W. Hume Co., San Francisco, Cal.
P. E. Harris & Co., Seattle, Wash.
Pyramid Packing Co., Seattle, Wash.
Marathon Fishing & Packing Co., Seattle, Wash.
Fidalgo Island Packing Co., Anacortes, Wash.
Sockeye Salmon Co., Seattle, Wash.
Abercromble Packing Co., Seattle, Wash.
Straits Packing Co., Seattle, Wash.
Tallant Grand Packing Co., Portland, Oreg.
Alaska Herring & Sardine Co., Seattle, Wash.
Southern Alaska Canning Co., Seattle, Wash.
Petersburg Packing Co., Seattle, Wash.

LIST OF PURCHASE ORDERS AND CONTRACTS PLACED BY THE ORDNANCE DEPARTMENT OF THE U. S. ARMY

The Army Ordnance Department authorizes publication of the following list of contracts and purchase orders:

Purchase Orders.

Hercules Powder Co., Wilmington, Del., repairing boxes.

Ritter Can & Specialty Co., Philadelphia, Pa., tin cans.

Mueller & Sons Co., Milwaukee, Wis., shipping boxes.

Keystone Vehicle Co., Reading, Pa., tops for driver's seat.

Nicholson File Co., Providence, R. I., files.

Nestor Mfg. Co., New York, gauges.

Imperial Drop Forge Co., Indianapolis, Ind., forgings.

Raleigh Iron Works, Raleigh, N. C., projectiles.

Oshkosh Mfg. Co., Oshkosh, Wis., mauls.

Bethlehem Steel Co., Bethlehem, Pa., forgings.

Bartlett Hayward Co., Baltimore, Md., loading, assembling, and packing fuses.

Enston Process Co., Scranton, Pa., shrapnel balls.

Buffalo Pitts Co., Buffalo, N. Y., machining steel shells.

Barlett Hayward Co., Baltimore, Md., shrapnel.

Wheelock Lovejoy & Co., New York, N. Y., hot rolled steel.

Federal Primer Co., Arlington, N. J., percussion primers.

The Fairbanks Co., Washington, D. C., miscellaneous hardware.

J. H. Lane & Co., New York, N. Y.; Parker-Wilder & Co., New York, N. Y., gray duck.

Hyde Park Lumber Co., Cincinnati, Ohio, packing boxes.

Artillery Fuze Co., Wilmington, Del., reaming rifle grenades.

Spacke Machine & Tool Co., Indianapolis, Ind., rifle grenades.

Dayton Adding Machine & Time Lock Co., Dayton, Ohio, control handles.

American Radiator Co., Buffalo, N. Y., malleable castings.

Smith & Wesson, Springfield, Mass., revolver barrels.

The Adapti Co., Philadelphia, Pa., strap adapti.

Ward & Co., Washington, D. C., brass wire gauze.

J. T. Slocomb Co., Providence, R. I., micrometer calipers.

The Standard Scale & Supply Co., Pittsburgh, Pa., warehouse and crane scales.

Sargent & Co., New York, N. Y., steel squares.

Illinois Iron & Bolt Co., Carpenterville, Ill., locomotive jacks.

Pyrene Mfg. Co., New York, N. Y., pyrene liquid.

Collieries Supply & Equipment Co., Philadelphia, Pa., miscellaneous blacksmith tools and equipment.

Bishop Gutta Percha Co., Philadelphia, Pa., electrical repair truck equipment.

American Car & Foundry Co., Berwick, Pa., power leads.

Four Wheel Drive Auto Co., Clintonville, Wis., truck chassis spare parts.

H. G. Fetterolf Co., Philadelphia, Pa., gray duck.

Warren Tool & Forge Co., Warren, Ohio, miscellaneous blacksmith's tools.

E. I. du Pont de Nemours Co., Wilmington, Del., loading, assembling, and packing bombs and boosters.

Doehler Die Casting Co., Brooklyn, N. Y., rifle grenade plugs.

National Cash Register Co., Dayton, Ohio, bomb release mechanisms.

Black & Decker Mfg. Co., Baltimore, Md., stabilizers.

W. A. Bonnell Co., Philadelphia, Pa., squeeze connectors for flexible conductor.

Youngstown Sheet & Tube Co., Philadelphia, Pa., armored conductor.

General Electric Co., Schenectady, N. Y., mobile repair shop equipment.

Quartermaster Corps, Washington, D. C., automobile and motorcycles.

Derby Mfg. Co., Derby, Conn., copper bands.

Bartlett-Hayward Co., Baltimore, Md., shrapnel.

American Can Co., New York, N. Y., high-explosive shell forgings.

Imperial Munitions Board, Washington, D. C., base plugs.

Columbia Steel & Shafting Co., Pittsburgh, Pa., cold drawn Bessemer screw steel.

American Brass Co., Waterbury, Conn., brass rod.

Illinois Zinc Co., Peru, Ill., sheet zinc.

Westinghouse Electric & Mfg. Co., East Pittsburgh, Pa., electric motor.

Hercules Powder Co., Wilmington, Del., refining scrap T. N. T. components.

Wollensak Optical Co., Rochester, N. Y., trench periscopes.

The Perkins-Campbell Co., Cincinnati, Ohio, bearing reins.

Aug. Buermann Mfg. Co., Newark, N. J., spur rings, links and buckles.

Yale & Towne Mfg. Co., Stamford, Conn., belt fasteners.

Buffalo Weaving & Belt Co., Buffalo, N. Y., olive-drab halter webbing.

J. H. Meyer & Co. (Inc.), New York, N. Y., gray duck.

Progressive Knitting Works (Inc.), Brooklyn, N. Y., currycomb handles.

The L. H. Gross Co., Cleveland, Ohio, cotton thread.

Kilbourne & Jacobs, Columbus, Ohio, gun transport and ammunition cars.

Rock Island Arsenal, Rock Island, Ill., bacon cans.

American Car & Foundry Co., Washington, D. C., various parts for pack frames.

Keeler Brass Co., Grand Rapids, Mich., belt fasteners.

Canvas Products Co., St. Louis, Mo., machine-gun barrel covers.

White Co., Cleveland, Ohio, tarpaulins.

American Car & Foundry Co., Washington, D. C., pack frames.

E. I. du Pont de Nemours & Co., Wilmington, Del., powder-drum bags.

The Fairbanks Co., Washington, D. C., soldering salts.

H. K. Porter Co., Pittsburgh, Pa., locomotive spare parts.

Ward & Co., Washington, D. C., repair truck tools and equipment.

Goodyear Tire & Rubber Co., Akron, Ohio, tire repair material.

Taylor Instrument Co., Rochester, N. Y., vulcanizer thermometers.

Crocker-Wheeler Co., Ampere, N. J., controller covers.

W. N. Matthews & Bro. (Inc.), New York City, electric repair equipment.

Bryant Electric Co., Bridgeport, Conn., cartridge fuze contacts.

B. F. Goodrich Rubber Co., Akron, Ohio, pneumatic hose.

The Heil Co., Milwaukee, Wis., steel ammunition truck bodies.

Smith & Wesson, Springfield, Mass., revolvers.

Atwater Kent Manufacturing Works, Philadelphia, Pa., machine-gun sights.

American Sheet & Tin Plate Co., Pittsburgh, Pa., helmet steel.

Smith, Hinchman & Crylils, Detroit, Mich., tracings.

United Engine & Manufacturing Co., Hanover, Pa., engine stands.

Yale & Towne Manufacturing Co., Stamford, Conn., duplex chain blocks.

E. I. Du Pont de Nemours & Co., Wilmington, Del., repairing powder containers.

The Cleveland Osborn Manufacturing Co., Newark, N. J., thong brushes.

New England Westinghouse Co., Chicopee Falls, Mass.; Remington Arms, Union Metallic Cartridge Co., Bridgeport, Conn., rifle stocks.

The Wm. Scholhorn Co., New Haven, Conn., pliers.

The Pfau Manufacturing Co., Cincinnati, Ohio, plane tables.

Raymer Hardware Co., St. Paul, Minn., arm repair chests.

Sargent & Co., New Haven, Conn., metallic belt-loading machines.

The Isaac Winkler & Bro. Co., Cincinnati, Ohio, soda ash.

Scovill Manufacturing Co., Waterbury, Conn., primer caps.

The Artillery Fuze Co., Wilmington, Del., fuzes.

August Goetz & Co. (Inc.), Newark, N. J., brow band ornaments.

Brewer-Tichener Corporation, Cortland, N. Y., curb bit and chain.

Anderson Forge & Machinery Co., Detroit, Mich., plug forgings.

Yale & Towne Manufacturing Co., Stamford, Conn., snaffle bits.

Corbin Screw Corporation, New Britain, Conn., flathead brass screws.

North & Judd Manufacturing Co., New Britain, Conn., tongueless bar buckles.

American Car & Foundry Co., Washington, D. C., brace bars for pack frames.

North & Judd Manufacturing Co., New Britain, Conn., officers' belt hardware.

Berg Auto Truck & Specialty Co., New York City, carrying cases.

Remington Arms U. M. C. Co., Bridgeport, Conn., shells.

General Silk Importing Co., New York, N. Y., taffeta silk.

The Barrett Co., New York, N. Y., phenol.

Borman Sheep Line Coat Co., New York, N. Y., sheepskin.

Summerdale Dyeing, Printing & Finishing Works (Inc.), Philadelphia, Pa.; Piedmont Cotton Mills, Egan, Ga.; Jenckes Spinning Co., Pawtucket, R. I.; Mount Hope Finishing Co., North Dighton, Mass.; A. D. Juilliard & Co., New York City; Sayles Finishing Plant, Saylesville, R. I., gray duck.

Edwin C. Burt Co., Brooklyn, N. Y., gunner's pouches.

Geo. Lawrence Co., Portland, Oreg., brow bands.

Graton & Knight Mfg. Co., Worcester, Mass., carrying cases.

Mathews Gravity Carrier Co., Ellwood City, Pa., gravity roller conveyors.

American Brass Co., Waterbury, Conn., grommets and washers.

August Buermann Mfg. Co., Newark, N. J., strap buckles and links.

American Steel & Wire Co., Washington, D. C., mogul springs.

New York Arsenal, Governors Island, N. Y., lanyards and handles.

The Haven Malleable Castings Co., Cincinnati, Ohio, halter bolts.

G. W. J. Murphy Co., Amesbury, Mass., bridle checks.

Remington Arms U. M. C. Co., Ilion, N. Y., electric shop truck.

National Blank Book Co., Holyoke, Mass., rifle magazine.

Barclay Naval Stores Co., New York City, turpentine.

McCabe Chemical Co., Charleston, S. C., sulphuric acid.

Watertown Arsenal, Watertown, Mass., recoil forgings.

Kerr Adjustable Strap Co., New York City, gun slings.

Rock Island Arsenal, Rock Island, Ill., ironing tools.

Western Saddle Tree Co., Portland, Oreg., saddle trees.

Lichtenberger-Ferguson Co., Los Angeles, Cal.; Graton & Knight Mfg. Co., Worcester, Mass.; Bryden Bros. Harness & Saddlery Co., Los Angeles, Cal., scabbards.

Silver Lake Co., Newtonville, Mass., sash cord.

The Belber Trunk & Bag Co., Philadelphia, Pa., carrying cases.

Angsten-Koch Co., Chicago, Ill., Bolo scabbard hardware.

Perkins-Campbell Co., Cincinnati, Ohio, driving and check reins.

Mount Hope Finishing Co., North Dighton, Mass.; John H. Meyer & Co., New York City; Lowell Bleachery, Lowell, Mass.; W. & J. Sloane, New York City, gray duck.

Tubular Rivet & Stud Co., Boston, Mass., scabbard rivets.

Angsten-Koch Co., Chicago, Ill., bayonet scabbard mouthpieces.

American Manganese Steel Co., Chicago, Ill., steel plates.

American Brass Co., Waterbury, Conn., eyelets and washers.

Henry C. Griffin & Co., New York City, boxing reconnoisance bodies and machine-gun trucks.

United States Smelting, Refining & Mining Co., New York, pig lead.

Winchester Repeating Arms Co., New Haven, Conn., exhaust fan.

Winchester Repeating Arms Co., New Haven, Conn., bench type grinding motor.

Linen Thread Co., New York, N. Y., Thong cords.

Hercules Powder Co., Wilmington, Del., kegs, drums, and repairing powder drums.

Quartermaster Corps, New York, N. Y., axle grease.

The American Steel & Wire Co., Cleveland, Ohio, sulphuric acid.

E. I. du Pont de Nemours & Co., Wilmington, Del., packing boxes.

Wilputte Coke Oven Corporation, New York, N. Y., construction of toluol recovery plant.

LIST OF PURCHASE ORDERS AND CONTRACTS PLACED BY THE ORDNANCE DEPARTMENT OF THE U. S. ARMY

Robb Engineering Works, Amherst, N. H., machining high explosive shells.

American Smelting & Refining Co., New York, N. Y., pig lead.

Standard Forging Co., Chicago, Ill., mortar shell forgings.

International Arms & Fuze Co., New York, N. Y., fuzes and rifle grenades.

The Four Wheel Drive Auto Co., Clintonville, Wis., truck repair parts.

Electric Auto Lite Corporation, Toledo, Ohio, replacement parts for gun carriage sights.

Black & Decker Mfg. Co., Baltimore, Md., geometric die.

Dayton Adding Machine & Time Lock Co., Dayton, Ohio, lower pulley brackets.

Springfield Armory, Springfield, Mass., ammunition box fillers.

Westcott-Jewell Co., Seneca Falls, N. Y., ordinate machine gun scales.

Philadelphia Dyeing & Finishing Co., Philadelphia, Pa., gray duck.

Fairbanks Co., Baltimore, Md.; Howe Scale Co., New York, N. Y., portable platform scales.

Quartermaster Corps, New York, N. Y., engine oil.

Pike Mfg. Co., Pike, N. H., oil-stones and whetstones.

Acme Mfg. Co., South Bend, Ind., saddler's chests.

American Zinc, Lead & Smelting Co., New York, N. Y., spelter.

Symington Machine Corporation, Rochester, N. Y., shrapnel cases.

Bartlett Hayward Co., Baltimore, Md., shrapnel projectiles, and fuzes.

John B. Semple Co., Sewickley, Pa., antiaircraft fuzes.

Marlin-Rockwell Corporation, New Haven, Conn., tools for machine-gun production.

Remington Arms U. M. C. Co., Bridgeport, Conn., pistol cartridges.

New England Westinghouse Co., Springfield, Mass., Browning machine guns.

Marlin Rockwell Corporation, New Haven, Conn., aircraft machine guns.

Colt's Patent Fire Arms Mfg. Co., Hartford, Conn., converting machine guns to different model.

Novo Mfg. Co., New York, N. Y., flash-light batteries.

Angsten-Koch Co., Chicago, Ill., bayonet scabbard bushings.

Heller Bros. Co., Newark, N. J., miscellaneous blacksmith tools.

Coe's Wrench Co., New York City, screw wrenches.

Peck, Stow & Wilcox Co., New York City, hand punches and saddler's tools.

P. Lowentraut Mfg. Co., New York, N. Y., cold chisels and wing dividers.

Quartermaster Corps, New York, N. Y., neat's-foot oil.

Standard Forging Co., Chicago, Ill., shell forgings.

United Metals Selling Co., The New Jersey Zinc Co., American Smelting & Refining Co., U. S. Smelting, Refining & Mining Co. (Inc.), of New York City, spelter.

Gielow & Orr, New York City, yacht *Talalah*.

Crouse-Hinds Co., Syracuse, N. Y., miscellaneous electrical units.

Ostby & Barton Co., Providence, R. I., bouchon sealers.

Montgomery Ward & Co., Chicago, Ill., halter headstalls.

The Sparks-Withington Co., Jackson, Mich.; Edward G. Budd Mfg. Co., Philadelphia, Pa., pressing steel helmets.

American Can Co., New York, condiment can covers.

The Crosby Co., Buffalo, N. Y., pressing helmet bodies.

Plant Bros. Co., Manchester, Mass., belt pocket repair flaps.

H. D. Taylor Co., Buffalo, N. Y., travel bags and paulins.

M. & C. Skirt Co., Boston, Mass., horse covers.

Graton & Knight Mfg. Co., Worcester, Mass., ammunition-box fillers.

Fort Recovery Stirrup Co., Fort Recovery, Ohio, wooden stirrups.

R. H. Long, Framingham, Mass., machine-gun covers.

Winchester Repeating Arms Co., New Haven, Conn., shells.

Worthington Pump & Machinery Co., Washington, D. C., steam pumps.

Robert Lanyon Zinc & Acid Co., St. Louis, Mo., zinc spelter.

Cumberland Steel Co., Cumberland, Md., Bessemer screw stock.

Otis Flagg Corporation, New York City, copper hose clamps.

Taft-Pierce Mfg. Co., Woonsocket, R. I., reaming equipment.

Cleveland Twist Drill Co., Cleveland, Ohio, drills.

Dodge Bros., Detroit, Mich., instruction books.

Collieries Supply Co., Philadelphia, Pa., blacksmith hammers.

Chandler & Farquhar Co., Boston, Mass., riveting and ball peen hammers.

The Bryant Electric Co., Bridgeport, Conn., electrical equipment.

The Whittacker Mfg. Co., Chicago, Ill., split pins.

Stanley Rule & Level Co., New Britain, Conn., shoeing hammers.

Peck, Stow & Wilcox Co., New York City, screw wrenches.

Germantown Tool Works, Philadelphia, Pa., claw hammers.

The Baker R. & L. Co., Cleveland, Ohio, trucks.

Manning, Maxwell & Moore (Inc.), New York City, lathe chuck.

The Boston Woven Hose & Rubber Co., Cambridge, Mass., fire hose, nozzles, and wrenches.

American LaFrance Fire Engine Co., Elmira, N. Y., fire extinguishers.

National Blank Book Co., Holyoke, Mass., muzzle covers.

The Worcester Mfg. Co., Worcester, Mass., adapter heads.

Swineheart Tire & Rubber Co., Akron, Ohio; Fisk Rubber Co., Chicopee Falls, Mass., solid tires.

N. R. Allen's Sons Co., Kenosha, Wis., russet harness leather.

John Clark Saddlery Co., Portland, Oreg., rifle scabbards.

Berg Auto Truck & Specialty Co., New York, N. Y., dispatch cases.

Summerdale Dyeing, Printing & Finishing Works (Inc.), Philadelphia, Pa., gray duck.

Globe Optical Co., Boston, Mass., telescope gun sights.

Metals Production & Equipment Co., Springfield, Mass., brass ribbon.

Dayton-Ohio Production Co., New York City, shell body forgings.

E. I. du Pont de Nemours Co., Wilmington Del., loading, assembling, and packing adapters, boosters, and detonators.

Poole Engineering & Machine Co., Baltimore, Md., shells.

Kohler Co., Kohler, Wis., proof projectiles.

Emblem Mfg. Co., Angola, N. Y., fuzes.

The American Steel Foundries, Chicago, Ill., steel ingots.

Eastern Steel Co., Pottstown, Pa., silicon pig iron.

Barber Leather Co., North Adams, Mass., russet strap sides and backs.

Lowell Bleachery, Lowell, Mass.; John H. Mayer & Co. (Inc.), New York City; Summerdale Dyeing, Printing & Finishing Works (Inc.), Holmesburg, Philadelphia, Pa.; United States Finishing Co., New York City; Philadelphia Dyeing & Finishing Co., Frankford, Philadelphia, Pa., gray duck.

Susquehanna Webbing Co., Bloomsburg, Pa., halter webbing.

Wm. H. Evans, New York City; O. E. Hertlein, New York City; Ludlow Mfg. Associates, Boston, Mass.; International Braid Co., Providence, R. I.; Hamilton Web Co., Hamilton, R. I.; Rockland Webbing Co., Rockland, Mass., O. D. webbing.

Duratex Co., Newark, N. J., gray moleskin.

Mount Hope Finishing Co., North Dighton, Mass., gray duck substitute.

United States Aluminum Co., New Kensington, Pa., aluminum tubes.

Manning, Maxwell & Moore (Inc.), New York City, lathe chuck.

Albert T. Otton & Son (Inc.), New York City, hand fuze punches.

Tunley Machine Co. Tool Works, Brooklyn, N. Y.; Winchester Repeating Arms Co., New Haven, Conn.; The Carlson-Wenstrom Co., Philadelphia, Pa.; Walter Shaw, Boston, Mass., master inspection gages.

Pyrene Fire Extinguisher Co., Washington, D. C., fire extinguishers.

Kalamazoo Railway Supply Co., Kalamazoo, Mich., tractor and trailer with couplers.

Braden Copper Co., New York City, vertical boring mill.

Electric Service Supplies Co., Philadelphia, Pa., magazine lighting equipment.

Warren Tool & Forge Co., Warren, Ohio, miscellaneous machine tools.

Waltham Watch Co., Waltham, Mass., truck clocks.

Winchester Repeating Arms Co., New Haven, Conn., tilting machine.

Albert T. Otto & Sons (Inc.), New York City, hand fuze setters, spare parts.

The Bartlett-Hayward Co., Baltimore, Md., shrapnel.

Lockwood Folding Box Co., Philadelphia, Pa., paper board liners.

Fuel City Mfg. Co., Clarksburg, W. Va., tin cans.

National Binding Machine Co., New York City, gummed paper tape.

Doehler Die Casting Co., Brooklyn, N. Y., grenade screw plugs.

Precision Castings Co., Syracuse, N. Y., grenade bouchons and plugs.

Federal Rubber Co., Cudahy, Wis., rubber cups.

Maxim Silencer Co., Hartford, Conn., grenade parts.

Westinghouse Electric & Mfg. Co., East Pittsburgh, Pa., packing boxes.

New England Box Co., New York, N. Y., packing cases.

Summerdale Dyeing & Printing & Finishing Works (Inc.), Holmesburg, Philadelphia, Pa., gray duck.

Traut & Hine Mfg. Co., New Britain, Conn., brass eyelets and washers.

Cassidy-Fairbanks Co., Chicago, Ill., rivets and washers.

Illinois Steel Co., Chicago, Ill., shell steel billets.

Symington Machine Corporation, Rochester, N. Y., diaphragm forgings.

Hercules Powder Co., Wilmington, Del., nitrocellulose plant.

Kusa Spelter Co., Kusa, Okla.; New Jersey Zinc Co., New York City, spelter.

Watervliet Arsenal, Watervliet, N. Y., drop forgings.

Cadillac Motor Car Co., Detroit, Mich., unit tractor power plant.

The Williams Foundry & Machine Co., Akron, Ohio, clamps.

Firestone Tire & Rubber Co., Washington, D. C.; Indian Tire & Rubber Co., New Brunswick, N. J., solid tires.

Iron City Tool Works, Pittsburgh, Pa., light artillery vises.

Smith & Hemenway, New York City, cold chisels.

Caskey Duprey Co., Marietta, Ohio, grenade bouchons.

Rock Island Arsenal, Rock Island, Ill., targets.

Target Supply Co., Chattanooga, Tenn., target spotters.

Capital Publishers (Inc.), Washington, D. C., indoor range targets.

The Philip Carey Co., Cincinnati, Ohio, primer cap disks.

Nixon Nitration Co., Metuchen, N. J., picric acid.

The Sherwin Williams Co., Washington, D. C., black lacquer.

Springfield Armory, Springfield, Mass., United States rifles.

Chase Rolling Mills, Waterbury, Conn., brass rod and wire.

Quartermaster Corps, New York, N. Y., lard oil.

Minneapolis Steel & Machine Co., Minneapolis, Minn., wheel shoe pins, studs, nuts and split pins.

The Bassick Co., Bridgeport, Conn.; Majestic Manufacturing Co., Worcester, Mass., hand grenade sealers.

Federal Rubber Co., Cudahy, Wis., hand grenade plugs.

Landers, Frary & Clark, New Britain, Conn., aluminum meat can loops.

A. C. Lawrence Leather Co., Boston, Mass., sheepskins.

Alexander Leather Co., Philadelphia, Pa., russet strap.

Cheney Bros., South Manchester, Conn., tubular woven bags.

General Silk Importing Co., New York, N. Y., taffeta silk.

Wing & Evans, New York, N. Y., soda ash.

Gaston, Williams & Wigmore (Inc.), New York, N. Y., nitrate of soda.

Wasson Piston Ring Co., New Brunswick, N. J., packing boxes.

The Fairbanks Co., Baltimore, Md., machine tools.

Dunbar Manufacturing Co., Chicago, Ill.; Hutchins Car Roofing Co., Detroit, Mich., tool fastenings.

LIST OF PURCHASE ORDERS AND CONTRACTS PLACED BY THE ORDNANCE DEPARTMENT OF THE U. S. ARMY

American Car & Foundry Co., New York, N. Y., ammunition cars.

Philadelphia Dyeing & Finishing Co., Philadelphia, Pa.; Overbrook Carpet Co., Philadelphia, Pa., gray duck.

O'Landon Corporation, West Barrington, N. J., O. D. rubberized sateen.

Autoyre Co., Oakville, Conn., wire snap hooks.

The Linen Thread Co., New York, N. Y., O. D. linen thread.

United States Finishing Co., New York, N. Y., Army gray duck.

Carnegie Steel Co., Pittsburgh, Pa., miscellaneous steel supplies.

Dominion Copper Products Co., Montreal, Canada, copper driving bands.

Duristo Paint Co. (Inc.), Newport News, Va., paint.

Whitaker Glessner Co., Wheeling, W. Va., flange steel sheets and plates.

Cincinnati Tool Co., Cincinnati, Ohio, machine tools.

Ward & Co., Washington, D. C., copper rod and couplings.

Norman W. Henley Publishing Co., New York, N. Y., automobile repair books.

North & Judd Manufacturing Co., New Britain, Conn., bronze rings.

Savage Arms Corporation, Utica, N. Y., repair Lewis field guns.

W. H. McMeines & Co., Portland, Oreg., rawhide-covered saddle trees.

L. C. Chase & Co., Boston, Mass., magazine pockets.

United States Finishing Co., New York, N. Y., gray duck substitute.

Landers, Frary & Clark, New Britain, Conn., meat can handles.

Plant Bros. & Co., Manchester, N. H., haversack, suspenders, and pocket flaps.

Sampson Cordage Co., Boston, Mass., lariats.

Mount Hope Finishing Co., North Dighton, Mass., gray duck.

L. C. Chase & Co., Boston, Mass., haversacks.

The Felters Co., New York, N. Y., felt.

Landers, Frary & Clark, New Britain, Conn., bolo scabbards.

New York Arsenal, Governors Island, N. Y., pen and pencil combinations.

United States Finishing Co., New York, N. Y., gray duck.

Brauer Bros. Manufacturing Co., St. Louis, Mo., saber scabbard covers.

Plant Bros. & Co., Manchester, N. H., straps.

Bethlehem Steel Co., South Bethlehem, Pa., shell steel billets.

Warren Tool & Forge Co., Pittsburgh, Pa., square face flatters.

William Ryle Co., New York City, spun silk.

Simonds Manufacturing Co., Fitchburg, Mass., armor plate.

Watervliet Arsenal, Watervliet, N. Y., guns, with tools, accessories, and spare parts

Bausch & Lomb Optical Co., Rochester, N. Y., replacement parts for telescopes.

The New Home Sewing Machine Co., Orange, Mass., rifle sight covers.

Billings & Spencer Co., Hartford, Conn., combination pliers.

M. K. Bowman & Edson Co., New York City, lever snips, bench oilers.

E. C. Atkins & Co., Indianapolis, Ind., hacksaw blades.

Chandler & Farquhar Co., Boston, Mass., squares and belt clippers.

Ward & Co., Washington, D. C., monkey wrenches.

Goodell-Pratt Co., Greenfield, Mass.; J. H. Williams Co., Brooklyn, N. Y., machine tools.

Crescent Tool Co., Jamestown, N. Y., adjustable wrenches.

Graton & Knight Mfg. Co., Worcester, Mass., revolver holsters.

The Gulf Mfg. Co., Quincy, Ill., rawhide covered saddletrees.

Leatherwear Co. of America (Inc.), New York, N. Y., straps.

Otis Fenson Elevator Co., Toronto, Canada, recoil forgings.

Luria Bros. & Co., New York City, scrap iron and steel.

Lowrie-Robinson Lumber Co., Detroit, Mich., packing boxes.

Bethlehem Steel Co., South Bethlehem, Pa., antiaircraft mount.

Leatherwear Co. of America, New York, N. Y., cushing straps.

Plant Bros. & Co., Manchester, N. Y., lantern bracket straps.

Hewes & Potter, Boston, Mass., straps.

Allen Motor Co., Fostoria, Ohio, recoil groups.

Otis-Flagg Corporation, New York City, hose clamps.

Athol Machine Co., Athol, Mass., vises.

Birmingham By-Product Coke Co., Birmingham, Ala., construction and operation of by-product coke ovens.

American Can Co., Bridgeport, Conn., shell forgings.

Columbian Iron Works, Chattanooga, Tenn., gas shells.

E. T. Rugg & Co., Newark, Ohio, shell grommets.

Tubular Rivet & Stud Co., Boston, Mass., bolo scabbard rivets.

Plume & Atwood Mfg. Co., Waterbury, Conn., brass belt rivets.

Wellington, Sears & Co., Boston, Mass., olive-drab duck.

Willard Storage, E. K. Houser, proprietor, Washington, D. C., model horse.

George P. Lame Co., New York, N. Y., leather carrying cases.

Maxim Silencer Co., Hartford, Conn., metal grenade bodies.

P. H. Hentschel Machine Co., Baltimore, Md., cartridge containers and wind vanes.

Stanley Rule & Level Co., New Britain, Conn., miscellaneous blacksmith and carpenter tools.

Commerce Motor Car Corporation, Detroit, Mich., alterations on trucks.

Chandler & Price Co., Cleveland, Ohio, slotters.

National Enameling & Stamping Co., Baltimore, Md., spoons, forks, and cups.

W. S. Schuyler Mfg. Co., Savannah, Mo., filtering funnels.

Standard Tool Co., New York City, twist drills.

Lansing Co., Lansing, Mich., trailer trucks.

Gorham Mfg. Co., Providence, R. I., cartridge cases.

Bartlett-Hayward Co., Baltimore, Md., shrapnel.

McKesson & Robbins (Inc.), New York, N. Y., filling and packing liquid ammonia.

C. Kenyon Co., Brooklyn, N. Y., horse covers.

D. Sicher, New York City; Shapiro Bros., New York City; D. E. Sicher, New York City; New England Corset Co., Worcester, Mass.; Buchan Mfg. Co., New York City; Standard Tent & Awning Co., Toledo, Ohio, powder bags.

W. C. Huber & Co., Philadelphia, Pa., coal.

Gribben Lumber Co., St. Paul, Minn., stitching clamps.

Federal Enameling & Stamping Co., Pittsburgh, Pa., fuze socket holders.

Brauer Bros. Mfg. Co., St. Louis, Mo., web covers.

Powers Mfg. Co., Waterloo, Iowa, hand ax carrier billets.

R. H. Long, Framingham, Mass., cartridge belt, flap pockets.

Marlin-Rockwell Corporation, New Haven, Conn., hammer-spring compressors.

Colt's Patent Fire Arms Co., Hartford, Conn., machine-gun firing pins.

Winchester Repeating Arms Co., New Haven Conn., rifle spare parts.

The Wheeler-Schebler Carbureter Co., Indianapolis, Ind., carbureters.

American Brass Co., Black Rock, N. Y., cartridge case disks.

The Baker R. & L. Co., Cleveland, Ohio, standard tractors and trucks.

Canvas Products Co., St. Louis, Mo., meat-can pouches.

North & Judd Mfg. Co., New Britain, Conn., lariat hooks, links, thimbles, bronze rings, and steel rings.

Schartow Mfg. Co., Milwaukee, Wis., lariat hooks, links, and thimbles.

Warren Tool & Forge Co., Warren, Ohio, hardies.

Economy Engineering Co., Baltimore, Md., standard tiering machine.

Bourne-Fuller Co., Cleveland, Ohio, shell steel billets.

The Eisemen Magneto Co., Brooklyn, N. Y., magneto repair parts.

Marlin-Rockwell Corporation, New Haven, Conn., machine guns.

Grant Hammond Mfg. Co., New Haven, Conn., pliers.

Cleveland Pneumatic Tool Co., Cleveland, Ohio, hose couplings.

Commerce Motor Car Co., Detroit, Mich., tire pumps.

White, Grawick & Mitchell (Inc.), North Tonawanda, N. Y., packing boxes.

United States Machine Gun Co., Boston, Mass., cartridge extractors.

Colt's Patent Fire Arms Mfg. Co., Hartford, Conn., automatic pistol spare parts.

Cygnet Mfg. Co., Buffalo, N. Y., machine gun mount and mobile ammunition carrier.

A. J. Bates Co., Webster, Mass., helmet linings.

New Britain Machine Co., New Britain, Conn., machine gun tripods.

Ladoux & Co., New York, N. Y., brass analysis.

International Fabricating Corporation, New York, N. Y., cartridge cases.

J. Wise & Sons Co., Newark, N. J., shears.

Gribbes Lumber Co., St. Paul, Minn., handles.

Buffalo Forge Co., Buffalo, N. Y., fire shovels.

T. B. Rice & Sons Co., Philadelphia, Pa., packing boxes.

Federal Pressed Steel Co., Milwaukee, Wis., projector shells.

Wildberg Box Co., Cincinnati, Ohio, packing boxes.

Duplan Milk Corporation, Hazelton, Pa., flare parachutes.

Nixon Nitration Works, New Brunswick, N. J., flares.

Bartlett-Hayward Co., Baltimore, Md., fuzes and parts.

Curran & Barry, New York City, N. Y., commercial gray duck.

Wm. H. Horstmann Co., Philadelphia, Pa., O. D. webbing.

North & Judd Mfg. Co., New Britain, Conn., "D" rings.

Taft-Peirce Mfg. Co., Woonsocket, R. I., brass rules.

Kraeuter & Co., Newark, N. J., wire cutters.

Curtain Supply Co., Chicago, Ill.; F. M. Hoyt Shoe Co., Manchester, N. H., helmet linings.

Merchant & Evans Co., Philadelphia, Pa., brass rods and wire.

R. Wallace & Sons Co., Wallingford, Conn., forks and spoons.

Cleveland Metal Producing Co., Cleveland, Ohio, bacon cans.

The Thread Agency, New York City, O. D. cotton thread.

A. Ziegler & Sons Co., Boston, Mass., O. D. webbing.

Leatherwear Co. of America, New York City; R. H. Long, Framingham, Mass.; Progressive Knitting Works (Inc.), Brooklyn, N. Y., helmet linings.

Krout & Fite Mfg. Co., Philadelphia, Pa.; Mallison Braided Cord Co., Athens, Ga., O. D. webbing.

American Hardware Corporation, New Britain, Conn., belt fasteners.

Conway Co., Milwaukee, Wis., armer's tool chests.

Traut & Hine Mfg. Co., New Britain, Conn., brow band ornaments.

Landers, Frary & Clark, New Britain, Conn., cup hinges, handles, and sliding locks.

Turner & Seymour Mfg. Co., Torrington, Conn., ration bag clips and rings.

Catlin & Co., New York, N. Y., unbleached flannel patches.

Edgewater Dyeing & Finishing Co., New York, N. Y., gray duck.

Remington Arms U. M. C. Co., Bridgeport, Conn., bayonet parts.

Russian Embassy, represented by S. Ughet, Washington, D. C., machine guns and spare parts.

Savage Arms Corporation, Utica, N. Y., machine gun bolts.

Holcomb & Hoke Mfg. Co., Indianapolis, Ind.; Yale & Towne Mfg. Co., Stamford, Conn., rifle grenades.

Stanley Rule & Level Co., New Britain, Conn., hammers.

The Rowe-Calk Co., Plantsville, Conn., spoke clamp, links and chains for chassis.

Empire Rubber & Tire Co., Trenton, N. J.; B. F. Goodrich Rubber Co., Akron, Ohio, cord tires and inner tubes.

Columbus McKinnon Chain Co., Columbus, Ohio; American Chain Co., Bridgeport, Conn., truck chains.

Firestone Tire & Rubber Co., Akron, Ohio, cord tires and inner tubes.

Potter & Johnston Machine Co., Pawtucket, R. I., howitzer shells.

Bethlehem Steel Co., South Bethlehem, Pa., loading, assembling, and packing fuzes.

Diamond State Fibre Co., Bridgeport, Pa., carrying cases.

LIST OF PURCHASE ORDERS AND CONTRACTS PLACED BY THE ORDNANCE DEPARTMENT OF THE U. S. ARMY

R. Wallace & Sons Co., Wallingford, Conn., commercial knives.
National Belting Co., Norwalk, Ohio, shovel carriers.
Newport Mining Co., phenol.
Edward Hill's Sons & Co., New York City; Wing & Evans, New York City, soda ash.
Celluloid Zapon Co., New York City, pyro cotton boxes.
Gorham Mfg. Co., Providence, R. I., grenade bouchon assemblies.
Mergenthaler Linotype Co., Brooklyn, N. Y., master inspection gauges.

VOL. 2 WASHINGTON, WEDNESDAY, SEPTEMBER 18, 1918. No. 415

BEST U. S. BEEF TO BE RESERVED FOR OUR FIGHTERS AND ALLIES, FOOD PURCHASE BOARD DECIDES

INSTRUCTIONS GIVEN THE PACKERS

All Heavyweight Cattle to be Diverted from Civilian Use to Supply Needs of Army and Navy During Present Shortage.

Secretary Daniels authorizes the following:

At a meeting of the Food Purchase Board, which is comprised of a representative from the Navy, one from the Army, one from the Federal Trades Commission, and one from the Food Administration, the following motion was made and unanimously adopted:

"It is requested that the Food Administration preempt for and allot to the Army, Navy, and fighting forces of our allies a sufficient quantity of beef weighing 575 pounds up to 850 pounds to fill their demands. If there be not enough beef of these weights procurable, then the Food Administration is requested to allot, after giving notice to the War Department and the Navy Department, lighter beef of proper quality sufficient to meet such deficiency, keeping the weights of the alloted beef as near possible to the minimum mentioned above—this lighter-weight beef to be distributed pro rata between the Army, the Navy, and the allied fighting forces on the basis of their total demands.

Diverted from Civil Use.

"During such time, however, as a shortage of heavyweight beef may exist, the Food Administration is requested to take the necessary steps to prevent any such heavyweight beef from being diverted to the civilian populations either within the United States or abroad. The quality of all allotted beef to be passed upon by the inspectors for the Army and Navy in accordance with specifications and instructions issued to them by their respective departments."

This brings to an end the differences between the naval authorities and the meat packers over the Navy's specifications for beef which the packers sought to have modified. The specifications called for carcasses of a minimum weight of 575 pounds, and the packers sought to have this lowered to 475 pounds.

Best for the Fighters.

The attitude of the supply department of the Navy and of the Quartermaster's Department of the Army was that the best quality beef should be conserved for the fighting forces of the United States and their allies, and that none of this

President Calls Upon Munitions Plants to Reinstate Workers

The White House.
Washington Sept. 17, 1918.

Remington Arms,
U. M. C. Plant,
Liberty Ordnance Company, (and others), Bridgeport, Conn.

My attention has been called to the fact that several thousand machinists and others employed in connection with war industries in Bridgeport, Connecticut, engaged in a strike to obtain further concessions because they were not satisfied with the decision rendered by the umpire appointed under the authority conferred upon the National War Labor Board. On the 13th instant, I communicated with the workmen engaged in the strike, demanding that they accept the decision of the arbitrator and return to work, and stated the penalties which would be imposed if they refused to do so. The men at a meeting voted to return to work this morning, but I am informed by their representative that the manufacturers refuse to reinstate their former employees. In view of the fact that the workmen have so promptly complied with my directions, I must insist upon the reinstatement of all these men.

WOODROW WILSON.

JOHN WILLIAM DAVIS NAMED AMBASSADOR TO GREAT BRITAIN

Selection of Solicitor General Is Announced by the Secretary of State.

John William Davis, solicitor-general, selection of John William Davis as ambassador to Great Britain.

The following paragraph regarding Mr. Davis is taken from Who's Who in America:

John William Davis, solicitor general, U. S.; born Clarksburg, W. Va., April 13, 1873; son John J. and Anna (Kennedy) D.; A. B., Washington and Lee University, Va., 1892, LL. B. 1895 (LL. D. 1915); married Julia T. McDonald, June 20, 1899 (died August 17, 1900); 2nd, Ellen G. Bassel, Jan. 2, 1912. Admitted to bar, 1895; Asst. prof. law, Washington and Lee U., 1896–7; in practice at Clarksburg, 1897–; member law firm Davis and Davis. Member W. Va. House of

MAILING OF QUESTIONNAIRES TO 19 TO 36 REGISTRANTS BEGUN BY LOCAL BOARDS; TO BE RETURNED IN 7 DAYS

HOPE EVEN LESS TIME WILL BE NECESSARY

Serial Numbers Will Be Placed on Blanks, the Order Number to be Inserted Later—Text of Telegram of Instructions.

The War Department authorizes the following from the office of the Provost Marshal General:

Local boards throughout the United States began to-day mailing out questionnaires to all men between the ages of 19 and 36 years, both inclusive, who registered September 12, except British subjects who have 30 days to voluntarily enter the British or Canadian Armies.

The men within these ages comprise the first age group to be called up for classification under the new law, which extended the age limits of the selective draft to include all men between the ages of 18 and 45, both inclusive.

The questionnaire forms will go out at the rate of 10 per cent a day of all those registrants, who, on the day they registered, September 12, were between 19 and 36, both inclusive.

7 Days to Fill Out Questionnaires.

Under the regulations the registrant is given 7 days within which to fill out the questionnaire and return it to his local board. It is, however, the earnest hope of this office that the registrants will not require as much time as this, and that every effort will be made to turn the questionnaires in, properly answered, as promptly as possible. Under the maximum time allowed the local boards, in mailing out the forms, and the registrants, in filling them out and returning them, the questionnaires for the entire age group should all be back in the hands of the local boards within 3 weeks from to-day.

Instructions which have been sent to the local boards from this office direct them to place the serial numbers of the registrants upon the questionnaires before mailing them out, but to leave the space for the order number blank. This has been done so as to avoid the necessity of holding back the sending out of the questionnaires until after the drawing is held in Washington to determine the order numbers of the registrants. The

drawing will be held while the questionnaires are being distributed and on a date to be announced shortly. When the questionnaires shall have been returned to the local boards, and after the drawing shall have been held, the order numbers will be filled in. The "order number" will, of course, represent the order in which the registrant's "serial number"—assigned him immediately after his registration and entered upon his questionnaire—is pulled from the bowl in the drawing at Washington.

Printed Leaflets Included.

Printed leaflets, inserted in the questionnaires before they are mailed out, will instruct registrants desiring to claim deferred classification on the ground of being employed in necessary industries, occupations, or employments, including agriculture, how to proceed to present their claim under the proper heading. As heretofore explained the provision previously in the law, permitting claims on the part of "persons engaged in industries, including agriculture, etc." was changed in the new law to read "persons engaged in industries, occupations, or employments, including agriculture, found to be necessary to the maintenance of the Military Establishment, or the effective operation of the military forces, or the maintenance of national interest during the emergency." For such persons it will have to be shown that the particular enterprise by which they are engaged is "necessary" in this sense, and that they themselves are "necessary" to the operation of the particular enterprise.

Telegram of Instructions.

The text of the telegram of instructions regarding the mailing out of the questionnaires to registrants follows:

Communicate the following instructions in full to all the local boards your State: Beginning on Wednesday, September 18, and continuing for nine days thereafter, questionnaires of the third edition shall be sent each day to 10 per cent of the registrants who were on September 12, 1918, between the ages of 19 and 36, both inclusive. Questionnaires shall be sent to all registrants within such ages who registered on September 12, 1918, or who have registered thereafter, except British subjects, including Canadians.

2. In mailing questionnaires be governed by the provisions of section 92 and the last paragraph of section 99 as amended Selective-Service Regulations, except as otherwise herein provided and except that in mailing questionnaires local boards shall proceed according to serial numbers of such registrants and shall defer making any entries on the classification list until after the order numbers have been assigned in accordance with regulations subsequently to be promulgated.

3. Space for the order numbers on the questionnaires shall be left blank, the order numbers to be filled in after they have been determined and the questionnaires are returned. After the order numbers have been determined the names shall be entered upon the classification list in the order of their liability for service as will be prescribed under later regulations and the date on which the questionnaire is mailed to each registrant shall then be entered in column 5 of the classification list. For such purpose a tentative list of the dates on which the questionnaires were mailed must be kept by each local board.

4. In preparing form 10,002 under the provisions of section 92 Selective-Service Regulations, immediately below the words "Important Notice to Registrants," insert the words "Who were on September twelfth, nineteen eighteen, between the ages of nineteen and thirty-six both inclusive."

5. If in the opinion of the local board with due regard to the convenience of the registrants and the work of the legal advisory boards questionnaires can be mailed more rapidly than at the rate of 10 per cent per day, the local board may mail more expeditiously but not, however, at a rate less than 10 per cent per day.

You may not be able to fight, but you can save and buy war-savings stamps.

ARRANGEMENTS MADE TO SELL TRANSIT GOODS IN SWEDEN

Arrangements have been made with the approval of the American and associated governments to permit the sale in Sweden of so-called "transit goods," originally destined for shipment to Russia but arrested in Sweden and still held there, upon which the Swedish Government laid an embargo.

Advice to American Owners.

American owners of such transit goods are advised by the War Trade Board, in a new ruling (W. T.-B. R. 230), that these consignments may now be sold through the Swedish organization, Aktiebolaget Transito, Stockholm, which will act as agents for the owner, to Swedish firms approved by the interallied trade committee at Stockholm and under guarantees satisfactory to this committee. Owners of detained transit goods who wish to dispose of them should at once communicate full particulars to the Aktiebolaget Transito. They are advised that the proceeds of the sale of such American owned goods are to be placed to the credit of the Federal Reserve Bank of New York in a Swedish financial institution which will be designated to the sellers by the interallied trade committee at Stockholm. The dollar equivalent at par of exchange will be paid by the Federal Reserve Bank of New York to the parties in the United States designated by the parties making the deposit in Sweden. The fact of conversion at par of exchange should therefore be borne in mind by the American owners in fixing prices for their goods.

It will be unnecessary to obtain specific permission to sell individual consignments but inquiries on doubtful points may be addressed to the War Trade Board.

Permission to Sell.

It is possible that arrangements may ultimately be made for the return to Sweden of transit goods in Finland and owners of such goods who desire to avail themselves of facilities which may eventually be obtained for this purpose should communicate their wishes to Aktiebolaget Transito. Meanwhile, however, permission can not be given for the sale of such goods in Sweden except with the assent of the interallied trade committee at Stockholm.

FUEL ADMINISTRATOR REFUSES TO RECOGNIZE STRIKING MINERS

United Mine Officials in Anthracite Region Declare Walk-Out Is Unauthorized.

The Fuel Administration issues the following:

United States Fuel Administrator H. A. Garfield will not in any way recognize the mine workers in the anthracite region while they are on strike. Officials of the United Mine Workers of America declare that any strike of the miners at this time is unauthorized, and bodies of the anthracite mine workers have voluntarily sent in telegrams to the administration pledging their loyalty and determination to do their duty.

Telegram from Shamokin.

From Shamokin, Pa., Fuel Administrator Garfield received a telegram from J. O. Rumberger, an anthracite mine worker, not an official of the United Mine Workers of America, as follows:

SHAMOKIN, PA., *September 17, 1918.*

H. A. GARFIELD,
Washington, D. C.:

Desirous of settling trouble in anthracite, a meeting of miners September 18, 2 p. m., in Shamokin, some misunderstanding between Government miners and miners' officials. Will you meet a committee coming direct from the miners? Reply immediately so that we can have a report for the above meeting.

J. O. RUMBERGER.

Not knowing J. O. Rumberger, Fuel Administrator Garfield telegraphed to James Matthews, president of District No. 9, United Mine Workers of America, who has persistently refused to countenance a strike, plainly reiterating the determination of the administration not to deal with men on strike.

Mr. Garfield's Message.

He wired:

JAMES MATTHEWS,
President District No. 9,
United Mine Workers of America,
Shenandoah, Pa.:

J. O. Rumberger wires stating that evidently misunderstanding between Government miners and miners' officials exists, and asks whether I will meet committee of miners. Please say to him I will not meet any committee of miners out on strike. If they return to work at once, I will take matter up through you or other duly authorized representative.

H. A. GARFIELD.

MARINE SECTION DISCONTINUED.

U. S. RAILROAD ADMINISTRATION,
Washington, September 13, 1918.

CIRCULAR No. 55.

Effective September 1, 1918, the Marine Section of the Division of Transportation, the creation of which was announced in Circular No. 5, has been discontinued.

Coastwise steamship lines under Federal control will be under the jurisdiction of the Federal manager as announced in Circular No. 52.

Shipping on the Great Lakes under Federal control will be under the jurisdiction of the regional director, eastern region.

W. G. MCADOO,
Director General of Railroads.

MOTION PICTURE MACHINES PLACED UPON A WAR BASIS

Curtailment of Materials Used in Manufacture Is Decreed by Industries Board.

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

Motion-picture-machine manufacturers are to go upon a war basis of curtailment in variety of sizes of lenses, production of lighter machines, and substitutes where possible for brass, aluminum, steel, and iron under a conservation program which has been worked out at conferences between the manufacturers and the conservation division of the War Industries Board.

In an announcement to the manufacturers of motion-picture machines the conservation division, emphasizing the primary importance of husbanding the country's resources and supply of materials, equipment, and capital to aid in carrying on the war, says:

"The division has been informed that manufacturers in your industry are producing machines with lenses of a greater variety of sizes than is necessary in war time, that considerable saving in the weight of machines can be effected, with a further saving by substitution in many cases of some less essential materials for the brass and aluminum now used, and that economies can be effected in the distribution of accessories. The elimination of the avoidable use of brass, steel, iron, and aluminum, which are all urgently required for war purposes, is particularly desired."

Schedule As Issued.

The schedule covering the industry, which is issued, provides:

1. The purchase of new lenses to be restricted from this date to 4 inches, 5 inches, and 6 inches focal lengths, and 16 inches, 20 inches, and 24 inches stereo. There is no restriction in dealing in second-hand lenses of any size.

2. After September 20, 1918, the following accessories to be furnished to purchasers only upon request as extras: (a) rheostat; (b) rewinder; (c) reels.

3. Each manufacturer to reduce the weight of his machines as much as is practicable and to advise this division immediately of the amount of this reduction.

4. Each manufacturer to substitute some less essential material for brass, aluminum, and steel in so far as possible, and to advise this division of the action taken.

SEALED PROPOSALS.

Sealed proposals will be opened by the Superintendent of Lighthouses, Tompkinsville, N. Y., at 2 o'clock p. m. September 26, 1918, for approximately 65,000 cubic feet acetylene gas. Information upon application to the above office.

ORDERED TO WASHINGTON.

Special Orders, No. 211:

107. Col. William S. Valentine, Quartermaster Corps, will proceed to Washington, D. C., and report to The Adjutant General of the Army for duty in his office.

PROPOSALS FOR SUPPLIES FOR INDIAN AGENCIES

Sealed bids will be received until 2 o'clock p. m. September 30, 1918, at the Lower Brule School and Agency, Lower Brule, S. Dak., for 27,000 pounds well-matured corn for feed, and 52,000 pounds good quality oats for feed.

Sealed bids will be received until 2 o'clock p. m. September 24, 1918, at the Carson Indian School, Stewart, Nev., for 1 garment press and 1 wood washer, as per specifications.

Sealed bids will be received until 2 o'clock p. m. September 28, 1918, at the Crow Agency, Mont., for 40 tons of cottonseed cake.

Sealed bids will be received until 2 o'clock p. m. September 23, 1918, at the Lower Brule School and Agency, Lower Brule, S. Dak., for 1,000 gallons of gasoline.

Sealed bids will be received until 2 o'clock p. m. September 26, 1918, at the Office of Indian Affairs, Washington, D. C., for fixtures and materials for dormitory at Tishomingo, Okla.

Sealed proposals will be received until 2 o'clock p. m. September 21, 1918, at the Mekuskey Indian Academy, Seminole, Okla., for furnishing 1,400 gallons of gasoline.

Sealed proposals will be received until 2 o'clock p. m. October 1, 1918, at the United States Indian warehouse, 308 South Green Street, Chicago, Ill., for furnishing the following supplies:

1,000 yards bedticking, 6-ounce, blue and white stripe preferred, but bids on colors other than blue will be considered.

10,485 yards calico as follows: 5,810 yards indigo (patterns to be selected); 4,350 yards shirting (patterns to be selected); 325 yards oil red.

6,546 yards duck (Indianhead) white, (about 48 by 48 in the gray), 36-inch, bleached, shrunk finish.

380 yards flannel, red twilled.

54,434 yards hickory shirting, fast color (if practicable, as per patterns to be selected).

1,130 yards, Panama cloth, gray, all wool, 54-inch.

2,155 yards Panama cloth, dark blue, all wool 54-inch.

4,710 yards serge, dress, dark blue, all wool, 54-inch. (Bid also on substitutes—cheviot, cheviotcen, or others.)

4,505 yards plaid, glass toweling, about 18 to 20 inches wide, cotton or union.

11,360 yards sheeting, 4/4 brown, heavy standard, 48 by 48, weight about 2.85 yards to pound.

9,150 yards sheeting, 64 by 68, weight about 3.50 yards to pound.

14,131 yards sheeting (bleached muslin), 4/4, approximately 84 by 80.

7,491 yards white crossbar, for aprons, about 27-inch, as per patterns to be selected. (Submit pattern book in addition to samples.) (Samples of yard or piece goods items need not be submitted in original piece or bolt; a 3-yard swatch will be satisfactory.)

70 yards sleeve lining, twilled, 40 inches wide. (Sample required.)

75 yards drilling, corset jeans, slate, 27–28. (Sample required.)

403 fascinators, woolen, assorted colors.

278 pounds cotton bats, full net weight.

26 mufflers, woolen, knit.

8 shawls, dark-colored plaid, single, about 8/4.

122 shawls, same, double, about 16/4. (Samples of the above required.)

595 union suits, misses', knit, ribbed for summer wear, long sleeves and high neck, open seat, assorted, sizes 14 and 16 years, boxed. (Submit samples of age 14, weighing approximately 3½ pounds, 3¾ pounds, and 4 pounds per dozen net.) (Each garment delivered and each box in which the garments may be packed must have the proper size distinctly marked or tagged thereon.)

229 dozen pairs men's half hose, woolen; sizes 10½–11½ on whole and half sizes, in bundles.

748 dozen pairs half hose, boys', cotton, mixed heavy, sizes 9–10 in whole and half sizes, in bundles. (Submit samples for size 9, weighing approximately 2 pounds, 2¼ pounds, and 2½ pounds per dozen net.) (On the men's hose, woolen, item 22, submit samples weighing approximately 2½, 2¾, and 3 pounds per dozen net for size 10.)

1,146 dozen pairs misses' heavy cotton hose, reinforced heel and toe, black, sizes 6½ to 8½, in whole and half sizes, boxed. Submit samples of size 7, weighing approximately 1¾ pounds, 2 pounds, and 2½ pounds per dozen net.

655 dozen pairs misses' hose, reinforced heel and toe, cotton, black, seamless, or regular made, good quality, fast dye, sizes 6½ to 8½, in whole and half [illegible] ples of size 7, weighing approximately 1½ pounds, 1¾ pounds, and 2 pounds per dozen net.

Samples of not less than one-half dozen of each kind of [illegible] in the box and bundle goods in full bundles.

3,430 yards braid, cardinal, worsted, ¾-inch.

133-dozen clamps for fastening rubber or celluloid collars to uniform coats.

1,315 dozen pieces tape, white, cotton, as follows: 240 dozen pieces, ½-inch; 398 dozen pieces, ⅝-inch; 420 dozen pieces, ¾-inch; 257 pieces, ⅞-inch.

34-2/12 dozen spools thread, linen, standard make, 200 yards to spool, dark blue and unbleached, as required, No. 30.

11-10/12 dozen spools, same, No. 35.

24-10/12 dozen spools, same, No. 40.

518 pairs boots, rubber, assorted, sizes 5 to 13.

554 pairs overshoes, arctic, 4 buckles, assorted sizes, misses' sizes, 11 to 2.

632 pairs same, women's, sizes 3 to 8. Sizes on boots and overshoes to be delivered as required. Separate sample on each item required.

The foregoing items required for schools and agencies of the Indian Service and will have to be invoiced and put up in such quantities as are required at the various points.

Bids will be received until 9 o'clock a. m. September 30, 1918, at the San Juan Indian School, Shiprock, N. Mex., for the following supplies:

88 1 inch by 11 feet 8 inches 0 to 0 rods, tension.
50 ⅝-inch by 24-inch bolts, threaded 4-inch.
180 ⅝-inch by 21-inch bolts, threaded 4-inch.
150 ½-inch by 22-inch bolts, threaded 4-inch.
300 ½-inch by 16-inch bolts, threaded 4-inch.
50 ½-inch by 12-inch bolts.
50 ½-inch by 8-inch bolts.
40 pieces ⅝-inch by 16 feet round steel for D bolts.
50 pounds 10d. nails, com.
600 pounds 20d. nails, com.
1,400 pounds 40d. nails, com.
1,400 pounds 60d. nails, com.
40 pounds washers, W. I., for ⅝-inch bolts.
35 pounds washers, W. I., for ½-inch bolts.
200 pounds washers, C. I., for 1⅝-inch rods.
44 pounds plates, steel. As per attached print "A."
44 pounds plates, steel. As per attached print "B."
20 lineal feet ⅞-inch drill steel.
3 adzes, carpenter, 4-inch cut, with handles.
4 axes, single bit, 4 pounds, with handles.
4 augers, ship, ⅞-inch.
4 augers, ship, 1⅛-inch.
4 augers, ship, 1⅜-inch.
4 augers, ship, 1½-inch.
1 handle, ship auger, adjustable.
2 saws, crosscut, 6-foot, with handles.
2 chains, log, ⅝-inch by 12 feet.
2 files, 8-inch, flat-mill, 1 round edge.
6 files, 10-inch, flat-mill, 1 round edge.
4 files, 10-inch, round, bastard.
6 files, 12-inch flat, bastard.
6 scrapers, horse, No. 2.
2 cutters, blacksmith, cold.
2 cutters, blacksmith, hot.
1 tent, 14 by 20 feet, 10-ounce duck. No poles or pins.
2 covers, tarpaulin, 10-ounce duck, 10 by 12 feet.
1 fly, tent, 10 by 12 feet, 10-ounce duck.
4 rings, tent, stovepipe 5-inch.
3 pairs 8-inch strap hinges, with screws.
3 8-inch hasps and staples.
2 padlocks with two keys.
200 pounds wire, galvanized, 9 gauge.
1 pair pliers, 10-inch, combination. Heavy.
300 lineal feet rope, 1¼-inch.
500 square feet roofing paper, 2-ply.
100 metal identification tags. Lettered "G. M. V." (No. 1 to 100).

Item 1, tension rods, each end to be upset and threaded 6-inch for 1⅝-inch nuts. Two standard nuts to each rod.

Item 15, cast-iron washers are for tension rods, upset, 1⅝-inch at each end.

RULING ON BEEF RESERVE.

(Continued from page 1.)

heavyweight beef be diverted to the civilian population, either here or abroad, while a shortage of this kind of beef exists, the purpose of conservation, as repeatedly outlined by the Food Administration, being that such sacrifices as are necessary should be borne by the noncombatants for the benefit of the fighting forces.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

RATES BY MAIL.

Daily	One year	$5.00
	Six months	3.00
	One year, postage prepaid to foreign countries	8.00
	Six months, postage prepaid to foreign countries	4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

American Communique

American Official Communique No. 126.

HEADQUARTERS AMERICAN EXPEDITIONARY FORCES,
September 17, 1918.

Section A.—In the St. Mihiel sector the day was quiet except for continued activity of artillery and aviation, and patrol encounters, in which we captured prisoners. An enemy raid in the Vosges was repulsed.

DOMINICAN BANDITS KILLED IN FIGHT WITH U. S. MARINES

The Navy Department authorizes the following:

Clashes between United States marines and Dominican bandits occurred on September 7 and 9, without casualties to the sea soldiers, according to information made public at Marine Corps headquarters.

Col. George Cyrus Thorps, United States Marine Corps, of Northfield, Minn., with 10 enlisted marines, was ambushed at a ford north of Dos Rios on September 7. In 40 minutes' fighting at least 20 bandits are reported killed. There were no marine casualties, although a mule belonging to the sea soldier outfit was wounded and lost.

A detachment of the Guardia Nacional Dominicana, which is officered by marines, killed three bandits in a skirmish near Higuey on September 9. The Guardia suffered no casualties.

Greetings from Serbia On American Successes

The following telegram has been received:

"His Excellency, Mr. LANSING,

"*Secretary of State, Washington.*

"On my arrival at Paris I am greeted by the news of the victory which brings fame to the American Army. All the Servians will enthusiastically hail this additional pledge of triumph for right and justice. In the name of a people who are entering their seventh year of war and hardships, who unsparingly joined in the common effort of the allies, I salute, in admiration, the glorious American flag, my thoughts go in heartfelt gratitude to the heroes who paid with their lives the price of victory, and I beg your excellency to convey to His Excellency the President of the Republic, and all the American people, my warm felicitations.

PACHITCH."

New Mail Flight Record Washington to New York

All records of mail flights from Washington to New York were broken Tuesday by Aviator Miller accompanied by Aviator Newton as a passenger and the mail. The same aeroplane was used for the entire trip—a standard plane with a 150 h. p. engine. The plane left Washington at 11.36 a. m. and arrived at Philadelphia at 1 p. m.—1 hour and 24 minutes, or a speed of 91½ miles per hour. It left Philadelphia at 1.07 p. m. and arrived at New York at 1.50 p. m.—43 minutes, or a speed of 125½ miles per hour.

Time Washington to New York including Philadelphia stop—2 hours and 14 minutes, or a speed of 102 miles per hour. Time Washington to New York actual flying time 2 hours and 7 minutes, or a speed of 108 miles per hour.

646 Ensigns Receive Commissions in Navy

The Navy Department authorizes the following:

Six hundred and forty-six ensigns received commissions at the Naval Academy, at Annapolis, this morning. Secretary Daniels delivered the diplomas and the address to the graduating officers. The class has just completed four months of intensive training, which included the course at the academy and preliminary training in the active service of the Navy. Secretary Daniels, accompanied by Mrs. Daniels, went to Annapolis late yesterday for the graduating exercises, which took place at 10 o'clock this morning.

TO BE LIEUTENANT COLONEL.

Special Orders, No. 210:

386. The appointment of Maj. Herbert H. White, Field Artillery, to the grade of lieutenant colonel, Field Artillery, United States Army, during the existing emergency, with rank from August 30, 1918, is announced.

SPANISH INFLUENZA EPIDEMIC AT THREE ARMY CANTONMENTS

The War Deparment authorizes the following statement from the office of the Surgeon General:

Severe epidemics of the so-called Spanish influenza have broken out in several camps. Telegraphic reports received by the chief of the division of sanitation say that 1,500 cases, with 2 deaths, have developed at Camp Devens, Mass.; 1,000 cases at Camp Lee, Va.; and 320 cases at Camp Upton, Long Island, N. Y.

Mild in Nearly All Cases.

Camp surgeons report that in practically all cases the disease has appeared in a very mild form, and that it is reasonable to assume that the victims will be able to return to duty within a short time.

Every effort is being made to check as far as possible the spread of the disease. In the three camps where it has assumed the proportions of an epidemic orders have been issued to discontinue public gatherings in assembly halls and in theaters.

The appearance of the disease in the camps does not come as a surprise to the Medical Department, as it was reasonably certain that it would be brought to this country through the normal means of travel. The only method of preventing its entrance into this country would have been to stop communication with European countries while the disease was active in Europe. War-time conditions precluded such a course.

Hospital Facilities Taxed.

The hospital facilities in the camps will be taxed to the utmost to provide for the large number of sick. As an emergency measure barrack buildings are being fitted up as wards so that complete isolation of all victims will be secured.

Responsible medical officers at all camps and Army centers recently received instructions from the Surgeon General regarding the precautions that should be taken to prevent the spread of all classes of respiratory diseases. While these suggestions did not specifically call attention to the possibility of epidemics of Spanish influenza, the advice given applies equally well to this disease. It is believed that the adherence to the sanitary procedure outlined in this communication will limit the spread of influenza.

NAMED AMBASSADOR AT LONDON

(Continued from page 1.)

Delegates, 1899; Democratic candidate for presidential elector-at-large, 1900; delegate Dem. Nat. Convention, St. Louis, 1904; elected to 62nd and 63rd Congresses (1911–1915) 1st W. Va. District; resigned from Congress to become solicitor-general of U. S., August 30, 1913. President W. Va. Bar Association, 1906; member Phi Kappa Psi, Phi Beta Kappa, Mason (32°), Elk. Clubs: Metropolitan, University, National Press, Chevy Chase, Lawyers (Washington). Counselor American Red Cross. Home: Clarksburg, W. Va.

Mr. Davis is one of the American delegation to the American-German Prisoner Conference which will meet in Berne on September 23.

PROCEEDINGS OF THE CONGRESS OF THE UNITED STATES BRIEFLY TOLD

SENATE.

President Wilson's prompt reply to the peace feelers put out by the Austrian Government met with hearty approval in both Houses of Congress yesterday. In the Senate the minority Leader, Senator Lodge, praised the answer of the President warmly and said that it would meet with universal approval. He also endorsed the promptness with which the President acted. Senator Thomas, Democrat, said there was no difference throughout the country concerning America's object in the war and that the President spoke for all the people. Senator McCumber, Republican, of North Dakota, spoke of the aims of the United States and declared that there would be no discussion of peace terms until the principles laid down by this Government had been accepted. In the House Chairman Fess, of the Republican Congressional Campaign Committee, asserted that the President's answer would effectually check and peace offensive and gave his cordial approval to the treatment the President had given to the Austrian note.

Suffrage Up September 26.

Chairman Jones, of New Mexico, of the Suffrage committee, announced that an agreement had been reached to take up the pending suffrage constitutional amendment on September 26 for consideration.

In the course of general discussion yesterday afternoon Senator Pittman declared that unless the conferees on the oil land leasing bill reached an agreement, Government control and operation of western oil and coal lands would be inevitable.

A resolution providing for an investigation of the campaign expenditures of Truman H. Newberry, nominated by the Republicans in the recent Senatorial primaries in Michigan, and similar expenditures in other States, is provided for in a resolution introduced by Senator Pomerene, chairman of the Committee on Privileges and Elections. After a brief discussion the resolution was referred to the committee of which Senator Pomerene is chairman.

With two Democratic members of the committee in opposition, the Military Committee yesterday ordered a favorable report on the bill to create an independent department of aeronautics with an officer at its head to be appointed by the President, who shall have full charge over aircraft production and operation by the Army, Navy, and the Marine Corps. The original bill, which was amended, provided for the creation of a new Cabinet minister to have charge of this department.

Report on Packing Industry.

Rush C. Butler, of Chicago, chairman of the committee of the Chamber of Commerce of the United States that drew up the recent report criticising the Federal Trade Commission for its report relative to the packing industry, before the Agricultural Committee, denied that the packers instigated or had anything to do with the report. The Agricultural Committee is engaged in the consideration of the Thompson resolution empowering the Government to take over the meat-packing houses.

The Finance Committee struck from the bill designed to stimulate the sale of Liberty bonds, recently passed by the House, the provision granting the President authority to regulate or prohibit transactions in foreign exchange or other securities, and as thus amended ordered the measure favorably reported to the Senate. It was the plan of Chairman Simmons to call the measure up to-day and attempt to pass it before adjournment. Hearings were concluded by the committee yesterday afternoon on the war-revenue bill. William A. Brady and Walter W. Irwin, representing the motion-picture industry, protested against the doubling of the tax on admissions and the additional 10 per cent tax on rentals of films, asserting that it would levy taxes amounting to $2,000,000 a year more than the companies are making and would result in closing up half of the movies in the country. Other witnesses representing iron-ore interests asked the committee that in fixing the value of mining property the actual value at the time of paying the tax be considered. Beginning next Tuesday the committee will meet in executive session to consider the bill.

Accepts Vase from France.

The desire of the Government of France to give the Senate a vase in appreciation of the reception tendered the French mission by the Senate on the occasion of its visit to Washington will be realized. The Senate yesterday afternoon adopted a resolution by Senator Pomerene accepting the gift. It will be formally accepted next Tuesday.

In a brief speech, Senator Sterling, of South Dakota, asserted that a laborer, working on Government work in these times of war, who uses the strike to demand more than a fair wage is a profiteer. Workmen or contractors who thus took advantage of the Government he charged with being in the same class and expressed the belief that they should be summarily dealt with under laws now in force, but if such laws were not sufficient one should be passed at once.

HOUSE.

Chairman Sherley, of the Committee on Appropriations, yesterday made public the revised estimates of the War Department of the cost of maintaining the increased Army up to June 30 of next year. They show that additional appropriations aggregating the huge sum of $7,347,727,602 will be required. These figures are now being studied by the committee with a view to framing the necessary legislation. Hearings will be held on the bill next week, at which time officers of the department will explain the needs of the service and the purposes for which these great sums have been asked.

The items of appropriation estimated for are as follows:

Office of the Chief of Staff, contingencies, military information section, General Staff Corps, $1,000,000.

Office of the Provost Marshal General, registration and selection for military service, $23,617,302.

Office of the Chief Signal Officer, signal service for the Army, $104,180,934.

Air Service, military, $178,758,366.

QUARTERMASTER CORPS.

Pay of the Army	$791,619,952
Mileage, officers and contract surgeons	7,000,000
Subsistence of the Army	263,410,023
Incidental expenses	71,569,340
Transportation of Army and supplies	1,277,854,305
Water and sewers as military posts	2,244,419
Clothing and camp and garrison equipage	178,703,831
Horses for Cavalry, Artillery, etc.	14,667,580
Military post exchanges	3,342,512
Shooting galleries and ranges	100,000
Barracks and quarters, Philippines	3,766,830
Construction and repair of hospitals	129,833,542
Fireproof record building	450,000
Temporary office building in New York	2,225,000
New permanent building, Fort Leavenworth	695,427
Land for Ohio State rifle range	190,183
Land at West Point, Ky.	1,600,000
Land at Fayettesville, N. C.	1,500,000
Disposition of remains of officers, soldiers, and civilian employees	710,274
Barracks and quarters, seacoast defenses	5,100,000

MEDICAL DEPARTMENT.

Medical and hospital department	[illegible]
Chemical warfare section	198,800,000

ENGINEER DEPARTMENT.

Engineer operations in field	$335,000,000

ORDNANCE DEPARTMENT.

Armament of fortifications	$1,985,075,169
Armament of fortifications (Panama Canal)	150,000
Ordnance stores, ammunition	417,706,180
Small arms [illegible]	[illegible]
Manufacture of arms	85,156,875
Ordnance stores and supplies	160,634,668
Automatic rifles	156,093,994
Armored motor cars	217,687,500
Arsenals	1,633,696
Repairs of arsenals	1,750,000
Contract obligations, armament of fortifications	500,000,000
Grand total	7,347,727,602

The House continued consideration of the war-revenue bill. With practically no discussion the provision was approved continuing the present income-tax exemption at $1,000 for single and $2,000 for married persons, with an allowance of $200 additional for each child or other dependent under 18 years of age.

Congress has been requested by [illegible] Secretary of War Crowell to enact legislation recommended by Gen. Pershing under which prompt payment may be made to citizens of France for unpaid obligations of deceased American soldiers. Under the terms of the submitted bill the Government would liquidate debts of this character and deduct the amount from any sums due the soldiers.

IMPORT RULE CHANGED.

License Permits for Blue Stones and Yellow Stones.

List of Restricted Imports No. 2, item 121, has been so far amended by the War Trade Board, in a new ruling (W. T. B. R. 232), as to permit the issuance of licenses, where the application is otherwise in order, for the importation of blue stones and/or yellow stones from Europe and Mediterranean Africa, when coming from convenient ports where loading can be done without delay.

Orders Issued by the United States Fuel Administration Relating to Changes Concerning Coal Zone Regulations

The following orders have been issued by the United States Fuel Administration:

It appearing to the United States Fuel Administrator that it is essential that the producers of bituminous coal located in producing districts along the Louisville & Nashville and Cincinnati, New Orleans & Texas Pacific Railways in eastern Kentucky and a portion of Tennessee and Virginia be prohibited from making shipments of bituminous coal to certain sections included in "Zone F" as described in the order of March 27, 1918, and that the apportionment of bituminous coal in that portion of the so-called "zoning system" covered by his "order relative to bituminous coal Zone F" of March 27, 1918, will facilitate the movement of bituminous coal and will aid in the successful prosecution of the war,

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that, until further or other order of the United States Fuel Administrator, and subject to revocation or modification by him from time to time and at any time hereafter, no producer (which term shall include every person, firm, corporation or association operating as owner, lessee or purchaser of the entire output of a mine) of bituminous coal in Virginia along the Louisville & Nashville Railroad only; in eastern Kentucky along the Louisville & Nashville Railroad and the Cincinnati, New Orleans & Texas Pacific Railway and their short-line connections; and in Tennessee along the line of the Cumberland Valley division of the Louisville & Nashville Railroad and along the Middlesborough Railroad, shall sell, ship, or distribute such coal to dealers and consumers for use and consumption within the following-described section of the United States, viz:

Provided, however, that any such producer may ship such a quantity of coal of such quality, and for such special use or purpose and to such retail dealer or consumer outside of the above designated zone as may be described and designated in a permit issued by the United States Fuel Administration upon an application from such consumer, and in accordance with such rules and regulations as may be from time to time prescribed by the United States Fuel Administration; and

Provided further, that this order shall not apply to bituminous coal shipped for use as railroad fuel.

This order shall be effective on and after September 9, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

Regulations for West Virginia.

It appearing to the United States Fuel Administrator that it is essential that the producers of bituminous coal located in the high-volatile coal-producing districts of West Virginia, in the Logan and Kanawha districts west of St. Albans, W. Va., along the Chesapeake & Ohio Railway and short-line connections, be prohibited from making shipments of bituminous coal to certain sections included in "zone M–2," as described in the order of June 8, 1918, and that the apportionment of bituminous coal in that portion of the so-called "zoning system" covered by his "order relative to bituminous-coal zone M–2" of June 8, 1918, will facilitate the movement of bituminous coal and will aid in the successful prosecution of the war,

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that until further or other order of the United States Fuel Administrator, and subject to revocation or modification by him from time to time and at any time hereafter, no producer (which term shall include every person, firm, corporation, or association operating as owner, lessee, or purchaser of the entire output of a mine) of bituminous coal in the high-volatile coal-producing districts of West Virginia, in the Logan and Kanawha districts west of St. Albans, W. Va., along the Chesapeake & Ohio Railway and short-line connections, shall sell, ship, or distribute such coal to dealers and consumers for use and consumption within the following-described section of the United States, viz:

* * * * *

Provided, however, that any such producer may ship such a quantity of coal of such quality, and for such special use or purpose and to such retail dealer or consumer outside of the above-designated zone, as may be described and designated in a permit issued by the United States Fuel Administration upon an application from such consumer, and in accordance with such rules and regulations as may be from time to time prescribed by the United States Fuel Administration; and

Provided further, that this order shall not apply to bituminous coal shipped for use as railroad fuel.

This order shall be effective on and after September 9, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

Orders for West Virgina.

It appearing to the United States Fuel Administrator that it is essential that the producers of bituminous coal located in the high volatile coal producing districts of West Virginia along the Kanawha & Michigan, Kanawha & West Virginia, and the Coal & Coke (west of Dundon) Railways and their short-line connections, be prohibited from making shipments of bituminous coal to certain sections included in "Zone L" as described in the order of March 27, 1918, and that the apportionment of bituminous coal in that portion of the so-called "Zoning System" covered by his "order relative to bituminous coal Zone L" of March 27, 1918, will facilitate the movement of bituminous coal and will aid in the successful prosecution of the war.

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said Administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the Act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that, until further or other order of the United States Fuel Administrator, and subject to revocation or modification by him from time to time and at any time hereafter, no producer (which term shall include every person, firm, corporation, or association operating as owner, lessee, or purchaser of the entire output of a mine) of bituminous coal in the high volatile coal producing districts of West Virginia along the Kanawha & Michigan, Kanawha & West Virginia, and Coal & Coke (west of Dundon) Railways and their short-line connections, shall sell, ship, or distribute such coal to dealers and consumers for use and consumption within the following described section of the United States, viz:

* * * * *

Provided, however, that any such producer may ship such a quantity of coal of such special quality, and for such special use or purpose and to such retail dealer or consumer outside of the above designated zone, as may be described and designated in a permit issued by the United States Fuel Administration upon an application from such consumer, and in accordance with such rules and regulations as may be from time to time prescribed by the United States Fuel Administration; and

Provided, further, that this order shall not apply to bituminous coal shipped for use as railroad fuel.

This order shall be effective on and after September 9, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

In the Kentucky District.

It appearing to the United States Fuel Administrator that it is essential that the producers of bituminous coal located in the high volatile coal producing districts of Kentucky in the eastern Kentucky fields along the Chesapeake & Ohio and Sandy Valley & Elkhorn Railways and their short line connections be prohibited from making shipments of bituminous coal to certain sections included in "Zone M-4," as described in the order of June 8, 1918, and that the apportionment of bituminous coal in that portion of the so-called "Zoning System" covered by his "order relative to bituminous coal Zone M–4" of June 8, 1918, will facili-

Orders Issued Concerning Coal Zone Regulations

tate the movement of bituminous coal and will aid in the successful prosecution of the war.

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917, hereby orders and directs that, until further or other order of the United States Fuel Administrator, and subject to revocation or modification by him from time to time and at any time hereafter, as producer (which term shall include every person, firm, corporation, or association operating as owner, lessee, or purchaser of the entire output of a mine) of bituminous coal in the high volatile coal-producing districts of Kentucky in the eastern Kentucky fields along the Chesapeake & Ohio and Sandy Valley & Elkhorn Railways and their short-line connections, shall sell, ship, or distribute such coal to dealers and consumers for use and consumption within the following-described section of the United States, viz:

* * * * *

Provided, however, That any such producer may ship such a quantity of coal of such quality, and for such special use or purpose and to such retail dealer or consumer outside of the above designated zone, as may be described and designated in a permit issued by the United States Fuel Administration upon an application from such consumer, and in accordance with such rules and regulations as may be from time to time prescribed by the United States Fuel Administration; and

Provided, further, That this order shall not apply to bituminous coal shipped for use as railroad fuel.

This order shall be effective on and after September 9, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

Zones in Illinois.

It appearing to the United States Fuel Administrator that it is essential that the producers of bituminous coal located in the producing districts of Illinois be permitted to continue shipments of bituminous coal slack or screenings until further notice to points outside of "Zone C" as described in the order of March 27, 1918, and that further apportionment of bituminous coal in that portion of the so-called "Zoning System" covered by his "order relative to bituminous coal Zone C" of March 27, 1918, and his "modification number five" thereof of June 28, 1918, will facilitate the movement of bituminous coal, tend to prevent scarcity thereof, and is necessary for the production of a sufficient quantity of bituminous coal to aid in the successful prosecution of the war,

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that, until further or other order of the United States Fuel Administrator, and subject to revocation or modification by him from time to time and at any time hereafter, every producer (which term shall include every person, firm, corporation, or association operating as owner, lessee, or purchaser of the entire output of a mine) of bituminous coal in the State of Illinois may, in addition to the territory to which they are permitted to ship under "Zone C," continue to sell, ship, and distribute, as provided in said order of June 28, 1918, until further notice, bituminous coal slack or screenings to dealers and consumers for use and consumption within the following-described section of the United States, viz:

That portion of the State of Wisconsin on and north of a line coincident with the Green Bay & Western Railroad from Kewaunee, Wis., to Amherst Junction; thence coincident with the Minneapolis, St. Paul & Sault Ste. Marie Railway through Abbottsford and Chippewa Falls, Wis., to Minneapolis, Minn.

H. A. GARFIELD.
United States Fuel Administrator.

Sections on the B. & O.

It appearing to the United States Fuel Administrator that it is essential that the producers of bituminous coal located in the producing districts of Ohio and on the Ohio River division of the Baltimore & Ohio Railroad in Mason County, W. Va., be prohibited from making shipments of bituminous coal to certain sections included in "Zone K," as described in the order of March 27, 1918, and that the apportionment of bituminous coal in that portion of the so-called "zoning system" covered by his "order relative to bituminous coal, Zone K," of March 27, 1918, will facilitate the movement of bituminous coal and will aid in the successful prosecution of the war,

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that, until further or other order of the United States Fuel Administrator, and subject to revocation or modification by him from time to time and at any time hereafter, no producer (which term shall include every person, firm, corporation, or association operating as owner, lessee, or purchaser of the entire output of a mine) of bituminous coal in the coal-producing districts of Ohio and in the coal-producing districts located on the Ohio River division of the Baltimore & Ohio Railroad in Mason County, W. Va., shall sell, ship, or distribute such coal to dealers and consumers for use and consumption within the following described section of the United States, viz:

All points in the lower peninsula of Michigan located on and east of a line coincident with the Grand Rapids & Indiana Railway and its branches.

Provided, however, that any such producer may ship such a quantity of coal of such quality, and for such special use or purpose, and to such retail dealer or consumer outside of the above-designated zone, as may be described and designated in a permit issued by the United States Fuel Administration upon an application from such consumer, and in accordance with such rules and regulations as may be from time to time prescribed by the United States Fuel Administration; and

Provided, further, that this order shall not apply to bituminous coal shipped for use as railroad fuel.

This order shall be effective on and after September 9, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

MODEL AMERICAN VILLAGE FOR ITALIAN REFUGEES AT PISA

The Red Cross issues the following:

A cablegram from the American Red Cross commissioner to Italy, dated Pisa, states the following plans of a new enterprise in connection with the refugee problem:

Steps were taken here to-day toward building a model American village, for the purpose of providing new homes for people made homeless by the war. On a site comprising 30 acres of ground, adjacent to the leaning tower and other world-famous monuments of Pisa, ground was broken in the presence of the King, head of the Italian Red Cross, Maj. Chester Aldrich, and other officers of the American Red Cross. It is expected the village will be completed in 90 days.

Buildings of Cement.

The buildings will be made of cement. There will be a public square, church, schoolhouse, hospital, and public eating kitchen. Modern sanitary facilities will be installed. The water supply will be brought over the aqueduct built by the Medici 500 years ago, which still is in perfect condition. The site will provide homes for 2,000 refugees from the Venetian district.

It is proposed to transplant to the new village industries with which the refugees are familiar. The entire project is under the supervision of the American Red Cross, and is regarded as one of the most interesting undertakings in the effort to deal with problems arising out of refugees from devastated and threatened districts.

ORDERED TO NEW POSTS.

Special Orders, No. 170:

324. Each of the following-named officers is relieved from his present duty and will proceed to the headquarters of the coast defenses indicated after his name and report to the commanding officer thereof for assignment to duty:

Lieut. Col. Berton K. Lawson, Coast Artillery, National Guard, Coast Defenses of Mobile; Maj. Willard L. Coppernoll, Coast Artillery, National Guard, Coast Defenses of Key West; Maj. William G. White, Coast Artillery, National Guard, Coast Defenses of Tampa; Capt. Merritt B. Huntley, Coast Artillery, National Guard, Coast Defenses of Pensacola; Capt. George R. Wilbur, Coast Artillery, National Guard, Coast Defenses of the Cape Fear.

SUPPLEMENTAL ORDER ESTABLISHING MINIMUM WAGE SCALE FOR ALL U. S. RAILROAD MAINTENANCE OF WAY EMPLOYEES

The United States Railroad Administration issues the following:

WASHINGTON, D. C.,
September 1, 1918.

Supplement No. 8 to General Order No. 27.

Effective September 1, 1918, superseding General Order 27, and in lieu thereof as to the employees herein named, the following rates of pay and rules for overtime and working conditions for all employees in the maintenance of way department (except mechanics and helpers where provided for in Supplement No. 4, General Order No. 27, and clerical forces) upon railroads under Federal control are hereby ordered:

ARTICLE 1.

RATES OF PAY.

(a) For all building, bridge, painter, signal and construction, mason and concrete, water supply, maintainer, and plumber foremen, establish a basic minimum rate of $90 per month, and to this basic minimum rate and all rates of $90 per month and above in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $115 per month.

(b) For all assistant building, bridge, painter, signal and construction, mason and concrete water supply, maintainer, and plumber foremen, and for coal wharf, coal chute, and fence gang foremen, pile driver, ditching and hoisting engineers, and bridge inspectors, establish a basic minimum rate of $80 per month, and to this basic minimum rate and all rates of $80 per month and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $105 per month.

(c) For all track foremen establish a basic minimum rate of $75 per month, and to this basic minimum rate and all rates of $75 per month and above in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $100 per month.

(d) Rates of pay for all assistant track foremen will be 5 cents per hour in excess of the rate paid laborers whom they supervise.

(e) For all mechanics in the maintenance of way and bridge and building departments, where not provided for in Supplement No. 4 to General Order No. 27, who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 40 cents per hour, establish a basic minimum rate of 40 cents per hour, and to this basic minimum rate and all rates of 40 cents per hour and above add 13 cents per hour, establishing a minimum rate of 53 cents per hour.

(f) For helpers to all mechanics in the maintenance of way and bridge and building departments, where not provided for in Supplement No. 4 to General Order No. 27, who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 30 cents per hour, establish a basic minimum rate of 30 cents per hour, and to this basic minimum rate and all hourly rates of 30 cents per hour and above add 13 cents per hour, establishing a minimum rate of 43 cents per hour.

(g) For track laborers and all other classes of maintenance of way labor not herein named, who on January 1, 1918, prior to the application of General Order No. 27, were receiving less than 16 cents per hour, establish a basic minimum rate of 16 cents per hour, and to this basic minimum rate and all hourly rates of 16 cents per hour and above add 12 cents per hour, establishing a minimum rate of 28 cents per hour, provided that the maximum shall not exceed 40 cents per hour.

(h) For drawbridge tenders and assistants, pile driver, ditching and hoisting firemen, pumper engineers and pumpers, crossing watchmen or flagmen, lamplighters and tenders, add to the rate in effect as of January 1, 1918, prior to the application of General Order No. 27, $25 per month.

(i) The wages for new positions shall be in conformity with the wages for positions of similar kind or class in department where created.

ARTICLE II.

MONTHLY, WEEKLY, OR DAILY RATES.

For all monthly, weekly, or daily rated employees in the departments herein referred to, and not otherwise provided for, increase the rates in effect as of January 1, 1918, prior to the application of General Order No. 27 on the basis of $25 per month.

ARTICLE III.

MAXIMUM MONTHLY RATE.

No part of the increases herein specified shall be applied to establish a salary in excess of $250 per month.

ARTICLE IV.

PRESERVATION OF RATES.

(a) The minimum rates, and all rates in excess thereof, as herein established, and higher rates which have been authorized since January 1, 1918, except by General Order No. 27, shall be preserved.

(b) Employees temporarily or permanently assigned to higher rated positions shall receive the higher rates while occupying such positions; employees temporarily assigned to lower rated positions shall not have their rates reduced.

ARTICLE V.

EXCEPTION.

The provisions of this order will not apply in cases where amounts less than $30 per month are paid to individuals for special service which only takes a portion of their time from outside employment or business.

ARTICLE VI.

HOURS OF SERVICE.

Eight consecutive hours, exclusive of the meal period, shall constitute a day's work.

ARTICLE VII.

OVERTIME AND CALLS.

(a) Where there is no existing agreement or practice more favorable to the employees, overtime shall be computed for the ninth and tenth hour of continuous service pro rata on the actual minute basis, and thereafter at the rate of time and one-half time. Even hours will be paid for at the end of each pay period; fractions thereof will be carried forward.

(b) When notified or called to work outside of established hours, employees will be paid a minimum allowance of three hours.

(c) Employees will not be required to suspend work during regular hours to absorb overtime.

ARTICLE VIII.

PROMOTION AND SENIORITY RIGHTS.

(a) Promotions shall be based on ability, merit, and seniority. Ability and merit being sufficient, seniority shall prevail. The management shall be the judge, subject to an appeal as provided for in Article IX.

(b) The seniority rights of laborers, as such, will be restricted to their gangs, except where gang is abolished they may displace laborers in other gangs, who are junior in service.

(c) Except as provided for in section (b) of this article, the seniority rights of employees referred to herein—to (1) new positions; (2) vacancies—will be governed by section (a) of this article, and will be restricted to the maintenance division upon which employed.

(d) Employees declining promotion shall not lose their seniority.

(e) Employees accepting promotion will be allowed 30 days in which to qualify, and failing, will be returned to former position without loss of seniority.

(f) New positions or vacancies will be promptly bulletined for a period of 5 days at the tool house or in the department where they occur. Employees desiring such positions will file their applications with the designated official within that time and the appointment will be made within 10 days thereafter. Such position or vacancy may be filled temporarily pending assignment. The name of the appointee will immediately thereafter be posted where the position or vacancy was bulletined.

(g) In reducing forces, seniority shall govern; foremen will displace other foremen who are their junior in service before displacing laborers. When forces are increased, employees will be returned to the service and positions formerly occupied in the order of their seniority. Employees desiring to avail themselves of this rule must file their names and addresses with the proper official. Employees failing to report for duty or to give satisfactory reason for not doing so within seven days from date of notification will be considered out of the service.

(h) Employees furloughed for six months or less will retain their seniority.

(i) A seniority roster of all employees in each classified department, showing name, date of entering the service, and date of promotion, will be posted in a conspicuous accessible place in each roadmaster's or supervisor's office. The names of laborers who have been in the service

(Continued on page 13.)

Differentials Announced Based on Cotton Prices as Agreed Between Manufacturers and the War Industries Committee

The War Industries Board authorizes the following:

In accordance with the agreement between the representatives of the cotton-manufacturing industry and the price-fixing committee July 1, 1918, these differentials based on the prices then agreed to have been fixed by the price-fixing committee to remain in effect until October 1, 1918.

Statement by the Committee.

In connection with the announcement of differentials the committee states:

"In accordance with the agreement between the representatives of the cotton-manufacturing industry and the price-fixing committee, various differentials based on the fundamental prices then agreed on have been established and published. It is believed that enough representative fabrics have been so priced to make it entirely possible and feasible for the industry itself to establish prices on fabrics varying slightly from these representative numbers, such variants to be priced in complete harmony with the spirit of the agreement of July 1, 1918. Such variants may be reviewed and modified by the price-fixing committee if this course of action seems advisable."

SPECIAL PONGEE FABRIC.

Special pongee fabric, made from 1½-inch cotton, 38-inch width, 60 by 72 sley and pick, 4.85 yards per pound, 18½ cents per yard.

SINGLE YARN VENETIANS.

Forty-one cents on N–120, 35 inches, 156 by 64, 31.8, 30/1, all combed rev. twist warp; 33/1, all combed filling.

Forty-three and one-half cents on N–261, 35 inches, 156 by 64, 2.85, 30/1, all combed rev. twist warp; 23/1, all combed filling.

Forty-four cents on P–322, 38 inches, 156 by 64, 2.90, 30/1, all combed rev. twist warp; 33/1, all combed filling.

Forty-six and three-fourths cents on P–324, 38 inches, 156 by 64, 2.63, 30/1, all combed rev. twist warp; 23/1, all combed filling.

SEINE AND SAIL TWINE.

For United States standard seine twine in standard skeins, packed in bulk or in 5-pound or 10-pound pads, 100-pound bales, basis Nos. 15 to 42 medium laid, 62 cents per pound.

Differentials on other sizes and lays, as at present established.

Extras: For winding in 8-ounce or heavier balls, in bulk, 1 cent above price of skeins.

For winding on 1-pound or heavier tubes, in bulk, 1 cent above price of skeins.

For winding in 4-ounce balls, in bulk, 2 cents above price of skeins.

For winding in 2-ounce to 3-ounce balls, in bulk, 4 cents above price of skeins.

For packing tubes or balls in 5 pounds or 10 pounds, 2 cents above price for bulk packing muslin sacks.

Exact weight skeins, 4 ounces or heavier, 2 cents above price of regular skeins.

For export packing, 1 cent above price of regular packing.

For broken packages of lots of less than 100 pounds of a size, 2 cents above price of standard packing.

Sail twine, made on Brownell or Haskell-Dawes twisters, 8-ply and up, on cones or tubes or in 8-ounce balls, in bulk, 63 cents per pound.

Four-ounce balls, in bulk, 1 cent per pound above 8-ounce balls.

Balls in 5-pound or 10-pound muslin sacks, 100-pound bales, 2 cents per pound above bulk packing.

Export packing, 1 cent per pound extra.

Broken packages, 2 cents per pound extra.

Hose cord, made of 12s yarn, Brownell or Haskell-Dawes twisters, 64 cents per pound.

Terms: No allowance for cones or tubes; net cash f. o. b. mill. Seller to pay cost of selling.

DENIMS.

Division No. 1: Standard, Otis No. 3, 2.20 white-back denim, indigo. Price suggested, $0.3750 per yard; terms, 2/10, 60 days' dating, delivery at mill, no freight allowance (which figures net to the mill $0.3638 per yard). Comprising this division are all white-back indigo blue denims. Differentials suggested as follows: 9-ounce, 1 cent pound less than 2.20; 8-ounce, 1 cent pound less than 2.20; 2.40/2.50, inclusive, 1½ cents pound more than 2.20; 2.55/2.75, inclusive, 3 cents pound more than 2.20; 3 and lighter, 4 cents pound more than 2.20.

Division No. 2: Standard, Everett 2.45 denim, indigo. Price suggested, $0.33⅜ per yard; terms, 2/10, 60 days' dating, delivery at mill, no freight allowance (which figures net to mill $0.32617). Comprising this division are all double-and-twist construction denims.

Division No. 3: Standard, proximity $31, 2.40, double-and-twist indigo denim. Price suggested, $0.3350 per yard. Terms, 2/10, 60 days' dating, delivery at mill, no freight allowance (which figures net to the mill $0.3250 per yard. Differentials suggested as follows: 2.60/2.65, inclusive, 2 cents pound more than 2.40; 2.70/2.80, inclusive, 3 cents pound more than 2.40; 3 and lighter, 4 cents pound more than 2.40.

Brown denims: Recommendation is that 2 cents per pound more be paid for brown denims than indigo denims, in all corresponding weights.

Aniline denims: Recommendation is that price be 2 cents per pound less than indigo denims, in all corresponding weights.

HEAVY CHAMBRAYS, CHEVIOTS, COTTON PLAIDS, AND KINDRED COLORED FABRICS.

Class 1: Lakewood, 25-inch, 6.10 plaids, at 15/12 cents; terms, 2/10-60 extra, delivery at mill, no freight (which figures net to mill, $0.1503½).

Class 2: Riverside, 27-inch, 4.60 plaids, at 20½ cents; terms, 2/10-60 extra, delivery at mill, no freight (which figures net to mill $0.1988½).

Class 3: Pilot junior shirting, 28-inch, 4.30 Chambrays, at 22 cents; terms, 2/10-60 extra, delivery at mill, no freight (which figures net to mill, $0.2134).

Class 4: Massachusetts [illegible] suitings, at 29 cents; terms, 2/10-60, delivery at mill, no freight (which figures net to mill $0.2813).

Class 5: Otis indigo checks, 30-inch, 3.50 checks at 28 cents; terms, 2/10-60 extra, delivery at mill, no freight (which figures net to mill $0.2716).

Class 6: Massachusetts K. E. C., 32-inch, 3.10 shirting, at 31 cents; terms, 2/10-60 extra, delivery at mill, no freight (which figures net to mill $0.3007).

WAGE SCALE FOR RAILROAD EMPLOYEES

(Continued from page 11.)

at least six months prior to date roster is posted or revised will be shown, with their relative standing and the date they entered the service.

(j) The roster will be revised and posted in January of each year, and shall be open to correction for a period of 60 days after date posted on presentation of proof of error by an employee or representative. A copy will be furnished to each foreman or duly accredited representative upon request.

ARTICLE IX.

DISCIPLINE AND GRIEVANCES.

(a) An employee disciplined, or who considers himself unjustly treated, shall have a fair and impartial hearing, provided written request is presented to his immediate superior within five days of date of advice of discipline, and the hearing shall be granted within five days thereafter.

(b) A decision will be rendered within seven days after completion of hearing. If an appeal is taken it must be filed with the next higher official and a copy furnished the official whose decision is appealed within five days after date of decision. The hearing and decision on the appeal shall be governed by the time limits of the preceding section.

(c) At the hearing, or on the appeal, the employee may be assisted by a committee of employees or by one or more duly accredited representatives.

(d) The right of appeal by employees or representatives, in regular order of succession and in the manner prescribed, up to and inclusive of the highest official designated by the railroad to whom appeals may be made, is hereby established.

(e) An employee on request will be given a letter stating the cause of discipline. A transcript of the evidence taken at the investigation or on the appeal will be furnished on request to the employee or representative.

(f) If the final decision decrees that charges against employee were not sustained the record shall be cleared of the charge; if suspended or dismissed, the employee shall be returned to former position and paid for all time lost.

(g) Committees of employees shall be granted leave of absence and free transportation for the adjustment of differences between the railroad and the employee.

ARTICLE X.

GENERAL RULES.

(a) For main line, branch line, and yard section men the day's work will start and end at point designated to report for duty at their respective sections or yards.

(b) Employees taken from their regular assignment or outfit to work temporarily elsewhere will be furnished with board and lodging at the railroad's expense.

(c) Unless they so desire, except in emergency, employees shall not be transferred from one division to another.

ARTICLE XI.

RULES FOR APPLICATION OF THIS ORDER.

(a) It is not the intention of this order to change the number of days per month for monthly paid employees. The increases per month provided for herein shall apply to the same number of days per month which were worked as of January 1, 1918.

(b) The pay of female employees, for the same class of work, shall be the same as that of men, and their working conditions must be healthful and fitted to their needs. The laws enacted for the government of their employment must be observed.

ARTICLE XII.

INTERPRETATION OF THIS ORDER.

The rates of pay and rules herein established shall be incorporated into existing agreements, and into agreements which may be reached in the future, on the several railroads, and should differences arise between the management and the employees of any of the railroads as to such incorporation, intent or application of this order prior to the creation of additional railway boards of adjustment, such questions of difference shall be referred to the director of the division of labor for decision, when properly presented, subject always to review by the Director General.

Agreements or practices except as changed by this order remain in effect.

W. G. McADOO,
Director General of Railroads.

THREE APPOINTED CAPTAINS.

Special Orders, No. 210:

418. The appointments of the following-named Signal Corps officers in the Signal Corps, United States Army, during the existing emergency, with rank from September 4, 1918, are announced:

To be Captains—First Lieuts. Ralph H. Wingert, Lewis P. Bransford, jr., George B. Howe, and Richard J. Walters.

You can't eat your sugar and give it to the soldiers, too.

Order On Disposition of Inter-Road Freight Claims For Loss and Damage

The United States Railroad Administration issues the following:

WASHINGTON, *August 28, 1918.*

General Order No. 41.—Regulations Governing Disposition of Inter-Road Freight Claims for Loss and Damage.

The following regulations will govern carriers under Federal control in investigating, paying, and accounting for freight claims for loss and damage arising during Federal control. They will not affect the distribution of settlements involving any road not under Federal control, nor the distribution of claims clearly applicable to the period prior to Federal control.

1. Presentation of claims: Effective September 1, 1918, claims for loss of or damage to freight shall, except as modified in this paragraph, be presented to and settled by the destination or initial carrier. Claims filed with an intermediate carrier, through error, shall be immediately transmitted to the destination carrier and claimant so advised. An intermediate carrier clearly at fault may invite and adjust claims direct. Claims for fire or marine losses shall be referred for adjustment to the carrier responsible and claimant so advised.

2. Papers necessary to support claims: Claims for loss of or damage to freight shall be made on the standard forms approved by the Interstate Commerce Commission. In the case of loss or damage they shall be supported by original bill of lading, if not previously surrendered to carrier, original paid freight receipt, if issued, original or certified copy of invoice of value, and all obtainable facts in proof of such loss or damage and the value thereof. If any necessary document is lost or destroyed, claimant shall file a bond of indemnity to cover.

3. Method of adjustment: The foregoing provisions having been complied with, loss and damage claims shall be adjusted with the claimant in accordance with the established legal liability, bill of lading, tariff provisions, and Federal regulations, by the carrier to which presented for the account of and without reference to the other carriers interested in the haul, before the completion of other investigations necessary for the purpose of locating responsibility or apportioning the amount paid.

4. Car seal records: Investigation for development of car seal records in connection with the apportionment of claims between carriers shall be discontinued.

5. Loss or damage definitely located: Claims for loss or damage definitely located, the legal liability for which has been established and payment made, shall be charged direct to carrier or carriers responsible therefor.

6. Loss or damage unlocated: Claims for unlocated loss or damage, the legal liability for which has been established and payment made, shall be apportioned to interested carriers on mileage basis, with minimum of 10 miles for any carrier.

7. Claims involving litigation: Law expenses, including court costs, incurred in connection with the defense of an action where recovery is had, shall be apportioned among the carriers involved on the same basis as the claim. In the event there is no recovery the law expenses shall be apportioned between the carriers interested on a mileage basis, minimum 10 miles for any carrier, and subject to paragraph 8, minimum debits.

8. Minimum debits: Except as provided in paragraph 5 hereof, the entire amount of any individual loss and damage claim shall be absorbed by the settling carrier, unless the amount chargeable against all other carriers under Federal control in interest exceeds $5. Proportions less than $1 against any one carrier shall, however, be absorbed by the settling carrier.

9. Settlement between carriers: On or before the 10th day of each month paying carrier shall render a statement of amount due from each debtor carrier showing thereon the claim number, points between which shipment moved over debtor line, waybill reference and date, commodity, nature of claim, and amount. The total amount of such statement shall be accepted by debtor carrier as final, except if it be found that an amount was included in statement in error, or a manifest clerical error, adjustment shall be made therefor in the subsequent statement, as prescribed in General Order No. 30. Manifest errors in claim payments should be brought to the attention of the debiting carrier.

10. Monthly statements: Separate monthly statements shall be rendered for liabilities which were incurred prior to January 1, 1918, and for liabilities which were incurred subsequent to December 31, 1917. In no case shall a single statement include both prior and subsequent liabilities. Such statements rendered against debit carriers should be forwarded through the proper accounting officer of the carrier by whom they are prepared.

11. Method of payment: Loss and damage freight claims shall be audited and paid on regularly audited vouchers in same manner as other operating expenses are vouchered. Such vouchers shall be approved for audit by the freight claim agent, and for payment by or under the direction of the officer designated to approve vouchers for payment. Provided, however, loss and damage freight claims may be paid by drafts drawn upon the Federal or local Federal treasurer having jurisdiction within the same limitations which are now in effect and authorized by the officer in charge of such authorization.

12. Custody of claim papers: Claim papers shall remain in possession of paying carrier, except that where individual claims are charged in full to another carrier, the papers may be sent to such carrier upon request. When documents supporting either paid or unpaid claims leave possession of carrier, they shall be plainly stamped with carrier's name and claim number.

13. Notations of exceptions on waybills: Loss or damage discovered at any point in transit shall be specifically noted on face of waybill, dated and signed in name of agent, conductor, or other authorized employee, giving name of carrier responsible, or point where discovered if responsibility is located.

14. Noting exceptions on paid freight receipts: Agents delivering freight to consignee, when shortage or damage is known to exist, shall make specific notation of extent and nature of the loss or damage on face of original paid freight bill and sign and date such notation in ink. When freight bears external evidence of pilfrey or damage at time of delivery a joint inspection with consignee or his representative shall, when practicable, be made at the delivery station and receipt taken in accordance therewith. Claim for value of freight checking short at destination shall not be paid until inquiry has been made of delivering agent and consignee to ascertain if shortage has since arrived or reached consignee through any source.

15. Delivery of astray freight: Astray freight (freight marked with name and address of consignee, but separated from regular revenue waybill) shall be immediately forwarded to marked destination on standard form of waybill, without charges (copy by mail to destination agent) and such waybill shall bear the notation "Astray freight—Deliver only on presentation of original bill of lading or original paid freight receipt or other proof of ownership." Destination agent receiving astray freight shall immediately notify consignee to whom marked, and if regular revenue waybill is not received, delivery shall be made on presentation of proof of ownership prescribed and collection of tariff charges from point where shipment originated. Special efforts should be made to establish the ownership of perishable freight in order to insure prompt delivery.

16. Freight Claim Association rules: Rules prescribed by the Freight Claim Association, except such as conflict with the regulations herein provided, shall govern all carriers under Federal control until otherwise ordered.

W. G. MCADOO,
Director General of Railroads.

SERIES OF WAR LECTURES.

A series of lectures illustrated with slides on the various war activities of the United States up to this time is being prepared by George F. Zook, professor of modern European history, Pennsylvania State College. The cantonments, airplanes, the Navy, shipbuilding, the trenches, and many other features of the war are described in an interesting and instructive way. The lectures will be especially useful for the work of teachers, Y. M. C. A. secretaries, and club officials.

Each lecture is accompanied by from 45 to 65 slides. The slides are of excellent workmanship and will be sold at the nominal price of 15 cents each. The lectures and slides will be available for use about October 1. For further information address the Division of Civic and Educational Publications, Committee on Public Information, Washington, D. C.

DIRECTOR M'ADOO ANNOUNCES DECISIONS ON CERTAIN POINTS RAISED BY COUNSEL CONCERNING RAILROAD CONTRACT FORM

Director General of Railroads McAdoo issues the following:

WASHINGTON, D. C.,
September 5, 1918.

A number of questions involved in the negotiations for a standard form of contract have been submitted for my personal decision by counsel representing the railroads, and also counsel for the National Association of Owners of Railroad Securities. I have given careful consideration to the oral and printed arguments made in support of these contentions.

(1) It is insisted that section 1 of the contract should be amended so as to give an appeal from the Interstate Commerce Commission to the Court of Claims as to all of the matters which by the terms of the contract are referred to the commission for decision. There are a number of matters purely administrative as to which an appeal ought not to be considered, and as to which the contention of counsel can not be sustained.

The Federal Control Act.

It is provided in the Federal control act (sec. 6) that any loss claimed by reason of additions, betterments, or road extentions, or constructed pursuant to said section, may be determined by agreement between the President and such carrier failing such agreement, the amount of such loss shall be ascertained as provided in section 3 hereof.

As to all such matters, the contention of counsel is sustained, and provision will be made in the contract providing for an appeal to the Court of Claims. As to the other matters in the contract referred to the Interstate Commerce Commission for decision, the contention is disallowed.

(2) The contract as drawn provided that each carrier should turn over to the Director General a working capital which had been tentatively agreed upon as representing the expenses of the carrier for one month without interest. It was insisted that this provision should be stricken out; and that no working capital as such should be insisted upon, and that such balances as came over to the Railroad Administration from any carrier should bear interest at the average rate received by the company during the year 1917, or its daily cash balances in bank.

Counsel's Contention Sustained.

There is great force in the contention that the carriers should provide a working capital, but I have decided to waive this and sustain the contention of counsel, and the contract has been directed changed accordingly.

(3) The acceptance clause.—Counsel have insisted, especially the counsel representing the Association of Security Holders, that the acceptance clause of the contract, whereby it required that all loss and damage to the business or traffic by reason of the diversion thereof or otherwise which has been or may be caused by the taking over or the possession, use, control, or operation of the carriers, was unjust to the carriers, and should be stricken out; that the carriers should have the right now or at the end of the Federal control: (a) To sue for the loss of good will, loss of business, diversion of traffic, or loss of corporate organization; or (b) that if the road should not be returned to the carriers as now contemplated by the Federal control act, the effect of the acceptance clause, as now written, would be to deprive the carriers of the right to claim damages by reason of said items.

Terms of the Act.

This presents the question as to whether the compensation provided to be paid by the Federal control act is intended to be inclusive and exclusive. By the terms of the act of 1916 the President was authorized to take over the railroads for war purposes, to use the same as a unified system of transportation, to divert traffic, and to make such use of the railroads as the war situation required.

The Federal control act not only contemplates the same use, but definitely contemplates a unified control and use of the railroads as one great system of transportation. There can, in my judgment, be no doubt but that the methods provided in said act for compensation—that is, by agreement if an agreement can be made, if not by the decision of the Court of Claims—was intended to embrace all of the damage which the owners have a right to claim. This was the view of the general counsel of the Railroad Administration and of all of my advisers; but the question was pressed upon me so strenuously that it seemed wise to refer it to the Attorney General for an opinion, and an opinion was received, written by the Solicitor General, as follows:

"The contention made by counsel for the security holders as to paragraph (a), section 3, should be rejected. They are not entitled to have the contract so framed as to leave them after the acceptance of the agreed compensation with a right of action for further damages based upon the loss of good will and the division or diversion of traffic.

Contention is Rejected.

"Unquestionably the just compensation which the statute provides is intended to cover these as well as all other elements of loss and damage."

The contention, therefore, must be rejected.

(4) It was also contended that the Director General should pay to the carriers a sufficient sum from operating expenses during Federal control to pay the corporate expenses of the carriers. I gave careful consideration to this subject some months ago and reached the conclusion, to which I still adhere, that this contention is unsound and must be rejected.

(5) It was insisted that paragraph (b) of section 5 should be stricken out. This provides that the Director General may expend and charge to the carriers a sufficient sum to make such deferred maintenance as may be necessary to make the operation of the carrier safe, assuming a use of the road similar to the use during the test period, and not substantially enhancing the cost of maintenance over the normal standard of maintenance of railroads of like character and business during said period.

Not Open to Dispute.

It does not seem to me open to dispute that the power to make deferred maintenance is a necessary power and is one which the statute contemplates may be exercised, and the contention should, therefore, be rejected.

(6) It was contended that section 7, providing for compensation, should be so amended that the power to deduct from the amount of compensation provided in the contract to be paid the carrier should not be exercised for deferred maintenance, additions, and betterments, or road extensions.

I have given very careful consideration to the arguments and have decided to provide in the contract that the power of deduction will not be exercised so as to prevent the payment of interest where interest was regularly paid during the three-year period, or to provide sum sufficient to support the corporate organization, to keep up the sinking funds of the carriers required by contracts in force December 31, 1917, to pay taxes and other sums necessary for the payment of rents for leased, operated, or controlled roads; nor shall such deduction be made in respect of additions and betterments which are for war purposes and not for the normal development of the company; nor in respect of road extensions.

Substantially Granted.

This substantially grants the contention of the carriers and the security holders except to the extent that they request that such power of deduction be not insisted upon when its exercise would interfere with the payment of dividends regularly paid during the three-year period. I must deny this portion of the request, because if I should accede to it the result would be that railroad companies would be permitted to pay improvident dividends when the funds so used ought to be employed in taking care of deferred maintenance and in payment of their just debts to the Government. This ruling need not operate to embarrass any company which has paid dividends on a provident basis and has retained and does retain, as it is recognized all well-regulated companies should retain, a substantial surplus of its income to provide a margin of credit and cover unproductive improvements. In every such case the company will be in position to provide for deferred maintenance, if any, and to make reasonable provision for reimbursing the Government, and there need be no interference with the company's dividends as regularly paid during the test period.

Amounts to Be Added.

(7) It was also insisted that in determining the amount to be added to the compensation of the carriers upon the cost of any additions and betterments less retirements provided for by section 4 of the Federal control act, the rate of interest to be allowed should be at least sufficient to offset the cost to the carrier of money borrowed where the money is ad-

(Continued on page 16.)

BUSINESS CONCERNS TO WHICH THE WEBB EXPORT ACT APPLIES

The Department of Commerce has been asked by different firms as to whether the provisions of the act of April 10, 1918, entitled "An act to promote export trade, and for other purposes" (the Webb bill), applies to associations engaged in trade between our mainland and our overseas possessions, such as the Philippines, Porto Rico, Hawaii, Alaska, etc., or to associations engaged in import trade.

Opinion by Solicitor.

The solicitor of the department has given the following opinion on this question:

"Section 1 of the act referred to defines the term export trade so as to make it applicable to trade between the States and the Territorial possessions of the United States on the one side and foreign countries on the other.

"Section 2, in effect, withdraws from the operation of the act of July 2, 1890 (26 Stat., 209), all associations engaged solely in export trade, provided that neither such export trade nor any agreement or contract made in connection therewith shall operate as a restraint upon trade or to enhance or depress prices or to lessen competition in the United States with respect to commodities of the class exported by such associations, respectively. It is to be observed that this section does not withdraw from the operation of the act of July 2, 1890, associations which may be engaged in import trade as well as export trade.

"Section 3 exempts from the prohibitions of the act of October 15, 1914 (38 Stat., 730), forbidding one corporation from acquiring or owning stock or shares in another corporation, associations organized solely for and engaged solely in export trade 'unless the effect of such acquisitions or ownership may be to restrain trade or substantially lessen competition within the United States,' leaving associations organized for or engaged in import trade as well as in export trade still subject to the prohibitions of the act of October 15, 1914. But it is to be observed that that act, by its terms, does not apply to the Philippine Islands.

Section IV of Act.

"Section 4 makes the provisions of the Federal Trade Commission act of September 26, 1914 (38 Stat., 717), with respect to 'unfair methods of competition' apply to unfair methods of competition between competitors in export trades 'even though the acts constituting such unfair methods are done without the territorial jurisdiction of the United States.'

"The net practical effect of these four sections is to free all associations engaged in the 'export trades' as defined in section 1 and not engaged in the import trade from all statutory restraints which may interfere with their competition with those engaged in supplying the markets of the world outside the territorial jurisdiction of the United States, but not from such statutory restraints as may affect their domestic trade or their competition with domestic competitors in the foreign trade.

Reports to Commission.

"Section 5 imposes certain obligations with respect to making reports to the Federal Trade Commission upon those associations which may be entitled to the benefits of sections 2 and 3, and provides that failure to discharge such obligations shall deprive the association so failing of the benefits of the said sections 2 and 3 and subject it to a fine.

"Replying specifically to the questions raised, I have the honor to advise that, in my opinion, the act of April 10, 1918, supra, does not apply to associations whose business may be confined to trade within the United States and its Territorial possessions, such as the Philippines, Porto Rico, Hawaii, and Alaska, nor to associations engaged in the import trade, whether also engaged in the export trade or not."—Commerce Reports.

Rules for Inventors of Railroad Devices Submitting Ideas to U. S. Administration

The United States Railroad Administration, division of operation, issues the following:

WASHINGTON, *September 1, 1918.*

CIRCULAR No. 18.

RULES GOVERNING THE INVESTIGATION AND TESTING OF APPLIANCES OR DEVICES OFFERED FOR USE ON LOCOMOTIVES, CARS, ROADWAY, OR TRACK.

The following rules will govern the submission of devices or inventions to the United States Railroad Administration, for investiagtion:

Any person desiring to submit any apparatus or device to the United States Railroad Administration at Washington for the purpose of having it passed upon and investigated should forward complete specifications and detailed drawings, showing fully and clearly the construction, application, and method of operation of said apparatus or device. The drawings should be made of convenient size for handling and filing, and drawings not larger than 8 by 10½ inches are preferred. Larger drawings or prints must be multiples of this size.

Specifications and Plans.

The specifications and plans should be accompanied by a statement showing the following:

1. Name of appliance or device.
2. Name and address of proprietor.
3. Number and date of United States patent or patents.
4. Purpose of the appliance or device.
5. Brief statement of how the purpose is carried out.
6. General description.
7. Statement of relation to other appliances or devices.
8. Name of railroad or railroads on which use or tried and length of time in use.
9. Name of town, district, or railroad division where used or tried.
10. Name of railroad officers of whom inquiry may be made.

All plans, specifications, drawings, and other descriptions which are furnished for examination, become a part of the United States Railroad Administration's records and may be retained in its files.

When examination has been completed the papers furnished for such examination will not be returned; for that reason original patents, tracings, or other papers of that nature, which may be of particular value to inventors or proprietors, should not be furnished: instead, copies of patents, blue prints, or other descriptive papers of which duplicates can be obtained by the proprietor, should be sent. The United States Railroad Administration can furnish no protection of the inventor's or proprietor's rights in any device submitted; therefore, plans should not be submitted until the rights of the inventor or proprietor are fully protected by patent or otherwise.

Models Not Necessary.

It is not necessary to submit models of devices. If for any reason it is desired to do so, however, models may be furnished, provided the proprietor pays all transportation charges. After examination models will be returned, if the proprietor so requests, but this will also be done at the proprietor's risk and expense; otherwise models may be destroyed. In every case, however, whether or not models are supplied, complete detailed plans and specifications must be furnished; no report will be based on examination of a model alone.

When complete plans of any appliance or device have been furnished they will be placed under examination; after this examination has been completed the person submitting the device will be informed of the results thereof and the conclusions reached.

Arrangements for tests will not be made until an examination of plans discloses the necessity or desirability of conducting a test under service conditions. In case a test is to be made the apparatus must be furnished, installed, and operated without expense to the Government.

Address on Correspondence.

Correspondence regarding matters of this nature which relate to locomotives or cars should be addressed to United States Railroad Administration, Mr. Frank McManamy, assistant director, division of operation, Washington, D. C., and correspondence relating to appliances in connection with roadway and track should be addressed to United States Railroad Administration, Mr. C. A. Morse, assistant director, division of operation, engineering and maintenance, Washington, D. C.

C. R. GRAY,
Director, Division of Operation.

DECISIONS ON R.R. CONTRACT FORM

(Continued from page 15.)

vanced by the company had to be secured from outside loans.

It has seemed to me that this contention should be granted to the extent of providing that the rate of interest to be allowed where the money was advanced by the Director General should be the same rate which the Director General charged the carrier for the money loaned. The contract may be charged accordingly.

Other matters of less moment were discussed. These have been passed upon and the contract as now drafted reflects my final view as to these several matters.

W. G. McADOO.

Official U. S. Bulletin

PUBLISHED DAILY under order of THE PRESIDENT of THE UNITED STATES by COMMITTEE on PUBLIC INFORMATION
GEORGE CREEL, Chairman ★ ★ ★ COMPLETE Record of U. S. GOVERNMENT Activities

VOL. 2 WASHINGTON, THURSDAY, SEPTEMBER 19, 1918. No. 416

DANISH-AMERICAN TRADE AND SHIPPING AGREEMENT SUCCESSFULLY CONCLUDED BY AUTHORIZED OFFICIALS

NO EXPORTS TO THE CENTRAL POWERS

Conventions Signed Here By War Trade Board and Special Danish Mission. Annual Quantities of Supplies Allotted to Denmark, Under the Agreement, Set Forth.

Danish-American commercial and shipping agreements, which have been the subject of negotiation between the War Trade Board and a special Danish mission in Washington for some time past, were concluded successfully and signed here last night. The agreements, which follow the same general lines as those earlier concluded with the two other Scandinavian powers, assure to Denmark a supply of various foodstuffs, metals, machinery, textiles, nonedible animal and vegetable products, chemicals, drugs and other commodities required for its needs in an aggregate quantity of well over 352,000 tons annually.

Tonnage for Denmark.

Pursuant to the agreement a number of vessels sufficient to carry the enumerated commodities home to Denmark will be placed at the disposal of Denmark out of the tonnage which at present is employed in overseas trade.

The rest of the Danish tonnage in overseas trade will remain at the disposal of the United States and associated powers.

No articles imported into Denmark under the provisions of the agreement are to be directly or indirectly exported from Denmark to the central powers nor to any neutral country where such exportation will directly or indirectly serve to release for export to Germany or her allies any article or commodity of whatever origin. Nor shall commodities which the United States or its associates in the war furnish Denmark be used in the production of any commodity to be exported to the central powers. In return for the facilities for such supplies the agreement provides for a restriction and distribution of exports of food products to the central powers and our European associates along

Important Changes in Import Rules Governing Invoice Certification of Shipments by American Consuls

ARMY DEATH RATE FOR DISEASE ONLY 2.18 PER 1,000 ANNUALLY

Figures for Past Two Months Show That Troops at Home and Overseas Are in Good Health.

The War Department authorizes the following statement from the Office of the Surgeon General:

American troops both here and overseas continue to establish good health records. For the two months' period ending August 31 the combined reports of the American Expeditionary Forces and all troops stationed in the United States show an annual death rate for disease of 2.18 per 1,000—a fraction more than 2 men per 1,000 per year. The annual death rate for disease of men of military age in civil life is 6.7 per 1,000.

The combined reports show that generally the health of the soldiers overseas is better than that shown by the men in training in this country. This is largely due to the fact that only men in the best physical condition are being sent to France, with the result that the reports of the troops in America carry the men unfit for overseas duty.

During the month of August remarkably low figures for all troops were set. The death rate for disease for August 16 and 23 was 1.73 per 1,000. The lowest rate reached in the United States during the two months' period was 2.12 per 1,000 for the week ended July 26.

Contracts are Awarded For War Workers' Houses

The Department of Labor authorizes the following:

The Bureau of Industrial Housing and Transportation announces the following awards of contracts:

Hammond, Ind.—To Wells Bros. Construction Co. for the erection of 119 houses providing accommodations for 174 families.

Bath, Me.—To Leighton-Mitchel Co. for the erection of 78 houses providing accommodations for 90 families.

Philadelphia.—To Roydhouse-Arey Co. for 710 houses.

Seven Pines, Va.—To Owens-Ames-Kimball Co. for the erection of 129 houses.

LICENSE NUMBER I VALID

Consular Officers Not to Accept It From Shipper After October 1—New Forms for Import Licenses Soon to Be Available, the War Trade Board Announces—List of Outstanding General Licenses.

The War Trade Board announces in a new ruling (W. T. B. R. 234) certain important changes, to which careful attention of all importers is directed, in War Trade Board Ruling No. 111, governing the certification by American consular officers of invoices covering shipments. These changes will obviate certain irregularities and misunderstandings which have occurred in the past and facilitate the administration of the import restrictions.

Certifying of Invoices.

American consular officers will certify no invoice for any ocean shipment to be made on or after October 1, 1918, to the United States, except upon request of official notification from the War Trade Board of the issuance of an import license and of the import license number.

Importers are particularly requested to take notice that for the purpose of consulding invoices covering ocean shipments made on or after October 1, 1918, consular officers are not permitted to accept import license numbers furnished them by shippers, as they have heretofore done.

The number of any such import license, together with all necessary information, will, at the request and cost of the applicant for import license, be cabled or mailed by the War Trade Board to the consular officer, whose consular district is designated by the applicant as the district from which the shipment to the United States will be made.

New Forms of Application.

New forms of application for import licenses will soon be available, which will contain a blank to be filled out by the applicant for the purpose of indicating whether the applicant desires official notification of the issuance of the import license and of the number thereof to be sent by cablegram or by mail. The ap-

plicant designates in such blank the appropriate American consular officer. If the applicant is not able to supply the information at the time of the filing of his application, he should do so as soon thereafter as possible, either before or after the issuance of the license. All requests for such official notification made after the filing of the application should be, whether mailed or telegraphed, addressed as follows:

"Bureau of Imports, War Trade Board,
Washington, D. C."

Such request should refer to the application or license number and should designate the appropriate consular officer.

Import licenses will continue to be issued valid for a period of 90 days, but, under the new regulations, import licenses issued on or after October 1, 1918, will be valid if ocean shipments thereunder are made within 90 days from the date of such license. It will no longer be necessary, as in the case of licenses issued prior to October 1, 1918, that entry into the United States be made within the 90 days. This change will be of benefit to shippers and importers who, heretofore, in many cases, have found it difficult to prepare merchandise for shipment, arrange for freight space, and obtain entry into the United States within 90 days.

Licenses Outstanding.

With respect to import licenses which are outstanding and unused on October 1, 1918, if the shipments covered by such licenses have not been consulated by that date and the ocean shipments thereunder will be made on or after October 1, 1918, it will be necessary that official instructions be cabled to the appropriate consular officer at once by the War Trade Board. That there may be no delay in such shipments the holders of such outstanding licenses should immediately notify the War Trade Board that they desire the appropriate American consular officers to be officially notified by the War Trade Board, either by cablegram or letter, of the issuance of such outstanding licenses and of their numbers.

The date of ocean shipment, for purposes of these regulations, will be the date of a through ocean bill of lading to the United States.

Inasmuch as consular officers will be governed, when consulating invoices, by the dates of the licenses and the dates of the through ocean bills of lading, importers are cautioned to keep accurate record of the expiration dates of licenses in order that they make certain that the through ocean bills of lading are issued to them within the 90-day period or, in the event that such through ocean bills of lading are not issued within such period, that they may apply in due time for extensions or new licenses, thus avoiding delays and possible loss. Applications for extensions of expired licenses and for reissuances may be filed and will be disposed of according to the circumstances of each case.

Partial Shipments.

It will be possible, as heretofore, to make partial shipments against a license, providing such shipments are made during the life of the license. All such partial shipments will be governed by the same rules as those that govern complete shipments.

Invoices for shipments of commodities covered by general import licenses, known as "PBF" licenses, will continue to be certified by consular officers under the general license numbers, without official instructions governing each individual shipment, (except that shipments covered by general license PBF No. 1 require no certified invoices.

List of General Licenses.

The following is a list of the outstanding general (or "PBF" import licenses:

PBF No. 1.—Covering the importation from any country of all shipments of unrestricted articles except sugar, wheat and wheat products, where the value of any one commodity in such shipment does not exceed $100; and covering restricted articles of like value when coming from countries and by the means permitted under the terms of the restriction thereon.

PBF No. 2.—Covering all importations into Alaska, Canal Zone, Philippine Islands, Hawaii, Guam, Tutuila, Porto Rico, Virgin Islands, when for consumption in those countries and not for transshipment.

PBF No. 3.—Covering the importation into the United States from Canada and Newfoundland of all articles except those mentioned in the President's import proclamation of November 28, 1917, and except calcium carbide, olive oil, tapioca, sago, peanuts, rabbit skins, toys, manufactures of cotton not produced in Canada, tallow, cocoa beans, feathers, pumice and wheat products. Where commodities are restricted, this general license covers them only when shipped by other than ocean transportation and when they originate in Canada or Newfoundland or in a country from which they would be licensed for importation direct. Shipment from Newfoundland to Canada and thence overland or by lake to the United States is not considered ocean transportation.

Fresh Fruits From Mexico.

PBF. No. 4.—Covering the importation of fresh fruits and fresh vegetables when transported overland from Mexico or overland or by lake from Canada, or by rail from Cuba.

PBF. No. 5.—Covering the importation of goods previously exported from the United States where the value thereof does not exceed $500.

PBF. No. 6.—Covering the importation of personal baggage accompanying a passenger when containing only articles necessary for personal use on his journey.

PBF. No. 7.—Covering the importation of fresh vegetables from Bermuda when shipped on vessels approved by the War Trade Board.

PBF. No. 8.—Covering the importation of fresh fruits, fresh vegetables, preserved fruits, other fruit products, and cheese from Cuba when shipped on vessels approved by the War Trade Board.

PBF. No. 9.—Covering the importation of all empty drums, cylinders, containers, and empty cement bags, American owned, which have been used in the exportation of commodities from the United States.

PBF. No. 10.—Covering the importation of tobacco from Cuba and the West Indies.

PBF. No. 11.—Covering the importation of cotton from Mexico.

PBF. No. 12.—Covering the importation of all commodities of the origin and/or destination specified below which arrive at any port of the United States and/or which are conveyed in transit through the territory of the United States either in bond or otherwise as follows:

(a) Commodities originating in Canada or Newfoundland and destined for any country in the world; or originating in Great Britain, France, or Italy or any of their European or West Indian possessions and destined for Canada or Newfoundland.

(b) Commodities originating in Great Britain, France, or Italy and destined for any West Indian colony, possession or protectorate of said countries, or originating in any of said West Indian colonies, possessions, or protectorates and destined for Great Britain, France, or Italy, except (e) below.

(c) Commodities originating in Canada or Mexico and destined for another point in the same country, passing

NAMES OF PERSONS INDICTED IN DEFECTIVE RAINCOAT CASES

Following is a list of names of manufacturers and others who have been indicted for furnishing defective raincoats for the Government:

C. Kenyon Co.
Bernhard Wolf.
Henry Hede.
Joseph Smolanski and Lewis Friend.
Henry Yellin.
Aubrey W. Vaughan.
Felix Gouled.
David L. Podell.

Indictments under the act of April 20, 1918, for sabotage:

Morris Lesser.
Harry Steuge.
William Sydeman.
Joseph Sydeman.
S. Levinsky Sons Raincoat Co.
Aaron B. Levinsky.
Felix Gouled.
Samuel Joseph.
Samuel Levine.
Tolly Clamon.
Harry E. Lazarus.
Samuel Halpern.
Arthur Zittel.
Yorkshire Mfg. Co.
Ralph Cohen.
William Hanauer.
Ralph Rosenthal.
Louis Fried.
Simon Harris.
Charles Plottel.
Benjamin Plottel.

Indictments for bribery, section 39, U. S. C. C.:

Morris Lesser.
Joseph Sydeman.
Ralph Cohen.
Ralph Rosenthal.
Louis Fried.
Harry E. Lazarus.
Simon Harris.
Samuel Halpern.
Arthur Zittel.
William Sydeman.
Benjamin Plottell.
Tolly Clamon.

Additional indictments found on August 7, 1918, and filed in court August 30, 1918:

Isidore M. Halpern and Henry Yellin.
Patrick Clemon.

NATIONAL TRIUMPH WON IN BIG REGISTRATION OF AMERICA'S MAN POWER, DECLARES GEN. CROWDER

LITERALLY "OVER TOP"

Analysis of Official Returns Show That Practically Every Living Man Within the Ages Responded to the Call, Says Provost Marshal—Total Close to 13,000,000—Credit Given Press and Other Agencies.

The War Department authorizes the following statement by the Provost Marshall General:

On August 31 this office issued an estimate of the total male population due to be registered on September 12, under the act of Congress extending the age limits of the selective-service draft. This estimate, which included totals by States, indicated that the aggregate number of men in the United States subject to registration was 12,778,758. Official returns thus far received indicate that the actual registration for the entire country will be at least 12,870,000.

Little Change Anticipated.

Twenty-two of the returns by States are official final reports; the remainder are official provisional computations from the several State headquarters. Later final returns will bring minor corrections; but there will be no substantial variance from the above figures. On the first day after registration the early reports were so favorable that in some quarters of the press an interpretation was put on them as signifying a probable registration of nearly 14,000,000. This was due to the fact that the States showing a large excess over estimates hastened in their enthusiasm to wire this news promptly, while the States showing figures below estimates delayed for further returns. Any substantial national excess over estimate was, of course, virtually impossible; because the reliable census and actuarial computations signified actual population, and no more men could register than actually existed.

Analysis of Returns.

Analyzing the returns by States the following is shown: Actual excess over population estimates—Colorado, District of Columbia, Indiana, Kansas, Maryland, New Hampshire, New Jersey, Ohio, Oklahoma, Pennsylvania, Rhode Island, Vermont, and West Virginia. Indicated excess—California, Idaho, Kentucky, Maine, Missouri, New York, Oregon, Tennessee, Virginia, and Washington. Actual shortage—Arkansas, Connecticut, Georgia, Iowa, Massachusetts, Michigan, Nebraska, North Carolina, North Dakota, South Carolina, Utah, and Wisconsin. Indicated shortage—Alabama, Illinois, Louisiana, Minnesota, Montana, New Mexico, and Texas. Practically identical with population estimates—Arizona, Delaware, Florida, Mississippi, Nevada, South Dakota, and Wyoming.

As between the several States it is too early to attempt to explain why some exceeded and others fell below the estimates; further careful study of the figures will be required. The great shifting of population through economic influences and war needs will probably prove to be the main cause.

Census Experts' Estimates.

In June, 1917, the census experts' estimate of the national population of ages 21–30 was 10,077,700. The actual registration up to November 12, 1917, was 9,586,508, or more than 400,000 less than the estimated males of those ages due to register. This time the actual registration has slightly bettered the estimates of population.

It is very plain that practically every living man of the new registration ages has come forward. There is no shortage between the number that exist, alive, and the number that registered. This is where we have scored a national triumph.

The estimates as published a month ago were certainly prepared in entire candor and by coldly mathematical methods, with no discount or depreciation whatsoever; we took the figures as furnished us by the actuarial and census experts, the best authorities in the country. They figured the total at about 13,200,000; deducting about 400,000 for men already enlisted and therefore not required to register, there remained some 12,800,000. This was the number that ought to have registered; we frankly announced it; and we were prepared to face the facts if it should turn out that the actual registration fell short of this, and that apparently this country contained a hundred thousand or more men who were too ignorant or too indifferent or too disloyal to record themselves. But, instead of that, we find that the Nation has oversubscribed its own man power. It has literally "gone over the top."

Helped by Publicity.

Credit is largely due to the Committee on Public Information, the Council of National Defense, and the public press, as well as the other officials and private

(Continued on page 5.)

PRESIDENT'S PROCLAMATION FORBIDDING THE USE OF ANY FOODSTUFFS TO PRODUCE MALT LIQUORS AFTER DECEMBER 1, 1918

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Whereas, under and by virtue of an act of Congress entitled "An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel," approved by the President on August 10, 1917, it is provided in section 15, among other things, as follows:

"Whenever the President shall find that limitation, regulation, or prohibition of the use of foods, fruits, food materials, or feeds in the production of malt or vinous liquors for beverage purposes, or that reduction of the alcoholic content of any such malt or vinous liquors, is essential, in order to assure an adequate and continuous supply of food, or that the national security and defense will be subserved thereby, he is authorized, from time to time, to prescribe and give public notice of the extent of the limitation, regulation, prohibition, or reduction so necessitated. Whenever such notice shall have been given and shall remain unrevoked, no person shall, after a reasonable time prescribed in such notice, use any foods, fruits, food materials, or feeds in the production of malt or vinous liquors, or import any such liquors except under license issued by the President and in compliance with rules and regulations determined by him governing the production and importation of such liquors and the alcoholic content thereof."

Now, therefore, I, Woodrow Wilson, President of the United States of America, by virtue of the powers conferred on me by said act of Congress, do hereby find and determine that it is essential, in order to assure an adequate and continuous supply of food, in order to subserve the national security and defense, and because of the increasing requirements of war industries for the fuel productive capacity of the country, the strain upon transportation to serve such industries, and the shortage of labor caused by the necessity of increasing the armed forces of the United States, that the use of sugar, glucose, corn, rice, or any other foods, fruits, food materials, and feeds in the production of malt liquors, including near beer, for beverage purposes be prohibited. And by this proclamation I prescribe and give public notice that on and after October 1, 1918, no person shall use any sugar, glucose, corn, rice, or any other foods, fruits, food materials, or feeds, except malt now already made, and hops, in the production of malt liquors, including near beer, for beverage purposes, whether or not such malt liquors contain alcohol; and on and after December 1, 1918, no person shall use any sugar, glucose, corn, rice, or any other foods, fruits, food materials, or feeds, including malt, in the production of malt liquors, including near beer, for beverage purposes, whether or not such malt liquors contain alcohol.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia, this sixteenth day of September in the year of our Lord one thousand nine hundred and eighteen, and of the independence of the United States of America the one hundred and forty-third.

[SEAL.] WOODROW WILSON.

By the President:

ROBERT LANSING,
Secretary of State.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 10 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

RATES BY MAIL.

Daily—
- One year $5.00
- Six months 3.00
- One year, postage prepaid to foreign countries 8.00
- Six months, postage prepaid to foreign countries 4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

American Official Communique No. 127.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 18, 1918.

Section A.—Aside from artillery activity in Lorraine and in Alsace there is nothing of importance to report from the sectors occupied by our troops.

In the course of a bombing operation in Lorraine our aviators were attacked by superior forces. Five of our machines are missing.

Site for War Industries Board Building Set Aside

EXECUTIVE ORDER.

Pursuant to the powers vested in me I hereby revoke and rescind the Executive order issued July 15, 1918, which authorized the Secretary of Labor, in the construction of buildings in the District of Columbia, to make use of certain premises hereinafter described; and

I hereby authorize the War Industries Board, for the purpose of erecting a temporary office building and maintaining and using the same during the present war emergency, to take possession of squares 229 and 230 of the District of Columbia, such premises being owned by the United States and having not heretofore been dedicated by act of Congress for specific buildings.

WOODROW WILSON.

THE WHITE HOUSE, *September 6, 1918.*

Complete Registration Returns Received From 32 States up to Wednesday Night

The War Department authorizes the following from the office of the Provost Marshal General:

Following are complete State returns on the registration of September 12, received by this office up to 6 o'clock September 18:

Arkansas	187,122
Colorado	122,244
Connecticut	197,426
Delaware	30,033
District of Columbia	52,751
Florida	111,058
Georgia	287,475
Indiana	350,852
Iowa	280,303
Kansas	210,924
Maryland	177,098
Massachusetts	475,6[illegible]
Michigan	451,113
Mississippi	185,105
Nebraska	153,630
Nevada	16,081
New Hampshire	52,618
New Jersey	425,[illegible]
North Carolina	251,608
North Dakota	85,628
Ohio	762,741
Oklahoma	238,148
Pennsylvania	1,149,322
Rhode Island	73,503
South Carolina	157,877
South Dakota	77,607
Tennessee	257,609
Utah	53,224
Vermont	40,887
Virginia	251,053
West Virginia	149,085
Wisconsin	308,871

Complete returns were received to-day from Illinois and Missouri. Illinois showed an actual registration of 846,375 as against an estimate of 859,834. Missouri showed an actual registration of 421,056 as against an estimate of 396,509. The adjutant general of New York reported that his complete report, now being made up, would show a total of 1,357,631 as against an estimate of 1,345,457.

Complete official returns are still lacking from Alabama, Arizona, California, Idaho, Kentucky, Louisiana, Maine, Minnesota, Montana, New Mexico, New York, Oregon, Texas, and Wyoming.

DANISH-AMERICAN TRADE AND SHIPPING PACT CONCLUDED

— (Continued from page 1.)

the lines of existing restrictive agreements.

A feature of the agreement is the encouragement and facilitation of inter-Scandinavian trade, under which a considerable proportion of Denmark's exportable surplus will assist in satisfying the food needs of her neighbors, Norway and Sweden.

The War Trade Board for its part guarantees that export licenses and shipping permits will be granted to Denmark for the export to Denmark of the commodities enumerated in the agreement.

SUPPLIES FOR DENMARK.

The annual quantities (in metric tons) of supplies for Denmark under the general agreement are as follows:

Foodstuffs.

Corn starch	1,000
Rice	4,000
Sago and tapioca and products	3,000
(Above quantities conditional upon no exportation of cereals or cereal products to the central powers)	
Pork casings	300
Cocoanut, desiccated	150
Apricot and peach kernels	100
Other nuts and kernels	500
Glucose	2,00[illegible]
Apples, bananas and citrus fruits	7,000
Dried fruits	3,000
Canned fruits	200
(Fruit exports conditional upon no exports of fruits or berries to the central powers.)	
Coffee	16,000
Tea	600
Cocoa	2,000
Spices, not including cumin	500
Pepper	140
Stearine	600
Total	39,340

Fuels and oils other than edible.

Kerosene, gasoline, lubricating oils and greases, crude petroleum, and dark refuses (including not over 7,000 tons lubricating oils)	80,000
Castor oil (medicinal)	10
Linseed oil	6,000
Paraffine	400
Soaps and powders	400
Total	86,810

Metals, machinery, and instruments.

Copper and manufactures of (including brass)	3,500
Brass wire	34
Brass wire screens for paper making	20
Brass screws	36
Iron and steel products, including shipbuilding material (shipbuilding material to be subject to special agreement)	150,000
Electric lamps	70
Manganese dioxide	600
Nickel and manufactures	14
Antimony	25
Aluminum and manufactures	132
Lead and manufactures	3,000
Tin and tin plate (quantity to be later agreed).	
Zinc sheets	300
Zinc and manufactures	2,700
Silver and manufactures	14
Total	160,445

In addition various instruments for technical, scientific, and nautical purposes (if approved), motors, automobiles and parts (excluding tires), electrical machinery, bicycles, and bicycle parts (excluding tires), typewriters, accounting machines, office equipment supplies, sundry machinery and parts (if approved), hand tools of various kinds, hardware in quantities to be in accordance with actual Danish requirements for home consumption.

Fibers and their products.

Raw cotton and cotton waste	5,000
Cotton thread and yarn	2,000
Cotton manufactures	4,000
Hemp	3,000
Cordage	800
Jute	420
Silk manufactures	200
Binder twine	1,600
Wool shoddy and yarn	1,500
Woolen goods	1,200
Vegetable fibers	1,000
Total	20,720

Nonedible animal and vegetable products.

Cork and manufactures	1,200
Heavy hides	3,000
Leather soles, upper leather, belting, lacquered and dyed leather	800
Boots and shoes	280
Leather goods (manufactured)	200
Crude rubber	130
Bicycle tires	100
Rubber footwear	100
Machine picking	100
Motor and motorcycle covers and tubes	250

— (Continued on page 5.)

WORK OF CONGRESS BRIEFLY TOLD

SENATE.

The Liberty bond tax exemption bill was passed by the Senate yesterday afternoon as reported from the Finance Committee and now goes to conference. The only amendment of importance made in committee to the House bill and adopted by the House was one that eliminated the the provision giving the President power to investigate, regulate or prohibit any transactions in foreign exchange or in bonds or certificates, the export of gold, etc., between the United States and any foreign country.

For the purpose of preparing against a possible shortage in the coal output this coming winter, Senator Myers, of Montana, yesterday introduced a bill prohibiting the sale of intoxicating liquor within 5 miles of any coal mine for a period of 60 days after October 1. It was referred to the Judiciary Committee.

The French Ambassador yesterday, through the State Department in a communication to the Foreign Relations Committee protested against that provision of the war prohibition bill forbidding the import of wines prior to the date upon which the sale of wines in this country is prohibited. Spain, Italy, and Portugal already have protested.

Testimony as to Packers.

Before the Agricultural Committee, Rush C. Butler, of Chicago, chairman of the committee that prepared the report of the Chamber of Commerce of the United States attacking the Federal Trade Commission, yesterday continued his testimony justifying the action of the commerce body. Ed. C. Lasater, a cattle raiser, testified that the charge that the packers had sold unfit meat was true, and submitted affidavits which he contended proved his assertions.

Secretary of Commerce Redfield yesterday sent to the Senate a report on an intracoastal canal system from Boston to Norfolk to relieve the burden on the railroads and recommended that the Government should own and operate such a system. The report recommends that Congress provide for the purchase and improvement of the Cape Cod and Chesapeake and Delaware canals as deep sea level waterways of a minimum depth of 25 feet, and that another canal be cut across the State of New Jersey to connect with the Delaware River. The general plan also would take in the New York State barge canal, thus connecting the Atlantic seaboard with the Great Lakes. The report said the cost of the project would not be disproportionate to the benefits derived as it would "add what the railroads do not now and can not economically provide—a great continuous and efficient through highway of transportation" from New England to the South Atlantic States.

Claude R. Porter was confirmed yesterday as Assistant Attorney General, and John E. Shekell and Edward P. Costigan as members of the United States Tariff Commission.

HOUSE.

Rapid progress was made in consideration of the war revenue bill yesterday.

NATIONAL TRIUMPH SCORED IN BIG DRAFT REGISTRATION

(Continued from page 3.)

citizens, who assisted powerfully and heartily in giving the needful publicity to the registration program. The problem was to make sure that every individual of the millions was reached, and that he was prompted to respond to the call. And the message was carried to every home, every farm, every shop, every factory with such skill, energy, and thoroughness that virtually not a man remains in this country who failed to receive the knowledge of his duty and the inspiration to fulfill it. The personal effort and sacrifice thus contributed by the thousands of individual helpers in this campaign will never be known to the public, but its reward is this success—that gigantic rising of the Nation en masse to sign up for liberty and democracy.

If registration day means anything, it means that this Nation is unanimously in the war to win, and to win it completely, decisively, and forever.

At the close of the session Mr. Kitchin expressed the belief that the measure would be finally passed by to-morrow night. Without objection or amendment the war profits, excess profits, inheritance, beverage, tobacco, capital stock, stamp taxes, and luxury sections were adopted. The section taxing automobiles according to horsepower provoked considerable controversy but it was adopted without change. A number of important amendments were laid aside for consideration to-day, and of these the chief contest probably will come over Representative Moore's proposal to assess a tax of $3 a bale on cotton, and Mr. Green's of Iowa, to impose a 5 per cent tax on all products of child labor.

Gen. March, Chief of Staff, before the appropriations committee explained the estimates that have been submitted calling for 7,000,000,000 to provide for the equipment and maintenance of the new draft army. After all deductions have been made for casualties and rejections, Gen. March told the committee an army of 4,800,000 by July next was what the enlarged American military program called for.

In a letter to Representative Rainey of Illinois, member of the Ways and Means Committee, Food Administration Hoover asked that the war revenue bill be amended to provide for the repeal of existing law imposing a tax of 4 cents a barrel on mixed flour. It is understood that such an amendment will be made before the pending measure is finally disposed of.

The Committee on Public Buildings and Grounds yesterday ordered a favorable report on bills appropriating $1,500,000 for a Government sanitarium at Dawson Springs, Ky., and increasing the appropriations for the Yonkers, N. Y., post-office site from $250,000 to $662,500; that for the Eldorado, Kans., post office from $60,000 to $90,000.

Give our boys in the Army and Navy every fighting chance. Pledge yourself to save to the utmost of your ability and to buy war-savings stamps.

DANISH-AMERICAN TRADE AND SHIPPING PACT IS CONCLUDED

(Continued from page 4.)

Nonedible animal and vegetable products.—Con.	
Other rubber articles and manufactures	[illegible]
Tobacco	5,700
Feathers	760
Various glues and lines	[illegible]
Total	[illegible]
Wood, pulp, paper, plants and seeds.	
Various woods (not including nut, spruce, or mahogany)	[illegible]
Furniture and other approved manufactures in accordance with Danish needs.	
Flower bulbs	740
Timothy and other grass seeds (not including clover seed of any variety)	1,250
Vegetable tanning materials (30 per cent extract)	6,600
Bamboo	[illegible]
Total	8,390
Chemicals, drugs, earth, minerals, and miscellaneous.	
Lime borate	200

Talc	150
Total	24,030

In addition chemicals (if approved), drugs, medicines, and medicinal supplies, including mercury in medicinal form and for medicinal purposes and including instruments, sanitary goods, in quantities to be in accordance with actual Danish requirements for home consumption.

Grand total 352,895

Prices Paid for Foods For the Army in August

The War Department authorizes the following:

Prices paid by the Subsistence Division of the Quartermaster Corps during the month of August for principal articles of subsistence supplies for September requirements were as follows:

Beef, 23¾ cents per pound; ham, 34 cents per pound; bacon, 42 cents per pound; lard, 27 cents per pound, and lard substitute, 27 cents per pound, all f. o. b. Chicago.

Yellow corn meal was purchased at 4.14 cents per pound and white corn meal at 4.11 cents per pound, delivered at camps. Butter (sale prints) 47½ cents per pound, and butter (issue prints), 46 cents per pound, both delivered at camps. Tub butter was bought at 44¼ cents per pound f. o. b. Chicago. Oleomargarine in tubs, 25¾ cents per pound; oleomargarine prints, 26¼ cents per pound, and cheese, 24 cents per pound, all f. o. b. Chicago. The average price paid for potatoes was 2.9 cents per pound, and the price for onions 2.97 cents per pound, f. o. b. destination. Flour was purchased at $5.15 per hundred pounds at the mills, and sugar at $7.35 per 100 pounds at the refineries.

LIST OF CASUALTIES REPORTED AMONG THE UNITED STATES FORCES OVERSEAS

ARMY

SECTION 1, SEPTEMBER 19, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	37
Missing in action	38
Wounded severely	39
Died from wounds	11
Died from aeroplane accident	1
Wounded (degree undetermined)	5
Died of disease	8
Prisoners	3
Total	142

Killed in Action.

Lieut. Leoline O. Crane. Mrs. Ethel Crane, 1001 South High Street, Columbia, Tenn.

Lieut. Willard T. Lusk. James W. Lusk, 50[illegible] Main Avenue, Roswell, N. Mex.

Lieut. Joseph A. Skratt. Mrs. Caroline Skratt, 429 East Ninth Street, New York, N. Y.

Sergt. Thomas E. Lamont. Mrs. Jessie Whitacre, Yuma, Mich.

Sergt. Joseph H. Levoy. Mrs. Ray Levoy, 3694 Broadway, New York, N. Y.

Corpl. Ernest E. Bickford. Jesse Bickford, North English, Iowa.

Corpl. Willard M. Campbell. Mrs. Nora Campbell, R. F. D. No. 1, Morrison, Tenn.

Corpl. John Ruoff. Christian Ruoff, 2212 Clinton Place, Woodhaven, N. Y.

[illegible] Shannon. Michael Shannon, 188 Hampshire Street, Canton, Mass.

Corpl. James T. Valentine. Mrs. Jennie Feeney, 1430 Orange Street, Berwick, Pa.

Corpl. Herbert W. Willman. Julius B. Willman, R. F. D. No. 6, Stillwater, Okla.

Mechanic Ralph W. Wright. George M. Wright, R. F. D. No. 1, Gladwin, Mich.

PRIVATES.

Stanley H. Berry. Mrs. Mary Berry, 187 W[illegible] Street, Philadelphia, Pa.

Lewis E. Daniels. Mrs. Mary M. Daniels, P[illegible], Ohio.

Adam Felter. Mrs. Fannie Felter, Minsk, [illegible], Russia.

Fred Folmer. Tony Folmer, Avondale, Mont.

Fritz W. Galin. Mrs. Amelia Galin, R. F. D. No. 3, Cullman, Ala.

James E. Howell. James P. Howell, Toocle, Utah.

Joseph L. Huntley. George M. Huntley, Rutherfordton, N. C.

[illegible] Mrs. Anna Jerabek, 1290 First Avenue, New York, N. Y.

Emil K. Johnson. Henry Johnson, R. F. D. No. 1, Montevideo, Minn.

J[illegible] Mrs. Mary Juracinski, 1[illegible] Milwaukee, Wis.

[illegible] 1658 Washington Avenue, New York, N. Y.

Felix Kuzbarskis. Beo. Aiduckonis, 418 Tilden Avenue, Utica, N. Y.

[illegible] 1214 [illegible] New York, N. Y.

Att Middleton. Green Middleton, Greenville, Ky.

Erafus I. Nelson. John C. Nelson, R. F. D. No. 1, Leland, N. C.

[illegible] 155 East Sixty-first Street, New York, N. Y.

[illegible] Bellina, 66 Gorock Street, New York, N. Y.

[illegible] Mina.

Martin W. Silber. George Silber, 589 [illegible] N. J.

William J. Slemmer. Mrs. Elizabeth Slemmer, [illegible] Pa.

[illegible] John Marshall Place, Washington, D. C.

Arthur D. Patterson. Andrew J. Patterson, Maudlin, Mont.

Lee Rhoads. John M. Rhoads, Tucumcari, N. Mex.

George Robinson, jr. Mrs. May McConald, Pascagoula, Miss.

Joe Stevens. Mrs. Jane Acles Stevens, R. F. D. No. 1, Carlton, Ga.

Frank P. Wimberly. Eli W. Wimberly, Electric Mills, Miss.

Died from Aeroplane Accident.

Lieut. C. L. Kohlmeier. C. C. Kohlmeier, 1054 Ingraham Street, Los Angeles, Cal.

Wounded Severely.

Maj. Joseph D. Patch. Mrs. Joseph D. Patch, care of Richard King, Wentzville, Mo.

Lieut. Leonard A. Delph. Mrs. Anna Delph, 411 Washington Street, Pottsville, Pa.

Lieut. Roy Ritner Kriechbaum. Mrs. Roy Ritner Kriechbaum, 404 West Queen Street, Chambersburg, Pa.

Sergt. Calvin Valentine. Charles Valentine, Hempstead, N. Y.

Corpl. William P. Farmer. Mrs. Alice Farmer, Blanchardville, Wis.

Corpl. Henry Gass. Mrs. Armanda Gass, R. F. D. No. 2, Reading, Pa.

Corpl. Thomas W. Shiland. Mrs. Mary A. Shiland, Cambridge, N. Y.

Corpl. Roy Tyhurst. William Tyhurst, Annapolis, Ill.

PRIVATES.

William M. Anderson. David L. Anderson, Norton, Va.

Brook C. Bowles. John M. Bowles, Byrnside, W. Va.

Conrad C. Cockerline. Mrs. Elizabeth Cockerline, Estacada, Oreg.

William J. Dalton. Ed Dalton, Browning, Wis.

Daniel Fernimo. Mrs. Lilly Fernimo, 373 Sheldon Street, Hartford, Conn.

Benjamin Fink. Al. Erkenboack, Grant, Mich.

Edward A. Flynn. Mrs. Bridget M. Flynn, 419 Cherry Street, Anaconda, Mont.

James M. Folkner. F. D. Folkner, Pontotoc, Miss.

Iven Gedelman. Mrs. Clara Gedelman, Malvin, Ill.

William M. Heath. Mrs. Ellen Burgess, Altonah, Utah.

Grover C. Henderson. John N. Henderson, Stockton, Mo.

Chester Kath. Fred Kath, 186 Morton Street, Milwaukee, Wis.

Frank Kelly. Mrs. Minnie Perez, 24 Dearborn Street, San Francisco, Cal.

John Joseph Kiely. Miss Mary A. Kiely, 33 West Silver Street, Westfield, Mass.

Thomas L. Knott. Mrs. Fannie Knott, 4832 Winton Road, Cincinnati, Ohio.

George W. Kushner. Mrs. Goldie Levy, 124 Beacon Street, Chelsea, Mass.

Edward J. Light. Mrs. Anna M. Light, 2994 Atlantic Avenue, Brooklyn, N. Y.

Claud T. Looney. William J. Looney, Point Peter, Ga.

Thomas J. McCarthy. Mrs. Scott K. Gray, East Arlington, Vt.

Lester F. McGee. B. A. McGee, Route No. 1, Angier, N. C.

David F. Meile. Ludwig Merkel, Bowdle, S. Dak.

Latney Y. Montague. Mrs. Fairy Montague, 830 Twelfth Street, San Diego, Cal.

John M. O'Connor. Andrew O'Connor, 331 Pearl Street, Keene, N. H.

William G. Porter. W. S. Porter, R. F. D. No. 2, Blanket, Tex.

Juan Portes. E. H. Gepsaian, 1365 L Street, Washington, D. C.

Lewis M. Rose. Hiram F. Rose, Athol, S. Dak.

Carmelo Runco. Vito Runco, 320 East One hundred and second Street, New York, N. Y.

Verney Rutledge. Mrs. Henrietta Rutledge, Fort Springs, W. Va.

Francis E. Shannon. Mrs. Virginia Ellen Ivie, 96 East Street, Annapolis, Md.

Elmer Thompson. Mrs. Ida E. Thompson, 119 Michigan Street, Wellston, Ohio.

John H. Wagner. S. J. Wagner, Arthur, N. Dak.

Wounded (Degree Undetermined).

PRIVATES.

Elmer Banks. Mrs. Miggie Banks, Chesterfield, Ill.

Roy J. Hull. Mrs. Ellen Childers, St. John, Wash.

Konstanty Kapusta. No address given.

Hugh Aloysius McGroarty. Mrs. Kate Rommell, 351 Schenck Avenue, Brooklyn, N. Y.

George I. Myers. Mrs. Mary L. Myers, Oktaha, Okla.

Missing in Action.

Sergt. Louis B. Kindervatter. Henry C. Kindervatter, 84 Main Street, Irvington, N. Y.

Cook Medard William Smith. William H. Smith, 400 South Twenty-first Street, Louisville, Ky.

PRIVATES.

Edward V. Armstrong. George Bennet, Marianna, Pa.

Joseph N. Busse. Mrs. Veda Busse, 2624 Western Avenue, Seattle, Wash.

Glenn D. Bybee. David Bybee, R. F. D. No. 1, Piatt, Ill.

Cage P. Day. Mrs. William Reed, Del Rio, Tex.

Henry D. Derkacz. Steve Derkacz, 27 Lyle Street, Delray, Mich.

Oric E. Elfers. Mrs. Ally McBride, Auburn, Wash.

Walter C. Evening. Stanley Koslak, 2 Valley Road, Fort Washington, N. Y.

Warren A. Freshour. Mrs. Mary Freshour, 55 North Smith Street, Aurora, Ill.

Warren W. Garland. Mrs. I. Garland, Swan River, Manitoba, Canada.

Stanley B. Grover. Alson Grover, 119 Charles Street, Waukesha, Wis.

Jacob M. Hershman. Victor Hershman, Noworadomsk, Poland, Russia.

Fred S. Himebaugh. Mrs. Hattie E. Himebaugh, Malvern, Iowa.

Wendell W. Holm. Charles Holm, Chetlo Harbor, Wash.

Sylvain Pouredo. Mrs. Marie Viel, 1093 Gilman Street, San Francisco, Cal.

Charles J. Jones. Mrs. Louisa Jones, R. F. D. No. 8, Eastman, Ga.

Edward C. Kirst. Mrs. L. Kirst, 2744 North Sacramento Avenue, Chicago, Ill.

Joe Kopiec. Miss Mary Kopiec, Warsaw, Poland.

Stanislaw Kubko. John Kubko, 889 Dequindre Street, Detroit, Mich.

Walter Larson. Mrs. Amanda Peterson, 724 Lowland Avenue, Kenosha, Wis.

Ernest G. Lutz. J. J. Lutz, Papillion, Nebr.

Charlie C. McAuley, jr. Charlie C. McAuley, Troy, N. C.

Eurna F. McClain. Mrs. Julia Batz, Honor, Mich.

Harvey Ray Nelson. William Nelson, R. F. D. No. 3, Bay City, Mich.

Alfred W. Page. Mrs. Louise Page, 19 Dartmouth Street, Easthampton, Mass.

CASUALTIES REPORTED BY GEN. PERSHING

Charles J. Quincen. Theodore Quincen, 225 Wagner Avenue, St. Louis, Mo.
Jack E. Rinehart. B. T. Rinehart, Oaktown, Ind.
Richard Roehrig. Mrs. Hattie Roehrig, 4219 Belthoven Street, St. Louis, Mo.
Sam Rubinstein. David Glaston, 129 Thirty-first Street, Bayonne, N. J.
Andrew A. Rudnay. Louis Rudnay, 124 East One hundred and third Place, Chicago, Ill.
William Shamblin. David M. Shamblin, Haywood, W. Va.
Houston E. Stockstill. George S. Stockstill, Picayune, Miss.
John Stotz, jr. John Stotz, sr., Armour, S. Dak.
Clarence L. Triplett. Jesse Triplett, Clayton, Ala.
Russell E. Widgeon. Mrs. Vandy Widgeon, R. F. D., Princess Anne, Va.
Herman Willson. Miss Clara Loring, Stuyvesant Falls, N. Y.
Lester Wolverton. Eutaw Wolverton, Edinburg, Va.

Prisoners.

Lieut. Crawford J. Ferguson. Mrs. C. J. Ferguson, 366 Broadway, Cambridge, Mass.
Corpl. Harold Buchter. James Gilpin, Greentown, Pa.
Pvt. Joseph Remi Hetu. Mrs. Delia Hetu, 108 North Main Street, Woonsocket, R. I.

SECTION 2, SEPTEMBER 19, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	22
Missing in action	30
Wounded severely	43
Died of disease	9
Died of wounds	11
Died of accident and other causes	3
Wounded slightly	3
Total	121

Killed in Action.

Lieut. Lewis W. Milliman. Frank G. Milliman, Scotts, Mich.

SERGEANTS.

John Millsop. James Millsop, 118 North Street, Grove City, Pa.
Eben A. Smith. Mrs. Kate Bronson, 618 Columbia Street, Waterloo, Iowa.

CORPORALS.

Roy C. Batten. Mrs. Flora Batten, 1507 Ardmore Avenue, Chicago, Ill.
Stuart Carkener. George Stuart Carkener, care of Kansas City Board of Trade, Kansas City, Mo.
Joseph Jindra. Mrs. Mary Jindra, R. F. D. No. 3, Sawyer, Wis.
Henry Walters. John Walters, 210 West Sixteenth Street, Holland, Mich.
George Hart. John Hart, Harrisburg, Ill.

PRIVATES.

Dominick Bartolero. Joe Bartelero, 1809 Weller Street, Seattle, Wash.
Roy A. Hall. Mrs. A. G. Hunt, Columbia, S. Dak.
Eusthathios Kefalos. George Sarafy, 32 Scot Street, Riverside, N. J.
Eric J. Oslin. John Isaacson, King Street, Seattle, Wash.
Charlie H. Bramblett. Mrs. Amanda Bramblett, Ramhurst, Ga.
Carl F. Bredehoft. John H. Bredehoft, Erhard, Minn.
Clinton E. Bushey. Mrs. Dora Bushey, 265 Jessamine Avenue, Yonkers, N. Y.
Albert Grass. Basil Two Bears, Cannon Ball, N. Dak.
Clarence E. Hutcheson. W. T. Hutcheson, Bentonville, Ark.
Joseph Davis Mario. Mrs. Mary Coucci, Mapleton Depot, Pa.
Henry F. Schotte. Kuno B. Schotte, 77 Minaville Street, Amsterdam, N. Y.
John Smith. Miss Cora Smith, Privett, Ky.
Robert H. Williams. Mrs. Griff Jones, Elliott, Iowa.
John J. Woulfe. Mrs. Elizabeth Molloy, 592 East One hundred and sixty-fifth Street, New York, N. Y.

Died from Wounds Received in Action.

PRIVATES.

Frank Baclaske. Alex. Baclaska, R. F. D. No. 1, Old Forge, Pa.
Wladyslaw Kwyecinski. Mrs. Anastasija Kwyecinski, 529 Main Street, New London, Conn.
Frederick J. Murphy. Patrick Murphy, 20 Leonard Avenue, Cambridge, Mass.
Arthur D. Richmond. Mrs. Alice Richmond, 199 Bank Street, Waterbury, Conn.
Frank Greenwoldt. Mrs. F. F. Greenwoldt, Bertha, Minn.
Donald C. Knarr. Mrs. E. F. Allison, 346 Ralston Street, Reno, Nev.
John Laird. Robert Laird, Wishaw, Pa.
Tracey Moore. Mrs. Ellen Sneed, 403 Navaca Street, San Antonio, Tex.
Alfred G. Shaffer. Raymond Shaffer, Ida Grove, Iowa.
Garland B. Turner. Mrs. W. J. Gress, Hillsboro, Ga.
James A. Yarno. Mrs. J. A. McConky, Terry, Mont.

Died of Disease.

Nurse Nellie J. Ward. William H. Ward, 229 North Paxon Street, West Philadelphia, Pa.
Sergt. Floyd Allen Ramsay. Mrs. Edwin T. Ramsay, 914 Fifth Street, Beloit, Wis.
Corpl. Izador J. Chopp. Tony Swab, Brazil, Iowa.
Corpl. William Rodibaugh. Henry Gosser, 11 Stevenson Street, Pittsburgh, Pa.
Corpl. Roderick J. Shipley. Mrs. Ella M. Shipley, Rossville, Kans.

PRIVATES.

George Ashwood. Mrs. Elizabeth Ashley, 481 Ford Street, Ogdensburg, N. Y.
Peter Carter. Mrs. Rachael Carter, care of M. N. Rice, R. F. D. No. 1, Govan, S. C.
Willis O. Casey. Mrs. Martha R. Casey, Byars, Okla.
Denver Collum. Robert S. Collum, Seminole, Okla.

Died from Accident and Other Causes.

Sergt. John W. Larose. Mrs. Emily Larose, Prairie du Rocher, Ill.

PRIVATES.

Harry T. Hiller. Mrs. Sophia Hiller, 7618 Drexel Avenue, Chicago, Ill.
George W. Kammer. Ivan H. Spring, 244 Williams Street, New York, N. Y.

Wounded Severely.

Lieut. Harrison H. Caswell. Mrs. G. S. Caswell, 913 South Clay Street, Greenville, Mich.
Lieut. William Patteson Weisiger, jr. Mrs. Connie Davidson Weisiger, 12½ Nevarro Flats, Macon, Ga.
Sergt. Mark Devine. Mrs. Della McGaugh, 1012 Bennett Street, Wilmington, Del.
Sergt. Leo Moses Drozdowski. Caismer Drozdowski, Sheboygan, Mich.
Sergt. George W. McAndrews. Mrs. Mary McAndrews, Wilmington, Pa.
Sergt. Frederic M. Thompson. Joseph F. Thompson, Gardena, Idaho.
Corpl. Fay Wolverton. Charles Wolverton, Vickeryville, Mich.

PRIVATES.

Henry James Drake. Mrs. Amanda Drake, 1338 Hulbert Avenue, Detroit, Mich.
Emery W. Jibble. Mrs. H. V. Barber, 1620½ Tacoma Avenue, Tacoma, Wash.
Joseph L. Kenney. L. S. Kenney, 5 Standish Street, Dorchester, Mass.
Ernest L. Langley. Mrs. L. M. Langley, 497 Columbus Avenue, Boston, Mass.
Ernest Richard Leveridge. Miss Isabell Leveridge, Lincoln, N. H.
Morris Lipshitz. Mrs. Ethel Lipshitz, 920 Buchanan Street, San Domingo, Mexico.
Albert R. Lovick. Mrs. Carrie Lovick, Libby, Mont.
John Ryan MacDonald. Mrs. James Frederick Murphy, 4 Avon Street, Malden, Mass.
Howard S. Ploof. William Ploff, Wykoff, Minn.
Albert H. Porter. Andrew Porter, R. F. D. No. 1, Glenwood, Tex.
Anthony A. Prill. Emil Prill, Simla, Colo.
Louis J. Reiger. Henry Reiger, 443 East One hundred and sixty-eighth Street, New York, N. Y.
Perley G. Sharpe. Mrs. Elizabeth Sharpe, 112 Cove Street, New Bedford, Mass.
Andrew G. Shiner. Mrs. Ellen S. Davis, box 55, Meadville, Pa.
Emerson E. Smith. Mrs. Maude Smith, Isabel, S. Dak.
Fred S. Vaughan. Mrs. Mattie E. Vaughan, Graysville, Ga.
William Weyenberg. John Weyenberg, R. F. D. No. 12, Kaukauna, Wis.
George Willette. Mrs. Alice Willette, 4120 Forty-fifth Avenue, South Minneapolis, Minn.
Earl H. Williford. Mrs. Lottie Williford, Stonewall, Miss.
John H[illegible] V[illegible] [illegible] 106 La Fayette Street, Greenville, Mich.
John Zeldam. John Zeldam, 1065 Caulfield Avenue, Grand Rapids, Mich.
Nickolas Corradino. Mrs. Mary Corradino, 210 West Walnut Street, Lancaster, Pa.
Philomon J. Denault. Mrs. Emma Denault, 182 Barlow Street, Fall River, Mass.
Thomas H. Gillam. Mrs. Emma Gillam, 631 Maywood Street, Hammond, Ind.
Saul Godinsky. Mrs. Fannie Godinsky, 155 Wellington Hill, Mattapan, Mass.
Jens H. Jensen. Nels Jensen, Avoca, Iowa.
Frank P. Jones. Mrs. Ida O. Jones, R. F. D. No. 1, Moss, Tenn.
Deforrest Irving Kevill. Dave K. Kevill, 222 Doty Avenue, Neenah, Wis.
Albert E. Leplant. Mrs. Prudence Leplant, Willow Street, Richford, Vt.
Harry A. Leslie. Mrs. Emil Leslie, Decker, Mich.
Victor Moreau. Mrs. S. Moreau, R. F. D. No. 1, box 180, North Yakima, Wash.
Joseph Charles Murray. Patrick Murray, 208 Palisade Avenue, Jersey City, N. J.
George Francis Owen. Mrs. Delia Owen, 1974 Park Avenue, New York, N. Y.
Robert R. Parnell. Mrs. Alice Parnell, 7 West Third Street, Williamston, S. C.
William M. Saylor. William Saylor, Waverly, Va.
Henry Wilson Shipman. Charles Shipman, Bement, Ill.

Wounded Slightly.

Battalion Sergt. Maj. Harold Dise Moody. Mrs. Mary Moody, Glen Rock, Pa.

PRIVATES.

Louis M. David. Mrs. Sydney A. David, 27 Smith Street, Taunton, Mass.
Samuel Klein. Nathan Klein, 101 Mill Street, Duquesne, Pa.

Missing in Action.

Bugler Junior Smith. John Smith, 1519 South Saginaw Street, Flint, Mich.

PRIVATES.

Frank E. Grove. Benjamin F. Grove, 171 West Patrick Street, Frederick, Md.
Joseph A. McManamon. Frank McManamon, 2108 Luzerne Street, Scranton, Pa.
Charles Nielsen. Martin Nielsen, 601 Higgins Avenue, Neenah, Wis.
John O'Shea. Mrs. Hannah Quinn, 403 West Forty-eighth Street, New York, N. Y.
Vernie Schucker. Albert Schucker, R. F. D. No. 3, Kutztown, Pa.
Frank Udelhoven. Mrs. Angeline Udelhoven, Lancaster, Wis.
Martin Van Den Broek. Mrs. Theodore Van Den Broek, South Kaukauna, Wis.
John Vaznuk. Filydos Dryko, Izaslovski, Greczel, Russia.
Clyde G. Walls. E. P. Walls, R. F. D. No. 1, Lawsonham, Pa.
Thurman Davis. Mrs. Monie Adams, Wine and Baldwin Streets, Chattanooga, Tenn.
David Folsom. Lorenzo P. Folsom, Gooding, Idaho.
Howard B. Folsom. Lorenzo D. Folsom, Gooding, Idaho.
Joseph Garik. Mrs. Sopifa Drzenricha, 2603 West Twenty-fourth Street, Chicago, Ill.
William O. Gilbert. Mrs. Harvey G. Simpson, 101 West La Platt Street, Butte, Mont.
James Harrison. Mrs. Elizabeth Harrison, R. F. D., box 36, Forest City, Pa.
Arthur Haught. Mrs. Kate L. Payne, Chandler, Ariz.
Clyde H. Hess. Charles W. Hess, Gray Bull, Wyo.
Louis B. Hess. Mrs. Emma V. Hess, 200 Schenectady Avenue, Brooklyn, N. Y.

Marvin L. Poythress. Josie D. Poythress, Chapel Hill, N. C.

CHANGES IN IMPORT RULES AS TO INVOICE CERTIFICATES

(Continued from page 2.)

through the United States en route, except (e) below.

(d) Commodities of whatever origin or destination not now or hereafter placed on the restricted list except (e) below.

(e) Shipments under paragraphs (b), (c), and (d) are not to be included in the general license when such shipment would cross the United States from an Atlantic to a Pacific or Gulf port, or from a Pacific to an Atlantic or Gulf port, or from a Gulf port to an Atlantic or Pacific port.

Iron Ore from Sweden and Spain.

PBF. No. 14.—Covering the importation of iron ore from Sweden and Spain when coming as ballast in vessels returning from these countries.

PBF. No. 15.—Covering the importation of news-print paper and kraft paper from Canada and Newfoundland by rail or lake shipment, or by ocean shipment from points where there is no railroad or lake transportation.

PBF. No. 16.—Covering the importation of Garbanzo beans from Mexico for shipments made on or before November 1, 1918.

PBF. No. 17.—Covering the importation into the United States of fish and shellfish, fresh, cured, or preserved, from Newfoundland or Canada, when said fish are products of the fishing industries of said countries.

PBF. No. 18.—Covering the importation when shipped from Yarmouth, Nova Scotia, to Boston, Mass., by vessel, approved by the War Trade Board, of all commodities the importation of which is permitted without individual license overland or by the Great Lakes from Canada.

PBF. No. 19.—Covering the importation of all wheat and wheat flour when consigned to the United States Food Administration Grain Corporation, 42 Broadway, New York, or to the Wheat Export Co. (Ltd.), 27 Beaver Street, New York.

PBF. No. 20.—Covering the importation of all plants, seeds, vines, bulbs, cuttings, entomological specimens, and literature consigned to the United States Department of Agriculture.

PBF. No. 21.—Covering the importation of all commodities not exceeding $100 in value shipped by mail or express from the American Expeditionary Forces abroad.

PBF. No. 23.—Covering the importation of international exchanges from the United Kingdom when consigned to the Smithsonian Institution.

PBF. No. 24.—Covering the importation of fresh fruits and fresh vegetables from Cuba for shipments made on or before December 31, 1918.

PBF. No. 25.—Covering the importation of all commodities arriving at United States ports in bond in transit to Canada, provided the Canadian import license covering the shipments, or proper proof of the issuance of such license is presented to the collector of customs. (This supersedes PBF. No. 12 as to in bond transit shipments to Canada.)

PBF. No. 26.—Covering the importation of surplus stores and supplies, which the Bureau of Transportation of the War Trade Board may order removed from vessels in United States ports.

Notice to Ship Companies.

In furtherance of the ruling set forth above, the War Trade Board has notified all shipping companies and shipping agencies that vessels sailing from foreign ports on or after October 1, 1918, will not be permitted to unload any shipment of restricted commodities for importation into the United States, except coin, bullion, and currency, unless such shipment is covered by an invoice duly certified by the appropriate United States consular officer, or unless said shipment is covered by one of the "PBF." or general licenses; and that, if any shipping company shall bring to the United States any restricted commodity not so covered by such consular invoice, said company will be compelled to return said commodity to the port of origin at its own expense. Shipping companies will be protected, however, in accepting freight, provided they make certain that the invoice covering the commodity has been duly certified by the American consular officer.

This policy has been made necessary by the fact that, since the restrictions upon imports became effective, many shipments have arrived at United States ports, for the importation of which no licenses have been issued. These shipments have, in many instances, been unloaded, and have caused great congestion of the docks and warehouses.

It is expected that the precautions now taken will prevent this, and thus facilitate the handling of foreign trade, as well as the enforcement of the import restrictions adopted for the purpose of conserving tonnage.

U. S. PATROL BOAT BURNS.

The Navy Department is informed that the U. S. S. *Yard*, a scout patrol, caught fire about 11.30 Wednesday morning while on patrol off entrance to Narragansett Bay and burned to the water line. The cause of the fire and the extent of the damage have not been ascertained. Four men were slightly burned and sent to the naval hospital.

TROOP TRAIN WRECKED.

The War Department announces that information has been received that a troop train was wrecked near Marshfield, Mo., Tuesday night. Five men are reported killed and at least 24 injured.

REPORT OF DIRECTOR GENERAL OF RAILROADS ON FIRST SEVEN MONTHS OF FEDERAL CONTROL

In a report to President Wilson just made public Director General McAdoo tells of the work of the United States Railroad Administration during the first seven months of its existence. An abstract of the report issued by the administration follows:

THE AMERICAN TRANSPORTATION SYSTEM.

The American transportation system is briefly described as including a steam railway mileage (all tracks) of 397,014 miles, owned or controlled by 2,905 companies, employing 1,700,814 persons. Their property also comprised various boat and steamship lines engaged in coastwise transportation and navigating an inland waterways system which included some 57 canals, 3,057 miles in length, as well as many thousand miles of navigable rivers, lakes, bays, sounds, and inlets. Of the 2,905 railway companies, 185 operated major systems, each of which had an annual operating revenue of $1,000,000 or more, 221 were switching or terminal companies, 1,434 were plant-facility roads constructed primarily to serve some particular factory or industry, and 765 are what have come to be described as "short-line" railways, dependent upon one or more of the larger systems for through connections. It is explained that many of the smaller properties included in this description of the plexus of transportation which came under Mr. McAdoo's control January 1, 1918, have since been relinquished as not essential to the purposes that the President's proclamation and the enabling legislation had in view, but that it is the declared policy of the Railroad Administration to deal equitably with the relinquished properties in so far as it may have any relation to them.

THE POLICY OF THE RAILROAD ADMINISTRATION.

The report concludes with a reference to Mr. McAdoo's declaration of policy, issued last June, in which he announced that he hoped "to humanize the railroads and negative the idea that corporations had no souls." It might, perhaps, have been more appropriate if his report to the President had been commenced rather than ended with this phrase, for the narrative reflects throughout an undiminished ardor for practical idealism in the management of the railways for the purposes for which they were taken over. These purposes, as enumerated by him, were—

First. The winning of the war.

Second. The service of the public at the lowest cost consistent with the payment of fair wages to the railroad employees and the maintenance of the transportation system under control of the Government as a self-supporting rather than a money-making agency.

FUTURE EFFICIENCY DEPENDS ON MOTIVE POWER AND LABOR.

Mr. McAdoo's view of the future is optimistic. He says that there is good ground for believing that substantial progress has been made "in accelerating the movement of traffic and employing the available equipment more intensively," and that he is confident that the railroads will shortly be in a condition to meet any demands that may be made upon them if the needed motive power already ordered can be secured and the skilled labor necessary is not withdrawn from the railroads for military and other purposes. These, he says, are very serious phases of the railway problem.

The White House,
Washington,
September 4, 1918.

My Dear Mr. Director General: Allow me to acknowledge with appreciation the receipt of your report of the first seven months' administration of the railroads under Federal control. I am sure that the Members of the Congress and every thoughtful person interested in the great problem of our railways will read the report with interest and satisfaction.

Sincerely yours,
WOODROW WILSON.

Hon. WILLIAM G. McADOO,
Director General of Railroads.

ECONOMIES SHOWN BY TRAFFIC STATISTICS.

Elaborate traffic statistics are adduced in support of his claim with regard to the intensified employment of equipment. These statistics show that both the carload and the trainload have been substantially increased, and that by "rerouting" the distance that freight must be hauled between many important centers has been greatly shortened. In one instance 880 miles have been thus saved, and in many other cases the saving runs from 100 to 500 miles.

As one example of the economy that has thus been made possible he mentions the fact that recently during a period of about 60 days some 8,999 cars were rerouted in a certain western territory so as to effect a saving in the mileage traveled by each car of 195 miles, equal to a total of 1,754,805 car-miles.

CONDITION OF ROADS WHEN TAKEN OVER.

The report calls attention to the crippled condition of the railroads when they were taken over as a result of the freight congestion and blockades, and explains the measures of relief that were successfully applied to correct these conditions before any permanent organization was effected or Congress had passed enabling legislation providing for the revolving fund of $500,000,000, which did not become a law until March 31, 1918.

THE FEDERAL RAILROAD ORGANIZATION.

The organization which has been since created is described at length. There is a central administration at Washington, of which Mr. McAdoo is the head. Its chief officers are known as his "personal staff." They are:

W. G. McAdoo, Director General.

Walker D. Hines, Assistant Director General.

Oscar A. Price, assistant to the Director General.

John Barton Payne, general counsel.

John Skelton Williams, director of division of finance and purchases.

Robert S. Lovett, director of division of capital expenditures.

Carl R. Gray, director of division of operation.

Edward Chambers, director of division of traffic.

Charles A. Prouty, director of division of public service and accounting.

W. S. Carter, director of division of labor.

Theo. H. Price, actuary.

M. B. Clagett, private secretary to the Director General.

Mr. McAdoo also makes special mention of Mr. Henry Walters as formerly "an important member of my preliminary organization, having in charge the standardization of motive power, but now released at his own request, and to my regret, from constant attendance in Washington, although he continues to render highly valuable services in an advisory capacity."

It is explained that although these officers are supplied with the assistants, secretaries, and clerks that they require, the policy has been to keep the Washington organization as small as possible and avoid the creation of an unwieldly and expensive central administrative bureau.

THE REGIONAL DISTRICTS AND DIRECTORS.

Under the central organization are seven regional directors having charge of an equal number of regional districts into which the railroad mileage of the country has been divided. It is explained that the geographical boundaries of these regional districts are suggested rather than defined in the map which accompanies the report, but that it is impossible to map these districts accurately as many lines, most of whose mileage is in one district, penetrate areas that are also included in other regional districts, and that the districting has had for its purpose the assembling under the management of one regional director of the larger portion of the mileage serving his territory. The limits of administrative authority are therefore determined rather by the railway lines than by geographical boundaries, as they have been fixed more with regard to the movement of traffic and the service of the public than with reference to conventional State boundaries or groupings.

Thus it has been deemed wise to put the Pennsylvania lines and the Baltimore & Ohio lines east of the Ohio River in the Allegheny district, and those west of the Ohio River in the Eastern district, which contains the whole of the New York Central Division. This course has been followed in pursuance of a policy that contemplates the preferential use of the more northerly trunk lines for fast

Director General of Railroads' Report to the President

through freight and passenger traffic between the Chicago district and the east, thereby releasing the lines in the Allegheny district for the distribution of the enormous traffic that originates in the Pittsburgh district, where congestion of local and through freight in the past has created some of the most costly and exasperating blockades that have been known in the history of American transportation.

The regional districts are both named and numbered, and a list of them and their regional directors is as follows:

1. The eastern district, A. H. Smith, regional director, New York.
2. The Allegheny district, C. H. Markham, regional director, Philadelphia.
3. The Pocahontas district, N. D. Maher, regional director, Roanoke, Va.
4. The southern district, B. L. Winchell, regional director, Atlanta, Ga.
5. The northwestern district, R. H. Aishton, regional director, Chicago.
6. The central western district, Hale Holden, regional director, Chicago.
7. The southwestern district, B. F. Bush, regional director, St. Louis.

Under the regional directors come in turn district directors in charge of subdivisions of the regional districts, Federal managers in charge of the more important single divisions or groups of less important lines, general managers operating minor divisions, and terminal managers having control of all terminals at the more important railway centers and ports.

THE MARINE SECTION.

There is also a marine section of the division of transportation with headquarters at Washington, and a manager of this section has supervision of the many steamship lines owned by the railroads, the object being to coordinate them more completely with the railways, as well as with other shipping.

THE INLAND WATERWAYS.

An inland waterways organization has also been created, whose director when appointed will be generally in charge of the canals and navigable rivers of the country. Following the plan pursued in the case of the railroads, the inland waterways will be divided into districts. Two such districts have already been created, namely, the Mississippi and Warrior Rivers district, of which M. J. Sanders, of New Orleans, has been made Federal manager, and the New York and New Jersey Canals district, including the Erie Canal, with its connecting waterways, and the Delaware and Raritan Canal, of which G. A. Tomlinson has been made Federal manager.

CORPORATE AND FEDERAL OFFICERS DIFFERENTIATED.

Having thus described his operative organization, Mr. McAdoo proceeds to tell of the considerations which moved him in divorcing it from the corporate officers formerly managing the railway properties and still in office as the representatives of the proprietary corporations. He says:

"Inasmuch as 'no man can serve two masters,' and the efficient operation of the railroads for the winning of the war and the service of the public is the purpose of Federal control, it was manifestly wise to release the presidents and other officers of the railroad companies with whose corporate interests they are properly concerned from all responsibility for the operation of their properties, which will be in the hands of the regional directors, the district directors, and the Federal and general managers above referred to, and who will be directly responsible to the Director General. All ambiguity of obligation is thus avoided. The officers of the corporations are left free to protect the interests of their owners, stockholders, and creditors, and the regional and operating managers have a direct and undivided responsibility and allegiance to the United States Railroad Administration.

"In pursuance of this policy the regional directors, the Federal managers, and the general managers have been required to sever any relations they may have had with the railroad corporations as either officers or directors, and the corporate officers have been advised that they have no function to perform with respect to Government operation.

"Many of the former corporate officers have been appointed as officials of the United States Railroad Administration, whereas others have elected to remain as officers of their corporations.

"It has been made clear that the fullest possible cooperation is desired between the Government officers who operate the railroads and the corporate officers who represent the stockholders:"

SALARIES AND OFFICIAL FORCE REDUCED.

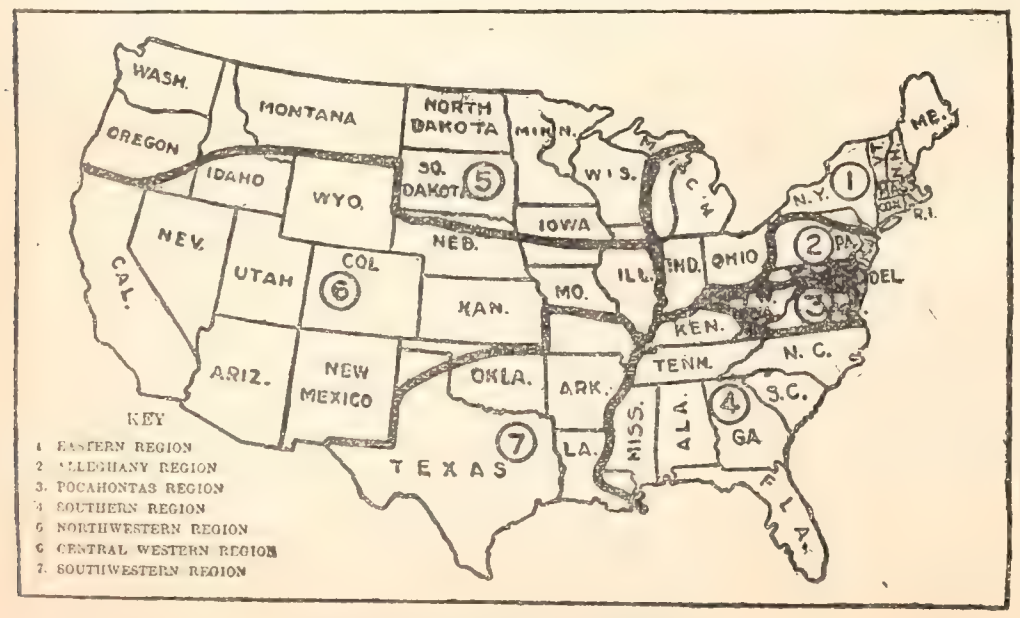
The report asserts that in thus reorganizing the operating force it has been possible without any impairment of efficiency to reduce both the number of officers required and the aggregate of the salaries paid them. A table is submitted showing that under private control 2,325 officers drawing salaries of $5,000 a year or over were employed. The aggregate of their salaries was $21,320,187. Under Government control 1,925 officials are employed, drawing salaries of $5,000 a year or over. The aggregate of their salaries is $16,705,298, and the saving shown amounts to $4,614,889 per annum. This total includes the officers of the various regional districts as well as those of the central administration in Washington.

A reduction in the legal expenses of the railroads amounting to approximately $1,500,000 annually has also been effected by the elimination of a number of men formerly employed in the legal departments, a reduction in the salaries of others, and the transfer of the general counsel of various roads from the operating pay roll to the pay rolls of the corporations. It is believed that efficiency has in no respect been lessened.

The report contains an interesting statement with regard to the salaries paid, which reads as follows:

"Under private control, salaries as high as $100,000 per annum were paid to officers of railroad corporations. Under Government control the highest salaries paid are to the regional directors (of whom there are but seven), and these salaries range from $40,000 to $50,000 per annum. This reduced compensation has been fixed for regional directors notwithstanding the increased responsibilities and duties of these directors as compared with those of the presidents of the larger railroad corporations.

"The reduction of $4,614,889 per annum in the aggregate of the salaries paid to the more responsible officials has not been effected by forcing the experienced men appointed by the United States Railroad Administration to accept salaries incommensurate with their responsibilities, although in numerous instances these salaries are substantially less than those they had been earning as officers of the railroads or could earn in private employment. I have felt that it was not only equitable but necessary that they should be justly remunerated, and that the rewards of brains, industry, and loyalty should be sufficient to continually attract able men to the service of the railroads as their life's work. It is not a question merely of operating the railroads during the period of the war—this re-



MAP OF REGIONAL DISTRICTS.

Director General of Railroads' Report to the President

quires, it is true, the best talent that can be secured if the present extraordinary demands are to be met—but it is a question of the post-bellum period as well, when railroad work must continue to be sufficiently attractive to draw constantly to it men of the right quality and caliber. Unless the ranks are uninterruptedly recruited with such men it will be impossible to maintain the efficient organizations which are essential to the successful management and operation of the railroads of the country.

"The salaries paid under Government control to the higher officers should be sufficient to make the juniors realize that the promotions and rewards of a railroad career are still worth working for, and that they will be commensurate with those of private enterprise and industry."

THE "CONTRACT."

Mr. McAdoo touches briefly upon the much discussed contract between the United States Railroad Administration and the corporations. He says that he is glad to feel that a satisfactory solution is near at hand, and that the delays have been the fault neither of the railroad corporations nor of the Government. They have been inherent in a matter of such intricacy and magnitude.

THE WAGE ADVANCES—WOMEN PAID SAME AS MEN.

The various advances made in the wages of railroad employees since Mr. McAdoo took charge are dealt with at length in the report. It is explained that the recommendations of the railroad wage commission of which Secretary Lane was chairman, have been accepted in so far as the percentages of advance recommended were concerned, but that Mr. McAdoo found himself unable to acquiesce in the suggestion of the commission that no change in working hours should be made during the continuance of the war, and that he has therefore recognized the principle of the basic eight-hour day in railroad service as a matter of justice. The advances made in the pay of common labor and in the wages received by the 500,000 employees in the mechanical departments of the railways under Federal control are also dealt with, as is an order instructing that the women employed by the railroad should be paid the same wages as men when engaged in similar work and that they shall not be permitted to occupy positions unsuited to their sex or allowed to work amid conditions that are unfit.

EQUAL PAY FOR NEGROES.

A new departure in the treatment of negro employees is indicated by the issuance of an order that all negroes employed by the railroads shall be paid the same wages that white men get for a similar work. This has not been the general practice in the past, but the Director General says that he has felt that equal pay for equal service without respect for sex or color was the only policy that could justly be followed.

THE ADVANCE IN FREIGHT AND PASSENGER RATES.

The advance of 25 per cent in freight rates and the establishment of a minimum passenger rate of 3 cents per mile is discussed at length in a paragraph which also deals with the supercharges of one-quarter and one-half cent per mile now made for transportation in tourist and Pullman cars respectively. Mr. McAdoo asserts that the general advance in freight and passenger rates has been necessary to provide for the increase in wages allowed and the rising costs of operations generally, and while he adds that it is assumed that these advances will increase the net operating revenue of the railroads by an amount about equal to the greater cost of operation, he says that this assumption is more or less conjectural, as it is impossible to say whether the higher rates charged will have the effect of reducing the traffic.

THE HEAVY PASSENGER TRAFFIC.

He adds that thus far such an effect has not been noticeable, at least in the case of the passenger traffic, and explains that the increased travel that is noticeable in many parts of the country is due to higher wages paid to workers, who are constantly changing their places of employment, as well as to the travel of the soldiers who have been granted a special rate of 1 cent per mile when on furlough, and the journeys made by friends and relatives of the men who are visiting the various cantonments. The tax upon the passenger service has also been greatly increased by the movement of troops on orders from the War and Navy Departments. During July over 1,100,000 men were moved on such orders, and an aggregate of about 6,455,558 troops had been moved for Government account between May 1, 1917, and July 31, 1918. Of this number nearly 68 per cent were carried between January 1 and July 1, 1918.

PULLMAN SUPERCHARGES EXPLAINED.

The supercharge for transportation in Pullmans has been imposed in the hope that it will reduce the demand for Pullman accommodations and free the sleeping cars for the use of our troops on night journeys, and it is frankly stated that the order which makes one and one-half tickets necessary for the sole occupancy of a section, and two tickets requisite for the exclusive occupancy of a compartment, has been issued to "discourage the well-to-do or extravagant from using more Pullman space than they really require, thereby excluding the thrifty or less prosperous portion of the public from the use of the Pullman space unnecessarily preempted."

THE ABANDONMENT OF COMPETITION AND CONSOLIDATION OF TICKET OFFICES.

The abandonment of competition, the consolidation of ticket offices, and the resultant economy are the subjects of a very interesting chapter of the report, in which it is explained that since there is no longer competition for freight or passenger traffic between the various divisions of the Government railroad system the solicitation of traffic and the special exploitation of passenger routes have been discontinued. This policy has involved a relinquishment of the soliciting forces hitherto employed by the railroads and has made it possible to consolidate the separate ticket offices formerly maintained in the larger cities. The saving that will be effected as result is estimated at $23,566,633, $12,000,000 of which is accounted for by the closing of "off line" offices, while $4,425,000 will be saved through the consolidation of "on line" ticket offices. The saving in advertising is estimated at $7,000,000.

Railroad time-tables have also been abridged and simplified.

SCHOOLS FOR WOMEN TICKET SELLERS.

To meet the demand for ticket sellers made necessary by the conscription of the younger men formerly employed in this capacity, women are being trained in the schools that have been established for that purpose in several of the larger cities. When the women so trained become proficient in the work they will be assigned to the more important ticket offices of the country, where they will receive the same wages that are paid men for similar services.

UNNECESSARY PASSENGER TRAINS ELIMINATED.

Another interesting chapter of the report deals with the elimination of unnecessary passenger trains. Between many important cities a duplicate and elaborately equipped passenger service was formerly maintained by competing roads. Where this service was in excess of the demand it has been reduced by the abandonment of one or more trains. Other unnecessary passenger trains have also been annulled. In the district west of the Mississippi River an aggregate passenger-train mileage of 21,000,000 miles a year has been thus done away with. In the eastern district unessential passenger trains that used to travel 26,420,000 miles per annum have also been eliminated. Through travel is being directed to the natural routes. The hauling of special trains or needless private cars has been discouraged, and the schedules are being revised, so that closer connections can be made. Railroad tickets between points reached by more than one road are honored by any route, and a universal mileage book good in the hands of bearer upon any Government-controlled road is now to be had. It is sold in units of 500 and 1,000 miles at 3 cents per mile, plus the Government tax of 8 per cent. The coupons it contains are also good at their face value for excess baggage charges.

THE CONSOLIDATION OF TERMINALS.

Another reform that is being worked out is the consolidation of passenger terminals. The most conspicuous case in which it has been applied is the use of the Pennsylvania Terminal in New York for through trains via the Baltimore & Ohio between Washington and New York. It has resulted in greatly relieving the pressure on the Pennsylvania line, as many who were formerly deterred from traveling by the Baltimore & Ohio because of the ferry trip across the Hudson River that it involved now find it just as convenient as the route that was formerly a favorite. The result has been a more equable distribution of the New York and Washington traffic, which is now carried in fewer but better filled trains.

Director General of Railroads' Report to the President

THE BUREAU FOR SUGGESTIONS AND COMPLAINTS.

The establishment of a bureau for suggestions and complaints through which the public are invited to cooperate with the Director General by bringing defects in the service to his attention is one of the latest and will probably prove to be one of the most popular novelties that he has introduced. He invites criticisms and suggestions as well as letters commending conspicuously courteous and efficient employees from all patrons of the railroads. The establishment of this bureau may be regarded as in line with the policy expressed by Mr. McAdoo in the slogan "the public be pleased," which he first adopted in inaugurating the service in the Hudson tunnels.

UNIFORM FREIGHT CLASSIFICATION.

Another chapter of the report relates to measures that are being taken to introduce a uniform freight classification that will resolve the confusion that formerly existed under the multiplicity of classification schedules that were in use.

STORE-DOOR DELIVERY.

"Store-door" delivery as adopted in New York and Philadelphia and as it may be extended to other cities is dealt with in still another chapter in which the stimulant of higher demurrage rates in intensifying the use of freight cars is also discussed.

STANDARDIZATION OF FREIGHT CARS AND LOCOMOTIVES.

The standardization of freight cars and locomotives, by which about 12 types of each will supersede the two or three thousand types formerly in use is also discussed. The expenditure of nearly a billion dollars for improvements and betterments, financial advances to the railroads which aggregate $203,714,050 up to 31st of July, the economies made possible by a consolidation of the purchasing departments of the various railroads under the direction of the division of finance and purchases, are subjects which are interestingly dealt with at length in the report.

THE REASONS FOR TAKING OVER THE PULLMAN CO.

The reasons for taking over the Pullman car service and consolidating the express companies and the benefits to the public and the employees which are expected to result, are the subjects of other chapters in the report.

THE GOVERNMENT ITS OWN INSURER.

An important feature is the announcement that the Government will hereafter be its own insurer against fire loss in so far as the railway properties are concerned.

An insurance and fire protection section has been established to minimize this loss. The railroads have previously paid five or six million dollars a year for fire premiums, which, less the losses hereafter sustained, will be the saving under the new system.

OTHER REFORMS.

Other reforms that are told of in the report include the coordination of the Railroad Administration with other governmental departments through the appointment of liaison officers, the adoption of through waybilling by which the clerical labor and delay hitherto resulting from interline waybilling is eliminated, the introduction of a uniform accounting system, and the issuance of an order that will preclude suits in districts that are inconvenient to the defendant and its witnesses, the abolition of car mileage accounting, per diem car rentals, the simplification of interline passenger accounting, and the creation of a "safety section" established to minimize the risks to which those who work and travel on the railroads are subjected.

UNIFORM PENSION AND COMPENSATION SYSTEM UNDER CONSIDERATION.

The plans that are under consideration for the establishment of a uniform system under which employees will receive a fixed and equitable compensation for personal injury or loss of life, and that will provide pensions for superannuated employees and enable them to purchase life, health, and old age insurance at a low cost, are also discussed in the report. The issuance of a recent order prohibiting the sale of intoxicants of every character in dining cars, restaurants, and railroad stations under Federal control is also noted to the satisfaction of the prohibitionists.

"RESULTS THUS FAR SECURED."

Under the caption, "Results thus far secured," mention is made of the speed with which transcontinental movement of lumber for ships, aeroplanes, and other Government requirements, not including those of the railroads, was made between January and July, 1918. Altogether 177,000,000 feet were shipped from the Pacific coast to the Atlantic or intermediate points, and when speed was essential, delivery on the Eastern seaboard was made within 15 days after shipment.

THE COAL MOVEMENT.

The coal movement is a subject in which especial interest will be felt just now. At present strenuous efforts are being made to speed it so as to preclude the recurrence of last winter's distressing experience. The figures for the six months ending with July show an increase of nearly 22,000,000 tons over the movement for the corresponding period last year, which was the largest on record up to that time.

It is asserted that the energies of the Railroad Administration are now being largely devoted to moving the coal mined as rapidly as the Fuel Administration can deliver it, and that of late the coal mines have been supplied with cars more rapidly than they have been able to load them, so that there is no longer any doubt that the transportation for the fuel requirements of the Nation is available provided the coal production during the warm weather can be maintained so as to employ the cars requisitioned.

Mr. McAdoo adds that "at present this is not the case," and that "I emphasize this point because the country has been led to believe that the coal production is limited entirely by transportation and any shortage is attributed to the railways." He claims that "The Federal railroad system is and has been for some weeks past in a position to handle more coal than has been produced, and any shortage during the coming winter will not, it is hoped, be properly chargeable to the lack of transportation."

THE ENTHUSIASM OF EMPLOYEES AND OFFICERS.

In concluding the report Mr. McAdoo makes his acknowledgments "to the officials and employees who have worked with such loyalty and zeal to accomplish what has already been done," and adds that "it is a constant satisfaction to be associated with them." "You can," he assures the President, "rely upon their patriotic enthusiasm and alacrity in the work of winning the war, in which they, as well as the soldiers at the front, have enlisted with such laudable determination and patriotism."

ORDERS ARE ISSUED REVISING PRICES OF BITUMINOUS COAL

Acting on applications for a revision of prices in certain localities, the Fuel Administrator—

Hereby orders and directs that bituminous coal mined in the Cerrillos field, in the State of New Mexico, may be sold at prices f. o. b. cars at the mine not to exceed the following per net ton: For run of mine, $4.05; for prepared sizes, $5.05; for slack or screenings, $3.55. To the foregoing prices may be added the 45-cent allowance for wage increase if the producing companies are entitled to add such allowance under the President's order of October 27, 1917.

Said prices are subject to the following monthly summer reductions: 25 cents for the month of July and 15 cents for the month of August.

This order to become effective at 7 a. m. August 30, 1918.

Hereby orders and directs that bituminous coal mined by the Wolf Park Coal Co., in the Canon City district in the State of Colorado, may be sold at prices not to exceed f. o. b. cars at the mine, $2.15 per net ton for run of mine, $4.15 per net ton for prepared sizes, and $1.15 per net ton for slack or screenings, plus the 45-cent allowance for wage increase if the producing company is entitled to add such allowance under the President's order of October 27, 1917.

This order to become effective at 7 a. m. August 30, 1918.

Hereby orders and directs that anthracite coal mined in the State of Virginia may be sold at prices f. o. b. cars at the mine not to exceed $5.40 per net ton for egg, $5.75 per net ton for stove, $5.75 per net ton for nut, $5.30 per net ton for briquets, and $4.60 per net ton for pea and smaller sizes.

And hereby further orders and directs that the above prices shall be subject to a summer reduction of 30 cents per net ton from April 1 to August 31, inclusive.

This order to become effective at 7 a. m. August 29, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

Director General Issues Instructions To Railroad Regional Directors on Classifying Employees in the Draft

Director General of Railroads McAdoo authorizes the following:

On September 9 the Provost Marshal General issued a statement urging employers and other representatives of industry to assume a larger share of responsibility in the classification of the new registrants under the selective-service act, to aid in emphasizing the cases where deferred classification should be granted, to make necessary claims in cases where employees fail to do so, and to inform themselves systematically as to which of their employees are registrants, to survey their entire plant so as to single out the really indispensable individuals and to lay the pertinent facts before the appropriate authorities.

Instructions to Regional Directors.

In line with this request the Director General on September 9 instructed regional directors to cause the Federal managers to ascertain who would be registrants among railroad employees and to see that deferred classification is properly claimed for employees that are necessary and also to avoid making such claims where it can reasonably be avoided.

In the further bearing out of this policy of cooperation requested by the War Department, the Director General has sent the following instructions to the regional directors:

U. S. Railroad Administration,
Office of Director General,
Washington, September 18, 1918.

Circular No. 57.

To the regional directors:

I attach statement issued by the Provost Marshal General on September 9 to employers and other representatives of industry urging their cooperation in the classification of the new registrants under the selective-service act. In addition to the instructions already issued, on and after September 9, with a view to such cooperation, you are hereby instructed to see that the railroad officers shall, in presenting or supporting claims for deferred classification before district boards, present the following to such boards as a statement of the policy of the United States Railroad Administration and of the general reasons in support of the claims made for deferred classification:

All applications made by officers of railroads under Federal control for deferred classification for railroad officers and employees and all affidavits made by railroad officers in support of claims for such deferred classification are made by them as officers of the United States Railroad Administration and by my authority and in pursuance of a general policy which in my judgment must be adopted in order to meet the war responsibilities which rest upon the railroads under Federal control.

The Government of the United States has taken possession and control of the railroads as a war measure, and their efficient and unhampered operation is indispensable to the successful conduct of the war.

Essential Character of the Industry.

The essential character of the railroad industry as a war enterprise is not open to dispute. Indeed, in contrast with nearly all war industries, the railroad industry is one of the very few which has actually become a Government enterprise because of its essential character for war purposes.

In such circumstances the men who are necessarily employed in rail transportation in this country are as truly employed in an indispensable war service as are our soldiers and sailors.

Since the railroads are indispensable and the branches of the service to which the employees belong are indispensable, I understand the remaining questions for consideration by the district board are whether a particular employee can be dispensed with (1) on the ground that the railroad has more of such employees than it needs, or (2) upon the ground that it can readily replace such employees with others.

Please state to the district board, with my full authority, that after eight and a half months of a thorough and continuing study of this subject, being constantly in touch with employers of railroad labor, the representatives of the railroad employees, and the representatives of the labor situation generally for the whole country, there is no surplus whatever of employees for running the railroads, and there is no surplus supply of labor from which new employees can be drawn to replace those who may be taken for military service. Any competent railroad employee taken from an indispensable branch of the railroad service will be subtracted from a force which is already too small and which can not be adequately replenished. The taking of any such employee by any district board would be a step tending to injure the war operations of some railroads. The taking of such steps by numerous district boards would in the aggregate constitute a cumulative and far-reaching injury to the United States Railroad Administration and would destroy the purpose for which the Government took possession of such control of the railroads.

Scarcity of Skilled Workers.

The scarcity of skilled railroad employees is in part due to the fact that up to the present time the railroads of the country, in addition to meeting their full share of the demands of men for general military service, have been subjected to the peculiar disability that they alone, out of all the industries of the country, have had to furnish large numbers of men for special military service. Hundreds of miles of military railroads in France are being operated for the military forces of the United States by men who have been drawn from the ranks of the skilled officers and employees of railroads in this country. In this way the drain upon skilled railroad labor has already been proportionately greater than the drain upon skilled labor of other industries, and this in part accounts for the exceptional shortage of skilled railroad labor which confronts the United States Railroad Administration.

It must also be clear that employees in these classes can not be supplied by the employment and training of new employees. Practically without exception these employments are not suited to women, but able-bodied and vigorous men are needed for the discharge of the duties. These men are not available in adequate numbers and will become less and less available as the war progresses. Besides, untrained men can not perform the functions, and if skilled railroad employees are taken for military service the substitution of untrained employees, even if available, would prove destructive to efficient railroad operation.

Sympathetic Cooperation.

It is desired that the understanding and sympathetic cooperation of the district boards shall be sought in all instances. We are all striving for the same end, and that is to win the war. To the extent that railroad men can be spared from railroad service for military service we ought to spare them. But to the extent that they are needed for railroad service the district boards should not attempt to take them for military service.

The United States Railroad Administration intends to ask for deferred classification only when the men on whose behalf the request is made are needed in the public interest for the continued performance of their duties and when experienced substitutes can not be found. And the district boards, upon whom rests the responsibility for preserving the necessary labor supply for essential occupations, should be urged to grant, in the interest of the national needs and with a nation-wide view of the controlling factors, the applications for deferred classification which are supported by the United States Railroad Administration.

Instructions to Officials.

Instructions have been issued through the regional directors to all officials of railroads under Federal control to see that proper applications are made for deferred classification for all necessary railroad employees and to support such applications vigorously, and at the same time to avoid making applications whereever reasonably practicable.

It is the patriotic duty of the men who are considered necessary for the operation of the railroads to claim deferred classification and to furnish the district boards with the necessary information in their answers to questionnaires to show the basis for such clasification. Every man who is helping in these necessary occupations to operate the railroads in this country is rendering not only a service indispensable to the war but a service that is as praiseworthy and creditable as any war service could be.

W. G. McAdoo,
Director General of Railroads.

HOUSING CONTRACT LET.

The Department of Labor authorizes the following:

The contract for 75 houses at Niles, Ohio, project No. 481, has been awarded to Yoho & Hooker, Akron, Ohio. The contract is on lump-sum basis.

Liberty Bonds Recently Reported Lost or Stolen and a List of Those That Have Been Recovered

Public institutions of all kinds, including post offices, receiving The Official U. S. Bulletin, are requested to post conspicuously the list of missing Liberty Bonds given below, the Government being exceedingly desirous of locating them.

Following is a list of lost and stolen Liberty bonds furnished this month to the American Bankers' Association.

If any of these bonds or coupons are presented, banks should write, telephone, or telegraph, collect, to L. W. Gammon, manager, Protective Department American Bankers' Association, No. 5 Nassau Street, New York City.

ASSIGNED TO CAMP FORREST.

Special Orders, No. 211:

110. Maj. Henry Tucker, Medical Corps, is relieved from duty in the Central Department and will proceed to Camp Forrest, Chickamauga Park, Ga., and report in person to the commanding general, that camp, for duty with the 213th Engineers.

No trouble to buy, cheap, convenient, a real investment—WAR-SAVINGS STAMPS.

SUPPLEMENTAL ORDER ESTABLISHING MINIMUM WAGE SCALE FOR RAILROAD CLERKS AND CERTAIN OTHER STATION WORKERS

The United States Railroad Administration issues the following:

WASHINGTON, D. C.,
September 1, 1918.

Supplement No. 7 to General Order No. 27.

Effective September 1, 1918, superseding General Order No. 27, and in lieu thereof, as to the employees herein named, the following rates of pay and rules for overtime and working conditions for all clerical forces in all departments, and for certain employees in stations, storage, or terminal warehouses, docks, storehouses, shops, and yards upon railroads under Federal control are hereby ordered:

ARTICLE I.

RATES OF PAY.

(a) For all employees who devote a majority of their time to clerical work of any description, including train announcers, gatemen, checkers, baggage and parcel room employees, train and engine crew callers, and the operators of all office or station equipment devices (excepting such as come within the scope of existing agreements or those hereafter negotiated with the railroad telegraphers) establish a basic minimum rate of $62.50 per month; and to this basic minimum rate and all rates of $62.50 and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $87.50 per month.

(b) This order shall apply to chief clerks, foremen, subforemen, and other similar supervisory forces of employees herein provided for.

(c) For office boys, messengers, chore boys, and other employees under 18 years of age filling similar positions, and station attendants, establish a basic minimum rate of $20 per month, and to this basic minimum rate and all rates of $20 per month and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $45 per month.

(d) For all other employees not otherwise classified, such as janitors, elevator and telephone switchboard operators, office, station, and warehouse watchmen, establish a basic minimum rate of $45 per month, and to this basic minimum rate and all rates of $45 per month and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $70 per month.

(e) The same increases provided for in sections (a), (b), (c), and (d) of this article shall apply to employees named therein paid on any other basis.

(f) The wages for new positions shall be in conformity with the wage for positions of similar kind or class where created.

ARTICLE II.

STATIONARY ENGINEERS (STEAM), FIREMEN, AND POWER-HOUSE OILERS.

(a) For all stationary engineers (steam), establish a basic minimum rate of $85 per month, and to this basic minimum rate, and all rates of $85 and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $110 per month.

(b) This order shall apply to chief stationary engineers.

(c) For all stationary firemen and power-house oilers, establish a basic minimum rate of $65 per month, and to this basic minimum rate, and all rates of $65 and above, in effect as of January 1, 1918, prior to the application of General Order No. 27, add $25 per month, establishing a minimum rate of $90 per month.

ARTICLE III.

LOCOMOTIVE BOILER WASHERS.

For all locomotive boiler washers who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 26 cents per hour, establish a basic minimum rate of 26 cents per hour, and to this basic minimum rate, and all hourly rates of 26 cents and above, add 12 cents per hour, establishing a minimum rate of 38 cents per hour, provided that the maximum shall not exceed 50 cents per hour.

ARTICLE IV.

POWER TRANSFER AND TURNTABLE OPERATORS.

For all operators of power-driven transfer and turntables who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 21 cents per hour, establish a basic minimum rate of 21 cents per hour, and to this basic minimum rate, and all hourly rates of 21 cents and above, add 12 cents per hour, establishing a minimum rate of 33 cents per hour, provided that the maximum shall not exceed 45 cents per hour.

ARTICLE V.

SHOP, ROUNDHOUSE, STATION, STOREHOUSE, AND WAREHOUSE EMPLOYEES (EXCEPT EMPLOYEES PROVIDED FOR IN HARBOR AWARDS).

(a) For all laborers employed in and around shops, roundhouses, stations, storehouses, and warehouses (except employees provided for in harbor awards), such as engine watchmen and wipers, fire builders, ash pitmen, boiler washer helpers, flue borers, truckers, stowers, shippers, coal passers, coal-chute men, etc., who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 19 cents per hour, establish a basic minimum rate of 19 cents per hour, and to this basic minimum rate, and all hourly rates of 19 cents and above, add 12 cents per hour, establishing a minimum rate of 31 cents per hour, provided that the maximum shall not exceed 43 cents per hour.

(b) For all common labor in the departments herein referred to and not otherwise provided for, who were on January 1, 1918, prior to the application of General Order No. 27, receiving less than 16 cents per hour, establish a basic minimum rate of 16 cents per hour, and to this basic minimum rate and all hourly rates of 16 cents and above add 12 cents per hour, establishing a minimum rate of 28 cents per hour, provided that the maximum shall not exceed 40 cents per hour.

ARTICLE VI.

MONTHLY, WEEKLY, OR DAILY RATES.

For all monthly, weekly, or daily rated employees in the departments herein referred to, and not otherwise provided for, increase the rates in effect as of January 1, 1918, prior to the application of General Order No. 27, on the basis of $25 per month.

ARTICLE VII.

MAXIMUM MONTHLY WAGE.

No part of the increases provided for in this order shall apply to establish a salary in excess of $250 per month.

ARTICLE VIII.

PRESERVATION OF RATES.

(a) The minimum rates, and all rates in excess thereof, as herein established, and higher rates which have been authorized since January 1, 1918, except by General Order No. 27, shall be preserved.

(b) Employees temporarily or permanently assigned to higher rated positions shall receive the higher rates while occupying such positions; employees temporarily assigned to lower rates positions shall not have their rates reduced.

ARTICLE IX.

EXCEPTION.

The provisions of this order will not apply in cases where amounts less than $30 per month are paid to individuals for special service which only takes a portion of their time from outside employment or business.

ARTICLE X.

HOURS OF SERVICE.

Eight consecutive hours, exclusive of the meal period, shall constitute a day's work.

ARTICLE XI.

OVERTIME AND CALLS.

(a) Where there is no existing agreement or practice more favorable to the employees, overtime shall be computed for the ninth and tenth hour of continuous service pro rata on the actual minute basis and thereafter at the rate of time and one-half time. Even hours will be paid for at the end of each pay period; fractions thereof will be carried forward.

(b) When notified or called to work, outside of established hours, employees will be paid a minimum allowance of three hours.

(c) Employees will not be required to suspend work during regular hours to absorb overtime.

ARTICLE XII.

PROMOTION AND SENIORITY.

(a) Promotions shall be based on ability, merit, and seniority. Ability and merit being sufficient, seniority shall preval except, however, that this provision

(Continued on page 17.)

Great Economies to Be Made by Rules Regulating Rubber Footwear Styles

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

Important economies in materials through reductions in patterns, discontinuance of production of various styles in rubber footwear, and regulations as to styles authorized are effected under a schedule worked out by the Conservation Division of the War Industries Board with representatives of the manufacturers, and made operative September 1 last, as to all canvas rubber-soled shoes, and on January 1 next as to waterproof goods.

Estimates of Saving.

It is estimated by the Conservation Division that the program will conserve among other things 29,012,600 cartons; 5,245,300 square feet of lumber, 1,526,493 square feet of shipping and storage space, 10,742,517 pounds of weight (freight), or 4,795 tons, 2,250,272 pounds of material that will not have to be dyed 74,750 pounds of flour starch, 30,380 gallons of varnish, 125,300 pounds of tissue paper, 49,617 days' labor that may be diverted to more essential work.

The new schedule eliminates for the period of the war 5,500 styles of rubber footwear, and restricts introduction of new lasts other than as required by the Government or to meet changes in leather footwear styles. The manufacture of men's hip and sporting rubber boots is to be restricted to one grade only and all duck boots to be discontinued as far as possible. Leather insoles in all boots will be discontinued. Women's, boys', and youths' hip and sporting boots will not be manufactured at all. The manufacture of knee boots will be discontinued.

Reductions in Styles.

Reductions in styles include the limiting of rolled-edge arctics and gaiters to men's sizes; and discontinuance of first-quality all-rubber gaiters. "Omaha" arctics and excluders, misses' and children's snow excluders, boys' and youths' jersey-cloth arctics, motormen's gaiters for men, plow shoes, high-lace lumbermen's duck vamp with gum uppers, all two-buckle jersey-cloth gaiters, men's one-strap (instep) sandals, all plain sandals and self-acting sandals and "croquet" with fleece lining (storm patterns not included), self-acting storm patterns, Russian rubbers, low-vamp Alaskas (not storm patterns), boys' and youths' Alaskas, clogs, youths' self-acting sandals, all self-acting Alaskas.

Height of Buckle Gaiters.

Buckle gaiters are not to be made higher than the present 4-buckle height in men's, boys', and youths', and the 3-buckle height in women's and misses' and children's. The manufacture of jersey-cloth gaiters and Alaskas authorized is to be restricted to first and extra quality. Use of flour starch or similar finish is greatly restricted; cashmerette or so-called heavy arctics or gaiters and canvas rubber-soled shoes are not to be varnished; dyed linings, except where fleece lined, are to be discontinued. All use of caustic soda in the manufacture of rubber footwear is to stop at once.

WAGE SCALE FOR RAILROAD CLERKS

(Continued from page 16.)

shall not apply to the personal office forces of such officers as superintendent, train master, division engineer, master mechanic, general freight or passenger agent, or their superiors in rank and executive officers. The management shall be the judge, subject to an appeal, as provided in Article XIII.

(b) Seniority will be restricted to each classified department of the general and other offices and of each superintendent's or master mechanic's division.

(c) Seniority rights of employees referred to herein—to (1) new positions; (2) vacancies—will be governed by paragraphs (a) and (b) of this article.

(d) Employees declining promotion shall not lose their seniority.

(e) Employees accepting promotion will be allowed 30 days in which to qualify, and failing, will be returned to former position without loss of seniority.

(f) New positions or vacancies will be promptly bulletined for a period of 5 days in the departments where they occur. Employees desiring such positions will file their applications with the designated official within that time, and an appointment will be made within 10 days thereafter. Such position or vacancy may be filled temporarily pending an assignment. The name of the appointee will immediately thereafter be posted where the position or vacancy was bulletined.

(g) In reducing forces seniority shall govern. When forces are increased employees will be returned to the service and positions formerly occupied in the order of their seniority. Employees desiring to avail themselves of this rule must file their names and addresses with the proper official. Employees failing to report for duty or give satisfactory reason for not doing so within seven days from date of notification will be considered out of the service.

(h) A seniority roster of all employees in each classified department, who have been in the service six months or more, showing name, date of entering the service, and the date of each promotion or change, will be posted in a place accessible to those affected.

(i) The roster will be revised and posted in January of each year, and shall be open to correction for a period of 60 days from date of posting, on presentation of proof of error by an employee or his representative. The duly accredited representative of the employee shall be furnished with a copy of roster upon written request.

ARTICLE XIII.

DISCIPLINE AND GRIEVANCES.

(a) An employee disciplined, or who considers himself unjustly treated, shall have a fair and impartial hearing, provided written request is presented to his immediate superior within five days of the date of the advice of discipline, and the hearing shall be granted within five days thereafter.

(b) A decision will be rendered within seven days after the completion of hearing. If an appeal is taken, it must be filed with the next higher official, and a copy furnished the official whose decision is appealed within five days after date of decision. The hearing and decision on the appeal shall be governed by the time limits of the preceding section.

(c) At the hearing or on the appeal the employee may be assisted by a committee of employees or by one or more duly accredited representatives.

(d) The right of appeal by employees or representatives, in regular order of succession and in the manner prescribed up to and inclusive of the highest official designated by the railroad, to whom appeals may be made, is hereby established.

(e) An employee on request will be given a letter, stating the cause of discipline. A transcript of evidence taken at the investigation or on the appeal will be furnished on request to the employee or representative.

(f) If the final decision decrees that charges against the employee were not sustained, the record shall be cleared of the charge; if suspended or dismissed, the employee shall be returned to former position and paid for all time lost.

(g) Committees of employees shall be granted leave of absence and free transportation for the adjustment of differences between the railroad and the employees.

ARTICLE XIV.

RULES FOR APPLICATION OF THIS ORDER.

(a) It is not the intention of this order to change the number of days per month for monthly paid employees. The increases per month provided for herein shall apply to the same number of days per month which were worked as of January 1, 1918.

(b) The pay of female employees for the same class of work shall be the same as that of men, and their working conditions must be healthful and fitted to their needs. The laws enacted for the government of their employment must be observed.

ARTICLE XV.

INTERPRETATION OF THIS ORDER.

The rates of pay and rules herein established shall be incorporated into existing agreements, and into agreements which may be reached in the future, on the several railroads, and should differences arise between the management and the employees of any of the railroads as to such incorporation, intent, or application of this order prior to the creation of additional railway boards of adjustment, such questions of difference shall be referred to the director of the division of labor for decision, when properly presented, subject always to review by the Director General.

Agreements or practices, except as changed by this order, remain in effect.

W. G. McADOO,
Director General of Railroads.

Method of Handling Oversea Mail and Causes of Delay Explained by Army Officer Sent Home for the Purpose

The following statement as to what is being done to expedite the delivery of soldier's mail is authorized by Capt. Frank E. Frazier, assistant director of the American Expeditionary Forces postal service in France:

GETTING LETTERS TO OUR SOLDIERS IN FRANCE.

Capt. Frank E. Frazier, United States Army, assistant director of the American Expeditionary Forces postal service at Tours, France, has been sent to the United States on a mission relative to postal affairs, with authority to furnish information heretofore, for military reasons, withheld from the postal officials. The military authorities found it necessary, in order to secure prompt delivery of soldiers' mail, to provide the military postal officers in France with complete information as to the location of troops. The military postal officers at the central post office in France have now been afforded access to the card-index directory of The Adjutant General's Department, located in the same building; and on his arrival in this country Capt. Frazier furnished, under seal of secrecy, to the postal officers a directory giving the location of troops in France and a record of those on the way. Orders have been issued to send mail on every boat destined to dock at any port in France organized to receive mail. This, and the adoption of a scheme of designation for groups of unattached men sent from the United States to replacement camps in France, which is recommended by Capt. Frazier, will, it is believed, go a long way toward expediting the delivery of letters to soldiers.

Address of 50,000 Inadequate.

The mail of more than 50,000 of our soldiers in France is delayed and perhaps can not be delivered at all. The reason for this is that letters for a greater number than 50,000, in the aggregate, are improperly or inadequately addressed.

Complaints covering these delays are sufficient to give the public the impression that the soldiers' mail service is bad, but besides the improper addressing of letters, which is woefully common, there are other reasons for delay in the delivery of soldier's mail which can not be avoided by the military postal service any more than it could be when this service was conducted by the Post Office Department.

These delays affect a relatively small proportion of the mail, but the number is sufficient to give rise to a very general, if unjust, criticism of the postal service.

One Obstacle Removed.

Delays caused by military objection to furnishing the civilian postal officials with information as to the location of troops are now, in a measure, cured by this information being given the Army officers directing the mail service. Letters could not be promptly delivered without knowledge as to where they were to be sent. Military officials are also provided now with transportation facilities which were not provided by the Army for the civilian servce.

But at times there is still delay to the mail after it reaches port in France. Some of these are absolutely unavoidable if the safety and welfare of our troops are to be given first consideration. Others can be avoided, and steps to that end which were impossible under military restrictions upon civil authorities have been or are being taken.

Average Time Three Weeks.

Only in exceptional cases, and under circumstances which will be explained, does it take more than three weeks for a properly addressed letter to reach a soldier in France who is attached to an organized unit of the Army. Most of the mail reaches its destination in less time than that. The great mass of letters to and from the Expeditionary Forces go and come on schedule time.

Yet exceptional circumstance may delay a soldier's mail as much as two or three months, or he may not get it at all. In the extreme case where there are several soldiers of the same name it will be because his letters are improperly addressed and he has failed to correct the conditions by furnishing his proper address. There are no delays, or at most none greater than a few days, when the soldier is located with the organized forces and the letter is properly addressed.

Duplication of Names.

In view of the duplication of names in the American Expeditionary Forces, the absence of any distinguishing designation for groups of casual or replacement men has been a source of difficulty in the delivery of mail. Thousands of soldiers are being sent to France every month from this country for replacement purposes. They come from various cantonments—Pike, Meade, Humphreys, Lewis, and elsewhere, and are usually designated simply "Camp Pike August automatic replacement draft," or some similar designation, and part of that particular draft may be sent to one replacement camp in France and part to another. Mail now forwarded to these soldiers who have been scattered among organizations at the front—"floaters' mail"—goes to the central post office at Tours and its distribution there is still further hampered by being mixed up with the accumulation of misdirected mail. It is estimated that 300,000 letters a month were delayed from this cause. This delay in delivery will not occur under arrangements which have just been made to have each replacement unit of 250 men or less as it leaves camp in the United States given a distinctive company number which it will retain until it reaches a replacement camp in France. Every member of such unit will then be one of 250 men instead of one of one and a half million men. The John Jones of the small unit will be easily located.

Directory Sections Established.

At each replacement camp in France a directory section of the Army post office has been established, and mail for a replacement soldier will hereafter follow him to the unit to which he is sent from that camp, the clerks in the directory section of the post office using the card records of the statistical division of the camp commander. It still rests with the soldier to immediately notify his correspondents as to his correct address, and with the various cantonments in the United States to see that mail addressed to him at the cantonment is properly indorsed for forwarding to France. It is equally important for the soldier to notify his correspondents immediately upon his assignment to a definite unit in France.

Delays in the delivery of mail which can not be avoided are liable to occur at any time during a period of great activity and secret movement of troops. Where the success of a troop movement on the front depends upon secrecy, mail can not be sent to members of a mobile force until they are established at the selected destination. Whatever delay is involved in this, whether 24 hours or several days, must be accepted as a military necessity. The same is true when shipments of supplies, munitions, fresh meat, etc., are such as to make an extraordinary demand upon transportation facilities from the French ports. Such delays, however, are but for a few days at most. When a divisional post office is moved in connection with a big troop movement great secrecy has to be exercised. No word, even to the Army postal authorities, is permitted concerning the secret troop movement until the troops have been located permanently enough to permit the sending of mail. Under these conditions a week's delay in the delivery of mail is possible.

Mail for Wounded Men.

Every care is taken in expediting the mail for wounded men in hospitals. The only delay in the delivery of such mail is that which is absolutely unavoidable. A wounded man may be sent from one hospital to another, and even to several, before reaching a permanent base hospital, and if detained a day or two at each of the hospitals through which he passes in transit, his mail will be delayed until he is at a hospital long enough for it to reach him. If he should be but slightly wounded, not being at the hospital long enough to get his mail, and then should be assigned to a new organization, there would be some further delay, but in none of these cases is the delay great. The hospital authorities are required to notify the central post office, as well as his company commander, immediately on the arrival of the soldier there for treatment, and mail is sent to him at once. There is no delay whatever in mail sent home by or for the wounded man. It is only that addressed to him that may be slightly delayed prior to his permanent location.

Only two causes of delay have occurred at the port of embarkation in this country. One is the posting of the letter just too late to make the transport, when a week might pass before another sailing. The remedy for this does not lie with the postal service. The other is the limitations placed upon ocean transportation facilities and lack of information as to the destination of the ships. Unless the

Method of Handling Oversea Mail and the Causes of Delay

military port officer at the American port of embarkation knows that an outgoing steamer is to land at a French port organized to handle the mail, it can not be sent by this steamer, as she might be bound for a port where there is no American post office and no postal employees to handle the mail. This difficulty has just been cured by a War Department order which directs that this information be furnished the military port officer.

The "Later Letter First" Puzzle.

One of the most puzzling things to the public has been the frequent occurrence, both as to mail delivered in France and mail received in this country, of a letter of a later date being received before one mailed perhaps a week or more earlier. One explanation of this is that the postmaster at the port of embarkation has been assigned by the War Department a definite limited space for mail, and when the amount of mail has exceeded this the excess has had to be held over until the next steamer. If there were, say, 2,000 bags ready for shipment and the postmaster was notified that only 800 could be handled, the surplus, 1,200 bags, would have to lie over, being included in the mail accumulating for the next steamer. Such an excess of mail might occur several times and some of the bags missing the first mail might also be among those left over from the second. This situation will be remedied by an order from the War Department that, upon proper notice in advance from the postal officer at the port of embarkation as to the number of sacks to be handled, the entire volume shall be cleaned up at each sailing.

The possible delay that would be unavoidable, though unusual, in the transportation of a letter from New York to a divisional post office at the front in France might be 21 days—one day in distributing in New York; 7 days on account of just missing a boat; 3 days on account of shortage of freight cars for carload transportation from the port of debarkation in France; 7 days on account of secret troop movements; and, in case of severe fighting, a holdup of trains carrying mail of perhaps 3 days. This exceptional delay would increase the normal time of from two to three weeks for the delivery of mail, to from five to six weeks. Normally it takes from two to three days to deliver a letter at the front after its arrival at a French port.

Delays Due to Censorship.

Delay that has occurred in the delivery in the United States of soldier's letters mailed in France is some times due in a slight extent to the censorship. Usually the delay from this cause is not great, but there have been cases, under exceptional circumstances, where it has been as much as three weeks. A cause of delays in mail coming this way is that the civilian postal officials to whom this mail is delivered at the French port have had but one port of embarkation for all mail. The dispatching of mail is therefore limited to the sailing time of steamers from that port, whereas steamers are sailing from other ports which also might carry mail. The reason for this restriction to one port is that the military authorities regarded it as inadvisable to furnish the civilian postal authorities, to whom the mail is turned over at the port of embarkation, with the sailing dates of vessels from other ports. This matter has been adjusted now so that the postal officials may take advantage of the opportunity afforded by sailings from other ports for the dispatch of mail.

Complete Postal System.

A complete postal system corresponding to that in the United States is now in operation in France, with a central post office located at Tours. This service in France, except the distribution and dispatch of mails to the United States, is entirely under military control, the director and assistant directors being commissioned Army officers and the entire force being a part of the military service. Nearly all of these officers and soldiers detailed to this work are men formerly employed in the Postal Service of the United States, former railway-mail clerks being employed in the handling of mail on postal trains, and others acting as distributers, etc. France is divided into three postal districts, each district in charge of an Army officer who was formerly a postal official; and these districts are under the supervision of the director at the central post office at Tours, Lieut. Col. T. D. Howe. Permanent post offices are established at numerous points, and mobile post offices are right at the front and move with a division to which they are attached. They are frequently under fire. The commanding officer of each company or military establishment is required to detail from his company a mail orderly especially selected for the purpose of receiving and handling mail. Wherever possible a man with former postal experience is drawn from the ranks for this purpose. Every mail orderly is required to keep an accurate record of officers and men attached to or formerly attached to his unit and to keep a record of changed addresses. This record is alphabetically arranged and the location of every man is noted up to date.

Finding Men in Hospitals.

Where a man is sick or wounded and the orderly has no record of his whereabouts, mail for him is indorsed "sick" or "wounded," giving the date. The letter then goes to the central post office at Tours, which is furnished by the hospital with the names of all those under treatment, identified by the designation of the unit to which they belong. The central office is informed also of every removal of a soldier from one hospital to another when in hospital long enough to establish an address. A perfect card system is employed to keep track of all who are in hospitals, and there is no delay in the delivery of mail unless it is that of a wounded soldier in transit or so slightly wounded as to be discharged before a letter could reach him.

The central office at Tours is in the same building and associated with the Central Record Division of The Adjutant General's Office, where is kept a card-index record up to date of the whereabouts of every man in the service, whether fighting at the front, on detached duty, or in the hospital, or wherever he may be. The mobile post offices, which are in charge of 27 men, the equivalent to a post office for 30,000 people, keep right along with the troops, and the mail for each company is received with the rations at the kitchen and distributed at the company headquarters by the mail orderly. The postal service extends right into the fighting trenches. The central post office at Tours is a clearing house for any mail that can not be disposed of promptly. One hundred and fifty men are employed constantly for nothing but search of addresses, and the superintendent of this office is furnished daily with a record of the location of troops.

Million Letters a Day.

It is estimated that a million letters per day arrive in France for members of the American Expeditionary Forces. There is also a large volume of mail for soldiers—about a third as much as that from home—mailed locally in France. In dispatching mail from the United States letters are sent to certain ports and other classes of mail to another, so that letters may be in no way interfered with by mail matter of less importance.

Warehouses have been built at ports of debarkation for sorting bags of mail as they are received from the United States. On approximately 2,000 miles of railroads in France American railway mail service is now in operation, and regular postal cars in charge of American soldiers acting as railway mail clerks are sent through from the port of debarkation daily to certain points where permanent post offices are established. Soldiers in the military postal service have been placed at all important junction points on these lines to act as transfer clerks. When boats arrive, full carloads of bags of through mail made up in Chicago and New York addressed to companies and batteries are sent to destinations in France in charge of a guard who returns to the port in about three days.

Changing Mobile Offices.

Under military control all changes of mobile post offices are flashed in code to the mail distributing points. The frequent military necessity for withholding this information when the service was under civil control sometimes resulted in a delay of as much as three weeks, but with the information immediately available, as it now generally is to the military post offices, there is seldom occasion for delay. A very material saving of time in the delivery of mail will be accomplished also by an order having the approval of Gen. Pershing under which the postal officers in the United States have been furnished, under the seal of absolute secrecy, with a directory of the location of all troops in France and all who are on the way. With this information [illegible] distribute and sack for delivery at its proper destination each mail [illegible] before [illegible] sorted and distributed on its arrival in France.

It is believed that [illegible] information and military transportation [illegible] mails the occasion for delay in the delivery of soldier's mail will be eliminated, except as to that which is improperly addressed. The matter of the address to

(Continued on page 23.)

WHAT DO SHIPS MEAN TO YOU?

Chairman Hurley's Question Answered by Men upon whose Shoulders Much of the Mighty Burden of a Stupendous War is Now Resting

UPON ocean tonnage the outcome of the war depends. Leaders of the allied armies and all students of the stupendous conflict in which the greater part of the world is engaged are agreed that the winning of the war depends upon our ability to build ships in required numbers and with sufficient speed to move our armies to the battle lines, maintain them with supplies and the allies with food.

Upon the United States Shipping Board Emergency Fleet Corporation has devolved the task of supplying this vital need. That our Government officials are keenly alive to this need of ships is shown in the accompanying replies to a question which Chairman E. N. Hurley of the Shipping Board has addressed to heads of important departments. The essence of that question was, "What do ships mean to you?"

The replies are wonderfully informative, disclosing, as they do, that there is not an angle of our national life that is not in some way interlocked with shipping. It is shown that ships are vital to the war program. They are equally essential to the exporter and to the importer. They are the reliance of the merchant, and farmers are now beginning to realize that without ships to move his grain and produce these will congest in storehouses and on wharves. They are essential for the food and fuel supply of ourselves and our allies. In the following replies to the query, "What do ships mean to you?" our numerous other needs for ocean tonnage are described:

President Wilson Says:

We must supply ships by the hundreds out of our shipyards to carry to the other side of the sea, submarines or no submarines, what will every day be needed there, and abundant materials out of our fields and our mines and our factories with which not only to clothe and equip our own forces on land and sea but also to clothe and support our people for whom the gallant fellows under arms can no longer work, to help clothe and equip the armies with which we are cooperating in Europe, and to keep the looms and manufactories there in raw materials; coal to keep the fires going in ships at sea and in the furnaces of hundreds of factories across the sea; steel out of which to make arms and ammunition both here and there; rails for worn-out railways back of the fighting fronts; locomotives and rolling stock to take the place of those every day going to pieces; mules, horses, cattle for labor and for military service; everything with which the people of England and France and Italy and Russia have usually supplied themselves but can not now afford the men, the materials, or the machinery to make. (Extract from an address, Apr. 16, 1917.)

Secretary of War Baker

To Secretary of War Baker the great merchant fleet which the Shipping Board is constructing has this meaning:

Each new ship added to our transport service means more American soldiers on the fighting front, more American soldiers in training behind the firing line, more supply workers to make secure the men in camp or trench, more doctors and nurses to care for the wounded, more food and clothing and comforts for our forces abroad, and more vital assistance to our associates in the war.

Ships, then, are indispensable. Greatly as our people have responded in all phases of war activity, the registration of their power is still determined by ships. We have to bridge 3,000 miles of dangerous water to strike the blows which are required to end the menace of ruthless militarism. Not a bullet can be fired nor a mouth fed by Americans over there unless a rivet has first been driven home here.

They have, indeed, done well. This Nation, and all that is free and hopeful in mankind, owes to them a great debt for the earnest manner in which they have rallied to their task. But they will do better, for their souls are in their work, and the human soul when inspired with visions of noble service is ever capable of tapping new reserves.

I bid them speed! The Army will be ready when the ships are ready.

NEWTON D. BAKER,
Secretary of War.

Secretary Daniels

To Secretary Daniels ships of our new merchant marine have this significance:

The chief business of the Navy so far during this war has been to keep safe the road to France. This work has been well done, due to the skill, knowledge, and courage of the men who man our fighting ships. But capable as has been the overseas transport service, brave and courageous as our soldiers and marines who are winning victories in France, the vital need has been ships, and ships, and more ships to carry our fighting men, munitions, and supplies. We need more, and every man who drives two rivets where one has been driven before is a public benefactor. More than that, he belongs to the mighty army which is preserving liberty for the men of our day and for the man of future generations.

All honor to the men who have expedited shipbuilding, who in freezing weather and in burning heat have heeded the naval signal "full speed ahead" in building ships. And all honor, too, to those who, in this supreme hour, are putting on additional steam in this patriotic service. They are as truly doing their part to win the war as are the men on the ships and in the trenches.

JOSEPHUS DANIELS,
Secretary of the Navy.

Food Administrator Hoover

Here is what Mr. Herbert Hoover, Food Administrator, says of the need of shipping:

No phase of our war program can be wholly divorced from the shipping situation. This is clearly shown in the case of foodstuffs. It is the shortage of ships which has placed upon us the responsibility of supplying the major share of all foodstuffs needed to maintain the millions of soldiers and civilians who are bearing the brunt of Germany's assaults upon the western front.

While it entails sacrifices on the part of each of us, our service to those across the sea can not be regarded as a burden. This is our war just as much as it is theirs. It is not, as in Germany, the war of a few people who control the multitudes. It touches each one of us, and if we are to be victorious each one of us must respond willingly and gladly to every appeal.

Until we are building ships fast enough to supply all war demands, we can not hope to be relieved of the responsibility for utmost conservation. In this year's crops, we very probably see the height of our war-time food production. As we are drawn deeper into the war the situation must become more serious; we must look for a steady degeneration of labor and for reduced production. More and more men will be drawn from accustomed pursuits and enter into direct war activities, as fighters or industrial workers who are supplying the actual sinews of war.

It will become increasingly difficult for us to provide for both the people in Europe and those in America, unless by the production of ships we can partially open up other sources of supply. So great is the present stringency that these other ports must be eliminated, so far as possible, in order that our few ships may ply at capacity. The effectiveness of each ship taken from the Australian trade, for

SHIPS, AND WHAT THEY MEAN TO AMERICA IN WAR AND PEACE

instance, is trebled, as it could make three round trips from Europe to America while making one from Liverpool to Sidney. Each one diverted from the Argentine doubles in efficiency.

Only if we have more ships can we expect any degree of freedom in manipulating the food supplies of the world, so that Europe may be fed without a serious drain upon other countries. We are faced with this tonnage problem in meeting our present sugar situation, which is almost wholly due to difficulty of transport and consequent inability to tap stocks in distant sources of supply.

Until the world's tonnage is sufficient to allow freer use of vessels, European supplies must be maintained largely from what can be spared in the United States. The measure of our service may be lightened only in direct ratio to the increase in marine shipping facilities.

HERBERT HOOVER,
Food Administrator.

The Fuel Administrator

Mr. Garfield, Fuel Administrator, says that ships are a vital factor in the problem of maintaining the Nation's fuel supply.

The Fuel Administration must depend upon ships to supply two great and important sections of our country with coal to keep the people warm and to maintain the constantly increasing industrial activities necessary to the proper prosecution of the war. New England, crowded with great war plants which are turning out a multiplicity of material for our Army and Navy, must be supplied to a large extent by ocean shipments from southern tidewater ports. The overburdened railways can not carry more than approximately one-third of New England's coal supply for the year. The remainder demands ships. Without them the wheels of New England's war industries must stop and New England's people must suffer.

The great section of our country at the northern end of the Great Lakes must likewise depend upon shipping for its coal supply. A great fleet of coal-carrying vessels must be in constant service from the lower lake ports to the great coal docks of Lake Superior and Lake Michigan throughout the open season if the great Northwest is to secure its winter coal supply. The enormous tonnage of coal demanded by this section can not be imposed upon the already overburdened railroads. It must move by water and it must move while the Great Lakes are open for navigation.

All of this means ships, and as the program of the Shipping Board continues to be worked out, ships sufficient to carry the coal supply become available. To-day ships are available to move the constantly increasing coal production. But railroads, ships, and coal must grow together in order that a coordinate machinery may be always at hand to keep the Nation supplied with fuel.

Fuel is a vital factor in maintaining the Nation's shipbuilding and in moving the Nation's ships after they are built.

As the armies of the United States in France are enlarged, which enlargement is steadily going on, the materials to support them will have to be increased correspondingly. This means more ships to move the commodities of warfare; it means more materials which have to be manufactured; it means increased railroad capacity to forward raw materials and finished products; it means more factories to produce more materials.

All of which, depending on ships for the final transportation over 3,000 miles of ocean, likewise means more coal.

With every additional ship that puts to sea, the fuel requirements of the Government are enlarged. Each must be supplied with fuel, either coal or oil. The annual coal requirements budget of the Fuel Administration prepared early in the year, included 10,000,000 tons of bituminous coal for bunkering of ships.

Later estimates of coal required for bunker purposes for 1918, for steam coal-burning vessels of 500 gross tons and over, in ocean service, including American and foreign vessels bunkering in United States ports and excluding warships operated by the Navy, bring the total requirements up to 11,790,000 tons. With tonnage for United States naval ships, amounting to 4,269,000 tons, added, the total requirements for this particular class of coal have grown to 16,000,000 tons. This is the July, 1918, status. The increased requirement is already 100 per cent beyond that of last year. As the program of the Shipping Board gains impetus, the responsibilities of the United States Fuel Administration are correspondingly enlarged.

HARRY A. GARFIELD,
Fuel Administrator.

Bernard M. Baruch

By Bernard M. Baruch, chairman, War Industries Board, ships are regarded as vitally essential for the winning of the war and for the great part we are destined to play when the war is over:

When primitive man's needs became larger than his immediate environment could satisfy, he traveled by land to wider sources of supply. Then he learned to reach new fields by water. Since then he has discovered the means of using a third element, air, but that as yet is not usable industrially. The fullness of his life depends upon man's ability to use land and water transportation. His needs in peace were great. In time of war they were multiplied. It is not too much to say that the very life of the Nation depends upon her unrestricted access to remote points; it might be even better to say the very life of the world, since the fate of the world is so indissolubly bound up with that of America and her associates.

All of this is expressed in forms of ships. Others will write of what ships mean in relation to men, to material, to food, to fuel, and to trade. I can make plain how much they mean to the governmental agency with which I am connected and which stands as a point of supply for our three great war factors—the War Department, the Navy Department, and the Shipping Board. Of equal importance, it is charged with the duty of answering the needs of the civilian population.

In each of these enterprises ships are vital essentials. Over the water routes come to us the nitrates for explosives; manganese for steel; wool for clothing; hides for leather; oil for fuel; rubber for many industrial and medical purposes; cotton, hemp, sisal lumber, minerals of various sorts, and hundred of other items necessary to prompt and effective conduct of the war.

Ships have helped to lay the foundation of our increasingly great part in the war; ships will help to make certain the great part we are to play in the days to come, for America has emerged from her isolation and her ships will project her friendship and commerce over all the world's waters.

BERNARD M. BARUCH,
Chairman War Industries Board.

Chairman McCormick

Development of trade is dependent upon adequate supply of ocean tonnage, asserts the chairman of the War Trade Board.

The increase in our shipping facilities through construction of a large number of American vessels means for the War Trade Board an opportunity to realize its program and policies along broader and more positive lines than has heretofore been possible. The functions with which this board has been intrusted by the President comprise, generally speaking, the war-time regulation of our foreign trade and the dependence of trade upon shipping is a truism almost too obvious for statement here.

Regulation of our foreign trade, be it noted, and not restriction is the essential mission of the board. Unfortunately, however, the world shortage of tonnage and the demand for ships, ships, and more ships to transport and maintain our rapidly growing Armies in Europe and to supply our cobelligerents have forced the board to work to a considerable extent along lines of restriction, particularly of imports, deferring the almost equally important function of encouraging and developing our foreign trade under war conditions.

Construction of American ships in large quantities means to us the opportunity to license freely the importation of all required raw materials of foreign origin where we are now compelled to pick and choose among most more and less essential supplies and to adjust by painful study and calculation the relative amounts of indispensables which we can and must import.

It means the possibility of free export of American commodities which can be spared under our war program to overseas destinations to help pay for our great war imports or raw materials and to redress the adverse balance of trade running so strongly against us in many foreign countries. Payment for war imports by commodity exports rather than by our precious and limited stocks of gold

SHIPS, AND WHAT THEY MEAN TO AMERICA IN WAR AND PEACE

is a war measure of prime importance and it should not be forgotten that exports even of articles to us of nonessential or luxury character which help us to pay for essential imports may from a war standpoint be regarded as essential. Adverse balances of trade mean the payment of higher prices for foreign purchases, each penny taken from the exchange value of our dollar in the marts of a foreign land meaning an extra cent added to the price charged us, and adverse balances may in this war be redressed only by shipment of wares. Our enterprising merchants and manufacturers, too, laboring under so many war burdens, are entitled to the openings for export which more ships will give them.

Shipbuilding means to us, inter alia, an easier and more grateful task in our negotiations with the neutrals. Not only will our exchange problems, noted above, be lightened, when we are no longer compelled to pay such exalted prices for the carriage of freights in neutral steamers, but can transport them more and more in our own vessels, but our offers of supplies to the neutrals can be more liberal, our calls upon their tonnage less pressing, and our relations with them more facile, when our great shipbuilding program comes into full fruition.

So, too, we shall be able to fulfill in far more liberal measure our obligations toward our allies and friendly neighbors in Latin America, who are dependent on the United States for so many of the commodities required for their wellbeing or comfort, and for whose products the natural market is in such large measure offered by this country. Lack of ships has during the war hampered our trade relations with these neighbor nations of the American continent more than we like to contemplate; adequate American tonnage means an opportunity for full development of the great trade possibilities between the peoples of this hemisphere opened up in consequence of the war, and of that friendship and understanding which commercial intercourse does so much to promote.

VANCE MCCORMICK,
Chairman War Trade Board.

Secretary McAdoo

Secretary of the Treasury McAdoo, who is also the Director General of Railroads, urges haste in building ships.

We are in the midst of a great war, a war involving the very life and security of America.

Our job is to destroy the military despotism of the German Kaiser and to make the Stars and Stripes wave triumphant over the battle fields in France and thereby reestablish liberty and make safe for the future all the free and independent peoples of the earth. That is our job and that is the job which America's brave soldiers and sailors can not do by themselves. They can do it only if the laboring men do their full share, and their full share is to work with all their might and main to turn out quickly the ships which are imperatively needed to carry our gallant soldiers to France and to keep them supplied with food and clothing and arms and ammunition and great guns, so that they may smash the Kaiser quickly and restore peace to a stricken world. Wouldn't it be a crime if we who stay at home should send 1,800,000 of our brave sons to France and then fail to supply the ships and all the munitions of war to enable them not only to save our liberties, our lives, and our property, but at the same time to fight successfully the German armies against whom we have sent them. Think of the bloody task we have given our soldiers and sailors and how much better off we are who stay at home, with our lives protected, plenty of work to do, and high wages and nothing to endanger our future unless we fail to back our boys in the armies in France so that they can win the great victory for us.

The one thing most needed now by America's soldiers and sailors is ships, ships, ships. We need ships to carry our gallant boys across the stormy waters of the Atlantic through the hazardous submarine zone, ships to send them guns and bullets and powder and food and clothing, without which they can not fight. It is the men working in the shipyards, upon whom the Nation must rely to build these ships in time. What a splendid privilege and opportunity these men have to save democracy. What a fearful calamity to the world it would be if they fail to turn these ships out in time.

WILLIAM GIBBS MCADOO,
Director General of Railroads.

Secretary Redfield

America's freedom of the seas, says Secretary Redfield, depends upon her shipping.

I will tell, in a few words, what shipbuilding work means to the Department of Commerce.

The commerce of the United States is like a man in a straight-jacket. There are certain things he may do; many more he may not do. Freedom, flexibility, these are gone. Commerce has become a weapon of war and is as truly directed to military uses as are armies or artillery. Current commercial thought is of war trade or war industries, and the necessities involved in these phrases are like bands about the expansive force of our commerce, holding it tight.

But commerce is an expansive force and it can not be wholly thus restrained. Certain needs of our 100,000,000 people must be supplied, and when reduced to their lowest still demand a large share of industry to assure that the processes of living shall continue.

Great opportunities lie open to us. In South America and elsewhere men seek the credit and the enterprise of which we are now the greatest reservoir. The future of America calls to the present not to neglect it and opportunity beckons from many a land with insistent finger. Much that we need is waiting for us.

To the expansive power of commerce, to the invitation of opportunity, to the call of the future upon the action of to-day, we have to reply, in large measure, "No ships," and again, "No ships."

To the constricting force of war trade and war industries is added the constricting power of no ships. America fighting for freedom seeks herself to be free, but has not liberty at sea for lack of ships.

It is up to the Shipping Board, first, that the Army shall have its fill of men and food and munitions and then may it come speedily that there may be freedom of the seas for American commerce to neutral lands, there to trade with those whose trade we need for the coming future and from whose trade we are now excluded by no ships.

The ultimate task then beyond the immediate one, is to set the commerce of America free.

WILLIAM C. REDFIELD,
Secretary of Commerce.

Secretary Wilson

What shipbuilding means to American labor is told by William B. Wilson, Secretary of Labor.

The program outlined by Edward N. Hurley, chairman of the United States Shipping Board, means that a very large number of men must be found who are capable of supplying labor. The finding of the right men for these jobs will be the very foundation of the success of this program, since the building must be prompt. Faithful, steady, conscientious workers must be discovered and turned over to the shipbuilding industry without delay. The hope of the war depends upon this.

Therefore Mr. Hurley's program means much to the Department of Labor. Taking the chairman's own figures—that 130 plants in 28 States on both coasts and the Great Lakes are now engaged in shipbuilding, and that more than one-half of these have been developed in two years—it may be seen that the National Department of Labor Employment Service has a tremendous task to perform. The employment exchanges in the various States are working day and night.

Mr. Hurley tells us that he will need for this work 4,000 new men a week until he has placed 400,000 laborers at shipbuilding.

To get these men, nearly every industry must contribute, for the shipyards must use the ability of skilled mechanics, artisans, blacksmiths, pattern makers, laborers in erecting, bolting, drilling, riveting, chipping, galvanizing, drop forging, etc. A ship requires all kinds of labor, from the very technical "tailoring in steel" to ditch digging in the shipyards. In order to build ships 20 trades must be used. There must be an enormous educational program giving thousands of men their first highly specialized knowledge. There is much that is big and hopeful about this—much that is of permanent constructive value. It will mean the organization of growing towns, the building of morale, which should be the finest in the world, the establishment of facilities under Government control which should result in stabilizing conditions.

With such inspiration, any laborer in the United States will be eager to give his best service. There can be found no

SHIPS, AND WHAT THEY MEAN TO AMERICA

greater loyalty nor more sincere patriotism than the American laborer feels.

WILLIAM B. WILSON,
Secretary of Labor.

The Postmaster General

Interrelation of commerce with mail facilities described by the Postmaster General. Now using naval vessels for carrying mail.

In regard to the transportation of the mails to foreign points, the service is restricted, except to Canada and Mexico, to the means provided by shipping, and without shipping the United States would be isolated from the rest of the world, and bound to other countries only by wires under the ocean and by electrical currents used in transmitting radio messages.

In the maintenance of the foreign-mail service, shipping is an absolute necessity and, with the withdrawals of mercantile vessels for use in the Navy Department in the transportation of troops overseas or for the now highly lucrative employment of freight carrying, the mail service has suffered and will continue to suffer unless the United States Shipping Board comes to its relief with the vessels that are under the control of that board or being built under its supervision. There appears to be no good reason why vessels of the Shipping Board that carry freight may not also carry mails, and the closest cooperation is hoped for between the board and the Post Office Department in order that the extension of the mail service may grow apace with the extension of the activities of the board.

Commercial interests in the United States suffer whenever there is a lack of mail facilities and, with shipping under the control of the United States authorities ample enough to take the place of the vessels of other nations withdrawn for war work, the extension of commercial intercourse with the United States will be increased and strengthened so as to guard against reduction in the future, no matter how great the opportunities offered by foreign bottoms after hostilities cease. At this time the department is availing itself of the opportunities afforded by naval vessels to carry mails to foreign ports to which there is a lack of carriers of other kinds, and the addition of vessels of the Shipping Board will surely give the United States the advantage in mail transportation which at no other time has the service enjoyed.

Parcel post to Belgium, Denmark, Greece, Liberia, the Netherlands, Norway, and Sweden was suspended because there were no steamships available to carry the mails direct from the United States to the respective countries, as the parcel-post service is restricted to vessels which land mails in the country to which they are directed and not at some intermediate country for onward transmission. Sixty years ago it was considered good service when one vessel a week reached New York with mails from Europe, yet, quite recently, for one week not a mail vessel came into the harbor from a European port.

In regard to the transportation of the mails between domestic ports, service by steamboat has heretofore been provided under contract awarded upon advertising for proposals. On the larger lines there has been practically no competition, resulting in the payment of high rates by the department for the transportation of the mails. Domestic service includes that between the United States proper and Porto Rico, Hawaii, and Alaska, as well as the service on the water routes within the States. However, under recent legislation, this department has ordered the carrying of the mails to Alaska and Hawaii as freight or express. If the Shipping Board constructs and operates vessels on which the mails can be carried on domestic routes, the Government will receive the advantage of having the mails carried at actual cost. Furthermore, the mail service could be considered in arranging schedules on the steamship lines and improved service be afforded.

A. S. BURLESON,
Postmaster General.

Secretary Lane

Secretary Lane, of the Interior Department, says ships will make America self-sufficient.

Ships mean to us the development of the minerals of the United States instead of their importation from foreign countries—making America self-sufficient industrially.

FRANKLIN K. LANE,
Secretary of the Interior.

HANDLING THE OVERSEAS MAIL AND SOME CAUSES OF DELAY

(Continued from page 19.)

insure prompt delivery is of vital importance. The misspelling of a name or the use of initials where a word should be spelled out may not only retard the delivery of a letter but may prevent its being delivered at all. Many thousands of letters are being constantly received which can not be promptly delivered, if delivered at all, on account of the manner in which they are addressed. The initials "A. C." may mean "Ambulance Corps" or "Administrative Company" or "Aviation Clearance Office;" while "A. C. C." means "Aero Construction Company;" "A. R. C.," "American Red Cross;" "A. I. C." means "Aviation Instruction Center," etc.

Write Names in Full.

Duplication of names of officers as well as soldiers run into the hundreds, and in some cases into thousands. The name of the soldier addressed should be written in full instead of using initials, and the branch of the service to which the soldier is attached should be written in full with the designation of company and regiment or battery and regiment, as well as that of the branch of the service to which he belongs. There are machine gun companies and machine gun battalions, entirely different and separate organizations. In some of the engineer organizations there are several different battalions, each battalion having company designations the same as companies of other battalions. For these organizations it is therefore necessary to give both designation of the company and the number of the battalion as well as of the regiment. A majority of the improperly addressed mail shows carelessness rather than a lack of knowledge of the proper address.

The War Department has now under advisement a proposition to stop all incompletely addressed mail at New York, returning it to the sender. This would save a great deal of time and relieve much disappointment and anxiety.

With what has been found or is now being done to insure the prompt delivery of mail, there should be no occasion for delay or nondelivery of letters to our soldiers in France if those writing them from home will realize that the silghtest inaccuracy or obscurity in the address of a letter is almost certain to cause delay and may result in nondelivery.

Except for delays due to improper addresses and occasionally to secret military movements, letters should reach the soldiers at the front promptly.

Proper Form of Address.

A letter for an American soldier in Europe should be so addressed as to show his rank, his full name, including his middle name, his company or battery, and his regiment, as well as the branch of service. A letter to "John Walter Smith, jr.", a private in Company L of the 102d Regiment of Infantry, should be addressed as follows, the return address of the sender to appear in the upper left-hand corner of the envelope:

Return to (Stamp.)
Mrs. John Walter Smith,
_____ Street,
Boston, Mass.

Private John Walter Smith, jr.,
Co. L, 102d Infantry,
American E. F.
Via N. Y.

SERIES OF WAR LECTURES.

A series of lectures illustrated with slides on the various war activities of the United States up to this time is being prepared by George F. Zook, professor of modern European history, Pennsylvania State College. The cantonments, airplanes, the Navy, shipbuilding, the trenches, and many other features of the war are described in an interesting and instructive way. The lectures will be especially useful for the work of teachers, Y. M. C. A. secretaries, and club officials.

Each lecture is accompanied by from 45 to 65 slides. The slides are of excellent workmanship and will be sold at the nominal price of 15 cents each. The lectures and slides will be available for use about October 1. For further information address the Division of Civic and Educational Publications, Committee on Public Information, Washington, D. C.

OFFICERS' TRAINING SCHOOLS ARE NOW OPEN TO CIVILIANS

Conditions Under Which Applications May Be Received for Enrollment.

The following is authorized by the War Department:

Applications of civilians for admission to Central Officers' Training Schools may now be received.

The age limits for admission of civilian applicants to the Central Officers' Training Schools are from over 18 to less than 46 at the date of registration. Special induction for training at these schools will be regulated so that a fair proportion of candidates shall come from (1) the Army at large in accordance with existing instructions, (2) civilians in class 1-A, (3) civilians of the deferred classifications, on grounds other than industry, occupation or employment, including agriculture.

Civilians in Class 1-A.

Civilians in Class 1-A, who may be admitted to Central Officers' Training Schools, with a view to obtaining commissions at the close of the prescribed course, will, upon entrance to the schools, be inducted into the service for the duration of the war, and provided that should they fail to obtain such commissions, they will be required to remain in the service.

Civilians in the deferred classifications on grounds other than industry, occupation or employment, including agriculture, who may be admitted to Central Officers' Training Schools, with a view of obtaining commissions at the close of the prescribed course, will, upon entrance to the schools, be inducted into the service for the duration of the war, and provided that should they fail to obtain such commissions, they may be given the option of a discharge from the service and a reversion to their original classifications under the Selective Service Regulations.

Applications at Schools.

The applications of civilians will be submitted as heretofore to the Army officers on duty at the various educational institutions throughout the country, as prescribed in the Memorandum of Information issued by this office. It is expected that this list will be supplemented in a few days. The final selection of civilian applicants will be made by the commanding officers of the various Central Officers' Training Schools.

No applications will be considered in the War Department.

Proposals on Officers' Uniforms Are Invited

OFFICE OF QUARTERMASTER GENERAL,
169 EAST SIXTEENTH STREET,
New York City.

Sealed proposals in triplicate will be received here until 11 a. m., October 1, 1918, for manufacturing officers' uniforms. Specifications and proposal blanks obtainable at office of depot quartermaster or at 109 East Sixteenth Street, New York City.

Drastic Measures Adopted in Europe to Control Fuel Supply of Nations

The Fuel Administration authorizes the following:

As a war measure the belligerent countries of Europe have been forced to take radical steps in order to insure an advantageous use of their coal resources.

The coal mines of Great Britain and Ireland were placed under Government control early in 1917. All dividends paid and all wage agreements must be approved by the Government. On account of the advance in cost of food and other necessities of living, which is figured there to average 94 per cent, increase in prices of coal amounting to from $1 to $1.60 per ton have been authorized. Army and navy requirements and other Government industries, including munition plants and railroads, are given priority in the distribution of coal and the allotment of cars.

Many Miners in Army.

At the beginning of the war about 241,000 miners of the United Kingdom, out of a total of about 1,000,000, enlisted in the army, and the industry was seriously crippled for a time. The Government tried to have these men returned to the mines, but less than 20,000 were sent back. Then a regulation was put in force providing that no miner could enlist in the war without the approval of a local board established in each district to pass upon enlistments. The result was that men employed in various other occupations immediately applied for work in the mines.

Conservation in Great Britain is governed by drastic rules. If cinders are found in the dustbin of any consumer he is liable to six months' imprisonment. No one can consume more than 22½ tons per year without a special permit. For 1917 the winter ration scale allowed the use of 200 pounds per week for 4 rooms; 1 ton per month for 7 rooms; and up to 2 tons per month for 15 rooms. Half rations are permitted in summer. If one person's ration is 10 tons a year and he buys 11 he is liable to prosecution.

Use of Oil Curtailed.

England has also recently curtailed the use of fuel oil as well as gasoline and gas for pleasure automobiles.

The French and Italian governments have assumed complete control of distribution. In May, 1917, the Russian provisional government took over the coal mines of that country for the purpose of controlling distribution and prices. Fuel is so scarce in France that during the winter of 1917-18 the amount of coal allowed to domestic consumers was approximately 11 kilos, or 24 pounds, per month. The colder sections received a larger amount and the warmer sections a smaller amount, but in all cases the allowances were much less than the minimum requirements for comfort. Strict limitations were imposed on the consumption of gas and electricity.

Conditions in France.

Since the loss of Alsace-Lorraine France produced, before the present war, only about two-thirds of the coal she consumed, and now the portions under invasion contain her principal coal mines. This has made necessary more extensive exploitation of other mines. In 1913 she used about 65,000,000 tons, of which she produced about 45,000,000 tons and imported the balance from Great Britain, Germany, and Belgium. In 1916 her consumption was curtailed to about 40,000,000 tons, of which she produced 24,000,000 tons and imported 16,000,000 tons. Her production has increased remarkably during the last 18 months, and for the year 1917 it is estimated to have been 30,800,000 tons.

Measures in Germany.

Early in the war Germany centralized the entire coal industry under Government control. In Berlin a new plan of distribution was put in force in May, 1918. Its chief feature is that a dealer is obliged to supply customers in exact accordance with tickets presented, these being issued by the Government.. There are two kinds of tickets, one for cooking and one for heating coal. For cooking, a family of one or two persons is allowed 1,200 pounds; three to six, 1,600; seven to ten, 3,200. As to coal for heating, one room is allowed 500 pounds, two rooms 1,000, and so on up to 6,000 pounds. Persons who used more than 6 tons for heating last winter will be allowed just half what they used then.

8-Hour Law Suspended At Immigrant Station

EXECUTIVE ORDER.

In order to effect the more expeditious construction, etc., of the proposed buildings for the Boston (Mass.) Immigrant Station, the early completion of which, in connection with war activities, constitutes a national emergency and by virtue of the provisions of the act of Congress approved March 4, 1917 (39 Stat., 1192), entitled "An act making provisions for the naval service for the fiscal year ending June 30, 1918, and for other purposes," whereby it is provided "that in cases of national emergency the President is authorized to suspend provisions of law prohibiting more than eight hours labor in any one day of persons engaged upon work covered by contracts with the United States: *Provided further*, that the wages of persons employed upon such contracts shall be computed on a basic day rate of eight hours work, with overtime rates to be paid for at not less than time and one-half for all hours work in excess of eight hours," I do hereby suspend the provisions of law prohibiting more than eight hours of labor in any one day by persons engaged in the construction, etc., of the above-mentioned proposed new structures. This order will take effect from and after this date.

U. S. AIR SERVICE IS REOPENED FOR MECHANICS AND AVIATORS REGARDLESS OF DRAFT STATUS

CLOSED FOR THE PAST SIX MONTHS

Fast Movement Overseas of Air Squadrons and Equipment Necessitates Increase in Commissioned and Enlisted Personnel.

The War Department authorizes the following:

Irrespective of status in the draft, the Air Service has been reopened for induction of mechanics and of candidates for commissions as pilots, bombers, observers, and balloonists, after having been closed except for a few isolated classes for the past six months.

The fast moving overseas of air squadrons, planes, motors, and material for American airdromes, fields, and assembly plants in France and England, together with the completion here of 29 flying fields, 1,200 de Haviland planes, 6,000 Liberty motors, the parts for the first heavy night bombers, 6,600 training planes, and 12,500 training engines has led to the necessity of increasing both the commissioned and the enlisted personnel in order to maintain full strength in this country and continue the necessary flow overseas. As a result, the Air Service alone is now half as large again as the whole American Army was at the outbreak of war.

Reservoir of 6,600 Men Depleted.

Civilians have not been given an opportunity to qualify as pilots since last March. During last fall and early winter, a reservoir of over 6,600 prospective flyers, accepted by the examining boards, had been built up, and has since been gradually drawn off as room has been made for them in the aviation ground schools through graduation. Moreover, a large number of men already serving in the ranks of the Air Service have been permitted to train for commissions, in line with the policy of promoting men from the ranks whenever possible.

The available number of men possessing the necessarily very high qualifications is insufficient for the needs and as a result it is now possible to examine and accept men from civilian life, in addition to those in the enlisted personnel. The number of men who must be examined is great indeed compared to the number of men who become finished pilots. Practically one applicant out of every two is found unfit for flying at the first examination, while, even of those accepted, a large number prove wholly unable to do the mental work necessary in learning the theories of flight, radio,

President's Proclamation Requiring Licenses for All Fuel, Oil, and Gas Manufacturers, Traders, and Importers

THE PRESIDENT DESIGNATES OCT. 12 AS "LIBERTY DAY"

Asks That America's Discovery Be Celebrated in a Way to Stimulate Generous Response to the New Loan.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Every day the great principles for which we are fighting take fresh hold upon our thought and purpose and make it clearer what the end must be and what we must do to achieve it. We now know more certainly that we ever knew before why free men brought the great Nation and Government we love into existence, because it grows clearer and clearer what supreme service it is to be America's privilege to render to the world. The anniversary of the discovery of America must therefore have for us in this fateful year a peculiar and thrilling significance. We should make it a day of ardent rededication to the ideals upon which our Government is founded and by which our present heroic tasks are inspired.

Now, therefore, I, Woodrow Wilson, President of the United States of America, do appoint Saturday, the 12th day of October, 1918, as Liberty Day. On that day I request the citizens of every community of the United States, city, town, and countryside, to celebrate the discovery of our country in order to stimulate a generous response to the fourth Liberty loan. Commemorative addresses, pageants, harvest-home festivals, or other demonstrations should be arranged for in every neighborhood under the general direction of the Secretary of the Treasury and the immediate direction of the Liberty loan committee in cooperation with the United States Bureau of Education and the public-school authorities. Let the people's response to the fourth Liberty loan express the measure of their devotion to the ideals which have guided the country from its discovery until now, and of their determined purpose to defend them and guarantee their triumph.

For the purpose of participating in Liberty Day celebrations all employees

(Continued on page 3.)

OCT. 1 IS THE TIME LIMIT

Only Those Doing Business Less Than $100,000 Annually and Certain Others Included in Congress Act Exempted — Applications to Be Made to Fuel Administrator — Penalty for Delinquents.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA,

A PROCLAMATION.

Whereas under and by virtue of an act of Congress entitled "An act to provide further for the national security and defense by encouraging the production, conserving the supply, and controlling the distribution of food products and fuel," approved by the President on the 10th day of August, 1917, it is provided, among other things, as follows:

"That by reason of the existence of a state of war it is essential to the national security and defense, for the successful prosecution of the war and for the support and maintenance of the Army and Navy, to assure an adequate supply and equitable distribution and to facilitate the movement of foods, feeds, fuel, including fuel oil and natural gas, and fertilizer and fertilizer ingredients, tools, utensils, implements, machinery, and equipment required for the actual production of foods, feeds, and fuel, hereafter in this act called necessaries; to prevent, locally or generally, scarcity, monopolization, hoarding, injurious speculation, manipulations, and private control, affecting such supply, distribution, and movement; and to establish and maintain governmental control of such necessaries during the war. For such purposes the instrumentalities, means, methods, powers, authorities, duties, obligations, and prohibitions hereinafter set forth are created, established, conferred, and prescribed. The President is authorized to make such regulations and to issue such orders as are essential effectively to carry out the provisions of this act."

And whereas it is further provided in said act as follows:

"That, from time to time, whenever the President shall find it essential to license the importation, manufacture, storage, mining, or distribution of any

100,000 REGISTRANTS CHANGED TO PRODUCTIVE EMPLOYMENT UNDER 'WORK OR FIGHT' ORDER

PROVOST MARSHAL'S STATEMENT

Information Concerning Results of the Regulation Gathered From Four Principal Sources.

The War Department authorizes the following from the office of the Provost Marshal General:

Information gathered by this office as to the operation and results of the "work or fight" regulations appears to warrant the assertion, as a conservative estimate, that 100,000 registrants have changed over from nonproductive to productive occupations since the regulations were promulgated.

This information has been gathered from the following four principal sources: The local boards, the United States Employment Service, the Emergency Fleet Corporation, and retail merchants' associations.

Reports from local boards in 44 States, as of August 25, 1918, showed that 52,826 registrants had been notified up to that time to appear before the boards on account of idleness or nonproductive occupation. Of this number 23,825 subsequently notified their boards of a change to productive occupations, 10,643 were certified to district boards for decision, and the cases of 18,358 were still pending before the local boards. Of the 10,643 certified to district boards for decision 2,695 were found to be idle or nonproductively employed, and therefore had their order numbers or deferred classification withdrawn. Those whose order numbers or deferred classifications were not withdrawn by the district boards numbered 5,608, and the cases of 2,340 were still pending on August 25.

It is estimated that for every one of the 23,825 men who notified the local boards of a change to productive occupation, three or four men moved from nonproductive to productive occupations without awaiting action by their local boards, following the promulgation of the "work or fight" regulations. This estimate is strongly supported by information supplied by the United States Employment Service, showing that in eight cities, viz, Boston, Chicago, Cleveland, Columbus, New Orleans, New York, San Francisco, and St. Louis, up to August 1, 1918, approximately 40,000 men had sought productive employment as a result of the "work or fight" regulations, and that 56 per cent of the applicants had been provided with productive employment.

Reports from the various plants operating under the Emergency Fleet Corporation show that with regard to a majority of them the "work or fight" regulations have resulted in an average increase of at least 20 per cent in applications for employment.

Information furnished by 154 retail stores in large cities of the country as of August 1 show that about 1,000 men had left their employ to engage in productive occupations.

Ten hotels in Washington, D. C., as of August 1, reported that 176 men employed by them had left to engage in productive occupations.

COMMISSIONED PERSONNEL BRANCH OF GENERAL STAFF

New Division Created to Take Over Functions of Various Army Sections.

The War Department authorizes the following statement:

There has been established a commissioned personnel branch of the General Staff which will hereafter be responsible for the appointment, promotion, transfer, and assignment of the commissioned personnel of all branches of the Army.

Under the order which creates this new branch the commissioned personnel branches of the various staff corps and departments, as heretofore operated, are abolished and their functions and personnel, as far as may be necessary, will be taken over by the new section. The commissioned personnel activities in the various staff corps and departments will be confined to the keeping of the necessary records to enable them to requisition such commissioned personnel as may be required. The activities of the committee on classification of personnel of The Adjutant General's Office and the commissioned personnel section of the General Staff are taken over by the new branch. The new branch will be under the control of a General Staff officer to be known as chief of the personnel branch.

How Present Branches May Function.

Pending the perfection of plans for the organization of the newly created branch, the actual carrying out of the provisions of the new order is held in abeyance in so far as they direct the immediate abolishment of the commissioned personnel branches of the various staff corps and departments. Meanwhile they may function as follows:

Qualified men between the ages of 18 and 45 belonging to the deferred classifications on grounds other than industry, occupation, or employment, including agriculture, may be commissioned direct from civil life by the usual procedure.

Men in the classification known as class 1, group C, having disqualifications that would prevent them from being drafted as class 1, group A, men for general service, but otherwise qualified for commissions in certain duties, may be commissioned direct from civil life.

Men who are within class 1, group A, or who would be classified in class 1, group A, except for industry, occupation, or employment, including agriculture, qualified for general service, between the ages of 18 and 45, must be first inducted into the service before consideration will be given to their appointment as officers.

All applications for appointments will be addressed to the Adjutant General of the Army, except that applications for appointments in the Medical Department may be submitted to the Surgeon General, and applications for training at the Central Officers' Training Schools should be submitted to the commanding officers of the various training schools.

INCREASE IN EXPRESS RATES IS PROPOSED BY COMPANY TO COVER WAGE ADVANCE

LETTER FROM DIRECTOR M'ADOO

Interstate Commerce Commission Asked To Decide On Means of Raising Necessary Revenue—Hearings Set For October 8.

The Interstate Commerce Commission authorizes the following:

Notice to the public:

The commission is to-day (Sept. 19) in receipt of the following letter and memorandum from Hon. William G. McAdoo, Director General of Railroads:

INTERSTATE COMMERCE COMMISSION,
Washington, D. C.

GENTLEMEN: The amount realized from the advances in express rates recently allowed by you, approximately $10,000,000, has been entirely absorbed by the American Railway Express Company in making advances in the wages of its employees. I am satisfied that those wages must be still further advanced and that approximately $12,000,000 of additional revenue must be had for that purpose. I have applied to the express company for a suggestion as to what advances should be made in the present express rates to yield that additional income and have received from that company the memorandum attached.

Acting under section 8 of the Federal control act I request you to advise me:

1. Whether in your opinion, assuming that approximately $12,000,000 of express revenue must be raised, the method of advance suggested by the express company is a proper one? If in your opinion it is not, will you kindly state what method should be followed.

2. If, in your opinion, the method suggested by the express company is proper, will the amount of advance proposed by it yield the sum required; namely, approximately $12,000,000? If not, what advance under that method will be required to produce that result? If you believe that some different method should be adopted, please indicate the amount of the advance which should be made.

At the present time the express business is being conducted at a deficit which will be largely increased by the advances in wages which must be made. This deficit is borne by the Railroad Administration. You will, therefore, appreciate the importance of as speedy action as may be consistent with a proper consideration of the questions submitted.

Cordially, yours,

W. G. McADOO.

Memorandum.

MEMORANDUM OF AMERICAN RAILWAY EXPRESS COMPANY SUGGESTING METHOD OF ADVANCING EXPRESS RATE.

It is suggested that the rates in zone 1, both intra and inter-zone, be increased three scales—that is to say, that the minimum rate of 55 cents be increased to 71 cents and each rate above that in-

(Continued on page 4.)

PRINCE AXEL OF DENMARK HERE, GUEST OF UNITED STATES NAVY

Heads Danish Commission Making Tour of American Shipbuilding Plants and Camps.

Prince Axel, of Denmark, at the head of a Danish naval commission, which will make a tour of the United States, arrived at Washington yesterday. The commission is here by invitation of the United States Navy, and the members will be the guests of the Navy during their stay.

Prince Axel was met at Union Station by Secretary Daniels and escorted to the Willard, where he will stay during his visit in the Capital. At 6 o'clock yesterday evening he was received by the President. Secretary Lansing escorted him to the White House. At 8 o'clock last evening the prince and the members of the commission were the guests of the Secretary and Mrs. Daniels at dinner. To-day the prince was entertained at luncheon by the President and will be the guest of the Secretary of State and Admiral Benson at dinner during his stay in Washington. Trips to Mount Vernon and other points of interest here have been arranged.

The visit of the commission is purely a naval mission and its tour of the country will include the principal points of naval activity, including the munition plants, training camps, and larger shipbuilding plants.

Prince Axel is a member of the Danish royal family, a cousin of the King of Denmark, and is commander of the Danish navy.

Italian Grain Exemption Continued Until Dec. 31

The Gazetta Ufficiale, Rome, says:

By royal decree of May 23, 1918, the period of temporary exemption from import duty for grain, flour, and cereals has been extended to December 31, 1918. This suspension of duties has continued since February, 1915, being renewed every six months.—Commerce Reports.

THE PRESIDENT DESIGNATES OCT. 12 AS "LIBERTY DAY."

(Continued from page 1.)

of the Federal Government throughout the country whose services can be spared may be excused on Saturday, the 12th day of October, for the entire day.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia this 19th day of September in the year of our Lord 1918, and of the independence of the United States of America the 143d.

[SEAL.] WOODROW WILSON.

By the President:

ROBERT LANSING,

Secretary of State.

SEALED PROPOSALS INVITED

Sealed proposals in duplicate will be received at the Interior Department until 2 o'clock p. m., Friday, October 4, 1918, and then opened, for furnishing track scale complete at the St. Elizabeth's Hospital, Washington, D. C., in accordance with specifications, copies of which may be obtained upon application to the chief clerk of the department.

Sealed proposals will be received in the Interior Department until 2 o'clock p. m., Thursday, October 10, 1918, for furnishing 8,600 sets, more or less, of rollers and hangers for use in mounting the General Land Office map of the United States for 1919. Form of proposal, including specifications for the work, will be supplied on application. All proposals must be securely enveloped, marked "Proposals for map rollers and hangers," and be addressed to the Secretary of the Interior, Washington, D. C. The right is reserved to reject any and all bids, or to accept or reject any part thereof, in the discretion of the department.

Sealed proposals will be opened by the superintendent of lighthouses, Tompkinsville, N. Y., at 2 o'clock p. m., September 24, 1918, for one oil engine-driven hoisting engine. Information upon application to the above office.

Storage space wanted: About 8,000 square feet. Location convenient to Nineteenth Street and Pennsylvania Avenue NW. preferred. Address Chief Clerk, Department of Commerce, or phone Main 5060, branch 5.

Sealed proposals for the construction of 12 miles of main lateral on the Fort Laramie unit, North Platte project, Nebraska-Wyoming, involving about 167,000 cubic yards of excavation, will be received at the office of the United States Reclamation Service, Mitchell, Nebr., until 2 o'clock p. m. October 15, 1918, and will at that hour be opened. The work is located near the Bridgeport-Guernsey line of the Chicago, Burlington & Quincy Railroad, in the vicinity of Torrington, Wyo. For particulars address the United States Reclamation Service, Washington, D. C., Denver, Colo., or Mitchell, Nebr.

Sealed proposals in duplicate to be publicly opened by the depot quartermaster, United States Marine Corps, 1100 South Broad Street, Philadelphia, Pa., on September 27, 1918, are hereby invited for furnishing 60,000 hairbrushes, 60,000 combs, 60,000 mirrors, 60,000 razors, 120,000 huckaback towels, 60,000 cakes toilet soap, 60,000 toothbrushes, 60,000 shaving brushes, 180,000 darning needles, 60,000 papers needles, 60,000 pairs scissors, 300,000 safety pins, and 1,200,000 papers pins to be delivered to the depot quartermaster, Marine Corps, 1100 South Broad Street, Philadelphia, Pa. Proposal blanks and other information may be obtained upon application to this office or the depot quartermaster, Marine Corps, Philadelphia, Pa. The right is reserved to reject any or all bids or parts thereof, and to waive informalities therein. Bids from regular dealers only will be considered. (Schedule No. 629.) C. L. McCawley, brigadier general, quartermaster.

Sealed proposals in duplicate to be publicly opened by the depot quartermaster, Marine Corps, 1100 South Broad Street, Philadelphia, Pa., on September 26, 1918, are hereby invited for furnishing 150,000 yards drilling, unbleached, 30 inches wide, and 250,000 yards drilling, bleached, 30 inches wide, to be delivered to the depot quartermaster, Philadelphia, Pa. Proposal blanks and other information may be obtained upon application to this office or the depot quartermaster, Marine Corps, 1100 South Broad Street, Philadelphia, Pa. The right is reserved to reject any or all bids or parts thereof, and to waive informalities therein. Bids from regular dealers only will be considered. (Schedule No. 627.) C. L. McCawley, brigadier general, quartermaster.

Sealed proposals will be received at the office of the purchasing agent of the Post Office Department until 2 o'clock p. m. September 30, 1918, for furnishing and delivering 250 spring scales, 120-pound capacity, suitable for motor vehicle routes.

Sealed proposals will be received until 2 o'clock p. m., October 7, 1918, at the United States Indian Warehouse, 308 South Green Street, Chicago, Ill., for 174 pounds hops, 6,634 pounds starch, 1,450 pounds tapioca, 4,430 gallons pure cider vinegar or distilled grain vinegar with a minimum strength of 4 per cent of acetic acid.

Sealed proposals will be received until 4 o'clock p. m., September 24, 1918, at St. Elizabeths Hospital, Washington, D. C., for the following supplies: 1,000 pills asafœtida, 3 grains; 10,000 tablets strychnine sulpate 1/60 grain; twenty 500 cubic centimeter bottles syrup hypophosphites comp., U. S. P.; ten 2½ kilos formaldehyde.

Sealed proposals will be received until 4 o'clock p. m., September 25, 1918, at St. Elizabeths Hospital, Washington, D. C., for 200 pounds fresh dressed fowl each week during October, November, and December, 1918. One hundred pounds to be delivered each Tuesday and Friday. Fowls to weigh from 3 to 6 pounds—all roosters to be excluded. Buyer's option bid on cold-storage stock will be considered. Also for 600 dozen near-by eggs each week during October, November, and December, 1918.

Sealed proposals in duplicate to be publicly opened by the Depot Quartermaster, United States Marine Corps, 1100 South Broad Street, Philadelphia, Pa., on October 1, 1918, are hereby invited for furnishing 10,000 gross grommets and washers, 12,000 gross hooks and eyes, and 15,700 pounds galvanized iron rings, to be delivered to the Depot Quartermaster, Marine Corps, 1100 South Broad Street, Philadelphia, Pa. Proposal blanks and other information may be obtained upon application to this office or the Depot Quartermaster, Marine Corps, Philadelphia, Pa. The right is reserved to reject any or all bids or parts thereof, and to waive informalities therein. Bids from regular dealers only will be considered. (Schedule No. 640.) C. L. McCawley, Brigadier General Quartermaster.

Sealed proposals will be received until 2 o'clock p. m. October 7, 1918, at the United States Indian Warehouse, 308 South Green Street, Chicago, Ill., for the following supplies:

Medicines.—64 bottles acetic acid, U. S. P., in 4-ounce bottles; 66 bottles compressed tablets, tannalbin, N. N. R. (albumen tannate), 5 grains, in bottles of 100; 62 bottles compressed tablets, trinitrophenol, U. S. P. (picric acid), in bottles containing 4 ounces; 115 bottles epinephrine, N. N. R., 1/1000, in bottles containing 1 ounce; 38 tubes homatropine, hydrobromide, U. S. P., one-half grain, in tubes of 10 tablets; 102 cans quinine, sulphate, U. S. P., in cans containing 5 ounces (specify brand bid on);* 106 boxes quinine and urea-hydrochloride, U. S. P., 1 per cent, in boxes of six 5 cc. ampoules.

Instruments, surgical dressings, etc.—157 pieces binder's boards, 2½ by 12 inches; 252 pieces binder's boards, 4 by 17 inches; 5 No. dilators, uterine, Goodell's, large blade;* 4 No. dilators, small blade;* 118 No. douche tubes, uterine, glass;* 5 No. forceps, obstetrical;* 259 No. bandages, suspensory;* 304 pounds cotton, surgeon's nonabsorbent, in cartons containing one-half pound;* 682 sheets cotton wadding;* 710 yards gauze, iodoform, 1-yard lengths, in paper containers;* 1,154 tubes ligature, umbilical tape, linen, in glass tubes, two 9-inch tapes in each tube (submit two samples);* 807 cartons lint, absorbent, in 1-ounce cartons;* 44 yards plaster, cantharides, 1 yard in a tin;* 1,319 cans calcium hypochlorite (bleaching powder), in 5-pound containers, noncorrosive metal shall contain not less than 30 per cent available chlorine (both names to appear on label);* 633 pounds sulphur in rolls (large pieces not crushed);* 44 pounds gelatin, silver label or equal;* 94 No. basins, pus, medium size, enameled ware;* 199 cans bedbug destroyer, in tin cans of 16 ounces (naphthalin flakes, 2 pounds; kerosene, 5 gallons; oil of mirbane, 4 ounces; carbolic acid, 1 ounce; oil of cedar, 2 ounces. Directions: Dissolve naphthalin in kerosene to clear solution, add remaining constituents in order given; shake. In 16-ounce tin cans, with attached delivery tube or other device for distributing contents over small area); 11 No. cases, medicine, buggy;* 1,009 boxes capsules, gelatine, assorted numbers 0 to 4 (specify number in box);* 8 No. cork pressers;* 605 No. holders, metal, with cover, to hold paper sputum cups;* 965 hundred envelopes, drug, medium size;* 625 hundred labels, blank, prescription, gummed, without any printing, 1 by 2 inches;* 623 hundred same, 2 by 3 inches;* 209½ hundred same, 3 by 4 inches;* 46 hundred papers, blue and white, 4½ by 6 inches, for seidlitz powder;* 359 hundred papers, powder, 2½ by 3½ inches;* 768 quires paper, wrapping;* 9 No. scales and weights, prescription;* 616 ounces of twine, wrapping, cotton.* Where articles are called for in containers other than those used in the general trade, alternate bids will be considered on the same articles in trade packages, proposals to show plainly what the trade container is. (* Samples required.)

(Continued on page 7.)

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

RATES BY MAIL.

Daily	One year	$5.00
	Six months	3.00
	One year, postage prepaid to foreign countries	8.00
	Six months, postage prepaid to foreign countries	4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

American Communique

American Official Communique No. 128.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 19, 1918.

Section A.—In the Woevre our detachments successfully raided the enemy's lines, capturing 15 prisoners. In the Vosges a hostile raiding party was repulsed with losses.

Sealed Bids Wanted

General Engineer Depot, United States Army, 1438 U Street, Washington, D. C.—Sealed bids are wanted until dates indicated under circular proposals as follows for furnishing miscellaneous supplies for the General Engineer Depot. Additional information may be had upon application to the purchasing officer as above:

Circular Proposal No. 1108, opening of October 1, 1918.—One hundred and seventy carriages for 60-inch portable searchlights as per specifications.

Circular Proposal No. 1110, opening of September 24, 1918.—100 generator switchboards as per specifications.

Circular Proposal No. 1115, opening of September 24, 1918.—Ninety-eight 5-kilowatt, 125-volt, steam-engine-driven generator sets as per specifications.

Circular Proposal No. 1116, opening of September 27, 1918.—Paint as per specifications.

Circular Proposal No. 1118, opening of October 1, 1918.—Two well-drilling machines, gasoline-engine driven, capable of drilling 8-inch holes 800 feet deep of the traction type as per specifications.

Circular Proposal No. 1119, opening of September 27, 1918.—Sixteen magnetos, 10,000 ohms resistance, Holtzer Cabot testing or equal; 16 magnetos, 5,000 ohms resistance for testing; 16 voltmeters, portable combination for A. C. and D. C. range 0 to 300 volt scale.

Circular Proposal No. 1120, opening of October 18, 1918.—Thirty thousand carbons, medium intensity for use with 60-inch portable searchlights as per specifications.

PRESIDENT'S REPLY TO AUSTRIA SENT TO THE SWEDISH MINISTER

Secretary of State Lansing Transmits Brief Message to Mr. W. A. F. Ekengren.

The following note was sent to the Swedish minister in Washington on September 17, 1918:

SEPTEMBER 17, 1918.

SIR: I have the honor to acknowledge the receipt of your note, dated September 16, communicating to me a note from the Imperial Government of Austria-Hungary containing a proposal to the governments of all the belligerent States to send delegates to a confidential and unbinding discussion on the basic principles for the conclusion of peace. Furthermore, it is proposed that the delegates would be charged to make known to one another the conception of their governments regarding those principles and to receive analogous communications, as well as to request and give frank and candid explanations on all those points which need to be precisely defined.

In reply I beg to say that the substance of your communication has been submitted to the President who now directs me to inform you that the Government of the United States feels that there is only one reply which it can make to the suggestion of the Imperial Austro-Hungarian Government. It has repeatedly, and with entire candor, stated the terms upon which the United States would consider peace and can and will entertain no proposal for a conference upon a matter concerning which it has made its position and purpose so plain.

Accept, sir, the renewed assurances of my highest consideration.

ROBERT LANSING.

Mr. W. A. F. EKENGREN,
Minister of Sweden,
In Charge of Austro-Hungarian Interests.

WAR SUPPLY BUREAUS TO TAKE ADVANTAGE OF CASH DISCOUNT

Contractors Will Be Asked to State in Proposals Amount They Will Allow.

The War Department authorizes the following:

All supply bureaus of the War Department will, whenever possible, take advantage of cash discounts for the prompt payment of bills. Instructions to do so have just been issued by the General Staff.

Specified in Proposals.

Contractors who have followed the custom of granting such cash discounts to the public will be required to state in their proposals the amounts they will tender the Government for the prompt payment of their bills. In those cases where it has not been the custom to give fixed cash discounts for prompt payments the Government will request the contractors to state how much they will give for prompt payment. These discounts will be taken into consideration by contracting officers when making awards. Arrangements have been made to allow the Government discounts on "materials or supplies on which a fixed or maximum price has been set" whenever these discounts have not been included in the differential between prices made for the Government and for the public.

Plan to Insure Discount.

That the Government may be sure of such discounts in the future, it is provided in the instructions that all materials and supplies shall, in so far as possible, be inspected and accepted by the Government at the point of manufacture or origin. The inspecting officer is ordered to see that the proper vouchers are sent through promptly with the Government bill of lading attached to the contracting officer, so that the bill may be paid within the specified time during which discounts will be allowed.

INCREASE IN EXPRESS RATES IS PROPOSED BY COMPANY

(Continued from page 2.)

creased accordingly, and further, that 10 cents per 100 pounds be added to the commodity rates. This will make an increase of first class as a maximum of 16 cents or 17 cents per 100 pounds, on second class 12 cents, and on commodities 10 cents, with proportionate increases on shipments of less than 100 pounds; that the rates, both intra and inter-zone in all other zones, be increased by advancing two scales and adding 10 cents per 100 pounds to commodity rates. This will result in a maximum increase on first class of 10 cents or 12 cents; second class, 8 cents; and commodities, 10 cents per 100 pounds, with a proportionate increase on shipments of less than 100 pounds. It is estimated that this will produce on zone 1 business $17,037,000; and on all other business, $6,642,300, or a total of $23,679,000, of which the express company will get $11,780,303, the balance, $11,898,697 going to the Director General in increased express privileges.

In view of the urgent need of immediate relief, and the necessity without further delay of increasing the wages paid to its employees, the increased revenue should be available at once, and the advance in rates made effective at the earliest possible moment.

Notice is hereby given that on Tuesday, October 8, 1918, at 10 o'clock a. m., the Interstate Commerce Commission will hear testimony and argument at its office in Washington, D. C., by the express companies and any other persons interested, in regard to the two questions proposed by the Director General and shown in the above letter, as to which the advice of the commission is sought.

By the commission:

GEORGE B. McGINTY,
Secretary.

WORK OF CONGRESS BRIEFLY TOLD

SENATE.

The draft treaties between the United States and both France and Greece were ratified by the Senate yesterday afternoon. They follow the general lines of the recently ratified treaty between this country and Great Britain and provide the machinery under which citizens of France and Greece living within the United States can be drafted into the Army.

The Bureau of Mines, through Director Manning, responding to a Senate inquiry, stated that the enactment of legislation for the leasing of public oil lands would go far toward obviating an oil shortage. No comment was made by the bureau upon the respective merits of the two bills as passed by the Senate and House and which are now in conference. The prospect of an oil leasing bill, the report said was desirable, and it pointed out that conditions will arise that will make such legislation distinctly a war measure.

Senator Fletcher yesterday asked that the water-power bill recently passed by the House be sent to conference. This request led to considerable discussion, and no action was taken on the request.

War Revenue Bill.

Representative Fordney, of Michigan, ranking Republican member of the Ways and Means Committee, appeared before the Finance Committee yesterday afternoon and urged that committee in its revision of the war-revenue bill to change the definition of invested capital so as to include borrowed money in figuring tax reductions. He also opposed a provision under which Congress could obtain returns on income taxes from the department. Louis K. Liggett, president of the United Drug Co., urged a revision of the tax on drugs. As written, he said, medicines in common use would be taxed from 20 to 60 per cent, greatly increasing the cost to the consumer.

The Senate adopted without discussion a resolution introduced by Senator Jones, of Washington, directing the Judiciary Committee to investigate political and propaganda activities of brewing interests. The resolution referred particularly to charges that have been made that a group of brewers supplied the funds for the purchase of a newspaper.

The President yesterday sent to the Senate the nomination of Albert Strauss, of New York, to be a member of the Federal Reserve Board, to succeed Paul Warburg, of New York, whose term has expired. Other nominations included Mark Storen, to be United States Marshal for the district of Indiana, and Hugh R. Robertson to be United States attorney for the western division of Texas.

In a speech, Senator Thomas, of Colorado, Democrat, criticized Secretary Daniels and Attorney General Gregory and charged them with usurping the duties of the Secretary of the Interior in the matter of oil-land leasing legislation.

Division of opinion in the Committee on Elections as to the jurisdiction of the Senate over the question of expenditures in a primary election prevented any conclusion being reached yesterday on the Pomerene resolution to investigate the Michigan primaries in which Truman H. Newberry was nominated for the Senate by the Republicans.

HOUSE.

The $8,000,000,000 war-revenue bill was all but completed at yesterday's session. When the House convened to-day all that remained to be done was to dispose of two minor amendments and take the final roll call. Secretary McAdoo yesterday let leaders of Congress know that for the present the Treasury Department would not ask for any increase in the total taxes the pending measure is expected to provide. Future conditions, he said, would determine the question of increased taxation. During consideration yesterday afternoon, the amendment to impose a tax of $3 a bale on cotton was defeated. A proposed tax of 5 per cent on all products of child labor, an amendment proposed to repeal the existing tax on mixed flours, and a proposition to create a congressional committee to supervise war expenditures, were thrown out on points of order.

Under the terms of a bill favorably reported from the Military Committee, all Army officers would be eligible for selection as heads of staff corps or departments. It proposes to repeal the present law which limits selection to members of the department or Army officers ranking above major, who served four years by detail in the corps of the department. This bill was urged by Secretary Baker.

U. S. AIR SERVICE IS REOPENED FOR MECHANICS AND AVIATORS

(Continued from page 1.)

photography, bombing, machine gunnery, and artillery observation, so that fully 15 per cent are disqualified in the first step at the ground schools and still more in the actual flying courses later.

Should First Consider Qualifications.

While this present call for flying candidates is being made generally, it is hoped that, in order to avoid unnecessary pressure on the examining boards, possible candidates will consider whether they have both the physical and the mental qualifications necessary. The age limits for flyers are from 18 to 30, inclusive, with preference to those under 25, and for balloonists from 18 to 45. Applicants may apply at the aviation examining boards located at:

Atlanta, Ga., Georgia School of Technology.
Boston, Mass., 739 Boylston Street.
Chicago, Ill., 230 East Ohio Street.
Dallas, Tex., Camp Dick.
Fort Sill, Okla., Post Field.
Los Angeles, Cal., Marsh-Strong Building.
Minneapolis, Minn., University of Minnesota.
New York City, 104 Broad Street.
San Antonio, Tex., Fort Sam Houston.
San Francisco, Cal., 55 New Montgomery Street.
St. Louis, Mo., 525 South Euclid Avenue.
Washington, D. C., Building "D," floor 1, wing 2.
Canal Zone, Camp Sherman.

Or to the personnel section, Division of Military Aeronautics, Washington, D. C.

Call for Mechanics.

The call for mechanics [illegible] service to a large number of skilled men anxious not only for active field service, but also for service for which their training best fits them. Skilled men only are wanted. Others would have no value in the highly delicate and technical work required. Those accepted will be sent to a concentration depot, trade tested, given a special intensive training in the new science of airplane mechanics, and then organized into airplane crews and squadrons, some for duty here, others for duty overseas, with especially good opportunity for advancement, since over four-fifths of the men are promoted above the grade of private. The classes especially desired as shown by the last year's experience are: Airplane mechanicians, cabinetmakers, chauffeurs, electricians, auto mechanics, radio operators, motorcyclists, tailors, instrument repairmen, armorers, carpenters, clerks, motor mechanics, riggers, engine repairmen, propeller makers, stenographers, machinists.

Growth of Air Service.

The Air Service to-day is over 160 times what it was on the outbreak of war. The enlisted strength alone, regardless of cadets in training and officers, has grown as follows:

April 6	1,110
August 1	10,107
October 1	20,176
December 1	36,234
February 1	92,500
April 1	128,569
June 1	137,972
August 1	147,434

Applicants, as mechanics, who will be accepted between the ages of 18 and 55, inclusive, may receive further details from the Department Air Service officers in the six departmental headquarters located at Boston, New York, Chicago, San Francisco, San Antonio, and Charleston, S. C.; the Air Service Trade Test Boards located at—

Army Recruiting Office, Atlanta, Ga.
739 Boylston Street, Boston, Mass.
230 East Ohio Street, Chicago, Ill.
Tramway Building, Fourteenth and Arapahoe Streets, Denver, Colo.
Third Floor, Municipal Courts Building, Detroit, Mich.
104 Broad Street, New York City.
Care of Department Air Service Officer, Western Department, San Francisco, Cal.
Third and Olive Streets, St. Louis, Mo.
Madison, Wis.
Fifth and Dodge Streets, Omaha, Nebr. (Army Building).
Care of Air Service Mechanics Training School, Overland Building, St. Paul, Minn.
Kelly Field, San Antonio, Tex., Air Service Mech. Tr. School.

Or by writing direct to the Personnel Section, Division of Military Aeronautics, Washington, D. C.

MAJOR, JUDGE ADVOCATE.

Special Orders, No. 211:

20. The appointment of Robert Netherland Miller as major, judge advocate, United States Army, for the present emergency, with rank from September 9, 1918, is announced. He will report in person to the Judge Advocate General of the Army, Washington, D. C., for duty.

LIST OF CASUALTIES REPORTED AMONG THE UNITED STATES FORCES OVERSEAS

ARMY.

SECTION NO. 1, SEPTEMBER 20, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	39
Wounded severely	84
Died of wounds	10
Missing in action	51
Died from aeroplane accident	1
Wounded, degree undetermined	3
Died of disease	3
Died from accident and other causes	5
Total	196

Killed in Action.

Capt. Belvidere Brooks. Gerald Brooks, 50 West Ninth Street, New York, N. Y.
Lieut. Oscar H. Cowan. Mrs. Selma C. Cowan, R. F. D. No. 30, Stamford, Conn.
Lieut. Lawrence S. Loughran. Frank Loughran, 165 Broadway, Asheville, N. C.
Sergt. Edward Coyle. Mrs. Josephine Sanderson, Darien Center, N. Y.
Sergt. Joseph A. Folwell. Mrs. Mary Folwell, Forrest, Ill.
Sergt. Leo Fred Kingsbury. Elgar Kingsbury, 1410 Roswett Avenue, Lansing, Mich.
Sergt. Wade E. Mulford. George Mulford, Henderson, W. Va.
Sergt. Jacob C. Stockburger. Jacob Stockburger, 728 New Street, Allentown, Pa.
Sergt. Roy Edward White. Mrs. Flossie Mayesler, 709 Douglass Street, Saginaw, Mich.
Corpl. John Bowman. Harvey Bowman, R. F. D. No. 2, Wilmington, Ohio.
Corpl. Norman J. Litzinger. Mrs. Ellen Litzinger, Ashville, Pa.
Corpl. John William Poet. John William Poet, 75 Chamberlain Avenue, Detroit, Mich.
Corpl. Charles H. Sells. Mrs. Kathern Sells, 7429 Parnell Avenue, Chicago, Ill.
Wagoner Jacob McDonald. Peter Ross, 144 Haistings Street, Detroit, Mich.

PRIVATES.

Remus Bacon. Mrs. Emma Bacon, R. F. D., box 11, Liberty County, Ga.
Clarence Albert Beuthin. Mrs. William Beuthin, 419 South Thirteenth Street, Saginaw, Mich.
Loren Joseph Brady. William H. Brady, Unionville, Mich.
Leonard A. Brewer. Mrs. Margaret Brewer, 621 East Oak Street, New Albany, Ind.
Dave Dukorsky. Loreno C. White, R. F. D. No. 6, box 171, Yakima, Wash.
Leonard E. Erickson. Eric Erickson, Main Street, Millville, Mass.
Alfred Emery Ladd. Lewis E. Ladd, Cranberry Isles, Me.
Jess Luke. Mrs. Belle Luke, Texanna, Okla.
Mathew C. McGraw. William McGraw, De Funiak Springs, Fla.
Gerald Alfred Malarkey. Daniel G. Malarkey, Warrenton, Oreg.
Louis Pietrykowski. Mrs. Grace Jozwiak, 1780 Tecumseh Street, Toledo, Ohio.
Arnold M. Ronnie. John Ronnie, Starbuck, Minn.
Benjamin Rutstein. Frank Rutstein, 2011 Second Avenue, Birmingham, Ala.
Bardosi Saducl. Frank Furnari, 323 Market Street, Newark, N. J.
Cosmo Sarace. Slario Circosta, box 216, Marcellus, N. Y.
Jasper Skeeter. Fount Skeeter, Eagle Lake, Tex.
Joseph John Slovensky. Mrs. Mary Slovensky, Starford, Pa.
John Sobenski. Andrew Stempinski, 2037 West Eighteenth Street, Chicago, Ill.
Enicke John Stanavage. Mrs. Mary Lime, 172 Jacob Avenue, Detroit, Mich.
Anasticlo Trujillo. Mrs. Christiana Trujillo, Walsenburg, Colo.
Jimmie L. Ward. Mrs. Lizzie Ward, Fordyce, Ark.
Marshall O. Webster. Lesley Webster, White Cloud, Mich.
Adolph Weiss. J. A. Weiss, 518 Hermanson Street, Saginaw, Mich.
Resterer H. Westberry. Mrs. Elizabeth Westberry, Woodville, Miss.
Wilbur Whitmore. Fred C. Whitmore, Bangor, Mich.

Died from Wounds.

CORPORALS.

George Fitzgerald. James Fitzgerald, Abernathy, Tex.
Robert Hampton. Harry Hampton, 926 North Tenth Street, Manitowoc, Wis.
Harry Johnson. Walter Johnson, care of police force, Barksdale, Wis.
Lovie C. Sudderth. James G. Sudderth, Buford, Ga.
Bugler Nicholas Florio. Mrs. Vincent Florio, 282 South Main Street, Waterbury, Conn.

PRIVATES.

Mike Barber. Rose Lavance, Whitsett, Pa.
Samuel P. Collins. Isaac Collins, Cairo, W. Va.
Lake E. Davidson. Murlin J. Davidson, Zearing, Iowa.
Frank J. Dvorak. Frank J. Dvorak, jr., Philbrook, Minn.
Morris J. Edwards. R. William Edwards, R. F. D. No. 1, box 70, St. Johnsville, N. Y.

Died of Disease.

PRIVATES.

Lester Choat. Mrs. Sarah Phillips, Bower, Okla.
George W. Cooper. George W. Cooper, Stratford, Okla.
Robert A. Nichols. Benjamine F. Nichols, Woodbury, Tenn.

Died from Accident and Other Causes.

Sergt. Joseph Phillips. Edward Phillips, National Military Home, Dayton, Ohio.
Wagoner George Milton Taylor. George Taylor, 5116 Tacony Street, Philadelphia, Pa.

PRIVATES.

Hobert M. Leonard. Mrs. Susan Leonard, R. F. D. No. 4, Jonesboro, Tenn.
Curt Julius Polst. Mrs. Helen Polst, 4264 Kossuth Avenue, St. Louis, Mo.
Caesari Colbertaldo. Caesari Colbertaldo, Trestad, Italy.

Died from Aeroplane Accident.

Pvt. Philip Thomas Mulvaney. Mrs. Elizabeth Mulvaney, 6A Wakeman Avenue, Newark, N. J.

Wounded Severely in Action.

Capt. Roger D. Lapham. Mrs. Helen A. Lapham, 420 Park Avenue, New York, N. Y.

LIEUTENANTS.

John H. Bush. Samuel Bush, Tygarts Valley, Ky.
Cecil Florian Bates. Mrs. Cecil F. Bates, 1662 Government Street, Mobile, Ala.
Paul Keller. Mrs. Margaret Keller, 68 West Concord Street, Boston, Mass.
Paul J. Kingsley. Nathan G. Kingsley, 605 Hope Street, Providence, R. I.

SERGEANTS.

Wilbern L. Emerson. Robert D. Emerson, Sedalia, Ky.
William Luzenski. Frank Luzenski, 48 Moran Street, Detroit, Mich.
George E. Point. Mrs. Margaret Point, 534 East One hundred and thirty-fourth Street, New York, N. Y.

CORPORALS.

Harold E. Becker. Mrs. Obedia Becker, 14 North Third Street, Allentown, Pa.
Alger L. Conkey Dr. Leonard L. Conkey, Hartford, Mich.
Raymond Rankin. Mrs. Elizabeth Rankin, Coopersville, Mich.
George Quincy Rice. Bert L. Rice, 89 West Chicago Street, Quincy, Mich.
William P. Walker. Mrs. Rose Sprague, Nanty Glo, Pa.

MECHANICS.

David D. Misner. Mrs. Margaret Gamble, Homer City, Pa.
Mike V. Saner. Joseph Saner, Moundsville, W. Va.
William Joseph Unland. Mrs. Mary Unland, 5217 North Twenty-first Street, St. Louis, Mo.

PRIVATES.

Clyde Walton Arnold. Dorah M. Arnold, 154 Market Street, High Spire, Pa.
Lester Austin. Mrs. Lois Elizabeth Wood, Box 61, Burstone, N. Y.
George Christofilopulos. Christ Christofilopulos, 1479 Clayton Street, Denver, Colo.
Robert J. Elliott. Mrs. Sarah Elliott, Jericho, N. Y.
Robert Samuel Ellison. Mrs. Josephine Ellison, 1050 Helen Avenue, Detroit, Mich.
Arvid Erickson. Mrs. John Erickson, Princeton, Marquette County, Mich.
Melvin Erickson. Martin Erickson, 1714 Jenkins Street, Menominee, Mich.
Herbert L. Estep. Amos Estep, R. F. D. No. 1, Cotes Store, Rockingham, Va.
Douglas L. Fredendall. Mrs. V. Fredendall, R. F. D. No. 2, Monona, Iowa.
Joseph Horowitz. Mrs. Jennie Abrams, 422 East Eighty-fifth Street, New York, N. Y.
Albert Simon Hovinga. Simon D. Hovinga, R. F. D. No. 3, Hudsonville, Mich.
Bernard J. Hoy. Mrs. Anna M. Hoy, 19 Lowell Street, West Lynn, Mass.
William E. Kaiser. Mrs. L. Riegel, 543 Wilken Street, Indianapolis, Ind.
Harry E. Kronfield. Mrs. Fannie Kronfield, 2086 Vyse Avenue, New York, N. Y.
Chris Larson. Mrs. Lena Larson, Milltown, Wash.
Rene J. Lavigne. Helaire Lavigne, 21 Charlton Street, Southbridge, Mass.
Harry Daniel Mabry. Mrs. Mary Mabry, 1106 Douglas Street, Reading, Pa.
Otto E. Magnusson. Theodore Magnusson, 77 Cedar Road, New Rochelle, N. Y.
Peter F. Mills. John Mills, 1017 Washington Street, Norwood, Mass.
Louis Morano. Rose Pucciarelli, 218 East Twenty-second Street, New York, N. Y.
Benjamin T. Nolan. Patrick Nolan, 185 Gordon Street, Stapleton, N. Y.
Mitchel Edward Ogle. William Ogle, Sumner, Mo.
Jacob J. Pearson. William H. Pearson, 601 North Fifth Street, B Village, Hopewell, Va.
Jue Kee Pon. Jue Sing, 330 Marchessault Street, Los Angeles, Cal.
Arthur Barnes Sawyer. Shelton G. Sawyer, 1102 East Twentieth Street, Baltimore, Md.
Cornelius Scherpenisse. Daniel Scherpenisse, 1814 Center Avenue, Grand Rapids, Mich.
Joseph C. Schwartz. Mrs. Sarah Schwartz, 912 Ann Street, Homestead, Pa.
Joe Silvio. Victor Silvio, Frisco, La.
Kelly C. Smith. Miss Edna Smith, 378 Jane Court, Akron, Ohio.
Frank Somers. Mrs. Josephine Krause, Woodlyn, Pa.
Pasqualine Valli. Gildo Valli, 232 Oak Street, Harwinton, Conn.
George Edward Veldman. Mrs. Mary Peterson, 44 McCracken Avenue, Muskegon, Mich.
Bruno Urban. Miss Nellie Sedlak, 1922 Wittnell Avenue, St. Louis, Mo.
Charles Anthony Wisbisky. Mrs. Mary Wisbisky, 425 West Oak Street, Shenandoah, Pa.
Leslie J. Miller. John Miller, Grafton, N. Dak.
Arthur Moreau. Albert Moreau, 41 Taft Street, Greylock, Mass.
Alexander Murdock. Mrs. David Murdock, 644½ North Third Street, Saginaw, Mich.
Ingvald Myhre. Chris Myhre, Tilden, Nebr.
John A. Nelson. John Nelson, sr., Marmon, N. Dak.
Willie B. Orr. Mrs. Elia I. Orr, Dixon, S. Dak.
Vicenzo Parent. Sam Vent, 210 Ellis Street, Pittsburgh, Pa.
William H. Pierce. Mrs. V. Gilmore, New Rockford, N. Dak.
John L. Poltevecque. Mrs. Threse Padbury, 3008 Princeton Avenue, Chicago, Ill.
Francis V. Powers. William M. Powers, Rockwell City, Iowa.
Floyd C. Pruett. J. T. Pruett, Vinton, Iowa.
Walter R. Ramsay. L. S. Ramsay, Fort Kent, Me.
Weibe Ringnalda. Cathrina Ringnalda, R. F. D. No. 3, Byron Center, Mich.

OVERSEAS CASUALTY LIST

Wallace C. Roberson. Mrs. M. A. Lakey, Orofino, Idaho.
Will Rogers. Mrs. M. E. Foster, Turley, Okla.
Julio Ruiz. Mrs. Carmileda Ruiz, 1171 Fitzgerald Avenue, San Francisco, Cal.
Peter Sadowski. Mrs. Mary Sadowski, 304 Fourth Avenue, Manistee, Mich.
Joseph Samuels. Mike Zukle, 153 North Ohio Street, Los Angeles, Cal.
Ben Sarosik. Mrs. Mary Jinviski, 923 Thirteenth Street, Lorain, Ohio.

Pvt. Perry L. Sink. Nettie Sink, 162 Fullerton Avenue, Detroit, Mich.

NAVY

The Navy Department announces the following casualties:

Alfred Andrew, seaman second class, U. S. Naval Reserve Force, drowned at Training Camp, Seattle, Wash., September 11. Father, William H. Andrew, 101 Sixteenth Avenue, Baltic, Mich.

Roy Ellsworth Joyce, quartermaster third class, U. S. Naval Reserve Force, drowned September 14. Father, Moses D. Joyce, Deer Isle, Me.

Elmer Ellsworth Thomas, seaman, U. S. Naval Reserve Force, drowned September 14. Father, James H. Thomas, [illegible].

Joseph John Collins, chief quartermaster, U. S. Naval Reserve Force, was severely injured in a seaplane accident at Pensacola, Fla., September 17. Father, Patrick J. Collins, 173 Salem Street, Lawrence, Mass.

PERCENTUM PURCHASE CLAUSE WAIVED BY EXECUTIVE ORDER

EXECUTIVE ORDER.

Whereas by the act of Congress approved July 8, 1918, Public No. 189, 65th Congress, it is provided—

"That except as expressly otherwise authorized herein, no part of the sums appropriated by this act shall be expended in the purchase from private manufacturers of any material at a price in excess of 25 per cent more than the cost of manufacturing such material by the Government, or, where such material is not or has not been manufactured by the Government, at a price in excess of 25 per cent more than the estimated cost of manufacture by the Government: *Provided*, That whenever in the opinion of the President the situation is such as to justify such action he may waive the limitations contained in this section"—

And whereas in view of the practical impossibility under existing conditions of making the estimates necessary to comply fully and adequately with said provisions, it appears that the situation is such as to justify a waiver of said provisions;

It is hereby ordered that during the present national emergency the limitations contained in the above section be and the same are hereby waived.

WOODROW WILSON.

THE WHITE HOUSE,
August 29, 1918.

SEALED PROPOSALS INVITED

(Continued from page 3.)

Sealed proposals will be received until 5 o'clock p. m. September 27, 1918, at the Cantonment Indian Agency, Cantonment, Okla., for the following supplies: 300 linear feet hardware cloth, ¼-inch mesh, 36 inches wide. Make bids delivered f. o. b. Indian Warehouse, St. Louis, Mo.

Sealed proposals will be received until 2 o'clock p. m. September 28, 1918, at the Ute Mountain Indian School, Towaoc, Colo., for 50,000 pounds No. 2 (or better) sacked oats.

Sealed bids will be received until 2 o'clock p. m. October 1, 1918, at the Ute Mountain Indian School, Towaoc, Colo., for 40,000 feet of No. 9 galvanized wire.

The Reclamation Service, Department of the Interior, is asking for proposals for the construction of 12 miles of main lateral on the Fort Laramie Unit, North Platte irrigation project, Nebraska-Wyoming, involving about 167,000 cubic yards of excavation. The work is located near the Bridgeport-Guernsey line of the Chicago, Burlington & Quincy Railway, in the vicinity of Torrington, Wyo. Bids will be opened at the office of the United States Reclamation Service, Mitchell, Nebr., on October 15, 1918.

Sealed proposals will be received at the office of the Post Office Department purchasing agent until 2 o'clock p. m. October 7, 1918, for three electric motors, alternating current, ½ horsepower, 110 volts, 40 cycles, approximately 1,200 revolutions per minute. Motors to be equipped with 6-inch crowned pulleys 1½ inches wide; but if the speed of the motor differs from that specified, the pulleys should be changed accordingly to obtain the desired speed; 94 rheostats suitable for ½ horsepower, 110-volt direct-current [illegible]; 41 [illegible] suitable for ½ horsepower, 220-volt direct-current motors.

FELT FOR BOX-TOED SHOES AND HEEL PADS RESTRICTED

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

Box toes in shoes, felt heel pads, and felt inner soles are doomed unless the felt manufacturers have on hand necessary raw materials to supply the felt for these purposes, the War Industries Board has ruled.

Based on the decision of the boot and shoe section that felt for box toes in shoes is essential and for heel pads and inner soles is necessary the felt section of the War Industries Board will grant permits to the felt manufacturers to produce felts for these purposes for the time being.

But such permits will be issued based on these contingencies:

1. That the felt manufacturers have on hand the raw materials necessary for the manufacture of felts for such purposes, as the Government has no raw materials available which could be allotted to the felt mills for this purpose, and—

2. That the manufacture of such felts will not cause the felt mills to defer or delay in any way fulfillment of any Government orders, direct or indirect, which they may have on hand at the present time, or any which may be placed with them at some future time which would require priority of manufacture.

ARMY WILL BUY WOOL DIRECT FROM SOUTH AMERICAN DEALERS

The War Department authorizes the following:

Purchases of wool in South America by the Quartermaster Corps have become considerably larger than was contemplated when the present method of purchasing through a syndicate was adopted. It is therefore deemed advisable that a more direct method of buying wool in Argentina and Uruguay should be substituted for the present plan.

Brig. Gen. R. E. Wood, Acting Quartermaster General, has decided to send to Buenos Aires a direct representative and capable assistants, who, upon their arrival there, will buy directly for the Quartermaster Corps.

The present plan of purchasing through the syndicate located in Boston will be continued until the direct representatives of the Quartermaster Corps can arrive in Buenos Aires, but after their arrival the buying in Argentina and Uruguay will be done by them and the present plan of operation will be discontinued.

Brig. Gen. Wood has appointed Abraham Koshland, of Boston, as his direct representative for the purchase of wool in Argentina and Uruguay for the Quartermaster Corps. John Wilcock, of Boston, has been appointed as assistant to Mr. Koshland, and the names of the other assistants will be announced later.

No trouble to buy, cheap, convenient, a real investment—WAR-SAVINGS STAMPS.

President's Proclamation Requiring Fuel, Oil and Gas Dealers' Licenses

(Continued from page 1.)

necessaries, in order to carry into effect any of the purposes of this act, and shall publicly so announce, no person shall, after a date fixed in the announcement, engage in or carry on any such business specified in the announcement of importation, manufacture, storage, mining, or distribution of any necessaries as set forth in such announcement, unless he shall secure and hold a license issued pursuant to this section. The President is authorized to issue such licenses and to prescribe regulations for the issuance of licenses and requirements for systems of accounts and auditing of accounts to be kept by licensees, submission of reports by them, with or without oath or affirmation, and the entry and inspection by the President's duly authorized agents of the places of business of licensees."

And, whereas, It is further provided in said act as follows:

"That in carrying out the purposes of this act the President is authorized to enter into any voluntary arrangements or agreements, to create and use any agency or agencies."

And, whereas, The President has heretofore designated and appointed Harry A. Garfield United States Fuel Administrator for the purpose of carrying into effect the provisions of said act, relating to fuel, and has directed that: "Said Fuel Administrator shall supervise, direct, and carry into effect the provisions of said act and the powers and authority therein given to the President so far as the same apply to fuel as set forth in said act, and to any and all practices, procedure, and regulations authorized under the provisions of said act applicable to fuel, including the issuance, regulation, and revocation under the name of said United States Fuel Administrator of licenses under said act," and has authorized said Fuel Administrator to employ such assistants and subordinates as may from time to time be deemed by him necessary, said Fuel Administrator and such assistants and subordinates together constituting the governmental organization called the United States Fuel Administration.

And whereas it is essential in order to carry into effect the provisions of said act, and in order to secure an adequate supply and adequate distribution, and to facilitate the movement of certain necessaries hereafter in this proclamation specified, that the license powers conferred upon the President by said act be at this time exercised to the extent hereinafter set forth,

Now, therefore, I, Woodrow Wilson, President of the United States of America, by virtue of the powers conferred on me by said act of Congress, hereby find and determine and by this proclamation do announce that it is essential, in order to carry into effect the purposes of said act, to license the importation, manufacture, storage, and distribution of certain necessaries to the extent hereinafter specified:

All persons, firms, corporations, and associations engaged in business as—

(a) Importers of crude oil, fuel oil, gas oil, kerosene, or gasoline;

(b) Manufacturers of fuel oil, gas oil, kerosene, or gasoline;

(c) Distributors or marketers of crude oil, fuel oil, gas oil, kerosene, or gasoline;

(d) Transporters of crude oil, fuel oil, gas oil, kerosene, or gasoline (except those specifically exempted by said act of Congress);

(e) Producers of natural gas who also distribute and market their product;

(f) Distributors or marketers of natural gas;

(g) Transporters of natural gas (except those specifically exempted by said act of Congress);

excepting, however, retailers of crude oil, fuel oil, gas oil, kerosene, gasoline, or natural gas, whose gross sales of crude oil, fuel oil, gas oil, kerosene, gasoline, and natural gas do not exceed $100,000 per annum, are hereby required to secure on or before October 1, 1918, a license, which license will be issued under such rules and regulations governing the conduct of the business as may from time to time be prescribed by the President of the United States, or by the United States Fuel Administrator acting by virtue of the authority heretofore as aforesaid, or hereby, delegated to him by the President.

The United States Fuel Administrator shall supervise, direct, and carry into effect the provisions of said act and the powers and authority thereby given to the President, as the same applies to crude oil, fuel oil, gas oil, kerosene, gasoline, or natural gas and to any and all practices, procedure, and regulations authorized or required under the provisions of said act, including issuance, regulation, and revocation, in the name of said Fuel Administrator, of licenses under said act; and in this behalf he shall also do and perform such other acts and things as may be authorized or required of him from time to time by direction of the President, and under such rules and regulations as may be prescribed by the President from time to time.

For all the purposes aforesaid the United States Fuel Administrator may make use of the said governmental organization called the United States Fuel Administration.

Application for licenses must be made to the United States Fuel Administration, Oil Division, Washington, D. C., upon forms approved by the Fuel Administrator for that purpose. The holders of existing licenses issued by the United States Fuel Administration are not required to secure a new license.

Any such person, firm, corporation, or association who, without a license, or whose license shall have been revoked, knowingly engages in or carries on any business for which a license is required under this proclamation, will be liable to the penalties prescribed by said act of Congress.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia, this 16th day of September, in the year of our Lord 1918, and of the independence of the United States of America the 143d.

[SEAL.] WOODROW WILSON.

By the President:

ROBERT LANSING,
Secretary of State.

STEEL AND IRON ORE MEN MEET WITH PRICE FIXING COMMITTEE

Schedules for the Quarter Beginning October 1 Discussed at General Conference.

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

The price-fixing committee of the War Industries Board, Robert S. Brookings, chairman, met with representatives of the steel, pig iron, and iron ore industries to consider price fixing for the quarter beginning October 1 and ending January 1. Prices fixed will be submitted to President Wilson for approval before being announced.

Present prices fixed by the price-fixing committee three months ago are: Iron ore, $5.50 per ton, base lower lake ports; pig iron, $32 per ton; steel, scrap, $29 per ton f. o. b. consuming point.

Besides the price-fixing committee the War Industries Board was represented at the conference by J. Leonard Replogle, steel administrator, and Herbert Bayard Swope, associate member of the board and assistant to B. M. Baruch, the chairman.

The Industries Represented.

The industries were represented by:

E. H. Gary, J. A. Farrell, and W. J. Filbert, United States Steel Corporation; E. J. Grace, Bethlehem Steel Corporation; A. C. Dinkey, Midvale Steel & Ordnance Co.; Willis L. King, Jones & Laughlin Steel Co.; C. R. Robinson, Lackawanna Steel Co.; A. H. Woodward, Woodward Iron Co.; James B. Bonner and H. J. Watt, American Iron and Steel Institute; H. G. Dalton, Pickands Mather & Co.; L. E. Block, Inland Steel Co.; D. B. Warren, J. D. Ireland, John A. Savage, W L Tinker, and T. D. Heed, Lake Superior Iron Ore Association; J. A. Campbell, The Youngstown Sheet & Tube Co.; D. T. Croaton, William H. Lindsey, John B. Newton, E. N. Rich, and John A. Penton, Associated Manufacturers of Merchant Pig Tin; C. E. Bertie, Virginia Iron, Coal & Coke Co.; Francis J. Hall, Central Iron & Steel Co.; W. P. Worth, Worth Steel Co.; David Reeves and A. H. Cordery, Phoenix Iron Co.; J. V. W. Reynders, American Tube & Stamping Co.; Joseph F. Savage, American Tube & Stamping Co.; R. A. Rainey, W. J. Rainey, Samuel Hale, and S. J. Llewellyn, Interstate Iron & Steel Co.; J. E. Frederick, Kokoneo Steel & Wire Co.; William P. Snyder, jr., The Shenango Furnace Co.; A. F. Hutson, Lukens Steel Co.; Leonard Peckitt, Empire Steel & Iron Co.; W. S. Pilling, Northern Iron Co.; Thomas K. Glinn, Atlantic Steel Co.; H. G. Moore, Keystone Steel & Wire Co.

NAMED LIEUTENANT COLONEL.

Special Orders, No. 210:

392. The appointmnt of Maj. William E. Larned, Field Artillery, Signal Corps, to the grade of lieutenant colonel, Field Artillery, United States Army, during the existing emergency, with rank from July 30, 1918, is announced. He is assigned to the 2d Field Artillery, Fort Sill, Okla.

BIDS FOR SUPPLIES INVITED BY QUARTERMASTER, NEW YORK

The office of the Quartermaster General, New York City, issues the following:

Sealed proposals in triplicate for furnishing 4,320,000 cotton huckaback bleached towels, size 18 by 36, weighing approximately 2.25 pounds per dozen finished, for delivery October, November, and December, 1918, towels to be stenciled in indelible ink M. D., U. S. A., in letters not less than 1 inch high on each towel, will be received here until 2 o'clock p. m. September 30, 1918. Information on application. Envelopes containing proposals to be indorsed, "Proposals for cotton huckaback bleached towels," and addressed to the Cotton Goods Branch, Clothing and Equipage Division, 109 East Sixteenth Street, New York City.

Sealed proposals in triplicate for furnishing 1,000,000 sheets 36 by 50 inch baling paper, waterproofed, expansive, or otherwise, delivery during October and November, 1918, will be received here until 2 o'clock p. m. September 27, 1918. Information on application. Envelopes containing proposals to be indorsed "Proposals for baling paper" and addressed to the Cotton Goods Branch, Clothing and Equipage Division, 109 East Sixteenth Street, New York City.

Sealed proposals in triplicate for furnishing 567,000 yards 32-inch 8-ounce blue stripped ticking, delivery in September and October, 1918, will be received here until 2 o'clock p. m. September 27, 1918. Information on application. Envelopes containing proposals to be indorsed "Proposals for blue striped ticking" and addressed to the Cotton Goods Branch, Clothing and Equipage Division, 109 East Sixteenth Street, New York City.

Sealed proposals, in triplicate, will be received at this office until 12 o'clock noon, October 2, 1918, for furnishing 500,000 gray duck feather pillows. Specifications and proposal blanks may be obtained from the depot quartermasters or at this office. Envelopes containing proposals to be indorsed "Proposals for pillows," and addressed to Manufacturing Branch, Clothing and Equipage Division, 109 East Sixteenth Street, New York City.

Sealed proposals, in triplicate, for furnishing 5,000,000 yards 36-inch 83 by 58 1.78 drill, to be made from 14's single warp and 10¾'s single filling, breaking strength in the warp 115 pounds and breaking strength in the filling 105 pounds, for delivery beginning October and running through January, 1919, will be received here until 2 o'clock p. m., September 30, 1918. Information on application. Envelopes containing proposals to be indorsed "Proposals for 36-inch 83 by 58 1.78 drill," and addressed to the Cotton Goods Branch, Clothing and Equipage Division, 109 East Sixteenth Street, New York City.

Sealed proposals, in triplicate, for furnishing 300,000 yards 39-inch 72 by 76 4.25 sheeting, made of strict to good middling grade of cotton, at least 1 1/16-inch staple, carefully carded to secure evenness, pieces to be not less than 50 yards in length, material to be free from imperfections as is consistent with a good manufacturing process, for delivery 30,000 yards weekly, will be received here until 2 o'clock p. m., September 30, 1918. Information on application. Envelopes containing proposals to be indorsed "Proposals for 39-inch 72 by 76 4.25 sheeting," and addressed to the Cotton Goods Branch, Clothing and Equipage Division, 109 East Sixteenth Street, New York City.

TWO ASSISTANTS APPOINTED TO MAJOR GENERAL GOETHALS

The War Department authorizes the following:

Under the reorganization of the General Staff, Brig. Gen. Hugh S. Johnson and Gerard Swope have been appointed assistants to Maj. Gen. George W. Goethals, Director of Purchase, Storage and Traffic.

The Quartermaster General of the Army is made director of purchase and storage, and will be responsible for and have authority over storage, distribution and issue within the United States of all supplies for the Army. Col. William H. Rose, of the Corps of Engineers, is designated to act under him as director of purchase, while Col. F. B. Wells will act as director of storage with L. M. Nicolson as his assistant.

PROGRAM FOR CONSERVATION OF FELT FOR PAPER MAKING

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

Wool felts are essential in the making of paper. All substitutes have proved inadequate, unsatisfactory, wasteful, or useless. As the wool supply of this country is limited and the Government requirements are very great, the War Industries Board, through joint action by its pulp and paper section, department of paper makers' felts in the felt section, and the conservation division, has put forth a program of conservation of wool in the manufacture of paper makers' felts and jackets designed to get the greatest service from the wool felts used, and to prevent destruction and waste.

Large Stocks Prohibited.

Large stocks of felts in the pulp, paper, and board mills are prohibited. Mill stocks on the Pacific coast are restricted to six months' supply; mills in all other districts to four months' supply. A report is ordered as of October 1 of stocks of wool felts and jackets on order and on hand, how many weeks' supply, and average length of service given by felts used.

A responsible officer of each mill must certify that every effort has been made to carry out suggestions for conservation of the felts sent out September 14 by the War Industries Board. Among suggestions made are: Keep stock cool and dry, as moisture causes mildew and destruction of wool fiber. Keep it clean, as dirt injures it and attracts moths. Use moth prevention freely and frequently. Handle felts carefully and do not tear them. Keep machines in good condition. Get every day's wear out of the felts. Post notices in plants. Superintendents and foremen of mills are cautioned to examine felts on machines carefully before allowing them to be taken off machines and new ones given out. From felts that can be run longer blankets have been made by mill workers. Wool must be saved for the Government. Wash and dry the used felts, save the small pieces, and sell them at once, as every pound can be used.

Ordering of Felts.

The conservation program requires paper manufacturers to order felts no wider or longer than needed; the elimination of special textures, designs limited to two for each grade of felt; the substitution of cotton for woolen drier felts; no manufacturer to make more than three grades of jackets; discontinuance of marking felts for special designs of paper; merino and half-blood wools to be used in place of three-eighths wools and low-quarter common and braid in place of quarter-blood wools where possible; manufacturers to dispose at once of obsolete felts in stock.

RAILROAD MEN MAY CONTINUE IN POLITICAL OFFICES WHEN ELECTED PRIOR TO ORDER NO. 42

The United States Railroad Administration issues the following:

WASHINGTON, *September 14, 1918.*

SUPPLEMENT No. 1 TO GENERAL ORDER No. 42.

(1) It appears that prior to the issuance of General Order No. 42, various railroad officers, attorneys, and employees were elected to political offices and are now holding such offices. In such cases, no objection will be raised to the completion of such terms of office. In all other respects, however, General Order No. 42 will apply to such officers, attorneys, and employees.

(2) In cases where prior to the issuance of General Order No. 42 railroad officers, attorneys, and employees had been nominated for political offices or had become candidates locally for such offices, they may continue in railroad employment until the election.

(3) The position of notaries public, members of draft boards, officers of public libraries and of religious and eleemosynary institutions are not construed as political offices.

W. G. MCADOO,
Director General of Railroads.

Inquiry Into Mine Wages Now Nearly Completed

The Bureau of Labor Statistics of the Department of Labor authorizes the following:

Agents of the Bureau of Labor Statistics of the United States Department of Labor who have for the past week been examining into the wages prevailing in anthracite coal mines and in other industries in or near these coal fields have almost completed their work. Meanwhile, data regarding the wages paid by the railroads, munition plants, and soft-coal operators, and competitive industries are being rapidly gathered and put into form for comparison. The results of these investigations are to be used in the adjustment of wages in the coal-mining industry.

POSTAL RULES AMENDED.

OFFICE OF THE P. M. GENERAL,
Washington, September 7, 1918.

ORDER No. 1964:

Section 973, paragraph 6, of the Postal Laws and Regulations, is hereby amended to read as follows:

6. When the sender is incompetent or deceased and has no legal representative or can not be located after a reasonable effort, the department reserves the right to pay indemnity to such relative of the sender as may in its judgment be entitled to receive the amount due, or to pay the addressee or owner of the contents of an article, when indemnity is claimed by him under the circumstances outlined, without procuring the consent of the sender.

A. S. BURLESON,
Postmaster General.

RULES FOR RUBBER FOOTWEAR MAKERS RESTRICTING STYLES AND MATERIALS ISSUED BY WAR INDUSTRIES BOARD

The Conservation Division, War Industries Board, issues the following schedule for manufacturers of rubber footwear:

Changes effective.—The plan outlined in this schedule is to be fully in effect for all waterproof goods not later than January 1, 1919, and for all canvas rubber soled shoes not later than September 1, 1918.

1. Lasts.—No new lasts are to be introduced other than are necessitated by changes in leather footwear styles, or by Government requirements.

2. Third quality goods.—This line is to be limited to arctics and gum shoes. The manufacture of boots, lumbermen's and gaiters, fleece lined gum shoes and arctics to be discontinued. The use of cashmerette or jersey cloth in this grade is to be discontinued.

3. Boots (a).—The manufacture of all duck boots of all kinds to be discontinued in so far as possible. (b) The manufacture of duck vamp boots, except in men's sizes only, to be discontinued. (c) The manufacture of regular dull finish (except in plain edge only) to be discontinued. (d) Leather insoles in all boots to be discontinued.

4. Hip boots.—The manufacture of the following to be discontinued: (a) Duck vamp in lower grades than first. (b) Felt lining in duck vamp. (c) Women's. (d) So-called "fireman's." (e) Boys' and youths'.

5. Sporting boots.—The manufacture of the following to be discontinued: (a) Duck vamp in lower grades than first. (b) Felt lining in duck vamp. (c) Women's. (d) So-called "fireman's." (e) Boys' and youths.'"

6. Short boots.—The manufacture of the following to be discontinued: (a) Men's, boys', and youths' pebble leg and bright finish in all styles. (b) Women's, misses', and children's in either pebble or plain. Each manufacturer to continue making one way only, as he may elect, either all pebble or all plain. (c) Women's, misses', and children's "Oyster."

7. Knee boots.—The manufacture of this pattern to be discontinued.

8. Rolled edge arctics and gaiters.—The manufacture of rolled edge arctics and gaiters to be confined to men's sizes only, all others to be discontinued.

9. All rubber gaiters.—The manufacture of all rubber gaiters to be discontinued, in the following grades: (a) Third quality. (b) Second quality, except as a substitute when cashmerette is not available.

10. One-buckle arctics.—The manufacture of the following one-buckle arctics to be discontinued: (a) Men's, boys, and youths' "Omaha" arctics and excluders. (b) Misses' and children's snow excluders. (c) Boys' and youths' jersey cloth arctics.

11. Gaiters and lumbermen's.—The manufacture of the following to be discontinued: (a) Men's motormen's gaiters. (b) Men's, boys' and youths' plow shoes. (c) Men's Ottawa (high lace lumbermen's duck vamp, gum upper). (d) Men's, boys' and youths' two-buckle captain. (e) Men's, boys' and youths' one-buckle corporal. (f) Men's, boys' and youths' gum ribbed Huron buckle and lace. (g) Men's, boys' and youths' "Lumbermen's "snow excluders and arctics, one and two buckles. (h) Boys' and youths' duck lace Lumber King. (i) Men's, boys' and youths', women's, misses' and children's two-buckle jersey cloth gaiters.

12. Heights of gaiters,—Buckle gaiters are not to be made higher than the present 4-buckle height in men's, boys' and youths', and the present 3-buckle height in women's, misses' and children's.

13. Jersey cloth gaiters and Alaskas.—The manufacture of jersey cloth gaiters and alaskas to be restricted to first and extra quality.

14. Gum shoes.—The manufacture of the following to be discontinued: (a) Men's one-strap (instep) sandals. (b) Men's, boys', youths', women's, misses', and children's plain sandals and self-acting sandals and "croquet" with fleece lining. (Storm pattern not included.) (c) Men's, boys', youths', women's, misses', and children's self-acting storm pattern. (d) Men's, boys', youths', women's, misses', and children's Russian rubbers. (e) Men's, boys', youths', women's, misses', and children's low vamp (not storm pattern) Alaskas. (f) Boys' and youths' Alaskas. (g) Boys' and youths', women's, misses', and children's clogs. (h) Youths' self-acting sandals. (i) All self-acting Alaskas, both storm and low pattern.

15. Catalogues, price lists, etc.—All 1919 catalogues are to be condensed and made as simple as practicable, having in mind the necessity for conserving paper.

16. Flour or starch finish.—The use of flour, starch, or similar finish is to be discontinued, except that skirts of top boots only may be treated with whiting or something similar for convenience of manipulation in manufacture when necessary.

17. Varnish.—(a) Cashmerette or so-called heavy artics or gaiters are not to be varnished. (b) Canvas rubber-soled shoes are not to be varnished.

18. Cotton net and sheeting linings.—(a) The use of dyed linings in gum shoes to be discontinued. (b) The use of dyed lining in all boots is to be discontinued, except that women's, misses', and children's boots may carry black fleece lining. (c) The use of dyed lining in lumbermen's, except in fleece lined, is to be discontinued.

19. Packing—Cartons.—The packing in cartons of the following goods, with the exceptions noted, is to be discontinued, and packing is to be in bulk: (a) All first quality and extra heavy goods and jersey cloth arctics and gaiters except first quality gum-shoe specialties—specialties include jersey cloth Alaskas. (b) All second quality goods, except women's gum shoes. (c) All third quality goods. (d) Canvas rubber soled shoes in cheap grades, corresponding to Vims, when made

EXECUTIVE ORDERS CANCELING CERTAIN PROPERTY SALES MADE IN THE PHILIPPINES BY ALIEN PROPERTY CUSTODIAN

EXECUTIVE ORDER.

AN EXECUTIVE ORDER CANCELING SALE OF PART OF A. RICHTER & CO., KNOWN AS "LA SOMBRERIA," MADE TO E. P. BRIAS Y ROXAS BY THE ALIEN PROPERTY CUSTODIAN'S REPRESENTATIVE PURSUANT TO THE "TRADING-WITH-THE-ENEMY ACT" AND AMENDMENTS THEREOF.

By virtue of the authority vested in me by "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, known as the "Trading-with-the-enemy act," and the amendments thereto embodied in "An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years, on account of war expenses, and for other purposes," approved March 28, 1918, and all other powers and authorities me hereto enabling, I hereby, in the public interest, make the following determination and order:

Whereas A. Mitchell Palmer, Alien Property Custodian, has reported to me that a certain property known as "La Sombreria," part of A. Richter & Co., was offered for sale at Manila, in the Philippines, by Francis Burton Harrison, the custodian's representative in the Philippines, on March 21, 1918, and the said property was bid in by E. P. Brias y Roxas, on April 1, 1918, and that the said sale was not advertised or conducted in accordance with rules and regulations prescribed by me, as required by the said "Trading-with-the-enemy act," as amended, nor in accordance with the instructions and policies of A. Mitchell Palmer, Alien Property Custodian, and that he has therefore disapproved the said sale;

Now, therefore, I hereby declare the said sale to be void and of no effect, and I hereby authorize and direct the Alien Property Custodian to reject all bids received at the said sale, including the bid of the said E. P. Brias y Roxas.

My reasons for the foregoing determination and order are:

(1) That by the powers granted me under said act of Congress, and by the Executive order issued by me on October 12, 1917, to the War Trade Board, and by the license granted by the said War Trade Board, the La Sombreria part of A. Richter & Co. should have been liquidated under said license and by the party designated in said license, and not sold by the Alien Property Custodian's representative.

2. That on the date of the advertisement, even if the Alien Property Custodian had the power to take over the above-mentioned property, there was no authority in law to sell the same either at public or private sale.

(3) The selling of the property by sealed bids.

(4) The advertised conditions of the sale excluded American corporations who are legally entitled to bid, and contained several objectionable details.

(5) The sale was not made under the rules and regulations prescribed by me and as required by said act as amended, and not in accordance with the instructions and policies of the Alien Property Custodian.

WOODROW WILSON.

THE WHITE HOUSE,
September 13, 1918.

EXECUTIVE ORDER.

AN EXECUTIVE ORDER CANCELING SALE OF PART OF A. RICHTER & COMPANY, KNOWN AS "EL SIGLO," MADE TO LORZA & LOZANO BY THE ALIEN PROPERTY CUSTODIAN'S REPRESENTATIVE PURSUANT TO THE "TRADING-WITH-THE-ENEMY ACT" AND AMENDMENTS THEREOF.

By virture of the authority vested in me by "An act to define, regulate and punish trading with the enemy, and for other purposes," approved October 6, 1917, known as the "Trading-with-the-enemy act," and the amendments thereto embodied in "An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years on account of war expenses and for other purposes," approved March 28, 1918, and all other powers and authorities me hereto enabling, I hereby, in the public interest, make the following determination and order:

Whereas A. Mitchell Palmer, Alien Property Custodian, has reported to me that a certain property known as "El Siglo," part of A. Richter & Company, was offered for sale at Manila, in the Philippines, by Francis Burton Harrison, the Custodian's representative in the Philippines, on March 21, 1918, and the said property was bid in by Lorza & Lozano on April 1, 1918, and that the said sale was not advertised or conducted in accordance with rules and regulations prescribed by me as required by the said "Trading-with-the-enemy act," as amended, not in accordance with the instructions and policies of A. Mitchell Palmer, Alien Property Custodian, and that he has therefore disapproved the said sale;

Now Therefore, I hereby declare the said sale to be void and of no effect, and I hereby authorize and direct the Alien Property Custodian to reject all bids received at the said sale, including the bid of the said Lorza and Lozano.

My reasons for the foregoing determination and order are:

(1) That by the powers granted me under said act of Congress, and by the Executive order issued by me on October 12, 1917, to the War Trade Board; and by the license granted by the said War Trade Board, "El Siglo," part of A. Richter & Company, should have been liquidated under said license and by the party designated in said license and not sold by the Alien Property Custodian's representative

(2) That on the date of the advertisement, even if the Alien Property Custodian had the power to take over the above-mentioned property, there was no authority in law to sell the same either at public or private sale.

(3) The selling of the property by sealed bids.

(4) The advertised conditions of the sale excluded American corporations who are legally entitled to bid, and contained several objectionable details.

(5) The sale was not made under the rules and regulations prescribed by me and as required by said act as amended, and not in accordance with the instructions and policies of the Alien Property Custodian.

WOODROW WILSON.

THE WHITE HOUSE,
September 13, 1918.

EXECUTIVE ORDER.

AN EXECUTIVE ORDER CANCELING SALE OF PART OF GERMANN & COMPANY, LTD., INC., MADE TO THE OXY-ACETYLENE WELDING & CUTTING COMPANY, CHANGED TO PHILIPPINE ENGINEERING COMPANY, INC., BY THE ALIEN PROPERTY CUSTODIAN'S REPRESENTATIVE PURSUANT TO THE "TRADING-WITH THE ENEMY ACT" AND AMENDMENTS THEREOF.

By virtue of the authority vested in me by "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, known as the "Trading with the enemy act," and the amendments thereto embodied in "An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years, on account of war expenses, and for other purposes," approved March 28, 1918, and all other powers and authorities me hereto enabling, I hereby, in the public interest, make the following determination and order:

Whereas A. Mitchell Palmer, Alien Property Custodian, has reported to me that a certain property known as the Engineering Department of Germann and Company, Ltd., Inc., was offered for sale at Manila, in the Philippines, by Francis Burton Harrison, the custodian's representative in the Philippines, on May 1, 1918, and the said property was bid in by Oxy-Acetylene Welding and Cutting Company, changed to Philippine Engineering Company, Inc., on May 13, 1918, and that the said sale was not advertised or conducted in accordance with rules and regulations prescribed by me, as required by the said "Trading with the enemy act," as amended, nor in accordance with the instructions and policies of A. Mitchell Palmer, Alien Property Custodian, and that he has therefore disapproved the said sale;

Now, therefore, I hereby declare the said sale to be void and of no effect, and I hereby authorize and direct the Alien Property Custodian to reject all bids received at the said sale, including the bid of the said Oxy-Acetylene Welding and Cutting Company.

My reasons for the foregoing determination and order are:

(1) The short notice given of the sale and inadequate opportunity for purchasers to inform and prepare themselves to bid.

(2) The exclusion of the public from the sale, which deprived it of the public character required by the aforesaid act of Congress as amended.

(3) The advertised conditions of the sale excluded American corporations who are legally entitled to bid, and contained several objectionable details.

(4) The sale was not made under the rules and regulations prescribed by me and as required by said act as amended, and not in accordance with the instructions and policies of the Alien Property Custodian.

WOODROW WILSON.

THE WHITE HOUSE,
September 13, 1918.

EXECUTIVE ORDER.

AN EXECUTIVE ORDER CANCELING SALE OF "HELIOS" CIGAR FACTORY, PART OF GERMANN & COMPANY, INC., MADE TO WALTER E. OLSEN AND COMPANY, BY THE ALIEN PROPERTY CUSTODIAN'S REPRESENTATIVE, PURSUANT TO THE "TRADING WITH THE ENEMY ACT," AND AMENDMENTS THEREOF.

By virtue of the authority vested in me by "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, known as the "Trading with the enemy act," and the amendments thereto embodied in "An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years, on account of war expenses, and for other purposes," approved March 28, 1918, and all other powers and authorities me hereto enabling, I hereby, in the public interest, make the following determination and order:

Whereas A. Mitchell Palmer, Alien Property Custodian, has reported to me that a certain property known as the "Helios" Cigar Factory, part of Germann & Company, Inc., was offered for sale at Manila, in the Philippines, by Francis Burton Harrison, the custodian's representative in the Philippines, on May 1, 1918, and the said property was bid in by Walter E. Olsen & Company, on May 7, 1918, and that the said sale was not advertised or conducted in accordance with rules and regulations prescribed by me, as required by the said "Trading with the enemy act," as amended, nor in accordance with the instructions and policies of A. Mitchell Palmer, Alien Property Custodian, and that he has therefore disapproved the said sale;

Now, therefore, I hereby declare the said sale to be void and of no effect, and I hereby authorize and direct the Alien Property Custodian to reject all bids received at the said sale, including the bid of the said Walter E. Olsen & Company.

My reasons for the foregoing determination and order are:

(1) The short notice given of the sale, and inadequate opportunity for purchasers to inform and prepare themselves to bid.

(2) The exclusion of the public from the sale, which deprived it of the public character required by the aforesaid act of Congress as amended.

(3) The advertised conditions of the sale excluded American corporations who are legally entitled to bid, and contained several objectionable details.

(4) The sale was not made under the rules and regulations prescribed by me and as required by said act as amended, and not in accordance with the instructions and policies of the Alien Property Custodian.

WOODROW WILSON.

THE WHITE HOUSE.
September 13, 1918.

EXECUTIVE ORDER

VESTING POWER AND AUTHORITY IN A DESIGNATED OFFICIAL OR HIS SUCCESSOR IN OFFICE, SUBJECT TO THE SUPERVISION OF THE ALIEN PROPERTY CUSTODIAN.

By virtue of the authority vested in me by "An act to define, regulate and punish trading with the enemy, and for other purposes," approved October 6, 1917, known as the "Trading with the enemy act," and the amendments to such act, embodied in "An act making appropriations to supply urgent

(Continued on page 14.)

Methods of Selection and Work Done By Bureau of Commerce Investigators Analyzed and Explained by Chief

The Bureau of Foreign and Domestic Commerce authorizes the following:

There seems to be some misunderstanding in certain quarters as to the caliber of the men selected to make foreign-trade investigations for the Bureau of Foreign and Domestic Commerce and also as to the methods of selecting men for this very important work. Such misunderstanding is most unfortunate in view of the fact that these investigators must have the absolute confidence of the business community which they serve. An instance of such misunderstanding came to light recently in a questionnaire circulated among business men by one of the most efficient and energetic commercial organizations of the far West. It was thought proper to address to this organization a letter explaining how the bureau's agents are selected, and for the benefit of the business public in general that letter is reproduced here substantially as written, as follows:

Letter to the Business Public.

GENTLEMEN: I have a copy of your questionnaire setting forth 30 questions on after-war trade which you present as subjects to be talked over and to be thought about by business men. The idea is a good one and it is unquestionably an important thing that American business men should be clarifying their thoughts with reference to the very important questions which bear on our trade in the future.

There are several points, however, that I wish to raise in connection with the question that reads as follows:

"Do you not think our Government should send competent trade representatives to the various foreign countries to make reports; that the compensation for such representatives should be sufficient to secure practical men and give them ample help? While it may be true many of the reports now being made are of little value, could not competent agents gather and send in much information of value as to what other countries were doing, samples of articles supplied by such countries, with prices, etc.?"

Wording of the Question.

The wording of this question is in the typical leading question form and tends to give rise to the inference that our Government is not to-day sending competent trade representatives to the various foreign countries to make reports. It gives rise to the further inference that to-day the Government is not securing practical men. It gives rise to the inference that to-day many of the reports being made are of little value and that reports are not being made containing information of value as to what other countries are doing; that samples of articles supplied by such countries, with prices, etc., are not now being sent in.

Only Competent Representatives Selected.

The Bureau of Foreign and Domestic Commerce of the Department of Commerce is sending and has for years been sending thoroughly competent trade representatives to various foreign countries to make reports. The system by which the special agents and trade commissioners of the department are picked gives as sure a guaranty of competency as any system could give. The men are not picked for political reasons; they are not picked on any purely academic basis. They are picked purely on the basis of their equipment for the work which they have to do. If a man is picked to report on ports and transportation in a foreign part of the world, he is selected only from candidates who have shown their fitness for that class of work. I think you would hardly care to raise in question the competency of the trade commissioner now conducting such an investigation for the department in the Orient; his reputation was made on the Pacific coast and was established throughout this country and Canada.

Manner of Selection.

If the department is picking a man to investigate foreign markets for electrical machinery, or for agricultural machinery, it does not make its choice in a haphazard manner. In the first place it takes the question up with the various engineering and manufacturing concerns interested in such an investigation, and the specialized trade organization whose membership is primarily interested in such investigations is given an opportunity to help pick the candidate in question. To-day the bureau has four trade commissioners investigating the lumber trade in foreign countries. Those commissioners were picked by the American lumber manufacturers. The written examination questions were drawn up by the leading lumbermen, and the oral examining board which passed on the qualifications of the large number of candidates was made up chiefly of the leading lumbermen of the United States. Similarly the investigators for foreign markets for agricultural machinery were men who had demonstrated their fitness for the work and were recommended by the National Implement and Vehicle Association. I could go right down the line taking our appointees man for man and show that this standard of competency is not merely on paper but is actually in effect.

Work Out in Practice.

Better than that, it can be shown that these preliminary tests have almost without exception worked out in actual practice, and that the work of the agents appointed on this basis has been not only practical, but has been acknowledged by concern after concern, and by national associations, as exactly what the trade and the associations in question desire. From not one of these associations has the practical value of the reports or the competency of our agents been called in question. Several of the national associations are actually cooperating with the bureau in bearing the expense incidental to the field investigations in which they are interested. It is not the exception for the national associations to pass resolutions of appreciation of the work of this agent or that agent in the specialized fields in which they are interested. If you want to get information as to what other countries are doing, I refer you with great confidence to the reports of these very agents. The information in these reports has satisfied the men in the trade, and I imagine that is as severe a test as could be desired.

Sample Work a Feature.

You also suggest the advisability of having samples of articles supplied by foreign countries, with indication of prices, etc. This sample work is one of the outstanding features of the foreign investigations of the agents of the Bureau of Foreign and Domestic Commerce. Many of these samples are sent around the country for exhibition in the district offices of the bureau or in chambers of commerce where the bureau has no district or cooperative offices. Agents returning bring numerous samples with them which they display in making their trips through the manufacturing and trading centers in this country. In connection with our New York office we have a well-equipped, well-arranged, rapidly growing exhibition of competitive products which have been purchased by our representatives over the counter in foreign countries, and are well tagged not only as to prices but as to all the other pertinent facts which an American manufacturer interested in them should know.

Bureau Welcomes Suggestions.

It is not very often that the bureau is called on to be on the defensive with reference to its work. It is very seldom indeed that any reflections on the work are cast by a chamber of commerce. We do not adopt an attitude of believing that we are perfect or beyond criticism or resentment at any sort of fair and helpful criticism. On the contrary, we welcome it. It is by the suggestions of the commercial organization and the business man using our reports and benefiting from the work of our agents that we are able to make that work progressively better. If you have any specific grievances against the bureau or any specific criticism of the work of any of its trade representatives, we invite you to bring them to our attention. We will not simply tell you that "the matter will receive careful consideration;" we shall be very glad to go into it and if there is anything wrong, see that it is remedied as soon as possible.

Regarded as Unfortunate.

We do regard it as unfortunate that in a formal printed questionnaire such as yours of August 28, which is sent out to make manufacturers and merchants think clearly on the problems of foreign trade, a slant should be given to the effect that the Government is not sending out competent trade representatives, is not getting out reports of value, is not telling what foreign countries have done, is not getting samples. These are the very things that the Government is doing, and according to the brunt of the testimony, is doing very well. Some of the readers of your bulletin will know this, but others will be unaware of it, and there is a possibility that the questions will lead to wrong ideas as to matters of fact rather than to clear thinking.

Very truly yours,

B. S. CUTLER,
Chief of Bureau.

NOTICE OF PROPOSED PURCHASES FOR THE UNITED STATES NAVY

WASHINGTON, Sept. 5, 1918.

The Bureau of Supplies and Accounts of the Navy Department has issued notice of proposed purchases of the following material. Bidders desiring to submit proposals should request the Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to send schedules covering the material which they propose to offer, giving schedule numbers.

MISCELLANEOUS.

Articles.	Quantity.	Delivery at navy yard.	Sch.
Crucibles	Miscellaneous	Portsmouth, N. H.	1949
Lead, sheet, in rolls 17 by 17½ feet	do	Various	1957
Pipe, lead, in commercial coils	do	do	1957
Plant, generating, oxygen-hydrogen electrolytic.	1	Boston, Mass.	1951
Pumps	Miscellaneous	do	1950
Tin, phosphor, ingot	do	Various	1944
Tubing, admiralty metal, seamless	do	do	1956
Tubes, condenser, admiralty metal	do	do	1956
Tubes, evaporator, admiralty metal	do	do	1956

BRASS, BRONZE, AND COPPER MATERIALS—BARS, SHEETS, PIPE, AND TUBING, ETC.

Bolts, brass, naval rolled	Miscellaneous	South Brooklyn, N. Y.	1946
Bolts, brass, stove, with square nuts	do	Brooklyn, N. Y.	1946
Bolts, brass, stud	do	Brooklyn and Philadelphia.	1946
Brads, wire, common type	do	Norfolk, Va.	1948
Brass, bar, naval rolled; commercial	do	Various	1942
Brass, commercial	do	do	1943
Brass, hooping, 50.8 mils thick	14,000 pounds	Portsmouth, N. H.	1942
Brass, sheet, naval rolled	Miscellaneous	Washington, D. C.	1947
Burrs, rivet, copper	do	Various	1948
Bronze, manganese, ingot	100,000 pounds	Portsmouth, N. H.	1942
Bronze, manganese, round, bar	Miscellaneous	Various	1942
Bronze, phosphor, sheet, full spring	do	do	1942
Copper, manganese	1,000 pounds	Norfolk, Va.	1942
Copper, sheet, for sheathing, 14 by 28	Miscellaneous	Various	1941
Copper, sheet	do	do	1943
Nails, copper, flat head; cut	do	Key West, Fla.	1948
Nuts, naval rolled brass	do	Mare Island, Cal.	1946
Nuts, brass, standard, hexagon	do	Brooklyn, N. Y.	1946
Rivets, copper, boat, cold-rolled	do	Various	1948
Tubing, brass, seamless, hard-drawn	do	do	1945
Pipe, brass, commercial lengths	do	New Orleans, La.	1945
Tubing, brass, seamless, hard-drawn	do	Newport, R. I.	1947
Tubing, copper, seamless, hard-drawn.	do	do	1947
Tubing, copper, seamless, hard-drawn.	do	Various	1945
Washers, brass, 1-pound boxes	do	South Brooklyn, N. Y.	1948

FIRE BRICK, CEMENT, AND FIRE CLAY.

Brick, converter and open-hearth	Miscellaneous	Various	1952
Cement, converter and open-hearth	do	do	1952
Brick, fire, standard; split; straight shapes; special shapes.	do	do	1953
Cement, fire, in strong, tight wooden barrels.	do	do	1953

MACHINE TOOLS.

Drills, Beckford, 42-inch, regular, friction, back-geared.	3	Washington, D. C.	1940
Lathes, belt-driven, turret, flat	2	do	1940
Machines, cutters, bolt, double head	2	Philadelphia, Pa.	1939

MACHINE TOOLS—continued.

Articles.	Quantity.	Delivery at navy yard.	Sch.
Machine, drill, sensitive, ball-bearing, bench type.		Philadelphia, Pa.	1939
Machine, drill, floor type, 12-inch	1	do	1939
Machine, drill, floor type, 14-inch	1	do	1939
Machine, drilling and tapping, all geared, 20-inch, motor driven.	1	do	1939
Machines, drilling and milling, horizontal boring.	2	Washington, D. C.	1940
Machine, milling, vertical spindle, No. 3.	1	do	1940
Machines, milling, No. 3, duplex	2	do	1940
Machine, standard drill press, vertical, 25-inch, motor-driven.	1	Philadelphia, Pa.	1939
Machine, drill, multiple, vertical, 8-spindle, round head, 16-inch.	1	do	1939
Machine, grinding, surface, vertical	1	Washington, D. C.	1940
Machine, grinder, disk, motor-driven, 30-inch.	1	Philadelphia, Pa.	1939
Machine, grinder, wet, 20-inch, motor-driven.	1	do	1939
Machines, pipe-bending, pneumatic, portable, 2-inch.	3	do	1939
Machines, pipe bending and cutting, 2-inch, motor-driven.	2	do	1939
Machines, pipe threading and cutting, 2-inch, motor-driven.	2	do	1939
Machine, pipe threading and cutting, motor-driven.	1	do	1939
Machine, press, arbor, No. 4	1	do	1939
Machine, press, arbor, No. 5	1	do	1939
Machines, profiling, No. 12, belt-driven.	2	Washington, D. C.	1940
Machine, pump, triplex, pressure, motor-driven.	1	Philadelphia, Pa.	1939

PIPE FITTINGS, VALVES, ETC.

Fittings, pipe, steam and water, joints, brass, low-pressure, screwed, rough; Y branches, composition; nipples; bushings; caps; plugs; tees; crosses; couplings; elbows; locknuts; unions; bends, high-pressure.	Miscellaneous	Various	1954
Valves, brass, low-pressure, steam and water; angle, regrinding, screwed; gate; globe; regrinding.	do	do	1955
Valves, brass, pressure-reducing, screwed type; heavy.	do	do	1955
Valves, brass, steam, safety pop, male thread, standard.	do	Puget Sound, Wash.	1955
Valves, brass, steam-pressure, relief, adjustable, screwed.	do	do	1955
Valves, brass, radiator, brass, air; standard union, angle, nickel-plated.	do	do	1955

Dates of opening have been assigned the following schedules:

1914 to 1922, inclusive	Sept. 10, 1918.	1926	Sept. 9, 1918.
1923	Sept. 24, 1918.	1928	Sept. 24, 1918.
1924 and 1925	Sept. 17, 1918.	1929 to 1938, inclusive	Sept. 17, 1918.

RULES FOR RUBBER FOOTWEAR MAKERS.

(Continued from page 10.)

with black or red sole. (e) Factory damaged canvas rubber-soled shoes in grades corresponding to Champions and cheaper grades. (f) All factory damaged waterproof goods.

Tissue paper.—The use of tissue paper with canvas rubber-soled shoes when packed in cartons in grades corresponding to Yachting, Campfire, Champion and Vim (heeled goods only excepted) is to be discontinued. Heeled canvas rubber-sole shoes may be packed with tissue only when necessary to keep them in proper condition. With gum shoes only sufficient tissue paper is to be used to keep in proper condition.

20. Caustic soda.—The use of caustic soda in the manufacture of rubber footwear of all types is to be discontinued at once.

Commission Merchants' Food License Revoked

Because they failed to handle properly a carload of fresh peaches, which were allowed to deteriorate on the track, two wholesalers and commission merchants have had their licenses revoked by the Food Administration.

Boyar-Sicard Co., Minneapolis, shipped the fruit to William Gilles, Fargo, N. Dak., who refused the consignment, saying that the other firm had not complied with his instructions when the order was placed. Boyar-Sicard Co. then appealed to Federal Food Administrator Ladd, of North Dakota, who investigated and found both to be at fault.

Gilles's license was revoked for one month, beginning September 16, and the Boyar-Sicard Co. license was revoked for 10 days, beginning on the same date. Permitting perishable food to deteriorate is deemed a wasteful practice by the Food Administration.

R. P. Koenig & Co., Watertown, Wis., have had their license revoked for an unlimited period for profiteering and unfair dealing with their customers and the Federal food administrator for their State. They operate a mill, an elevator, and a warehouse.

REVENUE RECEIPTS FOR YEAR AMOUNT TO $3,694,703,334

The Commissioner of Internal Revenue authorizes the following:

Internal-revenue collections from all sources for the fiscal year ended June 30, 1918, amounted to a total of $3,694,703,334.05, an increase of $2,885,309,693.61 over the preceding year, according to a statement submitted by the Commissioner of Internal Revenue to the Secretary of the Treasury to-day, preliminary to his annual report.

Income and Excess Profits.

Collections from income and excess-profits taxes for 1918 were $2,839,083,585.53, compared with $359,685,147.50 from income tax from corporations and individuals for 1917. The total revenue from income and excess-profits taxes in 1918 was 7.9 times as great as the revenue from the income tax of 1917. While all States report increased collections from these taxes in 1918, the gains in some States were much greater than in others. The smallest increase was in Utah, where $1,330,000 was collected in 1917 and only $2,505,000 in 1918, or less than twice as much as in the preceding year. West Virginia showed the largest gain, the collections in 1918 being 23.7 times as great as in 1917, the actual increase being from $1,921,000 to $45,549,000.

States Leading in Collections.

The five States reporting the largest collections were New York, Pennsylvania, Illinois, Ohio, and Massachusetts, in the order named. These five States in 1918 returned $1,868,371,000, or 65.8 per cent of the total collections for the United States. In 1917 the same five States reported 66 per cent of the total collections, almost exactly the same proportion as in 1918. New York, which showed 36.6 per cent of the total collections for the country in 1917, reported only 24.3 per cent in 1918.

Compared with a gain of 7.9 times for the entire country, the collections in New York for 1918 were only 5.3 times as great as in 1917. Pennsylvania collected 11.8 times as much in 1918 as in 1917, or 17.5 per cent of the total for the country in 1918 as against 11.7 per cent in 1917. Illinois showed a gain of 10.5 times; Ohio, 11 times; and Massachusetts, 8.2 times over the figures for 1917.

Differences in States.

Some remarkable differences are shown for States where similar conditions are supposed to prevail. Oklahoma, for example, collected but 2.8 times as much tax in 1918 as in 1917, while Kansas returned 8.8 times as much. The Southern States, with one or two exceptions, show gains that exceed the average for the country as a whole.

The collections shown for the several States represent taxes collected from individuals, partnerships, and corporations residing in or having their principal offices in those States. It should be borne in mind that the incomes upon which the taxes are assessed may be produced from activities carried on in other States.

It is not possible at this time, the Commissioner of Internal Revenue states, to segregate the collections from income and excess profits taxes so as to show separately the amounts from corporations, partnerships, and individuals, or to show what portions of these taxes relate to collections made, wholly or in part, under the acts of September 8, 1916, and October 3, 1917.

Miscellaneous Taxes.

Collections from miscellaneous taxes, heretofore designated as ordinary receipts, amounted to $855,619,748.52, an increase, compared with 1917, of $405,911,255.58.

The tax on distilled spirits for beverage purposes amounted to $232,872,375.13 and on distilled spirits for nonbeverage purposes to $12,270,433. The total taxes on spirits, including the tax on rectified wines, champagne, liqueurs, cordials, etc., stamps for distilled spirits intended for export, case stamps for distilled spirits bottled in bond, and grape brandy used for fortification of sweet wines, amounted to $317,553,687.33, an increase of $125,442,368.52 compared with the preceding year.

Tobacco taxes produced a revenue of $156,188,659.90, compared with $102,576,988.14 in 1917. Admission taxes yielded a revenue of $26,357,359.72. The tax on club dues amounted to $2,259,056.57. On automobiles and motorcycles the tax amounted to $23,981,268.35. Other excise taxes, including piano players, moving-picture films, jewelry, sporting devices, perfumes, cosmetics, chewing gum, cameras, yachts, etc., amounted to $12,995,732.31.

Results of Estate Taxes.

Due to delays in settling estates, the estate tax, the commissioner states, has not been as fruitful a revenue producer as is hoped for this tax in future years. Collections from this source, however, in 1918 amounted to $47,452,879.99.

The exact amount expended for the collection of internal revenue in 1918 can not be stated until all the accounts for the fiscal year have been received and adjusted. Such expenses, however, approximate $11,975,000, compared with $7,699,031 in 1917. The cost of collection was the lowest in the history of the bureau, amounting to but $3.24 per $1,000 collected, or 0.324 per cent.

EXPORT TRADE BY COUNTRIES.

Part Two of Trade of the United States with the World Now Ready.

Part 2 of Trade of the United States with the World is now ready for delivery. It makes easy the study of American export trade by countries during the fiscal years 1917 and 1916. For instance, under Brazil are found, simply presented, the quantity and value of each of the important lines of goods shipped to that country by the United States in 1917 and 1916. The import trade was treated in a similar manner in Part 1, as previously announced. The two bulletins make a very convenient source of information for any business library.

Copies of Trade of the United States with the World, 1916–17, Part 2—Exports, Miscellaneous Series No. 63, can be obtained at 20 cents each from the Superintendent of Documents, Government Printing Office, Washington, D. C., or from any of the district or cooperative offices of the Bureau of Foreign and Domestic Commerce.

EXECUTIVE ORDERS CANCELING SALES IN THE PHILIPPINES

(Continued from page 11.)

deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years, on account of war expenses, and for other purposes," approved March 28, 1918, I hereby, in the public interest, make the following determination and order:

I hereby vest in the managing director of the Alien Property Custodian in the Philippine Islands, and his successors in office, to be hereafter appointed by the Alien Property Custodian, all of the rights, powers and authorities with respect to property, rights, titles, and interests in the Philippine Islands, heretofore or hereafter vested in or conferred upon the Alien Property Custodian by me under Executive order dated October 12, 1917, and all other Executive orders heretofore or hereafter signed by me, subject, however, to the control, supervision and direction of the Alien Property Custodian at all times.

WOODROW WILSON.

THE WHITE HOUSE,
September 13, 1918.

EXECUTIVE ORDER.

AN EXECUTIVE ORDER CANCELING SALE OF FROEHLICH & KUTTNER, MADE TO COMPANIA MERCANTIL DE FILIPINAS BY THE ALIEN PROPERTY CUSTODIAN'S REPRESENTATIVE PURSUANT TO THE "TRADING WITH THE ENEMY ACT" AND AMENDMENTS THEREOF.

By virtue of the authority vested in me by "An act to define, regulate, and punish trading with the enemy, and for other purposes," approved October 6, 1917, known as the "Trading with the enemy act," and the amendments thereto, embodied in "An act making appropriations to supply urgent deficiencies in appropriations for the fiscal year ending June 30, 1918, and prior fiscal years, on account of war expenses, and for other purposes," approved March 28, 1918, and all other powers and authorities me hereto enabling, I hereby, in the public interest, make the following determination and order:

Whereas, A. Mitchell Palmer, Alien Property Custodian, has reported to me that a certain property known as Froehlich & Kuttner was offered for sale at Manila, in the Philippines, by Francis Burton Harrison, the custodian's representative in the Philippines, on May 1st, 1918, and the said property was bid in by Compania Mercantil de Filipinas on May 10th, 1918, and that the said sale was not advertised or conducted in accordance with rules and regulations prescribed by me, as required by the said "Trading with the enemy act," as amended, nor in accordance with the instructions and policies of A. Mitchell Palmer, Alien Property Custodian, and that he has therefore disapproved the said sale:

Now, therefore, I hereby declare the said sale to be void and of no effect; and I hereby authorize and direct the Alien Property Custodian to reject all bids received at the said sale, including the bid of the said Compania Mercantil de Filipinas.

My reasons for the foregoing determination and order are:

(1) That by the powers granted me under said act of Congress, and by the Executive order issued by me on October 12th, 1917, to the War Trade Board; and by the license granted by the said War Trade Board the firm of Froehlich & Kuttner should have been liquidated under said license and by the party designated in said license, and not sold by the Alien Property Custodian's representative.

(2) That even if the Alien Property Custodian's representative had had the power to sell and liquidate said firm, that not sufficient notice or adequate opportunity was granted to purchasers to inform and prepare themselves to bid.

(3) The exclusion of the public from the sale, which deprived it of the public character required by the aforesaid act of Congress as amended.

(4) The advertised conditions of the sale excluded American corporations who are legally entitled to bid, and contained several objectionable details.

(5) The sale was not made under the rules and regulations prescribed by me and as required by said act as amended and not in accordance with the instructions and policies of the Alien Property Custodian.

WOODROW WILSON.

THE WHITE HOUSE,
September 13, 1198.

THE DEATH OF KARL BUENZ AT ATLANTA FEDERAL PRISON

The Department of Justice authorizes the following:

Karl Buenz, who at the outbreak of the European war in 1914 was managing director in the United States of the Hamburg-American Steamship Co., died at the Federal penitentiary at Atlanta, Ga., Sunday afternoon, September 15, two days after his sentence of 18 months had been commuted by the President to expire at once. Upon the commutation of his sentence by the President the warden at the penitentiary was directed by wire to release him, but his physical condition had become so grave that it was impossible to move him before his death.

Committed Last April.

Buenz was committed on April 27, 1918, and would have been eligible for parole on October 27 at the expiration of one-third of his term. He was originally sentenced December 4, 1915, but he took an appeal to the circuit court of appeals for the second circuit, which court affirmed the judgment January 10, 1918, and the Supreme Court of the United States, on March 12, 1918, denied an application for writ of certiorari. Before moving to commit Buenz, the Attorney General had two reputable physicians of New York City report upon his physical condition. Judge Howe, on April 6 and 8, considered in open court the question of his physical condition and decided not only to decline to recommend that the defendant be granted a respite and commutation but to recommend the execution of the sentence.

Buenz, during the hearing before Judge Howe, in a letter dated April 7, 1917, to Judge W. D. Noyes, of New York City, submitted a statement to be read in open court, declaring that he was entirely prepared and willing to go to Atlanta to serve his term and instructed his counsel to so declare.

Prison Physician's Reports.

During the period of Buenz's confinement, the Attorney General received many reports from the prison physician at Atlanta as to his condition. On September 4 the warden of the prison informed the Attorney General the prison physician advised that Buenz appeared extremely weak and spoke with great difficulty, but he attributed this to temporary conditions which he believed could be entirely overcome within a few days. The warden stated further that the prisoner had lost over 20 pounds in weight since his arrival at the penitentiary, but that that was not necessarily detrimental; that the high blood pressure from which he suffered upon arrival had substantially improved and that, was it not for his advanced age, his condition would undoubtedly be reasonably satisfactory. He said further, that with the exception of the depression naturally caused by confinement, the prisoner was, no doubt, as well off at the penitentiary as he would be at any other place.

Steps for His Release.

On September 10 the warden wired that the physician that day reported the condition of Buenz to be serious. Steps were at once taken for the release of Buenz, as above stated.

Buenz, with others, was convicted of conspiracy to defraud the United States in and by obtaining clearance papers by means of false manifests and of conspiracy to defraud the United States in and by causing collectors of customs, by means of false statements, to make report and transmit untrue and inaccurate records. The testimony showed that the conspiracy involved the sending, by the Hamburg-American Line under false manifests, of supplies to be transferred to the German war fleet at places of rendezvous on this side of the ocean. Buenz was about 75 years of age, and has held, under the German Government, many high positions, having been mayor of Gluckstad, consul general in Chicago, consul general in New York, German minister to Mexico, and counsel for his Government before The Hague tribunal during the Venezuela arbitration.

INFORMATION FOR FARM WORKERS CONCERNING THE NEW DRAFT LAW

Under the rules of the War Department for executing the new draft law, special provision is made for informing the district boards in regard to farm-labor requirements in order that necessary food production may be maintained, says a statement issued by the Department of Agriculture. The statement continues:

In the new draft the district boards are charged with the duty of putting into deferred classes those persons who are more likely to further the war by remaining in civilian occupations than by entering the Army. Accordingly, three advisers are to be selected for each district board—one for agriculture, one for labor, and one for other occupations. The agricultural adviser will be appointed by the board upon the recommendation of the Secretary of Agriculture. The advisers are not members of the board but may, when invited, attend its meetings.

Agricultural Adviser Will Aid.

The duties of the agricultural adviser will be to furnish to the board facts relative to farm-labor requirements, not only of his own district, but of the whole country. He should be the repository of all facts having relation to the deferment of agricultural workers, whether these be necessary farm laborers, managers or operators. He will be expected to advise the district boards as to a shortage or surplus of necessary farm workers for any given district, as well as for the entire Nation. Such information will be supplied to the advisers by the Department of Agriculture. This will make it possible to have necessary workers transferred from districts in which they may not be necessary to other districts in which they are sorely needed.

The adviser may also concern himself with individual cases that come before the district board. He will have the right under certain conditions, to examine the questionnaires and other records in the files of the local board for the purpose of ascertaining whether persons entitled to deferred classification have actually claimed it. In case he finds the names of such registrants he may file for them a claim for deferred classification with the district board, which, in turn, may require the local board to certify the questionnaire and record of any such registrants for consideration. Reasonable time will be given for the purpose of obtaining information and supplying the affidavits required. If a local board determines to consider a case for deferred classification because a registrant is engaged in a necessary occupation, notwithstanding no claims for deferred classification on that ground has been made, it shall indorse the recommendation on the questionnaire of the registrant and forward it to the district board having jurisdiction. The district board will thereupon consider the case and proceed to classify the registrant, notwithstanding the fact that no claim for deferred classification by or in respect of the registrant has been made.

Claims of Necessary Employees.

A further duty with which the adviser is charged is to confer with employers of necessary farm workers and to instruct them as to their right under the regulations to file a claim for deferred classification in respect of any registrant who has failed or refused to file a claim for deferred classification in his own behalf. This, in the opinion of the War Department, is a very important matter. The apparent injustice of placing many registrants in Class I is often due to the fact that employers have failed to make claims for deferred classification on behalf of necessary workers. It is to avoid a repetition of this trouble that farmers should see that all of their necessary employees, whether sons or other laborers, of the draft age have made for them just claims for deferred classification.

One important explanation is made in the new Selective Service Regulations in connection with the expression "skilled farm laborer." The Questionnaire provides deferred classification for the "necessary skilled farm laborer in necessary agricultural enterprise." The new regulations provide that in Class II shall be placed any registrant found to be engaged in a "necessary" agricultural enterprise, and found to be necessary to such enterprise in the capacity of a farm laborer—"especially fitted for the work in which he is engaged." This quoted phrase constitutes an explanation of what is meant by "skilled" as applied to farm laborer. The expression will make easier the determination of the status of many registrants.

War Service in Right Place.

The purpose in the appointing of advisers is to place men where they can do most to help win the war. These advisers will be able to help greatly the district boards to keep in agriculture the necessary workers. These workers, whatever may be their inclination to enter military service, should stand ready to serve in any capacity in which they can contribute most toward a speedy ending of the war. In order that this may be done a frank statement should, in each case, be made to the boards. It is believed that it will frequently require as much courage on the

(Continued on page 16.)

POLICY IS STATED IN ORDERS GOVERNING ARMY PROMOTIONS

GENERAL ORDER No. 67.

IV. The following policy will govern all future temporary appointments, promotions, and assignments in the line of the Regular Army, National Guard, National Army, and Officers' Reserve Corps:

1. In the future all temporary commissions that issue in the line of the Army, either as original appointments or as promotions to higher grades, will be issued as commissions in the arm affected of the National Army, except temporary promotions in the Regular Army, which will be made in accordance with existing law. This will apply to the issuance of temporary commissions in the National Guard, National Army, and Officers' Reserve Corps.

2. Hereafter officers holding temporary commissions of whatever class will be assigned in accordance with the needs of the service to their proper arm in the Regular Army, National Army, or National Guard, and will be entitled to promotion in accordance with the present policies in the several branches of the service.

V. 1. A food division was authorized by the Secretary of War (A. G. O. letter 720.1, Mis. Div., Oct. 16, 1917) to make nutritional surveys of the military camps both in this country and abroad "for the purpose of safeguarding the nutritional interests of the Army (1) by means of competent inspection of food with reference especially to its nutritive value, (2) by seeking to improve mess conditions, and (3) by studying constantly the suitability of the ration as a workingman's diet."

2. This division will hereafter be designated the "Division of Food and Nutrition" of the Medical Department. All provisions of said letter of authorization, except that portion referring to the length of time necessary for a nutritional survey of a camp and the frequency of such surveys, are continued and made applicable to the new designation, and the following regulations pertaining thereto are published for the information and guidance of all concerned:

3. A "nutrition officer" will be designated from the officers of the Medical Corps, Medical Reserve Corps, or Sanitary Corps, by the Surgeon General or by the local commanding officers with the approval of the Surgeon General, for each training camp or post used as a training camp or recruiting camp the strength of which is 10,000 or more.

4. The duties of the nutrition officer shall be:

(a) To advise the commanding officer, the camp quartermaster, and the camp surgeon on all matters relating to the composition and nutritive value of foods.

(b) To inspect, as directed by the commanding officer, foods and rations in the hands of organizations with reference to nutritive value, freedom from adulteration, spoilage, or deterioration from any cause.

(c) To cooperate with the School for Cooks and Bakers, where such schools exist, in the instruction of mess sergeants and mess officers in the fundamentals of nutrition—to wit, purposes served in nutrition by the different foodstuffs (protein, fats, carbohydrates, mineral salts, and vitamines) and the proper construction of dietaries, so as to insure a satisfactory distribution of these nutrients.

(d) To assist in the coordination of mess requirements with subsistence supplies, whether carried by the camp quartermaster or purchased locally.

(e) To cooperate with and advise the conservation and reclamation officer with reference to the best classification, separation, and disposition of wastes from food.

(f) To render directly to the camp commander reports on urgent food matters that require immediate executive action.

(g) To report through the camp surgeon on all matters relating to food conditions of the camp as these may effect the nutritional welfare of the troops.

5. The nutritional surveys authorized will hereafter be conducted in such camps and with such frequency as may be deemed necessary by the Surgeon General.

6. Nutrition officers in such number as the exigencies of the service may require, but not to exceed 20 in number, will be appointed from the officers of the Medical Corps, Medical Reserve Corps, and Sanitary Corps, for special detail in hospitals, hospital ships, laboratories, or to other departments of the service. The duties of such officers on specal detail will be prescribed in orders assigning them to duty.

By order of the Secretary of War:

PEYTON C. MARCH,
General, Chief of Staff.

Official:
H. P. MCCAIN,
The Adjutant General.

INDEMNITY CLAIMS IN POST OFFICE INVOLVING SOLDIERS' ADDRESSES

OFFICE OF THIRD ASSISTANT
POSTMASTER GENERAL,
Washington, September 9, 1918.

Postmasters at offices where military camps or cantonments are located, who receive for completion applications for indemnity covering insured or C. O. D. parcels addressed to soldier-addressees at camps supplied from their offices, will, when the addressee is at the time of claim with the American Expeditionary Forces, prepare a copy of the Form 3812, and transmit it to the United States postal agent, American Expeditionary Forces, with a request that he secure the declaration of the addressee thereon and transmit the document direct to the Third Assistant Postmaster General, Division of Registered Mails. The copies of forms sent abroad in this manner will be indorsed "Copy. Original sent to the Third Assistant Postmaster General on ———."

At the same time the copy is sent abroad the original will be forwarded to the Third Assistant Postmaster General, Division of Registered Mails. The form should be indorsed with a notation, on the statement of postmaster at office of address, showing that a copy has been sent to the United States postal agent, and the date such action was taken.

Postmasters sending copies of forms overseas must be careful to see that the complete designation of the military unit with which the addressee is connected is furnished the United States postal agent, American Expeditionary Forces.

These instructions supersede and revoke those contained in article 86, page 115, of the July, 1918, Postal Guide.

A. M. DOCKERY,
Third Assistant Postmaster General.

FIVE NEW APPOINTMENTS IN SHIPPING BOARD ANNOUNCED

Five men of national prominence have been appointed as district representatives in shipyards of the Industrial Relations Group, United States Shipping Board Emergency Fleet Corporation.

The appointments were made by L. C. Marshall, director of the Industrial Relations Group, as follows:

District No. 1, embracing the New England yards: Gardner Perry, Boston; lawyer, and formerly an examiner of the Labor Adjustment Board.

District No. 4, which includes Florida and Gulf coast yards: Emmett L. Adams, formerly an examiner of the Labor Adjustment Board.

District No. 5, which embraces the Louisiana yards: Thomas E. Carroll, of Washington, and formerly an examiner of the Labor Adjustment Board.

District No. 7, embracing the California yards: H. A. Brotherton, widely known labor authority of San Francisco, and formerly an assistant examiner of the Labor Adjustment Board.

District No. 8, taking in all yards in the State of Washington: Ex-Gov. Henry W. McBride, of Washington, formerly an examiner of the Labor Adjustment Board.

There are 11 shipyard districts, and in the near future additional appointments will be made so that there will be a representative in the Industrial Relations Group in each district.

INFORMATION CONCERNING THE NEW DRAFT LAW.

(Continued from page 15.)

part of many men to remain in their civilian occupations as to waive deferment.

This effort to keep men in industry, rather than to send them to the camps and the trenches, should not be abused so as to permit the slacker to escape military duty. The necessities for raising an army are paramount. Every man that can be spared will be needed and needed badly to bring the enemy to his senses. The adviser should be assisted in every possible way by every legitimate agricultural interest to find the men that can be spared for military duty, but also to keep those that are essential to the maintenance of a proper food supply.

Luxuries as usual means a victorious Germany. Save and buy war-savings stamps.

NEWS FROM ALL FRONTS IS "CONTINUOUSLY GOOD," GEN. MARCH'S SUMMARY OF EVENTS IN FRANCE

1,750,000 MEN OVERSEAS

American Positions Twelve Miles from Metz Quickly Stabilized—Our Troops Within Ten Miles of Conflans, Important Railway Center—French Regiment First to Enter St. Mihiel.

Press interview with Chief of Staff, Gen. Peyton C. March.

News during the week since last I spoke to you has been from all fronts continually and continuously good. On the western front our new line in Lorraine, so rapidly produced by cutting off the enemy in St. Mihiel salient, was quickly stabilized. The enemy has been hurriedly strengthening his line of defense, the so-called Kriemhild line, which lies only a mile or two in front of our new line on a front of about 20 miles from near Maizeray to the Moselle River at Vandires. We are now 10 miles away from Conflans and 12 miles away from Metz. Conflans is the center of this general section, and as you can see on the map, is a very important strategic point from which railways feed the Lorraine front. During the last few days there has been no attack in force by either our army or the enemy's. Reports indicate simply patrols, airplane observation, and artillery fire.

Events In Picardy.

In Picardy the British Third and Fourth Armies with the French First Army renewed their advance Wednesday on the Cambrai-St. Quentin front, toward the old Hindenburg line. In spite of the concentration of the enemy forces defending this sector and in spite of very strong counter attacks by the enemy at several points, especially west and southwest of Cambrai, the British have made steady progress, reaching the Hindenburg line at several points; and the enemy is reported to have lost very heavily. It is now officially confirmed than 10,000 prisoners have been captured. St. Quentin is now hardly three miles from the British on the northwest and the French on the southwest.

On the plateau northeast of Soissons the French have continued to force back

(Continued on page 9.)

ORDER TO SAVE STEEL ISSUED BY THE WAR DEPARTMENT

Publication of the following general order is authorized by the War Department:

Owing to the present acute shortage of steel all bureaus, corps, and departments of the War Department will at once take steps to economize in the purchase and use of steel. The purchase of, or contracting for, steel furniture, beds, tables, chairs, containers, filing cabinets, and safes is forbidden, unless it can be clearly shown that it is necessary that these articles be steel and that no other material or article will answer the purpose.

By order of the Secretary of War:

PEYTON C. MARCH,
General, Chief of Staff.

P. C. HARRIS,
Acting The Adjutant General.

ADDITIONAL COTTON PRICE DIFFERENTIALS ANNOUNCED

The War Industries Board authorizes the following:

In accordance with the agreement between the representatives of the cotton industry and the price-fixing committee July 1, 1918, the following differentials, based on the maximum prices then agreed to, have been fixed by the price-fixing committee, to remain in effect until October 1, 1918:

Twills.—37-inch, 4.50, 96 by 60, 3-leaf twills, 19⅛ cents.

Gray Red Star diaper cloth.

Width.	Price per pound.	Yards per pound.	Price per yard.
			Cents.
19½ inches	$0.77	6.85	11.41
20½ inches	.76	6.00	12.67
24½ inches	.75	5.50	13.64
26 inches	.75	5.15	14.56
29½ inches	.74	4.55	16.26
32½ inches	.73	4.15	17.59

U. S. SOLDIERS FOR FIRST TIME TRAVEL IN AIR UNDER ORDERS

The War Department authorizes the following:

For the first time in the history of this country, soldiers under orders for duty have been transported by the air route. On Saturday, September 7, 18 enlisted men were passengers in airplanes piloted by officers and the airplanes in formations of three, four, and five ships, carried the men from Chanute Field, Rantoul, to Champaign, Ill., where the men had been ordered to report at the United States School of Military Aeronautics, University of Illinois.

UNITED STATES' ATTITUDE CONCERNING EXPORTS TO NETHERLANDS EXPLAINED BY STATE DEPARTMENT

CITES GERMAN THREATS

Four Hundred Thousand Tons of Dutch Shipping Kept Idle in Home Ports by Holland's Failure to Accept Offer to Supply Her with Needed Commodities of All Kinds.

In view of apparent misapprehension as to the attitude of the Government of the United States toward exports to the Netherlands, the Department of State issues the following:

"It has always been, and still is, the desire of the United States Government that the resources of the United States, in so far as they can be spared from purposes essential to the successful prosecution of the war, be made available under proper safeguards to neutral countries in order to assist them in the maintenance of their economic life. The sincerity of this desire has been evidenced by arrangements concluded by the War Trade Board with the authorities of Switzerland, Norway, Sweden, Denmark, and Spain, whereby these countries are to-day obtaining from overseas from the United States and elsewhere important supplies of essential foodstuffs, raw materials, and manufactured articles. It has been the hope of this Government that an arrangement could be reached by the War Trade Board with the Netherlands authorities similar to those reached with other neutrals similarly situated, whereby imports from the United States to the Netherlands might be permitted. An understanding was, as is shown, tentatively reached in London in January of the current year pursuant to which the United States and the allied Governments would have facilitated the import to the Netherlands of ample amounts of those supplies which were judged essential for the economic life of that country. This arrangement failed to receive the assent of the Netherlands authorities. Had it not so failed, among the supplies, the import of which would have been facilitated by the United States

and the allied Governments, were the following:

Bread cereals, amount to meet actual requirements.	Tons.
Petroleum products	140,000
Cotton and cotton products	25,000
Copper	4,000
Lead and lead manufactures	4,000
Magnesite	4,000
Coffee	35,000
Cocoa	8,000
Tea	5,000
Nuts, etc	1,000
Hemp	3,500
Jute	5,000
Fibers	1,200

Also substantial amounts of such commodities as tobacco, iron and steel manufactures, textiles, turpentine, rosin, waxes, capoc, tanning materials, aluminum, antimony, castor oil, chemicals, etc.

Ready at All Times to Aid.

"The War Trade Board of the United States has at all times been ready, in conjunction with the authorities of the allied Governments and on reasonable conditions, to conform to an arrangement similar to that which failed of approval, taking into account such changes as may have since occurred in the positions of the several countries concerned with respect to their needs and their supplies. As an earnest of this spirit, and in response to urgent representations of the Netherlands Government as to the privations faced by the Dutch people, the United States and the allied Governments some months ago offered unconditionally to place at the disposal of the Dutch people [illegible] tons of bread cereals, which, it was estimated, would tide over the period until the new Dutch crops should be harvested. Under the terms of the offer these cereals were to be lifted by the employment of some portion of the large number of Dutch vessels lying idle in Dutch European ports. It has developed, however, that owing to German threats against Dutch shipping the Netherlands Government had not felt in a position to avail itself of this offer of bread cereals, or apparently to avail itself of the willingness of the United States and the Allied Governments to place other supplies at the disposal of the Dutch people. These threats against Dutch shipping have accordingly for many months held idle, without financial return and suffering physical deterioration, more than 400,000 tons of Dutch shipping in Netherlands European ports, rendering this shipping unavailable either to lift the bread cereals which have been offered, or, if a general commercial understanding should be reached, to lift the other supplies which the United States and the allied Governments would put at the disposal of the Netherlands Government.

"It may be noted that this tonnage constitutes the only block of neutral tonnage in the world which is not engaged in useful activity. In order, however, to relieve the Dutch people from a serious food shortage reported by the Netherlands Government, the War Trade Board of the United States in accord with the authorities of the allied governments, as a further exceptional measure of relief, freely licensed bunker coal and ships stores to permit of substantial amounts of grain cereals being lifted by vessels other than those which had originally been stipulated for. Thus, the *Nieuw Amsterdam* and certain vessels normally employed in western Atlantic trade have transported approximately 50,000 tons of bread cereals to the Netherlands. The balance, largely in the Argentine, remains unlifted now for nearly six months, because of acquiesence in the position of Germany, which, while receiving from the Netherlands large amounts of foodstuffs, at the same time threatens with destruction Dutch vessels which might be sent even to another neutral country to lift grain for the Dutch people.

"Commercial relations between the United States and the Dutch colonies have been resumed on a normal basis. In these waters, free from the menace of German submarine activity, Dutch shipping moves freely in the transport of commodities between the United States and the Dutch East Indies. It is the hope of the United States Government that ships may be sent out from Dutch ports to lift the grain which is awaiting shipment to the Netherlands, thereby opening the way for a general resumption of trade relations between the United States and the Netherlands similar to that which is so happily existing between the United States and the Dutch colonies."

Deaths at Flying Fields Due to Accidents During Week Ending Sept. 14

The War Department authorizes the following:

Herewith is a summary of deaths due to aviation accidents in training at flying fields in this country for the week ending September 14, 1918:

Place at which fatality occurred.	No. of fatalities.
Brooks Field, San Antonio, Tex	1
Carruthers Field, Benbrook, Tex	1
Love Field, Dallas, Tex	2
Rich Field, Waco, Tex	2
Rockwell Field, San Diego, Cal	2
Selfridge Field, Mount Clemens, Mich	2
Taliaferro Field, Fort Worth, Tex	2
Total	12

The 12 deaths during the week ending September 14 represent one fatality for every 1,619 hours flown, or 129,520 miles air travel. At 20 fields other than those named there were no fatalities.

STOPS MALTING OF GRAIN FOR BEER OR NEAR BEER BREWING

The United States Food Administration announces that from this date (Sept. 21) forward no malting of grain will be permitted for the purpose of brewing beer or near beer. Malting will be permitted for the purpose of manufacturing yeast, vinegar, cereal breakfast foods, malt extract, and other products, but no grain shall be malted for these legitimate purposes until sales have actually been made. Malsters are now permitted to purchase grain to cover malting of this character.

Better than money because they earn money; buy a WAR-SAVINGS STAMP TO-DAY.

NEW PRISON BUILDING PLANS ABANDONED UNTIL AFTER WAR

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

The New York State commission on new prisons has abandoned a project for new Sing Sing prison buildings, which amounted to about $1,244,692, in a desire to be of assistance to B. M. Baruch, chairman of the War Industries Board, in the effort to conserve labor, materials, and all elements essential for war uses.

In Line With School Ruling.

The action by the State commission is in line with the ruling contained in the letter recently sent by Mr. Baruch to Mayor John F. Hylan, of New York City, disapproving this year's new public school building program for that city, which involved more than $9,000,000, on the ground that both the labor and the material necessary would be needed in the great war program framed to meet the purpose of the country—to win the war and win it quickly.

Maj. James C. McGuire, chairman of the State of New York commission on new prisons, has notified D. R. McLennan, chief of the nonwar construction section of the War Industries Board, that he recommended abandonment of the building of the new prisons as a patriotic measure, and the commission rejected all bids.

Gov. Whitman's Letter.

Gov. Charles S. Whitman, of New York, approved the action of the commission in the following letter to Maj. McGuire:

"I approve the action of your commission in rejecting bids * * * to conserve materials, the use of which would be embarrassing to the Federal Government at this particular period. This action is necessary as a war emergency. * * * By placing the prisoners in temporary quarters they can be taken from the old cells and housed in clean buildings, where sanitary conditions will at all times prevail.

"The attitude of the priorities committee of the War Industries Board at Washington toward the immediate awarding of these contracts seems entirely proper and fully justifies your action."

Steps Taken to Prevent Profiteering in Butter

The Food Administration is turning the full power of its enforcement machinery against dealers who are taking advantage of the present stringency in butter supplies and are reaping heavy profits from the rising market. Its inspectors throughout the country have been instructed to center their work upon investigations of butter operations and to obtain a close check upon the recent activities of dealers.

Some manufacturers and dealers who had stored late butter have been taking advantage of a rising market to remove their goods and to sell as fresh butter on account of an advanced market. This is a clear violation of Food Administration rulings.

Telegrams have been sent to Federal food administrators, instructing them to take decisive measures in their States.

PROCEDURE FOR MAKING DEFERRED CLASSIFICATION CLAIMS FOR GOVERNMENT EMPLOYEES IS SET FORTH

LOCAL BOARDS NOTIFIED

Registrant Himself or His Superior Officer May File Such Claims—Would Be Placed in Class III if His Services Are Regarded as Essential to the Operation of His Department.

The War Department authorizes the following from the office of the Provost Marshal General:

Government employees, stationed within the District of Columbia or elsewhere, who are necessary to the adequate and effective operation of the service in which they are engaged may be granted deferred classification under the selective-service law and regulations.

Circulars explaining how deferment claims for such employees must be filed have been sent by this office to all local boards throughout the country.

Based on section 4 of the selective-service law, the regulations provide that a registrant may be placed in deferred Class III who is employed by a department or branch of the Government of the United States in the capacity of a custom-house clerk, a person employed by the United States in the transmission of the mails, an artificer or workman employed in an armory or arsenal or navy yard of the United States, or a person employed in the service of the United States, and with respect to whom it is found by the local and district boards having jurisdiction that he is necessary to the adequate and effective operation of the service in which he is engaged and that he can not be replaced without substantial material loss and detriment to the adequate and effective operation of such service.

Superior Officer May Make Claim.

A claim of this character may be made either by the registrant himself or by his superior officer in the department or branch of the Government under which he is engaged.

If the registrant makes the claim he must indicate the claim on page 1 of the questionnaire, and must answer the questions on page 6 of the questionnaire under Series VIII, Part A. Furthermore, he must also secure and file with the local board, in support of his claim, an affidavit of the official having direct supervision and control of the registrant. This affidavit, if the registrant is stationed within the District of Columbia, must be approved by the Secretary of the department in which he is employed. If he is stationed outside the District of Columbia, the supporting affidavit must be approved by the official designated by the Secretary of the department who has jurisdiction or control of the area within which the applicant is stationed at the time, unless the affidavit is originally made by such official.

Approval By Department Head.

If an official of a department or branch of the Government makes the claim, he must make it on the first page of the questionnaire, indicating the claim thereon in the appropriate blanks provided for that purpose, and must file the same with the local board, together with the affidavit of the official having direct supervision and control of the registrant, which affidavit must be approved as above stated by the Secretary of the department (if the registrant is stationed in the District of Columbia) or by the official designated by the Secretary (if the registrant is stationed outside the District of Columbia).

The supporting affidavit, which must be filed with the local board either by the registrant or by the official making the claim in the registrant's behalf, must state that the registrant is necessary to the adequate and effective operation of that branch of the service in which he is engaged and can not be replaced by another person without substantial material loss and detriment to the adequate and effective operation thereof, and must be indorsed "approved" as stated above.

This affidavit must be filed with the local board within seven (7) days after the day of mailing the questionnaire to the registrant, unless, in its discretionary power, the local board shall extend the time for filing such claim.

Independent Bureaus.

If the registrant is in the service of a commission or board or body not organized directly under one of the executive departments, the same general method will be followed so far as practicable as outlined above.

If the registrant is employed in the legislative or judicial branch of the Government the affidavit may be signed and approved by the official under whom such person serves.

The lists of officials in the different executive departments who may make supporting affidavits and have been designated as certifying officials and who have authority to approve affidavits of necessity are set forth in Part XIV of the Selective-Service Regulations.

Affidavits of necessity and certificates of approval filed with such claims shall be considered as prima facie evidence of the fact that the registrant is a necessary employee as claimed and he shall be placed in Class III, unless other substantial evidence is received by the local board sufficient in its judgment to rebut such prima facie evidence and to prove that the registrant is not a necessary employee as claimed.

Forms Supplied.

The different departments and branches of the Government may communicate directly with local boards, using standard forms in reference to a registrant, even though the department official has not seen and is not able to have access to the registrant's questionnaire. Upon request, the office of the Provost Marshal General will furnish the departmental officials with an ample supply of the standard forms sufficient for the purpose of making and filing claims for deferment on the ground that the registrants are necessary Government employees.

Department officials, in order to make claim and file the required proof in behalf of necessary registrant employees, should require every such employee to furnish immediately the exact name and location of the local board with which he is registered. A printed list of the boards will be furnished on request.

October 5 Designated by Mr. McAdoo As "Women in War Work Day"

Millions of women in the United States are engaged in war work. Seven hundred thousand women serve as active workers in the organization of the National Woman's Liberty Loan Committee. Seventy thousand women are employed on the railroads. Hundreds of thousands of women are laboring in the munitions factories. Other hundreds of thousands serve in clerical work directly related to the war. As many more are engaged in the Red Cross and other activities for the amelioration of war conditions. The women of America are doing their share in the winning of the war, both by actual hard work and by the tremendous force of their moral influence. It is fitting that their service should be memorialized and Saturday, October 5, has been designated for observation in the Fourth Liberty Loan Campaign as Women in War Work Day.

W. G. McAdoo.

Rain Storms Fail to Halt Aerial Postal Service

The aerial mail has scored 100 per cent daily thus far for September, including the rainy period of the last few days. The worst day was on September 18, when the planes left Washington and New York in the midst of rainstorms. On that day it was raining so hard that the machine had to be started in the hangar, Aviator Shank leaving Washington in a downpour of rain, the landing gear of his plane sinking in the mud up to the hubs in parts of the field and making the take-off from the ground very difficult. Notwithstanding the stormy weather, he made the trip from Washington to New York in 3 hours and 5 minutes. He flew nearly the entire distance through rain and storm, and landed in rain both at Philadelphia and New York.

Aviator Max Miller left New York on September 19 for Clarion, Pa., to chart a more favorable route across the mountains in Pennsylvania than is found on the air line from Belmont to Cleveland.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 16 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

RATES BY MAIL.

Daily	One year	$5.00
	Six months	3.00
	One year, postage prepaid to foreign countries	8.00
	Six months, postage prepaid to foreign countries	4.50

Make all checks, money orders, and drafts payable to THE OFFICIAL BULLETIN.

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

REGULATION OF RETAIL PRICES BY THE WAR INDUSTRIES BOARD

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

Through error it was recently reported and widely circulated that the War Industries Board was about to undertake the regulation of all retail prices by compelling retailers to brand all goods with their cost prices. To prevent the further spread of the report and to remove any confusion which exists the War Industries Board wishes to make its position clear.

Board's Position Stated.

The board has treated matters of prices of raw materials, of manufactured products, and of wholesale distribution. An effort is being made to adjust a fair scale of retail prices, based upon the cost of production, in cooperation with the various industries, which are attacking the problem under the guidance of the board in a spirit of cooperation and fair-mindedness.

The board believes that this method will bring about beneficial results. No action ever has been or will be taken by this board effecting the interests of any industry, except after consultation with representatives of that industry.

Fairness to Public.

It should be said that the War Industries Board is deeply concerned over the whole question of retail prices and is intent upon gaining the support of the various industries so that the public may be assured of a fair deal.

American Official Communique on Operations of U. S. Forces

American Official Communique No. 126—Continued.

HEADQUARTERS AMERICAN EXPEDITIONARY FORCES,
September 17, 1918.

Section B. Referring to our attack of September 12 on the St. Mihiel salient, the German communique of September 13 stated: "In expectation of this attack, the evacuation of this salient, which is exposed on both sides, had been planned for years and was begun some days ago. Therefore we did not fight the battle to a decision and carried out the movements which we had planned. The enemy was unable to check them."

In this connection the following captured order of the 10th German Division, dated September 8, will prove of interest (this division was in line in the salient on Sept. 12):

"Teuth Infantry Division, section 4, number 1713, H. Q., September 8, 1918. Secret. Orders for the defense.

"One. It is essential that each company commander, platoon leader, and squad leader should understand thoroughly the mission that falls to him. For certain elements of the troops, the location of the shelters is unfavorable to taking combat position, and this must not give rise to any hesitation (such is the case at the present moment in the 398th Infantry and the Right Company of G. I. I., left).

"Two. Alarm position. This may be ordered by battalion, regiment, brigade or division. The greatest vigilance is necessary, in the trenches as well as in the artillery and in the battalions at rest. Every officer and soldier must take his assault equipment, gun in hand; the machine guns must be uncovered, and everything must be ready to take combat in formation at once. The rounds of ammunition carried by each man must be verified, as well as the means of liaison, especially with the artillery. Have carts ready to start for Charey, and load on them immediately important documents, papers, and secret orders (be ready to do this in case of alarm, even if the alarm position has not previously been taken). A special alarm in case of fog will not be ordered. It goes without saying that in foggy weather surveillance must be reinforced (if necessary, increase the number of sentinels), and that in case the situation becomes tense, the order to take alarm position may be given. In any case, in foggy weather all men must * * * [words missing].

"Three. Give the alarm as soon as the enemy's approach is visible or as soon as the alarm signals from the front are seen. The alarm will be given, by all means: Gongs, bells, sirens, whistles, bugles, and horns called 'alarms.' The bugle will blow the alarm, and this call will be repeated to the rear (in case of fog there will be sound signals for the artillery). There is no difference between the combat-alarm and the gas alarm.

"Four. Light signals: No barrage fire 'on the whole front,' but only destruction fires A and B. Destruction fire A is adjusted in front of the garrison of the advanced zone, B immediately before the principal resistance line. Use judgment in calling for fire B, for it might happen that the garrison of the advanced zone would be endangered. These two destruction fires are executed only at certain of the most vulnerable spots to be attacked. The sketches are shown to the commander of the combat troops.

"Five. The garrison of the advanced posts and the N. C. O. posts, and if possible the strength should not be more than one-third of the occupants of the principal line * * * (words missing) line of resistance. This garrison has for its mission to observe and then to attract the attention of the principal line of resistance by a violent fire. It then falls back at once. The road leading to the company must be known exactly. At night no one must sleep; change the positions of the sentinels frequently in order that our formation may remain unknown to the enemy, and that no surprise may be possible. The enemy's patrols must be pushed back and captured.

"Six. The principal line of resistance passes south of the village of Montsec. Montsec is 240.2 (map 0.125) immediately north of Richecourt, immediately north of Iahayville, southern edge of the Sonnard Wood. This line must be held at all costs and must remain in our possession at the end of the combat. There must be no falling back without order, and no one must leave the position. If the artillery destruction fire is not precise, the infantry must drive the enemy back by its own means. As soon as the alarm is given everyone will come out of the shelters and go to the parapet. Each one has his place exactly marked, the machine guns are in position; keep the squads well grouped in order to obtain precision fire in front, obliquely on the sides and behind. If necessary, hold the parados against the hostile elements that may have filtered through. The gas masks are on the breast; order them to be put on in case a gas attack is threatened. The principal targets for the machine guns and riflemen are the hostile skirmishers and not the tanks; fire at the latter at a distance of not over 400 meters for the machine gun and with armor-piercing bullets.

(Continued on page 7.)

PROCEEDINGS OF THE CONGRESS BRIEFLY TOLD

SENATE.

Replying to a Senate resolution, Chairman Baruch, of the War Industries Board, yesterday informed the Senate that in placing restrictions upon private building operations the board is simply carrying out the duties conferred upon it by law in order to assist in winning the war. "It is not only the policy but it is the clear and simple duty of the War Industries Board," said Mr. Baruch, "to see that the war program of the country is met and this program must be met now when its needs are upon us. This duty must be fulfilled, even if its fulfillment entails industrial loss in this country as it does human loss abroad."

General Manager Piez, of the Emergency Fleet Corporation, yesterday reported to the Commerce Committee that ship tonnage actually delivered to the corporation so far this year amounts to 1,811,000 tons, with 2,596,000 tons launched and keels laid for 4,105,000. Deliveries for the month of September, he said probably would reach 400,000 tons. Not more than 20 ships are expected from the Hog Island shipyards this year, Mr. Piez said, and he admitted that this was far below the number called for in the original program. This output, Mr. Piez said, would be doubled when the plant was fully supplied with skilled workmen. He explained to the committee how the yards were getting rid of unskilled men who took refuge in the shipbuilding plants to escape the draft. Local draft boards are notified where men of draft age are discharged as incompetent.

Secretary McAdoo conferred yesterday afternoon with the conferees on the bill to stimulate the sale of Liberty bonds. It was understood that a compromise was reached on the House provision struck out by the Senate giving the President authority to regulate or prohibit transactions in Liberty bonds and other securities. This section was fought when the bill was in the Senate on the ground that it gave too much power to the Executive and would establish a dangerous precedent.

HOUSE.

The $8,000,000,000 war-revenue bill was passed by the House late yesterday afternoon by a record vote of 350 to 0, Chairman Kitchin, of the Ways and Means Committee, in charge of the measure, demanding a roll call. It now goes to the Senate. In that body the Finance Committee has closed its hearings, and consideration of the measure by the committee in executive session will begin next week. The bill has been in the House more than three months and under debate on the floor of the House since September 6. The bill was passed practically as reported from the committee. Only a few minor amendments, and all recommended by the committee, were made to the bill in the House. One of the committee amendments adopted yesterday extends the depletion allowance to gas and oil wells and mines so as to include "timber and other natural deposits." Representative Moore, of Pennsylvania, renewed his fight for the creation of a committee on war expenditures, but it was thrown out on a point of order. The same fate befell another proposal by Mr. Moore for the creation of a House committee to investigate means of preventing wasteful expenditures. The amendment of Mr. Good, of Iowa, to provide a $3,500 exemption in income taxes for those in the military service overseas was rejected. Similarly an amendment by Mr. Austin, of Tennessee, to exempt from taxation the incomes of all privates in the military service was defeated. In the interest of the wine growers of California, Mr. Kahn proposed an amendment that would have permitted them to extract the alcohol from wine and sell nonalcoholic beverages, but it went out on objection by Mr. Stafford, of Wisconsin. This amendment was approved by the Treasury Department, and will be pressed in the Senate.

By unanimous consent an agreement was reached to take up the annual agricultural appropriation bill to-day. This is the measure that was vetoed by the President because it contained a provision increasing the guaranteed price of wheat. The bill has been reported to the House with this objectionable feature stricken out.

The review of the proceedings of Congress published in the OFFICIAL U. S. BULLETIN of Thursday, September 19, stated that the Senate had on Wednesday confirmed the nomination of Mr. John E. Shekell as member of the United States Tariff Commission. This was incorrect, as Mr. Shekell was confirmed as postmaster at Jackson, Mich.

$100,000,000 CREDIT TO ITALY.

The Treasury Department announces the extension of an additional credit of $100,000,000 to taly.

KEEP BULLETIN POSTED IN ALL PUBLIC INSTITUTIONS

PUBLIC LIBRARIES, BOARDS OF TRADE, CHAMBERS OF COMMERCE, AND OTHER SIMILAR INSTITUTIONS THROUGHOUT THE COUNTRY ARE REQUESTED TO SEE THAT THE OFFICIAL BULLETIN IS DAILY POSTED IN A CONSPICUOUS PLACE IN THEIR BUILDINGS SO THAT THE GENERAL PUBLIC MAY HAVE EASY AND REGULAR ACCESS TO ITS COLUMNS.

POSTMASTER GENERAL BURLESON'S ORDER REQUIRING THE BULLETIN TO BE POSTED IN 58,000 POST OFFICES HAS PROVED OF INESTIMABLE VALUE AS A REFERENCE GUIDE TO THE BUSINESS AND OTHER INTERESTS OF THE NATION, AND IT IS REALIZED THAT THIS BENEFIT MAY BE VASTLY EXTENDED THROUGH THE COOPERATION OF PERSONS IN CHARGE OF ALL PUBLIC INSTITUTIONS NOW RECEIVING COPIES.

DO NOT MISS FILING A SINGLE COPY; THE ONE MISSING IS OFTEN THE MOST VALUABLE. WRITE FOR EXTRA COPIES BY NUMBER, NOT BY DATE.

THE OFFICIAL BULLETIN.

ANTI-AUSTRIAN DELEGATIONS RECEIVED AT WHITE HOUSE

The Committee on Public Information issues the following:

Representatives of the oppressed nationalities of Austria-Hungary have united their efforts in opposition to Austrian oppression. A committee representing these nationalities was received by the President at the White House Friday afternoon. Those present were Prof. T. E. Masaryk, president of the Czecho-Slovak national council; Ignace Paderewski, representing the Polish national committee; Dr. H. Hinkovich, representing the Jugo-Slav national council; Vasilo Sotica, president of the Roumanian national league; Giuseppe Bevione, representing the Italians of Austria; and Myron Korykora, representing the Ukranian federation.

Resolutions Presented.

Prof. Masaryk presented resolutions embodying the thought that "since the majority of the inhabitants of Austria-Hungary, to wit: Poles, Czecho-Slovaks, Ukranians, Roumanians, Jugo-Slavas, and Italians, have been unjustly and cruelly governed by a ruling minority of Germans and Magyars, we demand the dissolution of the present empire, and the organization of its freed peoples according to their own will."

Prof. Masaryk introduced his associates as representing more than 30,000,000 of the oppressed peoples of Austria. He told the President of the confidence these people feel in him, and that their hope of the future lies with him.

Mr. Paderewski pointed out that Austria-Hungary is not a nation, not even a State, but simply a bankrupt firm, bankrupt in the confidence of the world and its own people. Both speakers emphasized the fact that the sentiments expressed voiced the approval of all the people of these oppressed nationalities in the United States.

President Wilson's Remarks.

The President spoke informally and sympathetically, stating that he felt their confidence in him to be deserved because of his open and expressed sympathies, principles, and purposes in connection with America's attitude toward the oppressed peoples not only of Austria-Hungary, but of the world.

TWO NAVY AVIATORS KILLED.

Ensigns Palmer and Frothingham Accident Victims in France.

The Navy Department announces the death of Ensign Clyde Norton Palmer, United States Naval Reserve Force, and Ensign Philip Bernard Frothingham, United States Naval Reserve Force, who were killed in an aeroplane accident in France, September 14. They were buried in the Calais Military Cemetery, Calais, France. Ensign Palmer was a resident of Malden, Mass., his next of kin being, mother, Mrs. Clyde N. Palmer, 23 Fellsmore Road, Malden, Mass. Ensign Frothingham was a resident of Portland, Me., his next of kin being, mother, Mrs. Thomas J. Frothingham, 276 Brackett Street, Portland, Me.

Text of Treaties Between U. S. and France And the U. S. and Greece Providing for Reciprocal Military Service of Citizens

During executive session of the Senate on Thursday, September 19, 1918, the following treaties were ratified, and on motion of Mr. Pomerene the injunction of secrecy was removed therefrom:

Reciprocal Military Service with France.

To the Senate:

I transmit, with a view to receive the advice and consent of the Senate to its ratification, a convention between the United States and France, signed at Washington on September 3, 1918, in respect to military service of citizens of the United States in France and citizens of France in the United States.

WOODROW WILSON.

THE WHITE HOUSE,
Washington, September 6, 1918.

DEPARTMENT OF STATE,
Washington, September 4, 1918.

THE PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate, if his judgment approve thereof, to receive the advice and consent of the Senate to its ratification, a convention between the United States and France, signed at Washington on September 3, 1918, providing for reciprocal military service of citizens of the United States in France and citizens of France in the United States.

This convention was negotiated in conjunction with the War Department and has that department's approval.

Respectfully submitted.

ROBERT LANSING.

The President of the United States of America and the President of the French Republic, being convinced that for the better prosecution of the present war it is desirable that American citizens in France and citizens of France in the United States shall either return to their own country to perform military service in its army or shall serve in the army of the country in which they remain, have resolved to enter into a convention to that end and have accordingly appointed as their plenipotentiaries the President of the United States of America, Robert Lansing, Secretary of State of the United States; and the President of the French Republic, J. J. Jusserand, ambassador extraordinary and plenipotentiary to the United States, who, after having communicated to each other their respective full powers found to be in proper form, have agreed upon and concluded the following articles:

ARTICLE I.

All male citizens of the United States in France and all male citizens of France in the United States shall, unless before the time limited by this convention they enlist or enroll in the forces of their own country or return to the United States or France, respectively, for the purpose of military service, be subject to military service and entitled to exemption or discharge therefrom under the laws and regulations from time to time in force, of the country in which they are: *Provided*, That in respect to citizens of the United States in France the ages for military service shall be the ages specified in the laws of the United States prescribing compulsory military service, and in respect to citizens of France in the United States the ages for military service shall be for the time being 20 to 44 years, both inclusive.

ARTICLE II.

Citizens of the United States and citizens of France within the age limits aforesaid who desire to enter the military service of their own country must enlist or enroll or must leave France or the United States, as the case may be, for the purpose of military service in their own country before the expiration of 60 days after the date of the exchange of ratifications of this convention, if liable to military service in the country in which they are at said date; or if not so liable, then before the expiration of 30 days after the time when liability shall accrue; or as to those holding certificates of exemption under Article III of this convention, before the expiration of 30 days after the date on which any such certificate becomes inoperative unless sooner renewed; or as to those who apply for certificates of exemption under Article III and whose applications are refused, then before the expiration of 30 days after the date of such refusal, unless the application be sooner granted.

ARTICLE III.

The Government of the United States and the Government of the French Republic may, through their respective diplomatic representatives, issue certificates of exemption from military service to citizens of the United States in France and citizens of France in the United States, respectively, upon application or otherwise, within 60 days from the date of the exchange of ratifications of this convention or within 30 days from the date when such citizens become liable to military service in accordance with Article I: *Provided*, That the applications be made or the certificates be granted prior to their entry into the military service of either country. Such certificates may be special or general, temporary or conditional, and may be modified, renewed, or revoked in the discretion of the Government granting them. Persons holding such certificates shall, so long as the certificates are in force, not be liable to military service in the country in which they are.

ARTICLE IV.

The Government of the United States and the Government of the French Republic will, respectively, so far as possible, facilitate the return of citizens of France and of the United States who may desire to return to their own country for military service, but shall not be responsible for providing transport or the cost of transport for such persons.

ARTICLE V.

No citizen of either country who under the provisions of this convention enters the military service of the other shall, by reason of such service, be considered, after this convention shall have expired or after his discharge, to have lost his nationality or to be under any allegiance to the United States or to France, as the case may be.

ARTICLE VI.

The present convention shall be ratified by the President of the United States of America, by and with the advice and consent of the Senate of the United States, and by the President of the French Republic, and the ratifications shall be exchanged at Washington or at Paris as soon as possible. It shall come into operation on the date on which the ratifications are exchanged and shall remain in force until the expiration of 60 days after either of the contracting parties shall have given notice of termination to the other. Whereupon any citizen of either country incorporated into the military service of the other under this convention shall be as soon as possible discharged therefrom.

It witness whereof, the respective plenipotentiaries have signed the present convention and have affixed thereto their seals.

Done in duplicate at Washington, the 3d day of September, in the year of our Lord one thousand nine hundred and eighteen.

ROBERT LANSING.
JUSSERAND.

Text of Convention Between U. S. and Greece

RECIPROCAL MILITARY SERVICE WITH GREECE.

To the Senate:

I transmit herewith, to receive the advice and consent of the Senate to its ratification, a convention between the United States and Greece, signed at Washington on August 30, 1918, in respect to reciprocal military service of citizens of the United States in Greece and citizens of Greece in the United States.

WOODROW WILSON.

THE WHITE HOUSE,
Washington, September 6, 1918.

THE PRESIDENT:

The undersigned, the Secretary of State, has the honor to lay before the President, with a view to its transmission to the Senate, if his judgment approve thereof, to receive the advice and consent of that body to its ratification, a convention between the United States and Greece, signed at Washington on August 30, 1918, stipulating for the reciprocal military service of citizens of the United States in Greece and citizens of Greece in the United States.

This convention was negotiated in conjunction with the War Department and has its approval.

Respectfully submitted.

(Signed) ROBERT LANSING.

Inclosure: As above stated.

DEPARTMENT OF STATE,
Washington, August 31, 1918.

The President of the United States of America and His Majesty the King of the Hellenes, being convinced that for the better prosecution of the present war it is desirable that citizens of the United States in Greece and citizens of Greece in the United States shall either return to their own country to perform military service in its army or shall serve in the

army of the country in which they remain, have resolved to enter into a convention to that end, and have accordingly appointed as their plenipotentiaries,

The President of the United States, Robert Lansing, Secretary of State of the United States; and

His Majesty the King of the Hellenes, Mr. Georges Roussos, Envoy Extraordinary and Minister Plenipotentiary of Greece to the United States,

Who, after having communicated to each other their respective full powers, found to be in proper form, have agreed upon and concluded the following articles:

ARTICLE I.

All male citizens of the United States in Greece and all male citizens of Greece in the United States shall, unless before the time limited by this convention they enlist or enroll in the forces of their own country or return to the United States or Greece, respectively, for the purpose of military service, be subject to military service and entitled to exemption or discharge therefrom under the laws and regulations from time to time in force of the country in which they are: *Provided*, That in respect to citizens of the United States in Greece the ages for military service shall be the ages specified in the laws of the United States prescribing compulsory military service, and in respect to citizens of Greece in the United States the ages for military service shall be for the time being 20 to 24 years, both inclusive.

ARTICLE II.

Citizens of the United States and citizens of Greece within the age limits aforesaid who desire to enter the military service of their own country must enlist or enroll or must leave Greece or the United States, as the case may be, for the purpose of military service in their own country before the expiration of 60 days after the date of the exchange of ratifications of this convention, if liable to military service in the country in which they are at the said date; or if not so liable, then before the expiration of 30 days after the time when liability shall accrue; or as to those holding certificates of exemption under Article III of this convention, before the expiration of 30 days after the date on which any such certificate becomes inoperative unless sooner renewed; or as to those who apply for certificates of exemption under Article III and whose exemptions are refused, then before the expiration of 30 days after the date of such refusal, unless the application be sooner granted.

ARTICLE III.

The Government of the United States and the Government of Greece may through their respective diplomatic representatives issue certificates of exemption from military service to citizens of the United States in Greece and citizens of Greece in the United States, respectively, upon application or otherwise, within 60 days from the date of the exchange of ratifications of this convention, or within 30 days from the date when such citizens become liable to military service in accordance with Article I, provided that the applications be made or the certificates be granted prior to their entry into the military service of either country.

Such certificates may be special or general, temporary or conditional, and may be modified, renewed, or revoked in the discretion of the Government granting them. Persons holding such certificates shall, so long as the certificates are in force, not be liable to military service in the country in which they are.

ARTICLE IV.

The Government of the United States and the Government of Greece will, respectively, so far as possible, facilitate the return of citizens of Greece and citizens of the United States who may desire to return to their own country for military service, but shall not be responsible for providing transport or the cost of transport for such persons.

ARTICLE V.

No citizen of either country who, under the provisions of this convention, enters the military service of the other shall, by reason of such service, be considered after this convention shall have expired or after his discharge to have lost his nationality or to be under any allegiance to His Majesty the King of the Hellenes or to the United States, as the case may be.

ARTICLE VI.

The present convention shall be ratified by the President of the United States of America by and with the advice and consent of the Senate of the United States and by His Majesty the King of the Hellenes, and the ratification shall be exchanged at Washington or at Athens as soon as possible. It shall come into operation on the date on which the ratifications are exchanged and shall remain in force until the expiration of 60 days after either of the contracting parties shall have given notice of termination to the other, whereupon any citizen of either country incorporated into the military service of the other under this convention shall be as soon as possible discharged therefrom.

In witness whereof the respective plenipotentiaries have signed the present convention and have affixed thereto their seals.

Done in duplicate at Washington the 30th day of August in the year of our Lord one thousand nine hundred and eighteen.

ROBERT LANSING.
ROUSSOS.

American Official Communique

(Continued from page 4.)

Tanks are harmless; they can not fire accurately.

"Seven. Line of artillery protection: On the right wing, in front of the 398th reserve infantry, to the village of Montsec, inclusive, the same as the principal line of resistance, and passing then to the southern edge of the forest (by Kanon ewaldschen) by the quart de reserve, crest of maizerais to the south of Camp Hecken. This is at present under construction. Security garrison for the line of artillery protection. One company to the right and one to the left of the Kanon ewaldschen (on the edge of the wood), (G1 left), one company on the crest of maizerais (from GII left), one company on the southern edge of the quart de reserve (from GII right), and one company on the crest to the southwest of Camp Hecken on both sides of the road. Each squad always occupies the same position and must be able to find it without hesitation at night and in foggy weather.

"Eight. Reserve companies (one at each of the following points: GII right, GII left, GIII right, two at GIII left) will assemble at the alarm near the commander of the combat troops. The latter will decide according to the situation whether the reserve companies are to hold the enemy back by their fire, which by reason of the great length of our front will be the rule, or whether there will be opportunity (as, for example, at GIII left) to counterattack.

"Nine. Battalions W rest: For alarm position, see paragraph 6. In case of alarm, the battalions at rest will assemble. As the camps will very probably be bombarded by the enemy, the 398th will assemble at the camp, the 47th in the region northwest of Maizerais, the 6th Grenadiers southeast of Essey. Slight detours may be made to avoid hostile artillery fire.

"Ten. The staffs will go to their combat posts. The divisional staffs will go to Crest 255, south of Biltonville.

"Eleven. Artillery: In case of alarm, all the gun crews will be at their guns, machine guns in position, limbers hitched up, the sector battery at the wagon line. The batteries of field artillery at rest (with the exception of the army reserve battery, which will go to point 3.081) will join immediately the resting infantry battalions (the 9th Battery will join the 398th Infantry, one-half battery will join the 47th Infantry, and one-half the 6th Grenadiers). At the alarm signal, the position batteries will fire, in foggy weather, or in case there is any doubt, the light signals, a burst of destruction fire A; if the alarm is repeated on the front, a new burst will be fired.

"Twelve. The mobile reserves will, in case of an alarm, report to the major of camps and cantonments.

The officer will see to stopping stragglers, who will be assigned to the mobile reserves. Look out for the approach of the enemy. Be sure which position you are to occupy. (Check up per regiment and per brigade.)

"To be sent to: Division (IA, IB, II), 3 copies; 20th Brigade, 1 copy; 6th Grenadiers, 20 copies; 47th IR, 20 copies; 398th IR, 20 copies; artillery commander, 20 copies; pioneer commander, 1 copy; chief of liaison service, 1 copy; balloon section 214, 1 copy; reconnaissance squadron 206, 1 copy; major of camps and cantonments.

"(Par. 12.) By order of Baron von Gruter. Oelsner, lieutenant."

Labor Priority Bulletin Explaining Preference Claims for Employees Engaged in the Lumber Industries

B. M. Baruch, chairman of the War Industries Board, authorizes the following:

As the lumber industry was not mentioned in the official preference list issued by the priorities division of the War Industries Board, Judge E. B. Parker, priorities commissioner, has issued a supplemental statement entitled "Labor Priority Bulletin No. 1," addressed to the United States Employment Service and all industrial advisers, covering the industry.

Charles Edgar, director of lumber, War Industries Board, explains that this statement calls the attention of industrial advisers and the district exemption boards to the essential nature of the lumber industry, and to the importance of considering claims for exemption of necessary employees of lumber manufacturing plants supplying lumber "necessary to the maintenance of military establishments, or the effective operation of the military forces of the United States or its allies, or to the maintenance of national interest during the emergency."

Sent to Exemption Boards.

This bulletin will be in the hands of district exemption boards. It will be necessary for each lumber manufacturing plant to present its case before the proper district exemption board (1) by showing the amount of direct Government orders on hand, (2) by showing the amount of indirect Government orders on hand, and (3) by showing the amount of lumber supplied to others than the Government, which is of primary importance in war work or in essential civilian requirements.

It is believed, said Mr. Edgar, that this is a fair and impartial method of handling the question of labor preference for the lumber industry, as it leaves each individual lumber manufacturing plant to prove its own case.

Following is the full text of the new priorities bulletin:

LABOR PRIORITY BULLETIN No. 1.

To the United States Employment Service and all industrial advisers:

Section 80 of the Revised Selective-Service Regulations among other things provides:

"Such industrial advisers may place before the district board at its meetings, or at such other time as the board may request, all facts and information in their possession as to the preference lists issued by the Priorities Division of the War Industries Board. Such lists shall not be regarded as binding upon the district board in its conclusions as to whether or not any particular industry, occupation, or employment, including agriculture, is a necessary industry, occupation, or employment within the meaning of the law and regulations, nor shall such lists prevent the district board from holding as necessary any industry, occupation, or employment, including agriculture, not contained therein. Such preference lists and other facts and information in the possession of such advisers will supplement the information in possession of the district boards and will also be used to assist the district boards in dealing with specific cases."

The "preference lists" referred to in the regulation quoted are those embraced in Circular No. 20 issued by the Priorities Division of the War Industries Board under date of September 3, 1918, embodying, "preference list No. 2" and such amendments, supplements, or substitutions therefor as may from time to time issue. A careful study of the "foreword" to Circular No. 20 is invited and attention is particularly directed to the concluding paragraph thereof, reading:

"This preference list shall be amended or revised from time to time by action of the Priorities Board to meet changing conditions. The priorities commissioner shall, under the direction of and with the approval of the Priorities Board, certify additional classes of industries and also certify additional plants whose operations as a war measure entitle them to preference treatment, which industries and plants when so certified shall be automatically included in the preference list."

From time to time it may become necessary to certify to you additional industries or additional plants entitled to preferential treament in their supply of labor, and this will be accomplished through "Labor Priority Bulletins," of which this is No. 1.

Attention is particularly invited to the fact that no attempt has been made to embrace within the preference list all essential industries, but only such as, taking into account the urgency of the demand and the relation of the supply to the demand in the public interest as a war measure, require the artificial stimulus of priority over other essential industries. It should be constantly borne in mind that there are industries and plants which measured by this test may not require general preferential treatment, and which are, nevertheless, essential industries and an important part of the industrial fabric.

THE LUMBER INDUSTRY.

It is deemed of immediate importance that information as to the essential character of the lumber industry and the degree of consideration which should be given the industry with respect to its labor requirements should be furnished to you for your guidance in the administration of the labor recruiting program and to the district boards for their guidance in the matter of claims for industrial deferment.

It will be noted that the lumber industry as such does not appear on the preference list, and the comparatively few plants whose names appear thereon were listed to assist them in securing fuel to operate their logging roads. As a general rule it has been deemed in the public interest that lumber manufacturing plants should use wood as a fuel in order to conserve coal in those districts where the coal supply is less than the demand (although there are necessary exceptions to this rule), and this is one of the reasons why it was not deemed proper to accord to the industry as a whole preferential treatment for its supply of fuel.

Taking into account its very heavy tonnage, coupled with the necessity of applying special priority regulations for the movement of Government timbers and lumber, as well as the necessity for placing embargoes from time to time on commercial shipments into congested territory, it was not deemed proper to accord to the industry as a whole preferential treatment for its transportation service.

The essential nature of the industry as a whole is, however, recognized, and a large per cent of the present lumber production of the United States is required, directly or indirectly, in the prosecution of the war.

To guard against the action of the priorities board being misunderstood because of so important an industry being omitted from the preference list, it is proper to advise you that in the opinion of the priorities board the district boards may, in passing upon claims for industrial deferment made by or on behalf of "necessary" employees of lumber manufacturing plants supplying lumber "necessary to the maintenance of military establishments, or the effective operation of the military forces of the United States or its allies, or to the maintenance of national interest during the emergency," give to such claims consideration substantially equivalent to that which would be given them if they appeared in Class IV on the preference list. The suggestion is made that when such claims for industrial deferment arise the registrant or the plant interested be given an opportunity to present evidence in such form and manner as may be indicated by the district boards; that it is to some substantial extent supplying lumber, through direct or indirect orders, to the Government or some of its agencies (including railroads operated by the United States Railroad Administration), or supplying to others lumber of primary importance in war work, or in essential civilian requirements.

Attention is particularly invited to the fact that for some time to come many of the lumber manufacturing plants in the district east of the Mississippi River and south of the Ohio and Potomac Rivers, and also in Louisiana and Texas, and in the Pennsylvania hemlock district in eastern Pennsylvania will be largely engaged in filling heavy orders for the War Department and for the Emergency Fleet Corporation, as well as for the Railroad Administration, while many mills in the States of Washington and Oregon will be largely engaged in supplying spruce and fir for aircraft production, as well as ship timbers.

Attention is invited to the accompanying copy of Circular No. 21, issued by the Priorities Division of the War Industries Board under date of September 3, 1918, dealing with "nonwar construction." The curtailment of all building operations which can and should be deferred until after the war shall have been won will, to a considerable extent, automatically curtail the production of lumber not required for essential uses.

The request is made that this bulletin have your careful consideration and that

(Continued on page 9.)

U. S. WOMEN SEND SYMPATHY TO QUEEN OF THE BELGIANS

The Woman's committee, Council of National Defense, authorizes the following:

The following letter to the Queen of the Belgians has been transmitted through the State Department:

"Your Majesty: Knowledge of the woe which has so long tortured you and your beloved country rests heavily on the hearts of the women of the United States; speaking for them the woman's committee of the Council of National Defense extend to you profound and sincere sympathy.

"As a woman and as a queen you have suffered and as a woman and as a queen you have endured, and we offer our tribute of admiration to your devotion and your courage.

"With profound respect we have the honor to be your majesty's obedient servants,

"THE WOMAN'S COMMITTEE OF THE COUNCIL OF NATIONAL DEFENSE."

The original of the letter will be sent to her majesty by the minister from Belgium to the United States as soon as it is deemed advisable to transport it.

The message is done on parchment with illuminations, which are the work of C. Scappechi, of New York, who also did the letter to the Queen of Roumania.

LABOR PRIORITIES BULLETIN.

(Continued from page 8.)

It be called to the attention of the several district boards.

Yours, truly,

EDWIN B. PARKER,
Priorities Commissioner.

WASHINGTON, D. C.,
September 17, 1918.

SEPTEMBER 18, 1918.

From: Office of Director of Lumber.
To: Judge Edwin B. Parker, Priorities Commissioner.
Subject: Labor Priority Bulletin No. 1—Lumber Industry.

Lumber manufacturing plants supplying lumber necessary to the maintenance of military establishments or the effective operation of the military forces of the United States or its allies are certainly entitled to a higher classification on the preference list than the lowest, as provided in the third paragraph on page 3 of the Bulletin; and on behalf of the departments of the Government looking to this section for their lumber requirements, I must protest against this class of lumber manufacturers being placed in the lowest class.

CHARLES EDGAR,
Director of Lumber.

THE WEEKLY WEATHER FORECAST

The Weather Bureau has issued the following forecast for the period September 23 to 28, inclusive:

North and Middle Atlantic States.—Generally fair weather during the week with a return to nearly normal temperature after Monday.

South Atlantic and East Gulf States.—Generally fair weather during the week with a return to nearly normal temperatures after Monday.

West Gulf States.—Fair weather during the week with nearly normal temperatures.

Ohio Valley and Tennessee.—Fair weather during the week with nearly normal temperatures.

Region of Great Lakes.—Generally fair weather during the week, although some prospect of showers in upper Lake region early in the week; nearly normal temperatures.

Upper Mississippi and Lower Missouri Valleys.—Generally fair weather indicated during the week, although some prospects of showers by Monday in extreme upper Mississippi Valley. Nearly normal temperatures.

Northern Rocky Mountain and Plateau Regions.—Generally fair weather during the week with temperatures near or slightly above normal.

Southern Rocky Mountain and Plateau Regions.—Fair weather during the week with nearly normal temperatures.

Pacific States.—Generally fair weather during the week with nearly normal temperatures.

NEWS FROM ALL FRONTS GOOD, GEN. MARCH STATES

(Continued from page 1.)

the enemy's best troops until they are now within half a mile of the junction of the Mauberge road and the Chemin des Dames, and within 10 miles of Laon, which is being shelled. Other operations along the entire front have been minor in character.

Operations in the Balkans.

The reports in the press about the successful operations of the Serbian Army on the Balkan front are correct. The Serbian Army attacked the Bulgarians on a front of 25 miles on a sector that has been quiet for a long time and has driven them back about 20 miles through this mountainous region. According to official reports the British have reopened activities in Palestine. It is also reported, however, that the British have withdrawn from Baku on the Caspian. The city is again in the hands of the Turks.

In connection with the American operations at St. Mihiel we have a very interesting cablegram giving some details of the fine work of the French, who cooperated with the Americans in that successful advance. It appears that the French regiment that had the honor of being the first to enter St. Mihiel was led by the son of the prime minister, Clemenceau—a regiment of zouaves, colonial infantry, and foreign legion, composed almost entirely of men belonging to the laboring class. This organization was the first organization of either army to enter St. Mihiel. The work of the French in connection with that fighting was of the high character that we find them always showing all along the front.

American Division Praised.

Here is a copy of a commendatory order from Maj. Gen. H. L. Reed, commanding the 15th Scottish Division, referring to the 1st American Division, which I will read to you, indicating the standing which our units have with the British as well as with the French, as I have read some similar orders which emanated from French headquarters. These show clearly the high class of work our men are doing:

"I would like, on behalf of all ranks of the 15th (Scottish) Division, to express to you personally, to your staff, and to all our comrades in your splendid division, our most sincere thanks for all that has been done to help us in a difficult situation.

"During many instances of 'taking over,' which we have experienced in the war, we have never received such assistance and that rendered on the most generous scale.

"In spite of its magnificent success in the recent fighting, the first American division must have been feeling the strain of operation, accentuated by heavy casualties, yet we could discern no symptoms of fatigue when it came to a question of adding to it by making our task easier.

Special Praise for Artillery.

"To your Artillery commander (Col. Holbrook) and his staff and to the units under his command our special thanks are due. Without hesitation, when you and he saw our awkward predicament as regards artillery support, the guns of your division denied themselves relief in order to assist us in an attack. This attack was only partly successful, but the artillery support was entirely so.

"Without the help of Col. Mabee and his establishment of ambulance cars, I have no hesitation in saying that at least 400 of our wounded would be still on our hands in this area.

"The 15th (Scottish) Division desires me to say that our hope is that we may have opportunity of rendering some slight return to the 1st American Division for all the latter has done for us, and further, that we may yet find ourselves shoulder to shoulder defeating the enemy in what we hope is the final stage of this war."

In the American Army generally we have now embarked for foreign ports over three-quarters of a million on the second million, over 1,750,000 men.

Questions and Answers.

Q. Please locate the 114th Engineers, 39th Division.

A. This organization just recently landed. Has arrived safely.

Q. Where is the 90th Division?

A. The 90th Division is in eastern France.

Q. Where is the 36th Division?

A. The 36th Division still is in one of our training sectors with the French. It is training in France.

Q. Who is the successor to Col. Kennon at Camp Greene, S. C.?

A. Col. Kennon is the officer who died recently in New York while absent on leave from his command. His successor is Col. Macomb, of the Cavalry—a Regular Army officer. (Col. August Macomb, United States Cavalry.)

Q. Has a major general been selected to command the 18th Division?

A. No; not yet.

Q. Has a successor to Brig. Gen. Greble at Camp Bowie been selected?

A. Gen. Greble was recently retired, and I have not yet sent a general officer down there to command that camp.

Q. Can any of the units which took part in the St. Mihiel fight be identified?

A. We have not a definite statement on that as yet. I will be very glad to give it out when it comes.

Better than money because they earn money; buy a WAR-SAVINGS STAMP TO-DAY.

Order Establishing a Regulation to Restrict Consumption of Fuel by the Manufacturers of Cement

The United States Fuel Administration issues the following:

WASHINGTON, D. C., *August 8, 1918.*

Order establishing a regulation to restrict fuel consumption by manufacturers of cement:

It appearing to the United States Fuel Administrator, after consultation with the chairman of the War Industries Board, in view of the necessity for conserving the country's resources for the prosecution of the war and in consideration of the increased demand for fuel for industries engaged in the production of munitions and commodities required in the conduct of the war, and the fact that, owing to the limitations upon transportation facilities and other causes resulting from the war, there is an insufficient supply of fuel for these purposes and also for all the other purposes existing in normal times, that it is essential to the national security and defense for the successful prosecution of the war and for the support and maintenance of the Army and Navy to restrict the consumption of fuel in certain lines of industry, and that among such industries is that of the manufacture of cement, as defined in the regulation hereinafter prescribed; and the United States Fuel Administrator hereby finding that the restriction of fuel consumption to the extent specified in said regulation is reasonable, and that such restriction will contribute to the successful outcome of the war through the releasing of fuel and other resources for war purposes, and will result, with other limitations upon the use of fuel in various other lines of industry through the establishing of similar regulations, in an equitable distribution and apportionment of fuel among consumers, in accordance with the relatively essential nature of their products to the prosecution of the war:

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917, and as requested by the chairman of the War Industries Board, hereby makes and establishes the following regulation, effective until further or other order and subject to general or specific modification hereafter from time to time and at any time:

Regulation Restricting Fuel Consumption by Manufacturers of Cement.

1. That the term "cement" in this regulation shall be construed to cover all Portland cement, natural cement, and Puzzuolon (slag) cement made by any process whatsoever, as those terms are customarily used in the trade.

2. That the term "manufacturer" in this regulation shall be construed to cover any person, firm, association, or corporation engaged in the manufacture of cement.

3. No manufacturer, as defined above, shall at any of his plants consume, burn, or use fuel of any description, including coal, coke, natural gas, fuel oil, or other petroleum products, or use power derived from any such fuel, for or in connection with the manufacture of cement, as above defined, during the year beginning January 1, 1918, and ending December 31, 1918, to an amount in excess of the amount required to manufacture 75 per cent of the average annual production of cement at such plant during the period from January 1, 1915 to December 31, 1917.

Excepting—

First. In case such plant was not in existence on January 1, 1915, then and in such case the period during which it had been in existence prior to January 1, 1918, shall be used as a basis in arriving at a determination as to the quantity that would constitute 75 per cent of the average annual production.

Second. That any manufacturer of cement may burn fuel for the manufacture of cement in excess of the amount provided for in this order whenever permission in writing for such excess production is granted by the United States Fuel Administration to such manufacturer—

(a) Upon evidence that the necessities of the Government in the particular district in which such manufacturer is located can not be supplied by plants within practical shipping distance of the place where the United States Government requires such product, unless permission is granted for such excess production, and that on this account it is necessary in the interest of the United States Government that such permit be issued.

(b) Upon receipt of certification from the fuel administrator of the State in which the plant is located that the material to be manufactured is to be used in connection with building operations of urgent public necessity and that the fuel used in manufacturing such material can be spared for such purpose.

Third. That whenever two or more manufacturers of cement shall find that a further fuel economy would result from combining and using jointly the allotments of fuel to their several plants permitted by this regulation, upon application to the United States Fuel Administration, and upon receipt of a permit therefor, such manufacturers may use at one or more of such plants to be operated by them jointly sufficient fuel to manufacture 75 per cent of the aggregate of the average annual production of all such plants when operated separately, the manufactured product of such jointly operated plants being distributed to the individual manufacturers as may be agreed between them.

Fourth. That wood and peat, when not requiring railroad transportation, may be used for the manufacture of cement in excess of the amount provided for in this regulation, and all manufacturers of cement shall, within five days after beginning the use of such wood and peat as fuel for the purposes aforesaid, notify their respective State fuel administrators in writing of the exact time they and each of them began the use of such wood and peat as fuel.

Any such manufacturer violating or refusing to conform to the above regulation will be liable to the penalty prescribed in the aforesaid act of Congress.

H. A. GARFIELD,
United States Fuel Administrator.

FIRST FERROCONCRETE SHIP SOON IN THE BRITISH SERVICE

Consul General Robert P. Skinner, at London, reports:

The first large ferroconcrete vessel ever produced in Great Britain will shortly pass into the service of the Government. The vessel has a displacement of about 900 tons and a dead-weight carrying capacity of some 400 to 500 tons.

The following general description was taken from Lloyd's List:

Accurately to designate the class one should term them ferroconcrete or reinforced concrete ships. This means that a skeleton is employed which is packed round and filled in with concrete. Concrete is strong under compression but has substantially no tensile strength. This defect is, therefore, counterbalanced by "reinforcing" with steel rods. Different systems are adopted, but the general principle of getting the steel portions of the vessel into position and then packing the concrete round them obtains in all.

Needs of the Moment Met.

In assigning advantages to concrete ships as compared with steel productions, perhaps the main factor is that they meet the needs of the moment. Much less steel is required, which in itself is of inestimable value at the present time. The proportion of saving varies with the size of the ships; the larger the ship the less the saving. On a 500-ton ship the saving in steel would probably not exceed about 30 per cent. On a small vessel over 50 per cent might be saved. If a hundred 1,000-ton ships were built in ferroconcrete a saving of some 10,000 tons of steel might be looked for.

Two further important advantages are cheaper and quicker construction. Another weighty consideration is that labor other than that of existing skilled shipwrights can be successfully employed. Again, the necessary shipyard plant is cheaper, simpler, and more easily installed, while the materials for making the concrete are available in almost any locality.

Weight One of Main Defects.

One of the main defects is the greater weight, which, type for type, approaches 100 per cent increase. It follows that there is a proportionate increase in displacement for a given dead-weight. Where dead-weight freightage is a governing factor the concrete ship can only compare unfavorably with the steel vessel. Where "bulky" articles have to be carried the point is not so important. Commercially, of course, any increase of net tonnage involves further expenditure for port and harbor dues.

From the foregoing brief review it will be seen that many points of advantage in the ferroconcrete vessel are more than doubly valuable under present circumstances. Their utility as a war-time expedient is unquestionable. This is particularly the case in regard to the smaller vessels now being produced in this country.—Commerce Reports.

BRITISH IMPERIAL WAR CONFERENCE AND THE IMPERIAL WAR CABINET DISCUSS MATTERS AFFECTING EMPIRE

Commercial Attache Philip B. Kennedy, London, England, reports:

The imperial war conference and the imperial war cabinet have been holding important sessions in London during the past month. The imperial war conference, which is a deliberative body, has devoted considerable time to discussing matters of imperial policy. The war cabinet, which is more of an executive body, is the authority to whom the conference reports its decisions.

A large number of representatives of the Dominions have been present in London in connection with these conferences. The war cabinet, which has included the prime ministers of the Dominions, has discussed fully and passed resolutions on most important matters relating to peace negotiations and future imperial economic policy.

Oversea Ministers Attend.

The imperial war conference has been attended by cabinet ministers and other representatives of the Dominions, a considerable number of whom have been in London. The Canadian cabinet had in London at one time not only its prime minister, but also five or six cabinet ministers. Gen. Smuts, of South Africa, who has been permanently attached to the war cabinet, has been joined for the conference by the minister of railways of the Union of South Africa. The prime minister of Australia, Mr. W. M. Hughes, was accompanied to London by the minister for the navy of the Commonwealth, the governor of the Commonwealth bank, the solicitor general, and a representative of the Australian shipping board. New Zealand has been represented by its prime minister, Mr. Massey, and its treasurer, Sir Joseph Ward. The prime minister of Newfoundland has been present and the premiers of a number of Canadian States. This large representation of prominent officials from the Dominions has given unusual authority to the meetings at this time. In view of the great services of the Dominion's during the war it has also been the policy of the British Government to attach particular importance to this conference and to take up intimately with the Dominion representatives the most important matters of imperial policy.

So far as can be gathered from the public utterances of the Dominion representatives it appears that the Dominions are very much interested in the strong development of close imperial cooperation in matters of economic policy. Australia and New Zealand are greatly interested in retaining the German colonies in the Pacific and in combating German trade after the war.

Resolutions Adopted.

Although not very many announcements have been made regarding the resolutions passed by the imperial war conference, a general outline has been given of the resolutions. The prime minister, Mr. Lloyd George, announced in an address before Canadian journalists that matters relating to peace had been discussed intimately with the dominion representatives, and it is understood that certain confidential resolutions have been passed relating to postwar economic policy.

It has been publicly announced that an important resolution was passed dealing with the British nonferrous metal industries act, which aims at freeing the British Empire from dependence on German-controlled organization. The dominions have been asked to pass legislation similar to that embodied in the British nonferrous metal industries act, which makes it necessary to obtain licenses for trading in metals.

The Dye Industry.

Another important resolution related to the dye industry, and it is understood that the dominions have been asked to cooperate with the Imperial Government in protecting the developing British dye industry in the British Empire.

One of the most important matters that has come up before the imperial war conference and the war cabinet has probably been that relating to the future control of imperial raw materials. Mr. Bonar Law, chancellor of the exchequer, announced in Parliament that arrangements were being made with representatives of the dominions for the control of imperial raw materials as the basis for inaugurating negotiations with other allies for some joint action in regard to the control of raw materials after the war.

Special Committee Appointed.

A special committee of members of the imperial war conference has been appointed to consider the best methods by which essential raw materials may be obtained. After the British Government has perfected with the dominions a plan for obtaining control of the raw materials of the Empire, it is expected that representations will be made to the United States and to the other allies for some common action. The Inter-Allied Parliamentary Conference of Commerce, held in London July 2 to 5, at which were present parliamentary delegates from most of the allied countries with the exception of the United States, passed resolutions approving Mr. Bonar Law's statement in parliament that the British Empire was taking preliminary steps to bring up allied control of raw materials. There is probably no after-the-war policy which has received more serious attention than this of the control of raw materials, and it is probable that very definite progress is being made by Great Britain looking to effective future action.

Inter-Empire Trade.

The imperial war conference has considered various matters relating to the effective development of inter-Empire trade, such as transport, news service, parcel post, statistics, and emigration, and cable service. The dominions, recognizing the importance of transport, no doubt hope that soon after the war arrangements will be made for improving direct steamship connections between Great Britain and the dominions. Considerable attention has been given to news service, and it has been recommended that the news which goes to the dominions should come from a British source. This has been largely true in the past, but there is evidently a desire to secure for the dominions more comprehensive news service than formerly. An appeal has been made for reducing the rates for cable service, which will be of assistance to business and especially in the transmission of news. A proposal for an imperial bureau of statistics in London looks to more adequate transmission and compilation of information from the different parts of the Empire.

Question of Emigration.

One of the most important questions has had to do with emigration. The British Government has been considering recently the formation of a central committee to control emigration from the United Kingdom. The imperial war conference has cabled the dominions affirming the principle by which intending immigrants may be settled in territory under the British flag and asking cooperation with a proposed consultative committee in London, including representatives of the dominions. The conference has also discussed the question of giving preference in Government contracts to Empire raw materials.

Imperial Economic Policy.

It would appear that the representatives of the dominions are anxious that immediate consideration should be given to the important matters discussed relating to the closest cooperation of the different parts of the Empire. It is not so certain, however, that the British Government will be prepared to finally perfect a program of future economic policy during the war. Mr. Bonar Law, answering a question in Parliament on July 17, said that the imports and exports bill, which is preliminary to any after-the-war economic policy, would not be brought forward until autumn, and that it was impossible to make any statement on economic policy before the adjournment. Future economic policy, he said, was being considered as seriously as possible in war time, but that this was a problem to be solved after the war. The imports and exports bill, which has been prepared for some time, was brought forward by the board of trade to keep in Government hands the control of trade for a period of some three years after the war. The Government might at its discretion continue the policy of import and export licenses for the period of the bill. If this bill is passed it will give the Government power for a certain period after the war to enforce any trade regulations which might be passed.

Imperial Preference Tariff.

The question of an imperial preference tariff has not been given any open discussion of moment during these meetings in London. There is undoubtedly a great deal of sentiment in favor of a policy of this kind both in the Dominions and in the United Kingdom. The tariff question in the United Kingdom, however, is an issue on which there is as yet no unity of opinion. The old free-trade sentiment in

Expansion of American Port Facilities
Vast New Undertaking of Shipping Board

Enlargement of Dockage on Both Oceans—Improvement of and Creation of New Harbors Contemplated to Meet Demands of Swiftly Increasing Merchant Marine—Commiss on at Work on Survey.

The Shipping Board authorizes the following:

Along with the record-breaking production of ships for the war—and after the Shipping Board has undertaken the task of expanding the port and harbor facilities of the country to meet the needs of the greatest maritime commerce of modern times. This is a case of one huge enterprise begetting another.

A doubling, and perhaps trebling, of docks, piers, marine railways, and terminal facilities in general of Atlantic, Gulf, and Pacific ports will probably be called for by the swiftly increasing American merchant marine. To provide for the fullest possible service of the ships, once they are released from war traffic, even new ports may become necessary.

Great Possibilities Ahead.

There are the prospects as they are already shaping up in the preliminary studies of the situation which have been made by the recently created Port and Harbors Facilities Commission of the Shipping Board. Edward F. Carry, named chairman of this commission because of his experience as director of the Division of Operations of the Shipping Board, will have before him shortly complete data of the present inadequate facilities. The comprehensive survey instituted by the commission will be a constantly used basis of study for future developments.

In connection therewith the chairman and the experts attached to the commission will personally inspect the facilities at all the larger ports of the country, and from time to time, as the occasion may arise, obtain first-hand information on proposed new ports. To date they have given the harbors of New York and Boston thorough examination, and they plan to make visits soon to the rapidly growing ports of the South.

Inventory of Port Facilties.

For the first time in the history of port development in the United States, under the direction of Chairman Carry, a complete inventory of port facilities has been undertaken and is now well along. Every port used by ocean-going traffic has been requested to forward to the Port Facilities Commission detailed data concerning its docks, marine railways, terminal arrangements in general, repair plants, and the entrances and clearances in its domestic and foreign trade—all this data covering the past five years.

In addition, every dock and repair plant has been requested to fill out a questionnaire calling for information concerning the type of its facilities, present condition, exact location, whether or not this location is advantageous for the most efficient handling of ships, the terms, rates and conditions on which ships are docked, the number of ships docked during the past five years, the average length of time each ship was in dock, and for a brief statement explaining the nature of work done.

All ports where coal and oil are handled have been asked to equip the commission with full information about their facilities for handling the trade in those first necessities. Here is perhaps the most important of all the coastwise trades in which past performances have been handicapped by inadequate facilities — a trade, as revealed during 1917 and the present year, limited only by shipping and port facilities. One of the immediate tasks of the commission is to expand these facilities so that the bulk of coal for New England war industries may be expedited by water.

The survey of port facilities undertaken by the commission shows them taxed to capacity by the present shipping — in many instances overtaxed, and in nearly all instances, unless they are speedily expanded, facing serious congestion. This is especially true of the facilities of New York harbor, the greatest problem of port development in the world to-day.

To a lesser degree some of the southern ports show congestion in sight unless the National Government expands their facilities.

Diversion of Traffic.

Among the larger problems of shipping up for profound and detailed study before the commission is the diversion of imports and exports from northern to southern ports, especially those going to and from the Middle West. Hitherto they have passed through the port of New York, thus increasing not only the burden of the facilities of that port, but of the badly congested railroads along the north Atlantic seaboard and in Pennsylvania and Ohio. In the future, to relieve the congestion of the port and eastern railroads, other routes may be supplied—to the Middle West, for example, via southern ports, railways, and waterways.

A great deal of the enormous trade in sight with South America is prospectively considered in relation with the ports of the South, and if plans for this diversion go through, the expansion of water-front facilities in that part of the country becomes of front rank importance.

All the Pacific ports, if British shipping history points a moral, face likewise notable expansion of trade with the Orient, and therefore of port requirements far beyond all prewar plans.

Since the development of port facilities links up with the railroads, the Railroad Administration is represented on the Commission on Port and Harbor Facilities. The plans and policies of the Shipping Board coordinate with those of the Railroad Administration to give ports in the future a closer connection between shipping and railroads than they have ever had in the past. Port development on both sides—land and water—becomes easier with shipping and railroads under Government control.

And for the first time, with both great methods of transportation under Government direction, the studies of what is needed to take care of requirements is accompanied by equally detailed tabs on what is being done—on the railroads by what each car is doing, on the water by what each ship is doing. So that the Port and Harbor Facilities Commission is equipped to measure not only what the port facilities are doing, but what the ships are doing in ports. Their needs can thus be determined exactly in relation to one another and so matched. They can also, of course, be determined in relation to accurately measured railroad facilities.

The task assigned to the Port and Harbor Facilities Commission of developing the water fronts to keep pace with the expansion of shipping has aroused tremendous interest on all three coasts, and existing port organizations, State and local, have offered to cooperate fully. Keenly alive to the peace-time significance of the great shipbuilding program of the country, they realize, as their communications to the commission reveal, the prime importance of the expansion of their port facilities to handle the prospective commerce adequately.

BRITISH WAR CONFERENCE

(Continued from page 11.)

the Liberal Party is evidently unchanged. The Labor Party is still evidently opposed to any policy which would affect cheap food and cheap raw materials, and it also has committed itself to resolutions favoring an open door economic policy after the war as the best way of guaranteeing future peace. Before the United Kingdom can come to a definite decision on the tariff probably the issue will have to be joined by the conflicting interests, and this may be something which the Government will not care to bring up during the war. Probably Mr. Bonar Law's statement that future economic policy is receiving as careful consideration as is possible during the war and that this is primarily a question for after the war is about as accurate a statement as could be obtained of the general situation. The Imperial War Conference, however, has brought before the public mind many of the questions which may have to be worked out before a great while, and it therefore is of interest to note the lines along which discussion has taken place.—Commerce Reports.

LIMITS SWEETMEAT BOXES.

British Order Imposing Restrictions on Paper Containers.

The British (Government) Board of Trade Journal states that an order, dated July 19, has been issued by the Board of Trade entitled "Cocoa and sweetmeat box and advertisement order," which imposes certain restrictions on the manufacture and use of cocoa and sweetmeat boxes and on advertising in connection with such products.

The order aims at economizing cardboard and paper by prohibiting extravagant forms of packing and by limiting advertisements. In particular the use of show cards, posters, window bills, and packet stiffeners is prohibited, except in so far as such cards, etc., were actually in stock with the person displaying the same at the date of the order.—Commerce Reports.

HE USES OF POISON GASES IN WARFARE AND WHAT THE UNITED STATES IS DOING BOTH IN THE OFFENSIVE AND DEFENSIVE

Press interview with Maj. Gen. William Sibert, director chemical warfare serv-e:

The use of gas in war has grown so st that it has now become almost rategical in its scope. It was first used cylinders, making a gas cloud. Its ccess depended entirely upon the di-ction and the force of the wind. If e wind was too strong your gas was ssipated and scattered and soon lost toxic character. This uncertainty to the use of gas led to its being ed in artillery shells where it could placed accurately. The shells were st used in the neutralization of enemy tteries and afterwards used in barrages, at is to try to gas the men all along e line during the attack. This charac-r of use of gas lasted until last spring, hen the Germans suddenly increased aterially the use of gas. Evidently ey had been manufacturing it all winter d had accumulated a large quantity. hey adopted the plan of gassing large eas, especially with mustard gas, and in assing important transportation centers, metimes 8 or 10 miles to the rear the line to be attacked. That gives you general idea of the growth of the use gas.

Vital Importance in War.

A nation that has not developed the anufacture of toxic gases and the ecessary appliances for administering it the enemy is terrifically handicapped warfare. In fact, a nation without xic gas, and without means of adminis-ring it, and without protection from will be almost at the mercy of its ad-rsary. The chemical warfare service volves both the offensive and defensive estions that arise with troops in the ld, and there is that continual strug-e between the offense and the defense at there has been between the high-wer gun and armor on the ship. The velopment of the substance in the lab-ratory is immediately followed by a arch for an antidote or some way to efend against it. Generally we know e antidote before we know whether it practicable to manufacture in quantity new substance. It takes months or-narily from a chemical formula as de-eloped in the laboratory to the pro-uction of that gas in quantity.

No Use in Peace.

Poisonous gases have no peace use and onsequently you find no appliances ready or its manufacture and no approved rocess for such manufacture, and in any ation where there has not been much hemical development the manufacture gas in quantity and quickly is a diffi-lt undertaking. Chemical manufacture dyestuffs involves machinery more early similar to that in gas development han any other form of chemical manu-acturing. To this country the problem manufacturing gas in quantity was a ifficult one. We had all the necessary aw materials, but our lack of general anufacture of chemicals has necessi-ated the development from the ground up of machinery that must be had. However, our people have met the situation and we are actually producing gas in quantity and are actually shipping gas shells abroad.

The experience of this war shows clearly that the nation that does not study during peace times all the war problems, including chemical warfare, is at a disadvantage for the first two or three years of a war.

Offensive and Defensive Divisions.

Our two main divisions are the offensive and defensive divisions—that is, our two main production divisions. The defensive division comprises the manufacture of gas masks, protective suits, dugout blankets, alarm apparatus, etc. The American gas mask is, I am quite sure, better than that produced by any other country, and we are continually improving it. So our people can rest assured that our soldiers in France have at least as good a protection as those of any other nation.

The offensive side of gas warfare involves not only the manufacture of gas and other toxic substances and the filling of shells and other containers with such substances, but it involves the operation of gas troops. The function of the troops is to deliver gas to the enemy in all ways except by high-power artillery; that is, these gas troops carry out the cloud attacks, they operate the projectors or light mortars that throw shells filled with large quantities of gas. In other words, the mobile administering of gas is done by the gas troops.

Two Types in Use.

The two characteristic types of gases in use are mustard gas and phosgene. One is a persistent and the other is a non-persistent gas. All of the armies are using these gases—allies and enemy. There is a strong tendency toward standardization.

Questions and Answers.

Q. There have been repeated reports that your service has evolved a new gas that is very deadly; is it permitted us to refer to that at all?

A. Your question assumes that those reports are true.

Q. Well, I will put it another way. We know you have a branch at work on new gases. Can we state that they have accomplished anything?

A. We have a research laboratory that is continually at work, but we are not manufacturing any such substance as you have described.

Q. Well, there is one more question. Reports early in the week—about Monday—we got an official statement that Lens had been captured. Tuesday the British official statement said that "our troops have reached Lens." On Wednesday we got the explanation that they had passed by Lens but could not enter because the town was simply seeped with gas. Isn't that a new maneuver on the part of the enemy?

A. No; not new; that is, it has been new this year.

Q. Since spring?

A. Since spring. That is, mustard gas. Mustard gas lasts a long time; it takes days to get away, and if an area is soaked with it, it is not safe for troops to go in for several days without their gas masks on, and if they stay in any length of time the stuff will go through the clothing and burn the flesh.

Q. General, there are reports coming from neutral countries, and presumably having their inspiration in Germany, that the Germans have evolved a new gas which in operation will totally destroy the sight of a person. There are two types of this gas. Have we had any official reports of anything of that kind?

A. No. We know all the gases that the Germans have used in the field, and we knew all those substances before. Mustard gas has been known for 25 or 30 years. Of course phosgene is well known. Practically all of these substances have been discovered in the laboratory and have never gone any farther. The "duds," the shells that do not explode, are always picked up. We have a laboratory in France, and of course the other allies have laboratories and we will know within a day or two after any engagement what kind of gas they use.

Q. This is supposed to be a development of the lachrymal gas?

A. Well, some of those lachrymators are very strong.

Q. Could you tell us this, General, the protective operations, we will say, against gas attacks—have they resulted in a decrease in gas casualties recently in spite of increased German use?

A. Oh, yes, yes. Though one of the great advantages of the use of gas is to force the adversary into a gas mask, which reduces his fighting capacity very much. He can not fight so effectively as it reduces his vigor because the resistance to breathing is increased in order to pull the air through the chemicals in the canister of the gas mask. The mask will protect against all gases, especially if you sit down and do not exercise too much.

Meaning of "Antidote."

Q. General, you spoke of antidotes to these gases.

A. Well, possibly the word "antidote" was wrong. That implies an inward application, does it not?

Q. What I had in mind was a preventative to the effect of gas.

A. I mean something that takes the gas out of the air before you breathe it.

Q. Well, we havn't evolved any such antidote for the mustard gas, have we?

A. Oh, yes; the mustard gas does not go through any of the gas masks.

Q. Does it go through the clothing?

A. It will go through the clothes eventually. We will not discuss that question now.

Q. Is the quantity production of masks, etc., sufficient?

A. We are meeting the needs of the Army.

Q. The entire need?

A. Yes.

Q. There has been no shortage?

A. In the beginning a good many of our masks were bought in England, but we are now meeting the demands of the Army for masks, both men and horses.

Q. And you are also supplying them with sufficient gas for offensive?

(Continued on page 14.)

PHYSICAL TESTS FOR AIRMEN ARE NOVEL AND EXCITING

The War Department authorizes the following:

All men who have won their wings in the United States air service are now required to pass a new heart, lung, ear, and eye test to establish their physical and mental fitness when high in the air and particularly to indicate at what heights they are in a condition to fly. Cadets receive a test before they finish their schooling; flyers are given these tests periodically to eliminate any whose physical or mental efficiency has become in any way impaired.

Result of Laboratory Study.

These tests are the result of study and investigation by the Medical Research Laboratory at Hazelhurst field, Mineola, N. Y., whose staff has devised apparatus and determined upon a standard examination for classifying pilots.

To stay in the rarified air at an elevation of 20,000 feet for any length of time has been found to be a strain on even the most physically perfect. It has also been discovered that many of the most seasoned fliers can not undergo the sudden quick changes in altitude occasioned by diving and climbing without physical deterioration. It was recognized as too great a risk to subject these men to actual flying tests. So the medical laboratory at Hazelhurst field undertook to devise some way of getting the same results by means of a ground test.

Changes in Tests.

In the early tests the pilot was placed in a steel airtight cylinder from which the air was gradually exhausted and then replaced, to simulate a flight into the rarified air of high altitudes and back to earth, but to-day the pilot sits comfortably in the same room with his examiners. His nose is clamped so that he can not breathe through it. Over his mouth is placed the breathing apparatus, which is connected by tubes with a tank of measured air, and with instruments that record every breath he takes. The air is analyzed at various stages of the run. As fast as he exhales the air is taken into a reservoir where it is cleared of carbon dioxide, and then returned to the tank. Gradually he uses up the oxygen and thus air conditions of high altitudes are duplicated. The higher one goes up, the rarer the air becomes; just so with the man under test.

Candidate Kept Busy.

The man under test is kept fairly busy, just as he would be piloting a plane. Before him on a table is a bank of small electric lights, one or another of which flashes every 5 seconds. These he must extinguish as fast as he observes them and before they go out. He has but a few seconds. Below the lamps is a corresponding set of buttons which, when touched with a pointer held in the right hand, extinguishes the respective lights. Two observers watch him constantly and check his errors or delayed actions.

Another instrument before him is an ammeter which acts similar to a speed dial on a plane, and, accordingly, in the test must be kept at a constant point.

As time goes on (and the test lasts for about 30 minutes) the pilot becomes a bit groggy or sleepy from lack of oxygen, just as he would at the corresponding altitude, and this condition becomes manifest in changes in the action of his heart, eyes, ears, and brain.

A few minutes after his release from the apparatus all signs of his recent fatigue pass away and he becomes normal again.

DESTROYER PRESENTED TO U. S. NAVY BY PHILIPPINES TO BE NAMED THE JOSE RIZAL IN HONOR OF FILIPINO PATRIOT

The Navy Department authorizes the following:

Secretary Daniels announces that the destroyer donated to the United States Navy by the Philippine Government will be named the *Jose Rizal*, in honor of the noted Filipino patriot. The Philippine Legislature some time go adopted a resolution to tender to the United States Government the funds to provide a destroyer and a submarine as the voluntary contribution of the Philippine Islands to the Navy. The offer was accepted, with a formal expression of appreciation, and a destroyer of the most modern type, now under construction on the Pacific Coast, will be given the name *Jose Rizal*.

Dr. Rizal, who has been termed "the greatest man of the brown race," in his youth won fame as an author and sculptor, writing numerous books and poems, and took an ardent interest in movements for the good of his countrymen. He was educated as a doctor of medicine, and after traveling extensively in Europe and America, practiced his profession in his native islands. He took the part of tenants against grasping landlords and resented the oppression of Spanish governors. Banished for a time from the Philippines, he was later allowed to return. But he had incurred the enmity of the authorities, and in 1896 was arrested on a charge of "carrying on an antireligious and antipatriotic campaign of education," was brought before a military tribunal, denied the right of counsel and ordered to be shot. He was executed December 30, 1896. In the Philippines he is regarded as the "martyr patriot."

Names for Other Destroyers.

Secretary Daniels has selected names for other destroyers as follows:

The *Hogan*, in memory of Daniel Hogan, a seaman, who, after serving on the schooner *Revenge*, won distinction on the U. S. S. *Constitution* in her engagement with the British frigate *Guerriere*. When the *Constitution's* flag was shot away from the fore-topgallant masthead, Hogan climbed up and lashed it in place, in the face of heavy fire. He was severely wounded in the fight between the *Constitution* and the *Java*. He entered the Navy from Boston in 1811, and died in 1818.

The *Stansbury*, in memory of Lieut. John Stansbury, a native of Baltimore, Md., who served as a midshipman with Commodore Decatur in the capture of the *Macedonian* by the frigate *United States*, October 25, 1812; and was serving on the *Ticonderoga* as a lieutenant when he was killed in the battle of Lake Champlain, September 11, 1814.

The *Howard*, in memory of Acting Ensign Charles W. Howard, who was promoted for conspicuous bravery while in charge of the deck of the ironclad *New Ironsides* when that vessel was attacked by the *David* in Charleston Harbor on the night of October 5, 1863. The *David* attempted to blow up the *New Ironsides*. Howard mounted the rail of the ship and ordered the sentries to fire on the approaching *David*, and in this position he received the fire of the enemy and was fatally wounded. He was honored by being appointed acting master after his death.

The *O'Bannon*, in memory of First Lieut. Presley M. O'Bannon, United States Marine Corps, who in the war with Tripoli led a detachment of marines on a 600-mile march from Alexandria, Egypt, to Derne, arriving April 26, 1805. After the fortifications had been shelled by the *Hornet*, *Nautilus*, and *Argus* on April 27, they were stormed by marines under Lieut. O'Bannon; the Tripolitan ensign was hauled down and for the first time the United States flag was hoisted over a fortress of the Old World.

The *Renshaw*, in memory of Commander William B. Renshaw, who in the battle in Galveston Harbor, January 1, 1863, refused to surrender his ship to the Confederate forces, set fire to the vessel to prevent her falling into their hands, and was killed in the explosion which followed. Commander Renshaw was a native of Brooklyn, N. Y., born October 11, 1816. He was appointed midshipman in 1831, and in the Mexican War took part in operations on the Pacific coast. In the Civil War he was commended by Admiral Farragut for "the handsome manner in which he managed his vessel," the *Westfield*, in operations with the mortar fleet below New Orleans and on the Mississippi River, in 1862.

USES OF POISON GAS IN WAR

(Continued from page 13.)

A. Well, I don't know; that word "sufficient" is a pretty hard word to define.

Q. There is one more statement. The other day there were commissions given to quite a number of athletes, baseball players, Ty Cobb and Christy Matthewson, Branch Rickey and Haughton, I believe, of Boston. Can you say what specific duty those men are to perform, or is that a tabooed subject?

A. Our troops are not chemists—that is, the gas troops are not chemists and the officers that go with the divisions teach the men how to use the gas mask and stay with them through the engagements. These officers are not chemists and it is for work of that kind that these men were taken. They were not taken because they are baseball players; we simply want to get strong, robust fellows that have good average common sense and these men wanted to come in and we took them. They will go over in the gas troops as gas officers.

Act Amending War Risk Insurance Act by the Addition of a New Section Relating to Ships of Foreign Flags

[PUBLIC—No. 195—65TH CONGRESS.]

[H. R. 11048.]

AN ACT To amend the war-risk insurance Act.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the war-risk insurance Act is hereby amended by adding to such Act a new section, to be known as section two b, to read as follows:

"SEC. 2b. That when it appears to the Secretary of the Treasury that vessels of foreign friendly flags, or their masters, officers, or crews, or shippers or importers in such vessels, are unable in any trade to secure adequate war-risk insurance on reasonable terms, the Bureau of War Risk Insurance, with the approval of the Secretary, is hereby authorized to make provisions for the insurance by the United States of (1) such vessels of foreign friendly flags, their freight and passage moneys, and personal effects of the masters, officers, and crews thereof against the risks of war when such vessels are chartered or operated by the United States Shipping Board or its agent, or chartered by any person a citizen of the United States, and (2) the cargoes to be shipped in such vessels of foreign friendly flags, whether or not they are so chartered. Such insurance on the vessel, however, is authorized only when the United States Shipping Board or its agent operates the vessel or the charterers are, by the terms of the charter party or contract with the vessel owners, required to assume the war risk or provide insurance protecting the vessel owners against war risk during the term of the charter or hire of the vessel.

"The Bureau of War Risk Insurance, with the approval of the Secretary of the Treasury, is also hereby authorized to insure the masters, officers, and crews of vessels operated or chartered as aforesaid against the loss of life or personal injury by the risk of war and for compensation during the detention following capture by enemies of the United States, whenever it appears to the Secretary that the owners, operators, or charterers of such vessels are unable, in any trade, to secure such insurance on reasonable terms."

SEC. 2. That section five of the war-risk insurance Act is hereby amended to read as follows:

"SEC. 5. That the Secretary of the Treasury is authorized to establish an advisory board, to consist of three members skilled in the practices of war-risk insurance, for the purpose of assisting the Bureau of War Risk Insurance in fixing rates of premium and in adjustment of claims for losses, and generally in carrying out the purposes of this Act; the compensation of the members of said board to be determined by the Secretary of the Treasury, but not to exceed $20 a day each while actually employed. He is likewise authorized to appoint two persons skilled in the practice of accident insurance for the purpose of assisting the Bureau of War Risk Insurance in the adjustment of claims for death, personal injury, or detention; the compensation of persons so appointed to be determined by the Secretary of the Treasury, but not to exceed $20 a day each while actually employed. In the event of disagreement as to the claim for losses, or amount thereof, between the said bureau and the parties to such contract of insurance, an action on the claim may be brought against the United States in the district court of the United States, sitting in admiralty, in the district in which the claimant or his agents may reside. The Secretary of the Treasury is, in his judgment, authorized to compromise the claim either before or after the institution of an action therein."

SEC. 3. That section nine of the war-risk insurance act is hereby amended to read as follows:

"SEC. 9. That the President is authorized, whenever in his judgment the necessity of further war insurance by the United States shall have ceased to exist to suspend the operation of this act, in so far as the Division of Marine and Seamen's Insurance is concerned, which suspension shall be made in any event within six months after the end of the war, but shall not affect any insurance outstanding at the time or any claims pending adjustment. For the purpose of the final adjustment of any such outstanding insurance or claims, the Division of Marine and Seamen's Insurance may, in the discretion of the President, be continued in existence for a period not exceeding three years after such suspension.

"The words 'end of the war' as used herein shall be deemed to mean the date of proclamation of exchange of ratification of the treaty of peace, unless the President shall, by proclamation, declare a prior date, in which case the date so proclaimed shall be deemed to be the 'end of the war' within the meaning of this act."

Approved, July 11, 1918.

Red Cross to Establish Dairy Plant in France

Fresh milk will be supplied to 20,000 sick and wounded soldiers in France by 1,000 cows which the French Government has agreed to loan to the American Red Cross, according to an announcement just issued by the Red Cross. With these cows the Red Cross will establish a model experimental dairy plant at the largest American Army hospital in France, $5,000 having been set aside for the inauguration of the plant. As the dairy will be operated by convalescent soldiers, the cost of maintenance will be comparatively small. It is pointed out, however, that cost is not important, as fresh, pure milk is absolutely essential in the proper diet of the cases at the hospitals.

13,347 Red Cross Nurses Now in Active Service; Campaign On to Enroll 8,000 More By October 1

In actual number of nurses enrolled with the Red Cross since the United States entered the war the States of New York, New Jersey, and Connecticut led on August 1, according to a statement just issued from American Red Cross headquarters. These three States have assigned to war duty 2,600 nurses, or 45 per cent of their allotment of 5,708 nurses, by January. To supply their full quota of 27,000 nurses, which the Red Cross is endeavoring to recruit by the end of the year, these three States in the next four and a half months must enroll 3,108 additional graduates of recognized training schools for nurses.

The total number of war nurses assigned by the Red Cross to war service from the time the United States entered the war until August 1 was 13,347. The Red Cross is conducting intensive nurse recruiting campaigns throughout the United States to secure for Surg. Gen. Gorgas 8,000 additional nurses by the 1st of October and the remainder of the 27,000 before the New Year.

The allotment is as follows:

Red Cross division.	Allotment of nurses to be secured by Jan. 1, 1919.	Assignment of nurses reported up to Aug. 1, 1918.	Allotment still due.	Percentage of quota obtained Aug. 1, 1918.
Atlantic (New York, Connecticut, New Jersey)	5,708	2,600	3,108	45
Central (Illinois, Wisconsin, Louisiana, Nebraska, Michigan)	3,940	2,311	1,629	58
Gulf (Louisiana, Mississippi, Alabama)	864	324	540	37
Lake (Indiana, Ohio, Kentucky)	2,748	1,205	1,543	43
Mountain (Utah, Colorado, Wyoming, New Mexico)	264	221	43	83
New England (Maine, New Hampshire, Vermont, Massachusetts)	3,318	1,360	1,958	41

RED CROSS HOME SERVICE

Information for Soldiers' and Sailors' Families, Issued by Department of Civilian Relief.

Exemption Section, War-Risk Insurance Bureau.

The circumstances under which a soldier or sailor may be "exempted" from supporting a woman who is, or claims to be, his wife are set forth in an explanation recently issued by the Bureau of War-Risk Insurance. It gives the procedure of the exemption section of the bureau when an enlisted man requests that he be excused from making the compulsory allotment.

History of Exemption Section.

The exemption section was first started about February 1, 1918. Exemption cases were, prior to that time, put to one side and received no attention. No machinery had been devised, or substantive rules prepared, for the determination of these cases.

When consideration was first given to these cases the first point decided was that cases should be handled by the legal division of the bureau, by attorneys skilled in passing on controverted questions of fact. The second point decided was that the legal division should endeavor to create what would be in effect "courts of domestic relations"; that notices should be served on the interested parties, calling upon them to submit evidence. These notices now include notices to local public officials for a report on the merits of the man's claim. The evidence, therefore, is secured both from interested parties and those presumably disinterested.

Substantive Rules Governing Exemption Decisions.

The substantive rules which govern the determination of the case have been worked out through experience; they are, broadly, case-made rules. In the main, they have been built around this one proposition—that the act contemplates the provision of support to families of men who have been deprived of support by reason of the men's entry into the service; i e., by the removal of the breadwinner. It seeks to uphold the morale of the men who would not make good soldiers if they felt that their families were not receiving the support which they had been furnishing them before they became soldiers, and to uphold the morale of such families during the men's absence from home. Where, however, a man and his wife were separated prior to his entry into the service, and while he remained in civil life she made no effort to compel the man to support her, and apparently fully acquiesced in the situation then existing, there is no reason why that situation should be changed just because the man has been taken from civil life and put into the military service.

The rules, therefore, as they have been worked out, are perhaps more liberal to the man, so far as his wife is concerned, than is the law of domestic relations as applied by the civil courts; but the rules as they apply to children compel the man to perform the same obligations which he might have been compelled to perform had he remained in civil life.

Where the exemption rules follow the law of domestic relations as applied by civil courts, these rules are based on the law prevailing in the majority of the States; that is, instead of 48 different rules, as each State may have worked out the law of domestic relations, there is one rule based on the majority as prevailing holding, which is followed even though the rules in the particular jurisdiction may be different.

Procedure in Exemption Cases.

An exemption case goes through the following stages: A man makes out his claim in camp; his claim is forwarded with the allotment blanks of others not claiming exemption to the allotment and allowance section of the bureau. There the cases are separated. Exemption cases are sent to the exemption section. There they are carded, filed, and first notices sent out. Thirty days thereafter they are sent to the board for hearing. After a finding is made they are reviewed by the appellate board. They are then sent to the commissioner of the bureau for his approval, and next they are sent for an award to be made in accordance with the finding, and for notices of the findings to be mailed to the interested parties.

The usual case will go through this mill in approximately two months' time; the unusual case will take from two to six months' time. The unusual cases are, roughly, as follows:

(1) A man gives the address of his wife as unknown. A very thorough investigation is made to locate the wife.

(2) A man's claim for exemption is not adequately or clearly set forth in camp; as a consequence, when his papers are received by the bureau his claim may not be forwarded immediately to the exemption section, but may be held for a considerable period by the allotment and allowance section along with the ordinary cases.

(3) A wife in preparing her answer may fail to meet the charges of the man within the time prescribed; namely, 30 days. Consequently, her rights, if any, must be determined upon rehearing after the original finding is made.

(4) "None" cases. A woman will write to the bureau that she is the wife of John Jones. Then it becomes necessary to determine which John Jones, of the thousand that may be in the Army, is the husband of this woman. Each of the dozen or so John Jones who apparently meet her description has stated on his allotment blank that he has no wife, i. e., has written the word "None" in the place for the wife's name. Very careful investigation must be made to determine which one of these various John Jones is the husband of this woman. A mistake can easily occur whereby a man would be compelled to support a woman who is not his wife. Some months may elapse from the time the woman first applies for an allowance until a finding is made adjudicating one of the John Jones as the husband and directing him to contribute to her support.

(5) Many women—and other parties—corresponded with fail to use the official envelopes inclosed for their use, which envelopes are directed to the exemption section; on the contrary, they will use their own envelopes and simply address the same to the "Bureau of War-Risk Insurance." As a consequence, their replies are scattered throughout the bureau and are not attached to the cases. Too much emphasis can not be placed on this point.

A claim for exemption is normally made by the enlisted man when he first fills out his 1–B. He may, however, file such claim subsequently through his commanding officer, or the insurance officer at the camp. It is also possible for him to make such claim by letter to the exemption section of the Bureau of War-Risk Insurance, but this latter method is not nearly so desirable as the method above suggested. The exemption section states that they "will consider" an application for exemption from compulsory allotment filed by any person on behalf of the enlisted man. Of course, they will inquire into the case very carefully, and hence all available evidence should be submitted to them, together with the man's full name, organization, when and where he enlisted, and serial and allotment numbers, if known.

The Red Cross will not undertake to investigate an exemption claim, either for the purpose of confirming the claim of the enlisted man or for the purpose of helping the wife to rebut such claim. The Red Cross can not render any real service by transmitting the papers of either party. These papers should be sent directly by the party in question to the exemption section of the Bureau of War-Risk Insurance.

It should be borne in mind that a finding in an exemption case approved by the Commissioner of the Bureau of War-Risk Insurance is not final, but that the exemption section may reopen the case upon the presentation of new facts by the party against whom the finding was made. It quite frequently happens that a wife makes inquiry through Red Cross channels as to her allotment and allowance and learns that her husband has claimed exemption, and that exemption has been granted, although she has previously heard nothing about his claim. Such a situation results from the enlisted man's declaration that he does not know the present address of his wife, and the inability of the exemption section to locate her after thorough inquiry. If the wife, under such circumstances, feels that the exemption is unjustified, she should prepare her case in the form of affidavits by herself and supporting witnesses, and send them to the exemption section of the Bureau of War-Risk Insurance, with the request that the case be reopened.

Digest of Opinions Recently Rendered by Judge Advocate General of the Army

Training Camps—Funeral Expenses.

A civilian died while in attendance at a training camp as a candidate for a commission in the Army of the United States. Apparently the body was shipped home by the Government. *Held*, that there is no legal authority for the reimbursement by the Government of the funeral expenses incurred by the family of the deceased. The regulations covering the enlistment of civilians for service in civilian training camps (Spec. Reg. 49, 1917) contain no provision for payment of burial expenses of any candidate who may die while under such enlistment. Nor are such civilian candidates on the "Army active list," as that term is employed in the provisions contained in the sundry civil appropriation act (40 Stat., 130) for the payment of funeral expenses of officers and enlisted men on the Army active list and the reimbursement of individuals who have borne such expenses. (Ops. J. A. G. 157, Mar. 26, 1918.)

Expeditionary Forces—Claims.

Claims for compensation for damages arising from the operations of the American Expeditionary Forces in France, where not recognized by American law—e. g., claims for damages resulting from the torts or criminal acts of officers or soldiers of the Army of the United States—should be presented for the authorization of their payment by Congress only where such claims fall within the classes of claims which would be payable under the French law. (Ops. J. A. G. 336, Mar. 11, 1918.)

Right to Modify Contract.

A contract between the Government and the city of Southport, N. C., for the supply of water at Fort Caswell, which was entered into June 14, 1917, and which will probably be terminated in April, 1918, by reason of the completion of the Government water supply system, can not legally be modified so as to provide for payment by the Government for such water at a much higher rate per gallon than provided for in said contract, merely because such contract has proved to be more burdensome on the city than was contemplated, owing to the fact that the consumption of water by the Government, although fully provided for by the contract, was more than five times as great as was in fact anticipated when the contract was made, largely as a result of leakage from the Government water main.

(Ops. J. A. G. 671, Mar. 30, 1918.)

Certificates of Discharge.

If an enlisted man to be discharged at a base hospital on surgeon's certificate of disability, pursuant to A. R. 147, is a member of the Medical Department, the commander of the base hospital, if a field officer, should sign the certificate of discharge. If the commander of the base hospital is not a field officer, then the camp commander is the proper officer to sign the discharge or he may designate a particular field officer to perform this duty. In all cases in which the man to be discharged is not a member of the Medical Department, the discharge should be signed by the camp commander or a field officer designated by him, unless a field officer of the soldier's regiment or corps be present. (Ops. J. A. G. 220.8, Mar. 21, 1918.)

Charging Offense Under Wrong Article.

A specification, laid under the eightieth article of war, alleged an attempt by one soldier to sell to another soldier certain sugar, the property of a certain railroad company, which the accused had taken from third parties. Held, That A. W. 80 is limited in its operation to the wrongful purchase, sale, or disposal of captured or abandoned property, and is not applicable to the facts stated in the specification. Hence an offense is not charged under A. W. 80, and the findings and sentence are invalid and should be disapproved, unless an offense under another article be properly shown. (Ops. J. A. G. 250.4, Mar. 16, 1918.)

Court-Martial Erroneously Convened.

A camp commander as such has no authority to appoint a general court-martial (A. W. 8). If such camp commander be also the commander of a tactical division he has such authority in his capacity as division commander (A. W. 8). When, however, such commander in his capacity as camp commander has issued orders appointing a general court-martial, such appointment and all action taken thereunder are void. They can not be validated by new orders issued out of division headquarters and purporting to correct the orders made by the camp commander appointing such court-martial, since it is not permissible under the guise of correcting a record, so as to make it correspond to fact, to substitute one official act for another, or to eliminate from the record an order made, or record of an official act performed, by one officer in a particular capacity and substitute in its place the official action of the same or another officer in a different capacity. Consequently, the proceedings in the several cases tried by the general court-martial appointed by the camp commander should be set aside as void and the cases referred for trial to courts properly appointed by the commanding general of the division in question. The division commander should detail as members of general courts-martial officers of his command as division commander. He has general court-martial jurisdiction over the members of the division and all other persons and units attached to or serving with the division; and all persons subject to military law in the camp in which the division is located are administratively construed to be attached to the division for general court-martial purposes. Charges against all such persons subject to military law may properly be referred by the division commander for trial to general courts-martial appointed by him. (Ops. J. A. G. 250.4, Mar. 22, 1918.)

Court-Martial Reporter.

A civilian per diem employee at a Signal Corps school, who was rated as a laborer but was used as a stenographer at post headquarters, rendered services as a court-martial reporter. *Held*, That he is entitled to the extra compensation prescribed for such services by M. C. M., paragraph 113, provided the duties of his regular position were distinct from and did not include such court-martial reporting, and provided his services as court-martial reporter, including the transcribing of his notes, did not interfere with such regular duties and were not performed during regular office hours. (Ops. J. A. G. 158, Mar. 14, 1918.)

Competency of Wife as Witness.

Letters sent through the mails by husband to wife, persuading her to come from one State to another to engage in prostitution, are admissible in evidence upon trial of the husband upon charges against him based on the violation of the white-slave act. An exception is made to the general rule that communications between husband and wife are privileged in the case where one spouse is called as a witness to testify to a personal wrong or injury sustained from the other. Such personal injury is not confined to acts of personal violence, but may be a tort against the wife, or a serious moral wrong inflicted upon her, including the precise case under consideration. (Cohen *v.* United States, 214 Fed. 23, 29.) Communications which were obscene, lewd, or lascivious within the meaning of R. S. 3893, as amended by the act of September 28, 1888 (25 Stat. 496), sent through the mails by husband to wife, may be used in evidence to support a charge of violation of this statute, notwithstanding they were communications between husband and wife. (United States *v.* Musgrave, 160 Fed. 700.) (Ops. J. A. G. 250.4, Mar. 21, 1918.)

Trial and Conviction by Summary Court.

A soldier was tried before a summary court, found guilty of the several offenses charged and sentenced, upon specifications laid under several of the Articles of War. One of the offenses so specified willful disobedience of the order of a superior officer—was erroneously laid under the sixty-third article; it should have been laid under the sixty-fourth article, and, being a capital offense, was not triable before a summary court. Held, (1) as to the other offenses, since the court had jurisdiction to try such offenses, the proceedings are not void; (2) since the sentence imposed included punishment for an offense not within the jurisdiction of the court, proper mitigation of the sentence imposed should be made by the reviewing authority (as in the case where a reviewing authority has disapproved the findings as to one or more of several charges and specifications of which an accused has been found guilty); (3) the offense of willful disobedience of the orders of a superior officer not being within the jurisdiction of the summary court, the proceedings and sentence of the court thereon are void and constitute no bar to a prosecution before a court having jurisdiction. (Ops. J. A. G. 250.4, Mar. 30, 1918.)

Health Conditions at Army Camps Within the United States as Reported to the Surgeon General for Week Ending Sept. 13

The War Department authorizes the following:

Herewith is a detailed report on the health conditions of troops in the United States (including Porto Rico) for the week ending September 13. The report of the division of sanitation to the Surgeon General of the Army for that week is as follows:

1. General.—The admission rate for disease (1,007) is slightly higher than last week (960), due entirely to the higher incidence of venereal diseases. The noneffective rate (35.1) shows a reduction as compared with last week (36.4). The death rate for disease (2.37) continues low. Extensive epidemics of influenza have been reported from Camps Devens, Upton, Dix, and Lee within the last few days. The disease may be expected to appear in other camps soon, and sick rates will undoubtedly show an increase in later reports. The outbreak of the disease occurred subsequent to the period covered by this report and the sick rates in this report have not been affected.

Summary.

Troops.	Noneffective rate.		Weekly admission rate for disease.		Death rate.			
					All causes.		Disease only.	
	This week.	Last week.	This week.	Last week.	This week.	Last week.	This week.	Last week.
Divisional camps	40.3	43.3	20.6	19.8	3.0	4.6	2.4	3.9
Cantonments	36.7	36.9	23.6	21.1	2.6	2.3	2.4	2.1
Departmental, etc	30.7	31.3	14.9	13.1	4.5	3.6	2.2	2.6

New Cases of Special Diseases.

The number of new cases of special diseases reported follows:

	This week.	Last week.
Pneumonia	332	333
Measles	697	603
Meningitis	12	14
Dysentery	27	26
Malaria	208	149
Venereal	10,481	9,211

2. Divisional camps.—There were 70 new cases of pneumonia reported from all camps of this group as compared with 116 last week. Of this number, Camp Wheeler reports 13, Camp Shelby 12, and Camp Beauregard 10. Camp Shelby reports 71 new cases of measles, Camp Sheridan 40, Camp McClellan 34, out of a total of 198 new cases for all camps of this group. A few cases of malaria are reported from Camps Eustis, Beauregard, and Sevier, but the number is exceedingly small considering the location of many of the camps and the season of the year.

Lowest Admission Rates.

3. Cantonments.—Camp Grant reports the lowest admission rate (389), and Camp Custer the lowest noneffective rate (8) of all camps of this group. Camp Devens leads all cantonments in the number of new cases of pneumonia with 57 out of a total of 184 for all cantonments. Other camps next in order with the number of new cases are Camp Taylor (25), Camp Gordon (15), Camp Lewis (13), and Camp Humphreys (12). A few cases of measles are reported from all cantonments with the exception of Camps Custer and Travis. Camp Gordon leads in the number of new cases with 81, Camp Funston is second with 61, and Camp Dodge next in order with 30, out of a total of 559 new cases from all camps of this group. Twenty new cases of malaria are reported from Camp Pike out of a total of 76 from all camps of this group.

4. Departmental and Other Troops.—The lowest sick and death rates are reported from stations of this group. The Port of Embarkation, Hoboken, N. J., reports 114 new cases of measles out of a total of 158 cases from all stations of this group. The Port of Embarkation, Newport News, Va., is credited with 25 new cases of pneumonia, and the Southeastern Department with 31, out of a total of 78 from all stations of this group.

Health conditions for the week ending September 1.

[1] First figure in this column for each camp gives the total number of new cases during the week; the figure in parenthesis is the number of those cases which were contracted during the week by men in that camp's command at the time of contracting the disease, the difference, therefore, is the number of cases first reported during the week which were either (a) cases brought from civilian life by recruits, or (b) cases brought by men transferred from other camps to the camp under which the case is reported, or (c) old cases which have previously evaded detection. An interrogation point signifies that the report from that camp did not segregate cases contracted at the camp from other cases.

Note.—New cases of typhoid fever were reported from following camps: Beauregard, 1; Cody, 1; Fremont, 1; McClellan, 1; Sheridan, 1; Gordon, 1; Las Casas, 2; Pike, 8; Travis, 1; Upton, 1; Northeastern Department, 1; Central Department, 1; Newport News, 1; and Fort Logan, 1.

Causes of deaths by camps.

Camp or department.	No. of deaths.	Causes.
Hancock	2	Anthrax, 1; meningitis, 1.
Kearny	1	Injury, 1.
Logan	2	Aortitis, 1; strangulation, 1.
MacArthur	1	Nephritis, 1.
McClellan	2	Pneumonia, 1; traumatism, 1.
Shelby	4	Pneumonia, 4.
Sheridan	1	Pneumonia, 1.
Syracuse	1	Typhoid fever, 1.
Wadsworth	1	Pneumonia, 1.
Wheeler	6	Pneumonia, 2; traumatism, 1; nephritis, 1; appendicitis, 1; gastric ulcer, 1.
Custer	2	Septicemia, 1; appendicitis, 1..
Devens	7	Pneumonia, 7.
Dix	1	Empyema, 1.
Dodge	3	Pneumonia, 1; uratoma, 1; anthrax, 1.
Funston	2	Appendicitis, 1; gunshot wound, 1.
Gordon	1	Cause not reported, 1.

Soldiers Who Died Last Week.

List of names of soldiers (not members of the American Expeditionary Forces) reported to The Adjutant General's Office as having died during the week ending September 13, 1918. (Included in this list are the names of soldiers (not members of the American Expeditionary Forces) not previously published, who died prior to the week mentioned and subsequently to March 8, 1918. These names are indicated by an asterisk.)

Camp Alfred Vail, N. J.—Chauffeur (first class) Charles F. Rex, Rumson, N. J.*

Camp Baker, Tex.—Pvt. Theodore W. Backes, 462 Bank Street, Newark, N. J.

Camp Custer, Mich.—Pvt. Steve Dudginski, 320 Lakeland, Laurium, Mich.

Camp Devens, Mass.—Pvt. Harris Haywood, Cokesberry, Fla.; Pvt. Florien Longtin, 7 Cumberland Street, Brunswick, Me.; Pvt. Joseph F. Murphy, 8½ Herbert Street, Salem, Mass.; Pvt. John H. Thompson, 35 Ellsworth Avenue, Trenton, N. J.

Camp Dix, N. J.—Pvt. John Griffin, Miami, Fla.*

Camp Dodge, Iowa.—Pvt. William T. Lee, Griffithville, Ark.; Recruit Anthony Yates, 988 Seminary Street, Arvay, Ind.

Camp Eustis, Va.—Pvt. (first class) Horace C. Barragar, 4208 Viola Street, Los Angeles, Cal.*

Camp Fremont, Cal.—Pvt. Archie R. Gibbens, R. F. D. No. 2, Woodburn, Oreg.;* Pvt. James L. Murphy, Fargo, Okla.;* Sergt. Carl Zimmerman, 924 Troost Avenue, Forest Park, Ill.*

Camp Gordon, Ga.—Pvt. Tom Curry, Alcovie, Ga.*

Camp Grant, Ill.—Pvt. John Herman Damerow, box 203, Atwater, Minn.; Pvt. Emery Ferguson, Pawpaw, Ill.; Q. M. Sergt. Lloyd L. Horton, Lime Springs, Iowa.;* Pvt. Amos Weatherspoon, general delivery, Castleberry, Ala.*

Camp Hancock, Ga.—Pvt. Frank Teske, 546 Erin Street, Eau Claire, Wis.;* Pvt. Eugene Tuggle, Starville, Ga.

Camp Jackson, S. C.—Pvt. James Mabry, 302 Proctor Street, Durham, N. C.; Pvt. Michael Skrutke, 50 Payne Street, Kingston, Pa.

Camp Johnston, Fla.—Pvt. Reese Matthew, Crawford, Ga.; Pvt. James Richardson, Lake Helen, Fla.

Camp Lee, Va.—Pvt. Morris M. Robinson, Lilian, Va.*

Camp Lewis, Wash.—Pvt. Henry J. Berman, Carthage, Ohio.

Camp Logan, Tex.—Sergt. (first class) Arthur Palmer, 1415 Avenue E, Galveston, Tex.*

Camp McArthur, Tex.—Pvt. Arthur Lawrence Collins, Victor, Colo.*

Camp McClellan, Ala.—Pvt. Max Drucker, 1326 Southern Boulevard, New York, N. Y.

Camp Meade, Md.—Pvt. Wayman Cook, R. F. D. No. 2, box 58, Queenstown, Md.; Pvt. Alden L. Haller, Andrews, Ind.*

Delivery of Letters With Allotment Checks

OFFICE OF THE FIRST ASSISTANT POSTMASTER GENERAL,
Washington, August 29, 1918.

Postmasters will note that allotment and allowance checks mailed from the Bureau of War-Risk Insurance now bear the following indorsement:

"Postmaster: This letter must be delivered to addressee through regular channels. If addressee has moved or died, return to sender with statement of facts."

The word "moved" in this indorsement does not preclude delivery in case of a change of street address in the same city, nor in case of a temporary absence from the delivery of the post office of address. In every instance of permanent removal from the delivery of the office of address, the letter should be indorsed "removed," with the new address if known and returned, under additional cover, to the Bureau of War-Risk Insurance.

In the event of death of the addressee, the letter should be indorsed "deceased," with date of death, if known, and returned without additional cover.

J. C. KOONS,
First Assistant Postmaster General.

LIST OF CASUALTIES REPORTED AMONG THE UNITED STATES FORCES OVERSEAS

CASUALTIES REPORTED BY GEN. PERSHING

SECTION NO 1, SEPTEMBER 21, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	23
Missing in action	51
Wounded severely	49
Died of wounds	6
Died of disease	5
Wounded slightly	1
Total	135

Killed in Action.

Lieut. Albert Harvey Bell, jr. Albert H. Bell, sr., 423 South Main Street, Greensburg, Pa.

Lieut. Lindsey F. Campbell. Mrs. John R. Campbell, 85 West Hancock Avenue, Detroit, Mich.

Sergt. Fred L. Johnson. E. L. Johnson, R. F. D. No. 4, Farmington, Me.

Corpl. Harry C. Frey. Mrs. Sara L. Frey, 155 Audubon Avenue, New York, N. Y.

Corpl. William A. Leonard. Mrs. John J. Leonard, 36 Boerum Avenue, Flushing, N. Y.

Corpl. George M. Lightner. Nathan Lightner, 1134 North Duke Street, York, Pa.

Corpl. Paul T. Loescher. A. F. Loescher, 41 Maplewood Avenue, West Hartford, Conn.

Corpl. George E. Marshall. Mrs. L. Marshall, 2016 Hope Avenue, Hannibal, Mo.

Mechanic John H. McConville. Michael McConville, 718 Westchester Avenue, New York, N. Y.

Wagoner James A. Love. James E. Love, R. F. D. No. 1, Lowryville, S. C.

PRIVATES.

James Benjamin Allen. Mrs. Julia Allen, 428 Lee Street, Spokane, Wash.

Charles L. Ayers. Mrs. Nellie B. Ayers, 1015 Twenty-fourth Street, Parkersburg, W. Va.

Bob C. Bentley. Mrs. Mandy Bentley, Fitzgerald, Ga.

August Bigler. Mrs. Mary Bigler, 56 Second Avenue, College Point, N. Y.

Joseph A. Bongord. Mrs. Veronica Bongord, 183 Gay Street, Philadelphia, Pa.

Thomas Brady. Mrs. K. Lamont, Hotel Biltmore, Sacramento, Cal.

James Brown. C. Smith, Palace Hotel, Sand Point, Idaho.

Joseph Burnell. Frank Burnell, 1109 Manhattan Avenue, Brooklyn, N. Y.

Patrick J. Coyne. Mrs. Winnie Coyne, 76 Market Street, Lawrence, Mass.

Roy Crader. Isaac Crader, Craig, Colo.

Nicola DeFelice. Frank DeFelice, Rodegaresarico Foggia, Italy.

Albert W. DeWitt. J. D. DeWitt, Moore, Mont.

James P. Donovan. Patrick Donovan, 167 Fairview Avenue, New Brighton, Staten Island, N. Y.

Died of Wounds.

Lieut. Harvey C. Ringer. Fletcher C. Ringer, R. F. D. No. 5, box 9, Paola, Kans.

PRIVATES.

Joseph J. Bernat. Mrs. Anna Bernat, 98 North Ninth Street, Brooklyn, N. Y.

Leslie E. Bradbury. George O. Bradbury, R. F. D. No. 6, Auburn, Me.

Richard Fleming. Mrs. Margaret Fleming, Brumahan, County Cork, Ireland.

John Fuchs. Frank Fuchs, Tomah, Wis.

Stanley Hill. W. C. Hill, 145 Milk Street, Boston, Mass.

Died of Disease.

PRIVATES.

Frank Allen Cast. John W. Cast, Clarksville, Ohio.

Joe Johnson. Mrs. Ellen Johnson, Georgetown, S. C.

David A. Margetts. David Margetts, 533 South Second west, Salt Lake City, Utah.

Jim Mason. Mrs. Mary Mason, Abilene, Tex.

Louis Henry Simonsen. Niels Simonsen, Svenson, Oreg.

Harold T. Emmons. Frank Emmons, R. F. D. No. 59, Buffalo, Ill.

Charles Murray. Daniel Murray, 391 Western Avenue, Albany, N. Y.

Burtnette Price Long. Mrs. Sarah Ann Long, 408 Forster Street, Harrisburg, Pa.

Mechanic Lawrence J. Rizzo. Mrs. Charles Rizzo, 284 First Street, Brooklyn, N. Y.

Henry Crosby. Mrs. Jessie Crosby, 24 Thompson Street, Fort Trumbull Beach, Conn.

Alvin P. Duncan. Joe Bennet, Smithville, Miss.

Saul Epstein. Louis Zicofsky, 181 First Street, Elizabeth, N. J.

Willis O. Finnell. Mrs. J. E. Finnell, Latah, Wash.

Thomas Goss. Mrs. Lizzie Downey, 1617 Blue Rock Street, Cincinnati, Ohio.

Collin L. Hadley. Henry B. Hadley, Newport, N. H.

Ira J. Haumeser. Mrs. Katherine Haumeser, Battleground, Wash.

Lawrence E. Heiden. C. F. Heiden, Merrill, Iowa.

Karl W. Holton. S. K. Holton, 1912 Work Street, Vancouver, British Columbia, Canada.

Stanley Kasprazak. Jacob Kasprazak, 860 Milwaukee Street, Milwaukee, Wis.

Fred Kemmler. Mrs. Elizabeth Kemmler, 1232 West Seventy-seventh Street, Erie, Pa.

Andrew Frew. Mrs. Anna Frew, R. F. D. No. 4, box 4, Punxutawney, Pa.

Albert C. Geoffrion. Albert Geoffrion, 497 Chicopel Street, Williamansette, Mass.

Harlan Gohean. Mrs. Jennie Gohean, Anselma, Pa.

Alfred H. Hansen. A. M. Hansen, 446 Center Street, Waupaca, Wis.

James Harrington. Mrs. Elizabeth Harrington, R. F. D. No. 2, Phoenixville, Pa.

George Stanley Hines. George Hines, Slippery Rock, Pa.

Walter F. Hollenback. Mrs. Hannah Hollenback. R. F. D. No. 4, Avoca, Pa.

Lionel L. Hollis. Mrs. Mary A. Hollis, 9 Clinton Avenue, Brockton, Mass.

Albert E. Hoyt. Mrs. Katherine M. Hoyt, 110 North Beatty Street, Pittsburgh, Pa.

John A. Hundley. Mrs. Mamie Hundley, Hinze Street, Hilton, N. Y.

Charles Keller Hunter. Mrs. Annie Hunter, 326 Mifflin Street, Reading, Pa.

Robert Preston Johnston. Ferdinand Johnston, Berkeley Springs, W. Va.

Valentine N. Kessell. Mrs. C. P. Kessell, 91 Java Street, Brooklyn, N. Y.

Theodore Teddy Krolczyk. Mrs. Josephine Krolczyk, 222 Twelfth Street, Manistee, Mich.

Eugene Kurschinski. Mrs. Omer Scott, R. F. D. No. 1, Boyne City, Mich.

Louis J. McCollum. Mrs. A. McCollum, 209 West Breckinridge Street, Louisville, Ky.

Calvin I. Maxfield. Mrs. Ellen Peterson, 506 Jackson Street, St. Paul, Minn.

Antone Mello. Antinio Jacinto De Mello, 38 Hollyhock Street, Bedford, Mass.

Arthur Tripp Morehead. Mrs. Lottie Morehead, care of Charles W. Morehead, Ford Motor Co., Highland Park, Mich.

William Murray. Mrs. Christina Murray, 4 Prospect Street, Pittsburgh, Pa.

Lewis W. Nuss. Mrs. Harry Minerva Nuss, 510 West Airy Street, Norristown, Pa.

Frank Edward Plumridge. James Plumridge, 1340 Asylum Avenue, Hartford, Conn.

John Reisenauer. Alexander Reisenauer, Dickinson, N. Dak.

Golden Riley. Mrs. Ella Riley, Clermont, Ky.

William Harry Roach. Mrs. Nellie Melosh, East Jordan, Mich.

August Sadowsky. Caroline Sadowsky, 142 Hendricks Avenue, New Brighton, N. Y.

Jim Sidaris. Miss Mary Sidaris, Vellia Magari[illegible], Greece.

August Steinmetz. Mrs. Emma Steinmetz, 656 Carr Street, Cincinnati, Ohio.

Ralph Newton Stewart. James Garfield Stewart, R. F. D. No. 3, box 20, Monroe, Mich.

James E. Trayner. James J. Trayner, 20 Woodbine Street, Somerville, Mass.

Charles Webb. Mrs. Ethel Webb, R. F. D. No. 2, Middleton, Tenn.

Wounded Slightly.

Pvt. David R. Gwynn. William G. Gwynn, 108 West Grace Street, Old Forge, Pa.

Missing in Action.

Capt. Arthur Allan Mitten. Mrs. Gertrude Mitten, care of Dr. Lemon, T. M. E. R. & L. Co., Milwaukee, Wis.

Lieut. Robert H. Ellis. W. M. Ellis, Endeavor, Wis.

Corpl. Elmer N. Buswell. Dr. H. E. Buswell, 268 West Newton Street, Boston, Mass.

Clarence M. George. Robert O. George, Tie Siding, Wyo.

Robert Voelkner. Mrs. Elizabeth Rickerhauser, 338½ Fifteenth Avenue, Newark, N. J.

Bugler Gerald Kinser. Mrs. Charles Kinser, R. F. D. No. 1, Levering, Mich.

Mechanic Felix E. Duby. Mrs. Delia Duby, Fabyan, Conn.

James O'Neil Matthews. James Matthews, Grayling, Mich.

Cook Fred Henderson. Mrs. George Henderson, 65 Dwight Street, Brooklyn, N. Y.

PRIVATES.

Willard J. Barber. Mrs. Margaret Clark, Livermore, Cal.

Frederick F. Belli. Mrs. Antone Belli, 1821 North Nineteenth Street, Philadelphia, Pa.

Earl Clarence Benjamin. William Benjamin, R. F. D. No. 1, Bancroft, Wis.

Harry Blanshay. Jake Blanshay, 1058 Clark Street, Montreal, Canada.

Douglas Brandon. Mrs. Nannie Brandon, 415 Russel Street, Nashville, Tenn.

James P. Buckley. Mrs. Mary S. Buckley, 95 Ashland Street, Lynn, Mass.

Nicola Carabillo. Nicola Carabillo, 108 Belleview Street, Hartford, Conn.

Steve E. Christian. Mrs. Norman B. Phelps, 73 Union Street, Pittsfield, Mass.

James F. Dalton. Patrick Dalton, 402 San Jose Avenue, San Francisco, Cal.

Frank Davidson. Mrs. Laney Davidson, Janesville, Minn.

William T. Davis. Mrs. S. A. Huddleston, corner Virginia and Madison Streets, Eugene, Oreg.

Carl R. Erickson. Robert Erickson, Nye, Wis.

Rudolph Erickson. Helmer Erickson, R. F. D. No. 2, Ellison Bay, Wis.

Willard A. Francis. Mrs. Mary Francis, box 146, Robyville, Ohio.

Irvin C. Franklin. William C. Franklin, Bercail, Mont.

James J. Gallagher. Mrs. Lucille Dahlen, St. Regis Hotel, San Francisco, Cal.

Paulus W. Hilmer. Christ Hilmer, R. F. D. No. 2, Greene, Iowa.

Warren Hukill. William Hukill, Marshall, Ill.

William F. Hundt. Mrs. Otila Hundt, 277 Highland Place, Milwaukee, Wis.

Harry D. Huni. Harold E. Huni, 1117 Chapel Street, New Haven, Conn.

Elmer W. Kinsey. Mrs. Adeline M. Kinsey, Sedro Woolley, Wash.

Selmer Lee. Mrs. Severine Lee, Coon Valley, Wis.

Jess H. McDowell. Sam M. McDowell, 401 Prindle Street, St. Joseph, Mo.

Henry Martin. David Martin, R. F. D. No. 4, Dalton, Ohio.

Michael J. Maye. Mrs. Mary Farrell, 355 York Street, Jersey City, N. J.

Daniel J. O'Connor. Mrs. John Hart, 114 Watdon Place, Englewood, N. J.

Bert McKinley Obenhoff. Mrs. O. H. Obenhoff, 139 Dodge Street, Houghton, Mich.

George Plummer. Perry Younger, Alley, Mo.

Ward Porter. Mrs. Ward William Porter, Hanover, Pa.

Joseph Pozen. Theodore Rozine, 225 Pine Street, Baltimore, Md.

Herbert Prescott. John Brown, 47 School Street, Cambridge, Md.

Henry Ned Sievers. Anton Sievers, 503 Washington Street, Marquette, Mich.

John Smith. Wilbur J. Smith, Amery, Wis.

Benjamin A. Stevens. O. L. Stevens, 514 Davis Street, Elmira, N. Y.

Cecil Tavenner. Fred Mason Tavenner, 318 South Plum Street, Springfield, Ohio.

Thomas F. Taylor. Mrs. E. V. Sampson, 529 Campbell Street SW., Roanoke, Va.

Angelo Tomaino. Mrs. Katy Tomaino, 758 Lansing Street, Utica, N. Y.

Clarence Tracy. Daniel Tracy, 423 Hangard Avenue, Rochester, N. Y.

William J. Turner. Mrs. Margaret Turner, 528 Cass Avenue, Detroit, Mich.

Lee Viotele. Mrs. G. Viotele, Mazzara De Val (Trapani), Italy.

Arthur Woodman. Mrs. Helena Woodman, 1123 Noyes Street, Evanston, Ill.

Joseph H. Zielinski. Valentine Zielinski, Rosholt, Wis.

SECTION NO. 2, SEPTEMBER 21, 1918.

The following casualties are reported by the commanding general of the American Expeditionary Forces:

Killed in action	22
Missing in action	57
Wounded severely	50
Died of accident and other causes	7
Died from wounds	7
Total	143

Killed in Action.

John Samoska, George Samoska, Washington Park, Ill.

Rene Schmit, John M. Schmit, Hortonville, Wis.

Harry R. Schumaker, Mrs. Harry R. Schumaker, 613 Cherry Street, Colesville, Wis.

Joseph Sobczak, James Sobczak, 1342 West Fiftieth Street, Chicago, Ill.

Edward Zavra, Mrs. Rose Darnek, 2649 Sawyer Street, Chicago, Ill.

Thomas P. Via, Mrs. R. E. Via, Ola, Ark.

Curtis Wood, O. S. Clark, Jonesboro, Ark.

Clifford Young, Mrs. Lottie Young, General Delivery, Miles City, Mont.

Return of Canadian Cars to Owner Roads

The United States Railroad Administration issues the following:

WASHINGTON, *August 30, 1918.*

BULLETIN CS–45.

To Railroads:

Your attention is directed to Car Service Bulletin No. 23, issued July 16, 1918, covering the return of Canadian Government Railway cars in series 248000 to 248999 to the owning road.

These cars are required by that company in order to convert them into heater cars to protect perishable freight this winter.

The results obtained from Bulletin No. 23 are not satisfactory, and all roads are directed to take immediate action and forward cars in this series to the Canadian Government Railway either loaded or empty; also to maintain record check of these cars for period of 60 days to locate and forward such as may be received.

W. C. KENDALL,
Manager Car Service Section.

The philosophy of the W. S. S. is save, save, save.

FUEL ADMINISTRATION ORDERS REFUND BY COKE COMPANY

The United States Fuel Administration issues the following:

A refund of a sum approximating $80,000 has been arranged by the United States Fuel Administration between the Consolidated Coke Co., of Pittsburgh, as party of the first part, and the Steel Co. of Canada, of Hamilton, Ontario, and the Thomas Iron Co., of Hokendauqua, Pa., as parties of the second part. The refund came as the outcome of the delivery of inferior coke to the two companies of the second part.

Quality of Coke Impaired.

The Consolidated Coke Co. had contracts providing for the delivery of coke made from washed coal to the blast furnaces of the other two companies. Last November the Consolidated Coke Co. washery broke down and shortly thereafter burned, rendering the producers unable to ship coke of the quality contracted. Also, in order to secure maximum output the coke company had installed coke-drawing machines, which enabled them to maintain the regular output of coke, but, as appeared, reacted unfavorably on the quality of coke produced.

It was clearly evident to the Fuel Administration that both the iron companies had been seriously damaged, not only by increased fuel consumption, but also had been unable to meet the requirements for metal of their respective Governments.

The Consolidated Coke Co. agreed to pay to each of the other companies a sum amounting to $1 per ton for each ton of coke shipped to them from June 1 to August 15. Also it agreed to rebuild its washery at the earliest possible date.

The sum involved while large, in no way represents the loss sustained by the furnace companies, and, of course, the national loss due to the curtailed tonnage of iron and steel can not be calculated in dollars and cents. It is the belief of the administration that the exercise of its power to maintain the standard of quality of coke by control of prices will result in more vigorous efforts on the part of all coke producers to use their properties to the utmost extent to aid in the effective prosecution of the war.

ORDERS SURPLUS COAL SOLD FROM ALASKA RAILROAD MINE

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Whereas, section 2 of the act of Congress approved October 20, 1914 (38 Stats., 741), authorizes the mining of coal from reserved areas in Alaska under the direction of the President, when necessary, by reason of the insufficient supply, for national protection, or relief from oppressive conditions, and

Whereas, it appears that the available supply of coal for domestic and other uses in the Territory of Alaska is by reason of existing conditions inadequate and insufficient,

Now, therefore, I, Woodrow Wilson, President of the United States of America, under and by virtue of said statute, do hereby authorize and direct the Secretary of the Interior, during the period of the existing war, to sell and dispose of surplus coal taken from the mine now being operated by the Alaskan Railroad Commission, for supplying domestic and other local needs in the Territory.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the District of Columbia this 27th day of August in the year of our Lord one thousand nine hundred and eighteen, and of the independence of the United States, the one hundred and forty-third.

[SEAL.] WOODROW WILSON.

By the President,

ROBERT LANSING,
Secretary of State.

PRICES FOR BITUMINOUS COAL AT CERTAIN GREAT LAKE DOCKS

The United States Fuel Administration issues the following:

WASHINGTON, D. C., *August 23, 1918.*

It appearing to the United States Fuel Administrator that by reason of the revision of the prices of bituminous coal mined in the State of Ohio, effective June 29, 1918, and the further revision of such prices effective August 23, 1918, it is necessary to revise the selling prices of coal received at Lake Michigan and Lake Superior docks during the period ending April 30, 1919, and reshipped by rail from such docks to purchasers buying in carload lots, which said prices were fixed by an order of said administrator effective June 1, 1918.

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that bituminous coal of the grades hereinafter specified received at any Lake Michigan or Lake Superior dock from and including the effective date of this order, to and including April 30, 1919, and reshipped by rail from the docks to purchasers buying in carload lots, may be sold at prices f. o. b. cars at the dock not to exceed the following per net ton, viz.:

Coal from—	Lump.	Run of pile.	Screenings.
Southwestern district in the State of Pennsylvania, Fairmont and Panhandle districts in the State of West Virginia, and Districts Nos. 3, 8, and 9 in the State of Ohio	$5.80	$5.55	$5.30
Harlan, Thacker and Kenova districts in the State of Kentucky, the Thacker, Kenova, Kanawha, and Mason County districts in the State of West Virginia, and Districts Nos. 1, 2, 4, 5, 6, and 7 in the State of Ohio	6.30	6.05	5.80
Pocahontas, New River, and Tug River districts, in the State of West Virginia	6.30	6.05	6.05

The above prices are based on freight rates between the mines and Lake Erie ports effective June 1, 1918. An amount equivalent to any increase in such freight rates by order of the United States Railroad Administration in effect at the effective date hereof may be added to such prices, and in the event that any further increase in such freight rates shall become effective at any time hereafter, an additional amount equivalent to such further increase may also be added to such prices.

For coal so received by lake shipment at any of the docks aforesaid, and sold for delivery by truck, wagon, or other usual facility for retail delivery to consumers without any rail reshipment, prices must be fixed and determined in the manner and according to the provisions and limitations prescribed in the regulations of the United States Fuel Administrator relative to maximum gross margins of retail coal dealers.

This order to be effective August 26, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

BITUMINOUS COAL "ZONE E" IS MODIFIED IN NEW ORDER

The United States Fuel Administration issues the following:

WASHINGTON, D. C.,
August 23, 1918.

It appearing to the United States Fuel Administrator that it is essential that the producers of bituminous coal, located in the western Kentucky producing districts, be permitted to make shipments of bituminous coal to points outside of "Zone E" as described in the order of March 27, 1918, and that further apportionment of bituminous coal in that portion of the so-called "zoning system" covered by his "order relative to bituminous coal, Zone E," of March 27, 1918, will facilitate the movement of bituminous coal, tend to prevent scarcity thereof, and is necessary for the production of a sufficient quantity of bituminous coal to aid in the successful prosecution of the war.

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States, dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that, until further or other order of the United States Fuel Administrator, and subject to revocation or modification by him from time to time and at any time hereafter, every producer (which term shall include every person, firm, corporation, or association operating as owner, lessee, or purchaser of the entire output of a mine) of bituminous coal in western Kentucky on the Illinois Central, Louisville & Nashville, and Louisville, Henderson & St. Louis Railways and their short-line connections may, in addition to the territory to which they are permitted to ship under "Zone E" as described in the order of March 27, 1918, sell, ship, and distribute such coal to dealers and consumers for use and consumption within the following described sections of the United States, viz: To Evansville, Ind.

This order shall be effective on and after August 26, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

PRIVILEGES TO COAL COMPANIES DELIVERING FUEL BY RAILROAD

The United States Fuel Administration issues the following:

It appearing to the United States Fuel Administrator that railroad companies which deliver coal to consumers or retail dealers for the purpose of relieving emergencies should be allowed to add to the cost of such coal an amount to cover extra switching, handling, and accounting,

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that until further or other order in the premises, a railroad company which, upon request or authority of a Federal fuel administrator for a State, or the request, requisition, or order of a district representative, or the distribution division of the United States Fuel Administration, delivers coal to any consumer or retail dealer in order to relieve an emergency, may receive from such consumer or retail dealer the cost of such coal to the railroad company delivering the same, including lawful transportation charges from point of origin to point of destination and the additional sum of 15 cents per net ton, or such greater additional sum as may be agreed upon by the railroad company furnishing such coal and the consumer or retail dealer receiving the same, or, in case of failure so to agree, such greater additional sum as may be fixed by the Bureau of Prices of the United States Fuel Administration upon the application of either such railroad company or such consumer or retail dealer.

The above order shall be effective September 5, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

PRICE OF COAL DELIVERED FROM TIPPLE TO LOCOMOTIVE TENDER

U. S. FUEL ADMINISTRATION,
Washington, August 16, 1918.

It appearing that operators should be allowed to make a charge for coal delivered directly from mine tipples to locomotive tenders in addition to the applicable Government mine price,

The United States Fuel Administrator, acting under authority of an Executive order of the President of the United States dated August 23, 1917, appointing said administrator, and of subsequent Executive orders, and in furtherance of the purpose of said orders and of the act of Congress therein referred to and approved August 10, 1917,

Hereby orders and directs that until further or other order in the premises there may be added to the applicable Government mine price of coal delivered directly from mine tipples to locomotive tenders the sum of 5 cents per net ton; provided, however, that if any operator refuses to furnish such coal at such increased price there may be added to the applicable Government mine price, such other sum as may be agreed upon between such operator and the railroad receiving such coal, or in case of their failure to agree said operator shall furnish such coal at the applicable Government mine price, plus such additional sum in excess of 5 cents per net ton, as may be fixed by the bureau of prices of the United States Fuel Administration upon application of either such operator or such railroad.

The above order shall be effective August 17, 1918.

H. A. GARFIELD,
United States Fuel Administrator.

Results of Census of the Virgin Islands Announced in Volume Just Published

The Department of Commerce, Bureau of the Census, issues the following:

The results of a census of the Virgin Islands (formerly the Danish West Indies) have just been published in an octavo volume of 174 pages. The inventory was made, at the request of the Secretary of the Navy, by the Bureau of the Census of the Department of Commerce, under the supervision of Mr. Eugene F. Hartley, chief statistician for manufactures of the Census Bureau.

The report shows that by this latest territorial acquisition the area of the United States was increased slightly more than 132 square miles, this area being practically that of the three principal islands, St. Croix (Santa Cruz), St. John, and St. Thomas. There are, in addition, about 50 small islands or cays, the largest about 1 mile square.

Interesting and significant is the fact that while the United States acquired title to the Virgin Islands by treaty with Denmark on August 4, 1916, after negotiations of more than half a century, the language of the people is English, though the islands were under the Danish flag for 245 years.

In 1917 the value of the exports from the United States to the islands was $1,416,342, and of the imports from the islands $1,259,607.

Population Decreasing.

The population as of November 1, 1917, was 26,051, and comparison with earlier censuses shows the population has steadily decreased from 43,178 in 1835 to 26,051 in 1917. Of the total persons in 1917, 1,922 were white, 19,523 were Negro, and 4,606 mixed. The sex distribution was 11,999 males and 14,052 females. The returns showed 5,281 persons, or 24.9 per cent, of the population 10 years of age or over to be illiterate. The population of each of the three principal islands in 1917 was as follows: St. Croix, 14,901; St. Thomas, 10,191; and St. John, 959. The islands contain three cities—Charlotte Amalie, on the island of St. Thomas, with a population of 7,747; and Christiansted and Frederiksted, on the island of St. Croix, with populations of 4,574 and 3,144, respectively.

Agriculture and animal husbandry engaged 6,084 of the total population as owners, managers, or tenants on the 430 farms or "estates" on the islands. These farms embraced 69,892 acres of the 84,781 acres included in the total area of the islands. Of the 430 farms reported 102 were operated by white farmers as owners, managers, or tenants; 270 by negroes; and 58 by mixed-blood farmers. The average size of farms is 162.5 acres, of which an average of 91.7 acres was reported as improved and 70.8 acres as unimproved. The total value of farm property is given as $3,706,911. The number of farms reporting live stock was 381, the value of which was given as $582,921. The total value of all crops for the year ending October 31, 1917, was given as $522,606, sugar cane contributing $442,120 and hay and forage $67,589.

Manufactures and Labor.

The number of manufacturing establishments in the islands was 84, of which 65 were located on St. Croix, 3 on St. John, and 16 on St. Thomas. The number of persons engaged in manufactures was 842, of whom 685 were wage earners. The capital invested was $1,429,524; the value of materials used, $781,417; and the value of products, $1,292,247. Of the total value of products, cane sugar contributed $978,188; bread and other bakery products, $192,544; and bay rum, $38,745. The manufacture of sugar from cane employed 62 per cent of the wage earners, 76 per cent of the capital, and produced 80 per cent of the total value of the products of manufactures. Distribution and hours of labor of the gainfully employed, by sex and age, are interesting features of the population and manufactures statistics of the report.

The Fisheries Industry.

The census of the fisheries of the islands, the first ever taken, shows a total of 380 persons engaged in the industry, with capital invested of $11,002, and a total catch for the year valued at $44,436.

In addition to the sections devoted to statistics of population, agriculture, manufactures, and fisheries, an introductory chapter of the report gives much interesting information of the geography, history, climate, etc., of the islands, and maps and illustrations are interesting features of the publication.

Customs Declarations For Goods to England

OFFICE OF SECOND ASSISTANT
POSTMASTER GENERAL,
Washington, Sept. 9, 1918.

The Postal Administration of Great Britain has advised this department that considerable delay is at present experienced in clearing parcels from the United States through the British customs in consequence of vague and inaccurate customs declarations; that in order to avoid such delay it is necessary that the particulars on the customs declarations relating to said parcels should be full and precise in all details, and that in the case of parcels containing articles of different kinds the exact quantity of each kind of article should be stated.

Postmasters will please cause due notice of the foregoing to be taken at their offices and the widest possible publicity to be given thereto.

OTTO PRAEGER,
Second Asst. Postmaster General.

EMPOWERS GOVERNMENT AGENTS TO BUY PRISON-MADE SUPPLIES

EXECUTIVE ORDER.

Whereas the present emergency has created a demand for supplies which can not wholly be procured or supplied by privately owned or conducted factories not employing prison labor, it is ordered that the agents for the departments or bureaus charged with the buying of war or governmental supplies are, for the period of the war, empowered in addition to any method of purchase or procurement now authorized, to place an order for such supplies with the superintendent or other head of any penal institution where persons are confined by any State, county or municipal authority, willing to undertake the manufacture, production, and delivery of such supplies: *Provided*, That the compensation to be paid for such supplies shall, so far as possible, be the prevailing price for like commodities in the vicinity of the institution furnishing them. Compensation and hours of labor for inmates of any institution above specified, working upon such supplies, shall be based upon the standard hours and wages prevailing in the vicinity in which the institution is located. The pro rata cost of maintaining the inmates so employed shall be deducted from their compensation.

The Executive order dated May 18, 1905, in so far as it is inconsistent with the provisions of this order, is superseded for the period of the war.

WOODROW WILSON.

THE WHITE HOUSE,
September 14, 1918.

Chemical Camp Named For Prof. H. L. Kendrick

The War Department authorizes the following:

By order of the Secretary of War, the training camp for the Chemical Warfare Section, now under construction at Lakehurst, N. J., is designated as "Camp Kendrick."

This new camp is named in honor of Prof. (Col., retired) Henry L. Kendrick, LL. D., who, after considerable service as a commissioned officer, served as professor of chemistry, mineralogy, and geology at the United States Military Academy from March 3, 1857, until his retirement from active service, December 13, 1880.

Henry L. Kendrick was appointed a cadet at the Military Academy from New Hampshire, September 1, 1831; second lieutenant brevet, Infantry, July 1, 1835; second lieutenant, April 1, 1836; first lieutenant, June 20, 1837; captain, June 18, 1846; brevet major of volunteers, for gallantry and meritorious conduct in the defense of Puebla, October 12, 1847; professor, Military Academy, March 3, 1857; brigadier general volunteers (declined) September 23, 1862; retired as colonel, December 13, 1880, at his own request, having served 45 years as a commissioned officer, and being over 62 years of age.

He received the degree of LL. D., March 3, 1857. He died in New York City, May 24, 1891. He had no leave of absence from 1863 to 1880.

Two Military Reservations In the Philippine Islands Restored to Public Use

EXECUTIVE ORDER.

Pursuant to the authority conferred upon me by section 9 of the act of Congress approved August 29, 1916, entitled "An act to declare the purpose of the people of the United States as to the future political status of the people of the Philippine Islands, and to provide a more autonomous government for those islands," the following military reservations in the Philippine Islands, being no longer required for the purpose for which reserved, are hereby placed under the control of the Government of the Philippine Islands to be administered for the benefit of the inhabitants thereof, as contemplated by the authority above mentioned:

1. Siassi Military Reservation, situated in the municipality of Siassi, Province of Moro, Department of Mindanao and Sulu, Island of Siassi, Philippine Islands, as reserved by Executive order dated September 22, 1903, and later enlarged by Executive order dated October 19, 1912.

2. Isabela de Basilan and Polloc Military Reservation, Department of Mindanao and Sulu, reserved for naval purposes by Executive order of June 19, 1903, and later transferred for military purposes by Executive order of June 19, 1903, and later transferred for military purposes by Executive order dated June 7, 1910.

WOODROW WILSON.

THE WHITE HOUSE,
August 13, 1918.

Suspension of 8-Hour Law in Work on Temporary Liberty Loan Building

TEMPORARY LIBERTY LOAN BUILDING.

EXECUTIVE ORDER.

In order to effect the more expeditious construction of the temporary building to be erected on the south side of the Bureau of Engraving and Printing, in this city, for use by the Loans and Currency Division of the Treasury Department in connection with the bond issue, the early completion of which, in connection with war activities, constitutes a national emergency and by virtue of the provisions of the act of Congress approved March 4, 1917 (39 Stat., 1192), entitled "An act making provisions for the naval service for the fiscal year ending June 30, 1918, and for other purposes" whereby it is provided "that in cases of national emergency the President is authorized to suspend provisions of law prohibiting more than eight hours labor in any one day of persons engaged upon work covered by contracts with the United States; provided further, that the wages of persons employed upon such contracts shall be computed on a basic day rate of eight hours work with overtime rates to be paid for at not less than time and one-half for all hours work in excess of eight hours," I do hereby suspend the provisions of law prohibiting more than eight hours of labor in any one day by persons engaged in the construction of the temporary building to be erected on the south side of the Bureau of Engraving and Printing this city. This order will take effect from and after this date.

WOODROW WILSON.

THE WHITE HOUSE,
August 12, 1918

EIGHT-HOUR LAW SUSPENDED ON WASHINGTON STREET PAVING

EXECUTIVE ORDER.

Whereas the District of Columbia appropriation act, approved August 31, 1918, provides the sum of $85,000 for grading, paving, improvement and repair of streets, avenues, and roads constituting necessary and adequate means of approach and access to existing buildings or to temporary buildings which may be erected in the District of Columbia for the use of the United States; and

Whereas street paving in the area between Seventeenth, Twenty-third, B, and Virginia Avenue NW. is necessary for proper ingress and egress to office buildings erected and in course of erection by the United States Government in connection with the prosecution of the present war; and

Whereas the Commissioners of the District of Columbia have requested that these paving operations be declared an emergency matter and have asked that the eight-hour law relating to the employment of laborers and mechanics in the District of Columbia be suspended in so far as it relates to the operations referred to;

Therefore be it ordered, that I, Woodrow Wilson, President of the United States, do hereby declare that the street paving operations in the area referred to is emergency work relating to the conduct of the present war, and are hereby excepted from the provisions of the eight-hour law governing the hours of laborers and mechanics employed in that connection.

Provided, however, That pay be allowed to those entitled thereto in connection with the prosecution of said operations with compensation of time and half for overtime work spent upon said construction.

WOODROW WILSON.

THE WHITE HOUSE,
September 16, 1918.

EIGHT OFFICERS PROMOTED.

Special Orders, No. 210:

425. The appointments of the following-named officers in the Signal Corps, United States Army, during the existing emergency, with rank from August 23, 1918, are announced:

To be Colonel—Lieut. Col. Parker Hitt, Signal Corps (Infantry).

To be Lieutenant Colonels—Majs. Sebring C. Megill, Field Artillery; Karl Truesdell, Infantry (captain, Infantry); Thomas L. Sherburne, Coast Artillery; Ruby Dwight Garrett, Signal Corps; Edward E. Kelly, Signal Corps, and Sosthenes Behn, Signal Corps.

To be Major—Capt. Leigh F. J. Zerbee, Signal Corps.

LUMBER SHIPMENT EMBARGO IS EXPLAINED BY DIRECTOR

The United States Railroad Administration issues the following:

In connection with the restrictions upon the shipment of lumber and other forest products destined for points north of the Ohio and Potomac and east of the Mississippi Rivers declared by the United States Railroad Administration as effective at 12.01 o'clock a. m. on Monday, September 16, Director General McAdoo issued the following announcement:

This order was not issued on account of any particular congestion or accumulation, but in order to bring the movement of lumber into the industrial territory under such control as will prevent undue accumulation or overshipments, also delay to cars and other elements of transportation waste.

Regulation of Traffic.

The experience of the freight traffic committees which have been operating in New York, Philadelphia, and Baltimore for some months past demonstrates not only the desirability but the practicability of regulating the flow of traffic by the permit system, based on conditions at destination, with particular reference to the need of the consignee and his ability to handle the freight promptly on arrival.

It is not the intent to stop the movement of lumber or other forest products, but merely to control it.

It is provided that permits will be issued by authorized bodies upon presentation by the consignee of evidence which justifies transportation service. This evidence will necessarily differ in different cases, the test being in each instance whether the need at destination and conditions there and en route are such as to warrant the particular movement at the particular time in its relation to other demands for transportation service.

Requests for Permits.

Requests for permits covering shipments destined to points within the jurisdiction of the freight traffic committees at New York, Philadelphia, Baltimore, and Washington should be addressed accordingly. Permits for all other shipments should be requested from the car-service section direct. To facilitate prompt disposition full information should be given in each case with respect to the necessity for the shipments at the particular time involved, the amount of material in stock, the number of cars in transit, etc. The following items should also be covered: Number of cars, name of shipper, address of shipper, to be shipped from, name of railroad, commodity, consignee, destination, and delivering line. The railroad agent at destination should be asked to indorse the request with such comment as may be proper with respect to the ability of the consignee to release the car promptly on arrival.

Cars Loading "In Transit."

On account of short notice which was given it has been necessary to consider as in transit such cars as were in process of loading at the time the order was received by railroad officers at various points. It has also been held that shipments of fuel wood, logs, pulp wood, or similar products which originate and terminate on the line of a single railroad may be authorized by the transportation officer of such railroad. Where such movements cover more than one railroad—that is, interline shipments—requests must be made to the designated freight traffic committee or to the car-service section. It is pointed out that the order not only prohibits movement from points outside of the embargoed territory to points within, but applies as well to movements wholly within the territory included.

The exceptions covering Government freight apply only when the freight is billed strictly as specified in the order, and claims for exemption by reason of Government contracts or other work will not receive consideration unless they bear the indorsement of the Government department interested.

RULES FOR THE DESTRUCTION OF OLD RAILROAD RECORDS

The United States Railroad Administration, Division of Public Service and Accounting, issues the following:

WASHINGTON, D. C.,
September 3, 1918.

P. S. & A. CIRCULAR No. 28.

1. The regulations to govern the destruction of records of steam roads, prescribed by the Interstate Commerce Commission, provide for the appointment by the board of directors of each railroad of one, or, where necessities require, two officers to have supervision of the destruction of accounts, records and memoranda.

2. Corporate officers, who, under the Interstate Commerce Commission rules, exercise authority with respect to records relating to operations prior to January 1, 1918, shall be called upon for proper authorization before such records are destroyed.

3. The responsibility under the order for destroying records relating to operations subsequent to December 31, 1917, devolves upon the Federal Manager or the General Manager of each railroad, and one or more officers should be designated by them to assume general supervision of the destruction of records, etc.

4. The Interstate Commerce Commission should be notified through the Federal or General Manager of the appointments and names of the appointees. The officers who are appointed should be governed by the instructions of the Commission with respect to their duties.

C. A. PROUTY,
Director.

REQUISITIONS 1918 CORN CROP.

Consul General David F. Wilber, at Genoa, reports:

All maize of the 1918 harvest, except that needed by the grower (or other person having the right thereto) for (*a*) sowing his fields; (*b*) food for his family, for his agricultural laborers, and for those at a fixed salary to whom he must supply food or compensation in kind; and (*c*) feeding live stock, has been requisitioned by the Italian Government under a ministerial decree dated August 9.—Commerce Reports.

DIRECTOR GENERAL ADDS TO ORDER ON CAR CLEANER'S PAY

The United States Railroad Administration issues the following addendum to Supplement No. 4 to General Order No. 27.

Effective September 1, 1918, superseding General Order No. 27, and in lieu thereof, as to the employees herein named, the following rates of pay and rules for coach cleaners are hereby ordered:

ARTICLE I. RATES OF PAY.

(a) For coach cleaners who were on January 1, 1918, prior to the application of General Order No. 27 receiving less than 16 cents per hour, establish a basic minimum rate of 16 cents per hour, and to this basic minimum rate and all hourly rates of 16 cents and above add 12 cents per hour, establishing a minimum rate of 28 cents per hour, provided that the maximum shall not exceed 40 cents per hour.

(b) All coach cleaners shall be paid on the hourly basis.

ARTICLE II. PRESERVATION OF RATES.

(a) The minimum rates and all rates in excess thereof, as herein established, and higher rates which have been authorized since January 1, 1918, except by General Order No. 27, shall be preserved.

(b) Coach cleaners temporarily or permanently assigned to higher rated positions shall receive the higher rates while occupying such positions; coach cleaners temporarily assigned to lower rated positions shall not have their rates reduced.

ARTICLE III. HOURS OF SERVICE.

Eight consecutive hours, exclusive of the meal period, shall constitute a day's work.

ARTICLE IV. OVERTIME.

(a) Where there is no existing agreement or practice more favorable to the employees, overtime will be computed for the ninth and tenth hour of continuous service, pro rata on the actual minute basis, and thereafter at the rate of time and one-half time. Even hours will be paid for at the end of each day period; fractions thereof will be carried forward.

(b) Coach cleaners will not be required to suspend work during regular hours to absorb overtime.

ARTICLE V. APPLICATION.

The rates of pay and rules herein established shall be incorporated into existing agreements on the several railroads.

W. G. MCADOO,
Director General of Railroads.

Appointed as Member of Freight Committee

The United States Railroad Administration issues the following:

CIRCULAR No. 6, SUPPLEMENT No. 1.
AUGUST 15, 1918.

Mr. C. P. Morse is hereby appointed member of Committee of Freight Traffic Control, Ohio River gateways, with headquarters at Cincinnati, Ohio, vice Mr. George Krause, transferred.

C. R. GRAY,
Director, Division of Operation.

Approved:

W. G. MCADOO,
Director General of Railroads.

ADDITIONAL LIST OF AMERICAN SOLDIERS HELD AS PRISONERS OF WAR IN GERMANY

The War Department authorizes the publication of the following list of prisoners of war at various camps in Germany:

CASSEL.

Pvt. Walter C. Adams. Mrs. Sarah Adams, mother, Earlsboro, Okla.

Pvt. Frank L. Baker. Mrs. Anna Baker, wife, 973 Seventy-third Avenue, Detroit, Mich.

Pvt. George W. Castleberry. Mrs. Mary Castleberry, mother, Wellston, Okla.

Pvt. Joseph M. Dawson. Mrs. Joseph Smith, mother, Imperial, Pa.

Pvt. (first class) John Ritz. Mrs. Annie Ritz, mother, Bitumen, Pa.

Pvt. Charles Sprano. Mrs. Margherita Sprano, mother, Formicalo, Province Caserta, Italy.

Mechanic Peter E. Stutzman. William C. Stutzman, father, Somerset, Pa.

Pvt. Erwin E. Larson. Christopher E. Larson, father, Dickey, N. Dak.

Pvt. Ignatz Belcuns. George Bataches, friend, 335 Spring Street, New York, N. Y.

Pvt. Vincenzo Burrini. Mrs. Anna Burrini, mother, S. Benedetto, Del Tricnto, Italy.

Pvt. Emilio Buso. Sarterecto Vincenzo, cousin, First Avenue, Raritan, N. J.

Pvt. Angelo Carlocclo. Pasquale Carlocclo, father, Salerno, Trentinara, Italy.

Pvt. John Colleti. Pietro Colleti, father, Ascolipicene, Monte Forte, Italy.

Pvt. Tony Civilli. Patsey Domdry, friend, 813 North Fifth Street, Lebanon, Pa.

Pvt. Angelo D'Alessandro. Miss Virginia D'Alessandro, sister, 824 South Eighth Street, Philadelphia, Pa.

Pvt. Tony Dec. Stanislaw Dec, father, Niveki, Lodlin, Russia.

Pvt. Raffale Di Donna. Palatino Di Donna, father, 49 Asher Avenue, Bristol, R. I.

Pvt. Luigi Dipalmai. Angelo Dipalma, brother, 9 Hopkins Street, Rochester, N. Y.

Pvt. (first class) Alfred W. Doyle. Mrs. Stella Doyle, wife, Weston, Mo.

Pvt. Jacob Doyka. Mike Doyka, brother, Portage, Pa.

Pvt. Burt Eaton. Burt Eaton, father, Ellenboro, Wash.

Pvt. George Fischer. Martin Fischer, father, 648 Madison Street West, New York, N. Y.

Pvt. Leslie M. Fisher. Mrs. Annie S. Fisher, 103 South Madison Street, Evansville, Wis.

Pvt. (first class) Fred Gregor. Chester K. Gregor, father, 1226 State Street, Erie, Pa.

Pvt. Felix F. Gutowsky. Mrs. Marcella Zirovski, sister, 301 Grove Street, Kingston, Pa.

Pvt. Antonie Kostentynowyz. Mr. Frank Kostentynowyz, uncle, 823 Pins Street, Trenton, N. J.

Pvt. David Kennedy. Mrs. Elizabeth Kennedy mother, Ashland Nebr.

Pvt. Sabottino Lizzi. Crispino Lizzi, brother 945 Federal Street, Philadelphia Pa.

Pvt. (first class) John McPeat. Mrs James McPeat, mother, Big Powgavie, Inchture, Perthshire, Scotland.

Pvt. Antonio Marcinszewski. Joseph Kilowski, cousin, 2 C H Street Melrose, Mass.

Pvt. Alex Melnick. Miss Platina Melnick, sister, Czwelorvice, Katro, Zivetoro, Kiev, Russia.

Pvt. Frank Mucciielli. Antonio Mucciielli, father, Casert A., Pontecorro, Italy.

Pvt. Clarence Elzera Whitlock. Thomas Whitlock, father, Dixie, Ky.

Pvt. George Myers. Mrs. Katie Myers, Westport, Conn.

Pvt. Nathan Atoff. Abe Tolschensky, brother, 216 Cherry Street, New York, N. Y.

Pvt. Frank Nowicki. John Smith, friend, Highlandtown, Baltimore, Md.

Pvt. Emanuel Steiger. Fred Steiger, father, Glenham, S. Dak.

Pvt. Kopel Szamkul. Louk Szamkul, father, Minsk Gubezni Novshrudskoho Veyda, Horodesza Russia.

Pvt. Sam Thomas. John Hollwitz, friend, 802 Nester Street, Philadelphia, Pa.

Pvt. (first class) Raymond Turney. John K. Turney, father, R. F. D. No. 1, Kittanning, Pa.

Pvt. Conrad Walker. Conrad Walker, father, 423 New York Avenue Hastings, Nebr.

Corpl. William W. Williamson. Mrs. Margaret Williamson, mother, 18 South Main Street, Lambertville, N. J.

Pvt. Joseph Wakessewski. Mrs. Leona Breskowitz, friend, 4554 Style Street, Philadelphia, Pa.

Pvt. Harry Wilson. Joe Wilson, father, 823 North Seventh Street, Philadelphia, Pa.

Pvt. (first class) Joseph Carroll. Mrs. Thomas Carroll, mother, 102 Sexton Street, New Britain, Conn.

Pvt. Eddie J. Chandler. Ben Chandler, father, Levesque, Ark.

Pvt. Guy Crawford. Calaway Crawford, father, Colson, Ky.

Pvt. Peter Gumbis. Mrs. Casa Kazacewecz, sister, 8700 Manastee Street, Chicago, Ill.

Pvt. Ernest J. King. J. M. King, father, Woden, Tex.

Pvt. Bonus Nebolchok. Siclar Boychuk, cousin, 396 Eleventh Street, Jersey City, N. J.

Pvt. Gustaf Olson. Axel Olson, brother, Brookside, Conn.

Pvt. Duke Reagan. Mrs. Emma Reagan, mother, 15 Union Street, Jersey City, N. J.

Mechanic Walter Stankiewicz. Mrs. Elsie Kozlowetca, sister, 227 West Second Street, Mount Carmel, Pa.

Pvt. James Toomey. Mrs. John Toomey, mother, 18 South Webster Avenue, Scranton, Pa.

Pvt. Joseph Steele. Miss Mary Steele, sister, 125 North Fourth Street, Woodland, Cal.

Pvt. Albert C. Orwig. J. W. Orwig, father, 710 West Main Street, Bellevue, Ohio.

Pvt. John H. Perrin. Mrs. Anna Perrin, mother, Piegah, Iowa.

Pvt Vitto Bruno. Michael Bruno, father, 307 West Third Street, Conshohocken, Pa.

Pvt. Stanley Grissell. Mrs. Millie Grissell, mother, Brooklyn, Pa.

Pvt. Arthur Fadden. George Fadden, father, 1006 West Lackawanna Avenue, Scranton, Pa.

Pvt. Patrick Gilgallon. Mrs. Mary Kennedy, friend, 336 Theodore Street, Scranton, Pa.

Sergt. Roland F. Hess. Conrad G. Hess, father, care of Schuman Dry Goods Store, Bartlesville, Okla.

Pvt. Leo L. Joyce. William Joyce, brother, 116 North Van Buren Street Scranton, Pa.

Pvt. Robert H. Kimmel. Mrs. Alsie M. Kimmel, mother, 52½ Green Street, Battle Creek, Mich.

Important Notice to U. S. Purchasing Agents

Purchasing agents for the various Government departments and the special United States war administrations are earnestly reminded to send to the Official U. S. Bulletin at the earliest possible moment all copy for bids to be advertised and purchase awards, in order that these may be promptly and correctly printed in the Bulletin in accordance with the orders of the Secretary of War and other heads of departments.

The task of preparing this copy for publication, with a view to absolute correctness and continuity, is a considerable one, but, with the cooperation of the purchasing agencies, should result in a great help, not only to the departments themselves, but to bidders throughout the country, all of whom, through the medium of the Official Bulletin, are desirous of keeping informed of the Government's needs.

PURCHASES AND CONTRACTS TO BE MADE BY HARDWARE AND METALS DIVISION

(Continued from page 30.)

Section 2-D, Mr. C. L. Butts, buyer, room 108, September 26.

Blades, saw, meat:	
28-inch	8,000
22-inch	15,000
16¼-inch	30,000
Blades, saw, compass:	
Large	24,000
Medium	24,000
Small	25,000
Blades, saw, keyhole	54,000
Blades, hacksaw:	
10-inch	27,421
12-inch	27,421
Blades, buck saw, 32-inch	7,430
Saws, crosscut, 2-man, with handle	7,430

Section 2-E, Capt. W. E. Standart, buyer, room 104, September 26.

Cutters, wire, combination	7,345

Section 2-F, Mr. E. A. Moye, buyer, room 432, September 26.

Screw drivers, 3-inch	26,888
Hooks, shave, plumbers:	
Oval	500
Half oval	500
Triangular	500

Purchases and Contracts to be Made by Procurement Branch No. 3.

Section 3-B, Capt. J. G. Williams, buyer, room 114 (Sept. 27):

Whistles:	
Thunderer	900,000
Kinglet	250,000
Siren	40,000
Pails, fire	2,000
Graphite, flake, pounds	22,000
Tubes, hypochloride of lime	152,000,000
Tanks, hand-pump	990
Pumps, spray	10
Knapsacks, spray	100
Belt lacing, rawhide, various widths, feet	40,000
Lamps, ambulance:	
Right	3,240
Left	3,240
Cosmic, quart cans	516,736
Tanks, bucket, 40-gallon	100
Containers, mineral oil, 5-gallon	500

Section 3-A, J. E. Diemer, buyer, room 122 (Oct. 1):

Hoods, stove	250
Balers:	
Size A, Economy or equal	6
Size B, Economy or equal	10
Cot legs, lower half (Gold Medal canvas cot)	3,000
Field ranges No. 2, complete with utensils excepting No. 52 pans	13,500
Pans, bake, No. 578, large, for No. 5 Army range, 29 by 22	8,400
Oven backs, No. 2A, for field bake oven No. 1	610
Oven fronts, No. 1A, for field bake oven No. 1	460
Balers, No. 62, Economy or equal	15

Section 3-A, M. A. Dunning, buyer, room 122 (Oct. 1, 1918):

Sewing machine for clothing repairing	1
Machines, sewing:	
"White type"	2
Tailor "Jumbo"	1

Section 3-C, W. B. Mitchell, buyer, room 118 (Sept. 24):

Boilers:	
Ordinary square, 5, 8, 10, 15, and 20 gallons	13,984
Ordinary round, 8, 10, and 20 gallons	9,228
Square, for Army range, 10, 15, and 20 gallons	6,000
Square, 10, 20, and 6 gallons	200
Cans, sponge, nested for field bakery equipment	6,000
Hooks, meat for racks	9,604
Boilers:	
Round, 6 and 8 gallons	420
Square, 10, 15, and 20 gallons	420
Pans:	
Bake, No. 5, large	420
Bake, No. 578	420
Frying, 18-inch	420
Brooms, stable	4,800
Measures, liquid, ½-pint, pint, quart, 2-quart, and gallon	312
Brushes:	
Floor, with handle	72
Scrubbing	108
Glasses, drinking	500
Mops:	
Cuspidor	72
Floor	72
Pans, dust	72
Wax, floor, "staples," 2-pound cans	72
Pans, sauce and stew, enameled, 2-quart, 4-quart, and 6-quart	1,250
Spoons	8,317,707

LIST OF QUARTERMASTER PURCHASES PASSED BY THE BOARD OF REVIEW

The following is a list of contracts approved by the Board of Review of the Office of the Quartermaster General of the Army:

August 27, 1918.

PURCHASE ORDERS.

I. Pachner & Son (Inc.), New York City, overseas caps.

Official U. S. Bulletin

PUBLISHED DAILY under order of THE PRESIDENT of THE UNITED STATES by COMMITTEE on PUBLIC INFORMATION
GEORGE CREEL, Chairman ★ ★ ★ COMPLETE Record of U. S. GOVERNMENT Activities

VOL. 2 WASHINGTON, MONDAY, SEPTEMBER 23, 1918. No. 419

U. S. EXPRESSES ITS HORROR AT RUSSIAN TERRORISM; URGES NEUTRALS TO JOIN IN CONDEMNING MURDERS

CABLES TO LEGATIONS

Instructed to Inquire of Various Governments if They Are Disposed to Take Some Immediate Action in Behalf of Civilization "Entirely Divorced from Atmosphere of Belligerency and Conduct of War."

The Secretary of State has sent the following telegram to all American ambassadors and ministers in the allied and neutral countries:

"This Government is in receipt of information from reliable sources revealing that the peaceable Russian citizens of Moscow, Petrograd, and other cities are suffering from an openly avowed campaign of mass terrorism and are subject to wholesale executions. Thousands of persons have been shot without even a form of trial; ill-administered prisons are filled beyond capacity and every night scores of Russian citizens are recklessly put to death; and irresponsible bands are venting their brutal passions in the daily massacre of untold innocents.

Desire to Befriend Russia.

"In view of the earnest desire of the people of the United States to befriend the Russian people and lend them all possible assistance in their struggle to reconstruct their nation upon principles of democracy and self-government, and acting therefore solely in the interest of the Russian people themselves, this Government feels that it can not be silent or refrain from expressing its horror at this existing state of terrorism. Furthermore, it believes that in order successfully to check the further increase of the indiscriminate slaughter of Russian citizens all civilized nations should register their abhorrence of such barbarism.

Instructed to Make Inquiry.

"You will inquire, therefore, whether the Government to which you are accredited will be disposed to take some immediate action, which is entirely divorced from the atmosphere of belligerency and the conduct of war, to impress upon the perpetrators of these crimes the aversion with which civilization regards their present wanton acts."

NO OPINION AS TO COTTON PRICE EXPRESSED BY MR. HOUSTON

A statement concerning cotton price fixing appeared in a newspaper on Saturday to the effect that it was understood that Secretary Houston has expressed the opinion that 25 cents would be a fair price for this year's cotton. This statement, and any other statement that may have been made purporting to represent the views of Secretary Houston as to a price for cotton, if any is to be fixed, is utterly without foundation. The Secretary has expressed no opinion as to a price for cotton.

ENFORCING THE DRAFT RULES AT THE SHIPBUILDING YARDS

Workmen Found Unworthy of Deferment Privilege Being Removed from Lists.

The War Department authorizes the following from the office of the Provost Marshal General:

Provost Marshal General Crowder has recently had conferences with Charles M. Schwab, Edward N. Hurley, and Charles Piez, of the United States Shipping Board and Emergency Fleet Corporation, concerning the more effective enforcement of the Selective Service Regulations regarding employees of shipyards and allied manufacturing concerns who are building ships and manufacturing ship equipment.

For several months the office of the Provost Marshal General and the United States Shipping Board and Emergency Fleet Corporation have been cooperating in removing from the Emergency Fleet classification list registrants who have been found unworthy of the privilege of Emergency Fleet listing, and during the past few months more than 20,000 registrants have been removed from the lists by reports made to local boards by the Emergency Fleet Corporation. It is expected that as a result of the recent conferences a procedure will be adopted strictly in conformity with existing regulations, but by means of which the removal from Emergency Fleet classification lists of registrants who have quit the yards and factories, or who are not putting in a reasonable amount of time each week, will be facilitated.

Recently published statements to the effect that there will be radical changes in the existing regulations are incorrect. The necessary remedy already exists in the regulations. Neither is the published statement correct that all right to claim deferred classification by, or on behalf of, necessary employees in shipyards and factories has been withdrawn. Such claims may be made in the same manner as claims for necessary employees in other necessary industries.

NECESSITY FOR CURTAILING NONWAR BUILDING WORK IS EXPLAINED BY CHAIRMAN OF WAR INDUSTRIES BOARD

REPLY TO SENATE QUERY

Resolution of Senator Calder Regarding Orders Designed to Conserve Materials and Labor Necessary For War Work Answered By Mr. Baruch — Shows Authority for the Action Taken by the Board.

The War Industries Board authorizes the following:

For the first time since its organization, the operations of the War Industries Board have been called into question as to the source of authority under which they proceed.

Senator Calder, of New York, offered a resolution adopted by the Senate on September 11, calling upon the board to make this explanation, but confining the scope of his inquiry to "all orders relative to the construction and alteration of public or private buildings * * *"

Bernard M. Baruch, chairman of the War Industries Board, made the reply, which was presented in the Senate Saturday.

Senator Calder's resolution, his comments thereon, and Mr. Baruch's reply follow:

Mr. Calder's Resolution.

[From Congressional Record of Sept. 12.]

Mr. CALDER. I submit a resolution and ask unanimous consent for its present consideration.

The VICE PRESIDENT. The resolution will be read.

The resolution (S. Res. 304) was read, as follows:

Resolved, That the War Industries Board be directed to transmit to the Senate all orders promulgated by that board relative to the construction and alteration of public or private buildings, and to advise the Senate under what authority of law said orders were issued.

Mr. CALDER. I introduce this resolution because articles appearing in the newspapers within the last day or two indicate that the War Industries Board has promulgated orders which, in effect, will completely destroy the building industry of the country. The building material industry of the country has an investment of $4,000,000,000 in their business, and the new buildings constructed in the

REPLY OF MR. BARUCH TO SENATE RESOLUTION

Nation in the last prewar year—1916—totaled $1,800,000,000. As I understand these orders, they prevent the construction of a barn, a silo, or even a private dwelling house, or of any building of a private character without the permission of the Federal Government. If it be necessary, in order to win the war, to destroy this great wealth and tax-producing industry, of which it seems to me there can be few more essential, we ought to know it, and the reasons for it, and the people must adjust themselves to it; but if this great business can be saved, at least in part, some way should be found to do so. I ask unanimous consent that the resolution of inquiry be now considered.

The resolution was considered by unanimous consent and agreed to.

Mr. Baruch's Reply.

[Reply of the chairman of the War Industries Board.]

SEPTEMBER 19, 1918.

To the Honorable the PRESIDENT
AND SENATE OF THE UNITED STATES,
Washington, D. C.

GENTLEMEN: On behalf of the War Industries Board, I beg to comply with Senate Resolution 304, passed September 13, 1918, and transmitted to me the same day.

1. The only order promulgated by the War Industries Board "relative to the construction and alteration of public or private buildings," is contained in Circular No. 21, isued September 3, 1918, and supplemented under date of September 10, 1918. Copies of the order and the supplement are attached hereto.

2. Said orders were issued under the authority conferred upon the War Industries Board and its chairman by the President of the United States in a communication to the chairman, dated March 4, 1918, and confirmed by Executive order dated May 28, 1918, whereby the War Industries Board was created a separate administrative agency of the President, with the powers, duties, and functions set forth in the said communication from the President of March 4, 1918. Copies of said communication and of said Executive order are attached hereto.

I beg to call particular attention to the following powers and duties thus specifically conferred by the President upon the board and its chairman:

a. "The studious conservation of resources and facilities by scientific, commercial, and industrial economies."

b. "The determination, wherever necessary, of priorities of production and of delivery and of the proportions of any given article to be made immediately accessible to the several purchasing agencies when the supply of that article is insufficient, either temporarily or permanently."

c. The Chairman's duty to guide and assist "in obtaining access to materials in any way preempted," and "to anticipate the prospective needs of the several supply departments of the Government and their feasible adjustment to the industry of the country as far in advance as possible, in order that as definite an outlook and opportunity for planning as possible may be afforded the business men of the country."

I refer also to the act of Congress of August 10, 1917, known as the Priority of Shipment Act.

3. In further response to Senate Resolution 304, permit me to add:

Statement of Situation.

In carrying out the duties with which we were thus charged by the President, the War Industries Board and its chairman found the following situation to exist with respect to building and construction facilities and supplies:

a. Iron and steel are a necessary part of every completed building. They are necessary for plumbing, heating, ventilating, piping, hardware, and mechanical equipment. The direct and indirect war needs of this country and of our allies for the last six months of the current year already exceed 21,000,000 tons and the country's total output for the first six months was less than 17,000,000 tons. The unavoidable result is that iron and steel can not be used for nonwar or less essential purposes.

b. The United States Fuel Administration, finding that the production of building materials consumed upwards of 30,000,000 tons of fuel per annum, and that there was a shortage in the fuel necessary for our war program, curtailed very materially the fuel allowed for building materials. The continued production of building materials for nonwar and less-essential projects would now necessarily be at the expense of productions which our war program requires.

c. The Railroad Administration finds that 25 per cent of the total tonnage moved by the railroads is building material. It is absolutely essential that the portion of this tonnage which represents materials not needed for war or essential purposes should be displaced by tonnage which is.

Shortage of Labor.

d. The United States Employment Service finds that there is an acute shortage in the labor needed for the war program. It is absolutely essential that labor which may now be idle, or which may be engaged on nonwar or less-essential work, should be employed upon work which will contribute toward winning the war.

It is therefore evident that the building and construction field furnishes an instance calling imperatively for the exercise by the War Industries Board of the duty, with which the President charged it, of conserving the resources and facilities of the country for war purposes, of determining necessary priorities in production and in delivery, of obtaining access to materials in any way preempted, and of anticipating prospective war needs.

It is clear that there is not enough iron, steel, transportation facilities, fuel, and labor to supply the direct and indirect war needs of the country, and the nonwar needs also, and that the resources and facilities used in nonwar and less-essential building projects can only be applied thereto by taking them from the war needs.

Would Postpone End of War.

The inevitable result of this would be failure to supply the war requirements of the country as they are needed. It would mean that nonwar and less-essential needs would be produced at the sacrifice of war needs, with the consequent postponement of the day when the war will end and when American lives will be freed from the hazards of battle.

The attached orders were promulgated by the War Industries Board as a necessary means of avoiding this unhappy result.

These orders were only issued after the nearly six months' warning given by the resolution of March 21, 1918, which is quoted at length in Circular No. 21.

Attention is also called to the fact that before Circular No. 21 was issued numerous conferences were held between the board and the manufacturers of the principal building materials. The latter appreciated fully the situation as briefly outlined above, and heartily agreed to cooperate with the board in carrying into effect the spirit of the resolution of March 21, 1918, and, to that end, to enter into the pledge set forth in Circular No. 21.

Manufacturers in Doubt.

The manufacturers, however, felt that, not having the country's war program before them, it was impossible for them to determine what building projects were essential and what were less essential. They felt that the War Industries Board should determine this question as definitely as possible, and should pass upon doubtful cases for them.

Accordingly, the board did determine what were essential projects, defining them in paragraphs numbered (1) to (5), inclusive, of Circular No. 21, and projects of this character may proceed as therein explained. Other building projects are not prohibited, but may likewise proceed if the local council of national defense, which is primarily the body best fitted to judge, finds them in the public interest or essential, and if this finding is approved by the War Industries Board, building projects which do not measure up to these standards must be deferred until the war program is fulfilled. If they are not, the due fulfillment of the war program will be impossible.

The orders referred to are very much in the interest of the public, because they will prevent the public, including the trade, from planning or undertaking building projects, and then, after plans or commitments have been made, finding that the war program makes it impossible to secure the materials necessary to complete them.

Moreover, the trade itself will find that because of the enormous housing and other construction work which the Government itself is undertaking, a large part of the trade's facilities will simply be transferred to new lines of building activity.

Will Further Curtail Nonwar Work.

Finally the operation of the selective-service acts will, much more than has already been the case, directly affect the amount of labor available for the building trade and for other industries. Even with increased efficiency and female labor, the natural outcome of this condition must be to curtail and reduce the volume of any given business not connected with the war program. As far as it is possible to do so, the less es-

SOLDIERS OF FOREIGN LEGION HERE FROM THE FRENCH FRONT

Veterans of Famous Regiment En Tour to Assist in Fourth Liberty Loan Campaign.

The first detachment of foreign soldiers to come to this country directly from the western front for use in the forthcoming fourth Liberty loan campaign, 12 French officers and 110 of their men, arrived Saturday in Washington from New York. About fifty or sixty members of the detachment belong to the Foreign Legion and are fully equipped. The remainder of the men include wounded soldiers and interpreters.

These men will be used in various parts of the country throughout the campaign, which opens September 28. All of the details regarding their participation in the drive have not been worked out, but it is probable that the Foreign Legion as a body will be sent on a trip through the South as far as New Orleans and north as far as Chicago and then east to New York. The remainder of the party will be divided into small units and sent to different parts of the country.

Carry Original Flag.

Speaking of the detachment, Louis Aubert, director of the information service of the French High Commission to the United States, said:

"The officer in command of the legionaries is Capt. Chastenet de Gery, one of whose legs was amputated as a result of war wounds. Lieuts. Heritier and Ramelet are also with this detachment.

"This unit accompanies the original flag of the 1st Regiment of the Foreign Legion, stationed at Sidi-Bel-Abbes (Province of Oran Algeria).

"During this war the two regiments of the Foreign Legion, considerably increased by voluntary enlistments, many of whom were Americans, were united under this same flag. Soon this flag was mentioned in the dispatches and repeatedly decorated with the palms of the war cross. It was the first flag in the French Army to obtain the Military Medal.

Awarded Many Honors.

"Then it was awarded the Cross of the Legion d'Honneur; these honors gave to its soldiers the glorious right of wearing on their left shoulder the cord, known as "fourragers," at first the colors of the Military Medal (green and yellow) and afterwards of the "Legion d'Honneur" (red). But to-day so many deeds have been performed by the legion that, by a special distinction, its soldiers are allowed to wear the "fourragers tricolors," the colors of the French national emblem.

"Besides the first detachment under arms, there are representatives of about thirty legionaries, all wounded, and under the command of Capt. Prulong and Lieuts. Chapelle and Bourgerasse. The name of legion is famous all over the world; it is looked upon with the greatest admiration and respect by soldiers and civilians alike, in France. Another of its titles to glory is the indignation and hatred which it rouses in every German heart.

"The blood of the legion has crimsoned the soil of every continent. It has fought in Africa, in Tonkin, in Dahomey, in Sudan, in Madagascar, and in Crimea. In 1859 it fought for Italian freedom. In 1870 it dealt the Germans blows which the invaders have not forgiven and will never forget. In this war there is no task to which its 60,000 volunteers of August, 1914, have not proved equal."

Itinerary as Planned.

Following is the itinerary of the 60 members of the legion who will go on tour in behalf of the fourth Liberty loan:

Washington, D. C., September 23.
Cleveland, Ohio, September 24.
Chicago, Ill., September 25.
St. Louis, Mo., September 26.
Kansas City, Mo., September 27.
Oklahoma City, Okla., September 28.
Dallas, Tex., September 29 and 30.
Houston, Tex., October 1.
New Orleans, La., October 2.
Birmingham, Ala., October 3.
Memphis, Tenn., October 4.
Louisville, Ky., October 5 and 6.
Indianapolis, Ind., October 7.
Cincinnati, Ohio, October 8.
Columbus, Ohio, October 9.
Pittsburgh, Pa., October 10.
Harrisburg, Pa., October 11.
New York City, N. Y., October 12 and 13.
Boston, Mass., October 14 and 15.
Hartford, Conn., October 16.
Newark, N. J., October 17.
Philadelphia, Pa., October 18.
Baltimore, Md., October 19.

The other 50 or more members of the detachment will be divided into small units and assigned to war-exhibit trains which are to be used in the different Federal reserve districts during the campaign.

The entire detachment, including officers, was present at the Treasury Department Saturday afternoon, when Secretary McAdoo raised the honor flag of the fourth Liberty loan over the Treasury Building. Saturday night they were the guests of honor at a dinner at the Willard Hotel given by French residents of Washington.

Monday noon they occupied a special gallery in the United States Senate. At 3 p. m., escorted by the Marine Band and a detachment of United States soldiers, they marched from the Liberty Hut to Lafayette Square, where the original flag of the 1st Regiment of the Foreign Legion was unfurled at the base of the Lafayette Monument. President Wilson received the detachment at 5.15.

NINE COAST GUARD MEN PERISH IN ATTEMPTING TO SAVE SHIP

Members of the Crew of U. S. S. Seneca Went to Rescue of Torpedoed British Steamer.

The Navy Department is informed by Admiral Sims that the following-named men of the Coast Guard on the U. S. S *Seneca* lost their lives on September 16 while attempting in a heavy sea to save the British steamer *Wellington*, which had been put in a sinking condition by an enemy torpedo:

Wm. L. Boyce, machinist (first class). Mother, Mrs. Annie Boyce, 227 Duncan Avenue, Jersey City, N. J.
Jas. J. Nevins, boy (first class). Mother, Mrs. Elizabeth Nevins, 10 Sixth Street, Norwich, Conn.
Merton Spellenwerf, seaman. Mother, Mrs. Anna Spellenwerf, 26 Richmond Avenue, Port Richmond, N. Y.
Raymond H. Pingard, fireman. Mother, Mrs. Frida Pingard, 534 Noble Avenue, Bridgeport, Conn.
Wm. H. Prime, seaman. Mother, Mrs. Jessie H. Prime, 75 Locust Hill Avenue, Yonkers, N. Y.
Russell Elam, cook. No next of kin.
August Zuleger, assistant master-at-arms. Father, Frank Zuleger, whereabouts unknown.
Martin M. Ovesen, fireman. Father, Anders Ovesen, Mou Aalberg, Denmark.
Wm. H. Best, water tender. No next of kin. (The body of Best was recovered by a U. S. destroyer.)
Carl S. Newbury, coxswain. Mother, Mrs. Daisy M. Newbury, 37 Chapel Street, New London, Conn.

SPANISH INFLUENZA CASES REPORTED IN FIVE ARMY CAMPS

The War Department authorizes the following statement from the office of the Surgeon General:

Five new camps were reported yesterday as having Spanish influenza. They are Camps Gordon, Syracuse, Humphreys, Merritt, and Lewis. The total number of cases reported from these camps up to noon was 451, as follows:

Camp Gordon	138
Camp Syracuse	64
Camp Humphreys	56
Camp Merritt	182
Camp Lewis	11

Up to noon, 9,313 cases, with 11 deaths, had been reported. The greatest number, 6,583, have been reported from Camp Devens, with 1,211 from Camp Lee, and 602 from Camp Upton.

Forty-three cases of pneumonia were reported yesterday from Camp Devens. It is believed by medical officers that this high figure is the result of the influenza epidemic.

Daily telegraphic reports of the spread of the disease are required now from all camps.

REPLY TO SENATE INQUIRY.

(Continued from page 2.)

sential industries are being converted to more essential activities, but there will be a certain percentage of these industries which can not be so converted. Therefore, the volume of business in the less essentials will be reduced, and with this reduction there will come a corresponding reduction in taxability.

It is not only the policy, it is the clear and simple duty of the War Industries Board to see that the war program of the country is met, and this program must be met now, when its needs are upon us. This duty must be fulfilled, even if its fulfillment entails industrial loss in this country, as it does human loss abroad.

I have the honor to remain,

BERNARD M. BARUCH,
Chairman War Industries Board.

Buy Bonds and Back the Guns that Hit the Huns.

Official U. S. Bulletin

Published Every Week Day, Except Legal Holidays, by the Committee on Public Information.

Office: No. 10 Jackson Place, Washington, D. C. Tel. Main 5600.

Copies of THE OFFICIAL BULLETIN will be furnished without charge to all newspapers and magazines; to every post office in the United States (to be posted daily, for the benefit of the public, under order of the Postmaster General); to officials of the United States Government and all governmental institutions equipped for the dissemination of official news.—EDWARD S. ROCHESTER, *Editor*.

RATES BY MAIL.

Daily	One year	$5.00
	Six months	3.00
	One year, postage prepaid to foreign countries	8.00
	Six months, postage prepaid to foreign countries	4.50

EXECUTIVE ORDER.

I hereby create a Committee on Public Information, to be composed of the Secretary of State, the Secretary of War, the Secretary of the Navy, and a civilian who shall be charged with the executive direction of the committee.

As civilian chairman of the committee I appoint Mr. George Creel.

The Secretary of State, the Secretary of War, and the Secretary of the Navy are authorized each to detail an officer or officers to the work of the committee.

WOODROW WILSON.

April 14, 1917.

American Communiques

American Official Communique No. 129.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 20, 1918.

Section A.—Renewed attempts of the enemy to raid our lines at four points in the Woevre and in the Vosges were repulsed. Aside from artillery activity in the Woevre and in Alsace there is nothing further to report.

American Official Communique No. 130.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 21, 1918.

Section A.—Aside from patrol encounters and increased aviation activity in the Woevre, the day was uneventful in the sectors occupied by our troops.

American Official Communique No. 131.

HEADQUARTERS, AMERICAN EXPEDITIONARY FORCES,
September 22, 1918.

Section A.—In the Woevre our raiding parties penetrated the enemy's line at two points, inflicted numerous casualties and brought back 25 prisoners. A hostile detachment which attempted to reach our positions was repulsed, leaving two of its men in our hands.

The More Bonds the Fewer Casualties.

Definite Program For Using Highways For Transportation After War Closes Is Developed at General Conference

The following is authorized by the Council of National Defense:

A definite program of specific use of the highways in support of both the war plan and the reconstruction policy for post-war times was developed by the Highways Transport Committee of the Council of National Defense in a conference of its 11 regional chairmen, representative of every section of the country, held at Washington, September 17 to 19, inclusive.

Government Officials Attend.

Recognition of the highway's value as a transportation resource was evidenced by the appearance before the committee and its chairmen of Cabinet officers, members of the National Railroad Administration, the Food Administration, the War Industries Board, the National Highways Council, the Electric Railways War Board, the Army, and the United States Senate. President Wilson received the conferees at the White House on the conclusion of the sessions.

Every one of the Governmental agencies whose war work can be effected by the full utilization of highways transport proposed a close cooperation between his own organization and the nation-wide organization which the Highways Transport Committee, under the direction of Roy D. Chapin, chairman, has achieved in the last nine months. All were glad to suggest means of developing this coordination for America's common cause.

Herbert Hoover, Federal Food Administrator, warmly approved the development of the rural express as a means for saving perishable foodstuffs now produced, for stimulating production of more food, for lowering costs of living, and for conserving farming man-power for the soil.

Franklin K. Lane, Secretary of the Interior, tied the highways development into his plan for putting millions of returned soldiers and their families on small farms carved by the Government from great areas of public domain now either unused or in need of reclamation.

Value to Commerce.

William C. Redfield, Secretary of Commerce, told the regional chairmen that he regarded highway, waterway, and railway as a trinity of economic usefulness, incapable of fullest function unless all factors of it were developed efficiently.

Relief for the railways by another of the Highways Transport Committee's projects—the store-door delivery system—was welcomed by Edward Chambers, former vice president of the Santa Fe Railroad, now director of traffic in the National Railroad Administration.

Mark L. Requa, director of the oil division of the Fuel Administration, asked the committee's cooperation in a campaign to promote more efficient operation of all gasoline-powered vehicles and the conservation of fuel through the stopping of wasteful practices and nonessential running.

The Army was represented before the conference by Lieut. Col. W. D. Uhler, Quartermaster Corps, in charge of Army truck-convoy service. Joseph D. Baker, of the War Industries Board's staff, asked chairmen to help make clear to motorists and garage managers the necessity of saving both materials and man power, and suggested ways in which such savings can be effected.

Reports made by the regional chairmen show tonnage moved over the highways increasing at a tremendous rate, in some States as much as 400 per cent increase over last year being shown.

Completing Organization.

The Highways Transport Committee is completing countrywide organization that will number more than 15,000 committeemen, manufacturers, farmers, and consumers, all working through contact with the State Councils of Defense and with the committee's regional chairmen. These chairmen, all but one of whom were at the entire conference, are J. Randolph Coolidge, Jr., of Boston; George H. Pride, New York; C. A. Musselman, Philadelphia; Tom Winn, Atlanta; Harry L. Gordon, Cincinnati; John J. Stockton, Chicago; J. F. Witt, Dallas; Julius H. Meier, Portland, Oreg.; L. A. Nares, Fresno; and Earle Brown, Minneapolis. Mr. Brown, who could not attend, was represented by Messrs. Babcock, chairman of the Minnesota Highways Transport Committee, and Mr. Leach, of Minneapolis.

WAR DEPARTMENT RULES FOR OVERSEAS CHRISTMAS GIFTS

The following statement is issued by the Chief of Staff:

The War Department authorizes relatives or friends of officers and soldiers in France to send Christmas packages, which will be of standard size and weight, one to each individual in the American Expeditionary Forces. A standard container to be used will be 9 by 4 by 3 inches, and the weight limit will be 3 pounds. Standard containers of the size indicated may be had by application to the local Red Cross chapters throughout the country.

In order to insure the arrival of these Christmas packages in France and their distribution to the soldiers by Christmas, all such packages must be mailed on or before November 15, 1918.

In order to insure the limitation of one package per man, which in itself will consume a very large amount of tonnage, a plan has been worked out by which Gen. Pershing is forwarding to the War Department coupons on which are inscribed the correct names and addresses of the members of the American Expeditionary Forces. These coupons will be distributed, and no package will be forwarded without a coupon.

Luxuries as usual means a victorious Germany. Save and buy war-savings stamps.

WORK OF CONGRESS BRIEFLY TOLD

SENATE.

Saturday afternoon the President sent to the Senate the nomination of Victor Murdock, of Kansas, to be a member of the Federal Trade Commission. This is a reappointment, Mr. Murdock now being a member of that commission. Other nominations included that of G. I. Christie, of Indiana, to be Assistant Secretary of Agriculture, and Fred C. Pabst, of Galveston, Tex., to be collector of customs for district No. 22.

Conferees on the bill for Government control over the production and distribution of certain minerals essential in war work reached a full agreement Saturday afternoon. Conferees on the bill to stimulate the sale of liberty bonds, although practically in accord as to the character of the compromise to be reported to their respective Houses, were unable Saturday to get the wording into final shape. It is expected that this will be done to-day and the conference report submitted at once.

HOUSE.

Saturday afternoon the House considered and passed the annual agricultural appropriation bill for the current fiscal year. This was the measure vetoed by the President because it carried a paragraph raising the guaranteed price of wheat above the amount already allowed by law. As repassed the bill had the objectionable feature eliminated.

In a letter to Chairman Sims, of the Interstate Commerce Committee, the President urged passage of the pending emergency power bill before Congress undertakes to put into effect any three-day recess program. Secretary of War Baker, Fuel Administrator Garfield, and Chairman Baruch, of the War Industries Board, have declared this legislation to be absolutely essential to the efficiency of the shipyards and other war work. The bill provides for the construction by the Government, or extension of financial aid, to long-distance power-transmission projects. The plan contemplates the construction of power plants at coal mines and the transmission of the power to the manufacturing cities of the seaboard. A fund of $175,000,000 for this purpose is provided. In urging the adoption of this legislation the President in his letter said:
